C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

DECLARATION—No. 1435J.

The 8th March 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the construction of quarters for the Sub-Inspector of the Asansol police-station, in the village of Asansol, pargana Shergarh, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 3 cottahs of standard measurement, bounded on the north by the Asansol police-station lands, on the west by a tank belonging to Murad Ali Shaikh, and on the south and east by the banks of Nutan Pukhar tank, belonging to Hari Roy and others, is required within the aforesaid village of Asansol.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines or minerals as it may be necessary to dig or carry away or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (I), Act XVIII of 1885, to all whom it may concern.

C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

PROCLAMATION—No. 1466J.

The 9th March 1897.—Under section 15 of Act V of 1861 (as amended by Act VIII of 1895), the Lieutenant-Governor declares that the conduct of the inhabitants of that portion of the villages of Dhaloi, Udalia, Safinagar, and Faradabad, which lies within the jurisdiction of the Hathazari police-station and to the west of the Ramgarh road, in the district of Chittagong, has rendered it expedient to increase the number of the police force by the appointment of an additional force to be quartered therein at the cost of the inhabitants of those portions of the said villages. This proclamation shall remain in force for a period of six months from this date.

C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

A. D. MCARTHUR, *Colonel*, R.E.,
Secy. to the Govt. of Bengal.

RAILWAY DEPARTMENT.

The 9th March 1897.

No. 53.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for staff quarters at Sitarampur, East Indian Railway, in the village of Varrah, pargana Shergarh, zilla Burdwan, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bighas 15 cottahs and 8·88 chitaks of standard measurement (corresponding to 3 roods 26·92 poles), bounded by a nick on the ground, is required within the aforesaid village of Varrah.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

No. 54.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose., viz., for extending the East Indian Railway Company's riverside sidings in the villages of Gopalpur and Moheshpur, parganas Damin-i-koh and Jamui, zilla Southal Parganas, it is hereby declared that for the above purpose a piece of land measuring, more or less, 158 bighas and 13 dhurs of standard measurement, bounded on the north by the river Ganges, on the east by the village of Moheshpur, on the south by the mauzas Gopalpur and Moheshpur, and on the west by the East Indian Railway land, is required within the aforesaid villages of Gopalpur and Moheshpur.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

No. 55.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for the construction of the Rajbari Faridpur Branch line of the Eastern Bengal State Railway system from Pachoorea station on the Eastern Section of the Eastern Bengal State Railway, to the river bank at Faridpur, with necessary stations and works, it is hereby declared that for the above purpose a strip of land about 14·60 miles long, varying from 50 feet to 1,000 feet in breadth, measuring more or less 646 acres of standard measurement, passing through the villages of Pachoorea, Naldubi, Baliakandi, Budhuria, Dasora Bangla, Kaligunga, Bulangho, Dayalhondo, Pangasia, Kholabaria. Baghalpur, Saidpur, Fultolla, Khankhanapur, Aladipur, Madhupur, Nykandi, Joypur, Majlishpur, Bhabanipur, Fatepur, Sibrampur, Rajapur, Koarpur, Machchar Hát, Sovarampur, Alipur, Gopalpur, Lakhimpur and Sadarkhada, parganas Kasimnagar, Amirabad, Dhuldi and Nosebsahi, district Faridpur, is required within the aforesaid villages.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

No. 56.—Declaration.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz. for emigration cooly sheds at Sara station, Northern Section, Eastern Bengal State Railway system, in mauza Bammungaon, pargana Bazooras, zilla Pabna, it is hereby declared that for the above purpose a piece of land measuring more or less 2 acres 3 roods 25 poles of standard measurement, bounded on the north by cultivated land of Ganesh Sirdar and Keshub Sirdar, on the south by cultivated land of Saudagor Paramanick, Keshub Sirdar and Arjaon Sirdar, on the east by cultivated land of Deno Paramanick and Saudagor Paramanick, and on the west by cultivated land by Ganesh Sirdar and temporary land belonging to Eastern Bengal State Railway and Arjaon Sirdar, is required within the aforesaid mauza of Bammungaon.

This declaration is made under the provisions of section 6 of Act I of 1894 to all whom it may concern.

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

The 3rd March 1897.

No. 56 Marine.—Mr. J. D. D. Kirkman, Senior Master Pilot, is granted, under article 746 (*a*) of the Civil Service Regulations, privilege leave for two months and ten days, with effect from the 23rd February 1897.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

The 3rd March 1897.

No. 57 Marine.—The following telegram, dated the 24th February 1897, from the Secretary of State, London, relative to the enforcement of restrictions by the authorities at Roumania and Bulgaria on account of the plague, is published for general information.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

Copy of a telegram, dated the 24th February 1897, from the Secretary of State, London, to the Viceroy, Calcutta.

Roumania. Importation of all animal products from India forbidden. Bulgaria. Importation of all merchandize from India, Beluchistan, Afghanistan, Persian Gulf forbidden. All Bulgarian Black Sea ports closed against India unless vessel quarantined in Ottoman lazaret and against vessels with sickness. Varna and Bourgas open in certain cases after satisfactory medical inspection. Change of ship *en route* from infected port does not secure more favourable treatment.

The 9th March 1897.

No. 58 Marine.—The following communication No. 56, dated the 18th February 1897, and enclosure, from the Political Agent and Her Britannic Majesty's Consul at Muscat, relative to the enforcement of quarantine regulations, are published for general information.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

No. 56, dated Muscat, the 18th February 1897.

From—CAPTAIN F. G. BEVILLE, I.S.C., Political Agent and Her Britannic Majesty's Consul, Muscat,

To—The Secretary to the Government of India, Foreign Department.

I HAVE been directed by the Resident, Persian Gulf, to report to you, with reference to your telegram to his address of the 12th instant, in regard to the quarantine regulations in force in Muscat and Gwadur.

I have the honour to state that on the 13th January 1897, at the request of the Sultan of Muscat, rules for the imposition of quarantine against arrivals from infected Indian ports were drawn up by myself and the Consular representatives of France and the United States, together with an official representative of the Local Government. These rules, a copy of which is attached, after approval by the Agency Surgeon and by the Political Resident, who was here at the time, were submitted to the Local Government and were thereupon promulgated.

Subsequently the Sultan considered it advisable as a further precaution to prohibit the discharge of cargo by coolies from the shore, and orders were issued that cargo must be worked by the ships' crew, and loaded into lighters alongside.

Under the instructions I have now received from the Resident, I have again consulted the Agency Surgeon as to the possibility of allowing coolies to work the cargo on board vessels, provided such vessels have been found after medical examination to have, or have had, no suspicious case or death on board. In reply the Agency Surgeon has stated as his opinion that such would not involve any risk, and I have therefore suggested to the Sultan that such might be allowed. His Highness, however, declines to agree to this proposal, stating that by such arrangement the quarantine will be a farce.

The period of nine days' quarantine on passengers was decided upon by the Committee, who overruled the Agency Surgeon's opinion that such was too short a period. The Committee's opinion was based on the rules then generally in force at other ports, and of the general rules laid down by the last International Sanitary Conference. In view, however, of the opinion of the medical authorities in India, as communicated in your telegram to the Resident in the Persian Gulf, I have suggested to the Sultan the advisability of extending this period to ten days.

In conclusion, I have to state that the same rules are in force at Gwadur as at Muscat.

Quarantine Regulations at Muscat and Gwadur.

ALL vessels arriving from an Indian port will be held in quarantine and will be visited by a medical officer, who will, if there is a ship's doctor, take his report on the ship's health.

If there has been no case of plague or suspicious case during the voyage, the vessel will have pratique and cargo may then be landed in the ordinary manner, with the exception that under no circumstances may rags or cotton waste be landed.

In the event of any other goods being considered susceptible of carrying the infection, orders will be issued prohibiting their import.

(The Customs House officers will be held responsible that an immediate report of any rags or waste being fraudulently or inadvertently landed is reported to the Local Government, who will order the destruction of such goods.)

Should any case of plague or suspicious case have occurred during the voyage, no communication whatsoever will be allowed with the shore except for the purpose of landing mails.

In the event of pratique being given and there being any passengers for Muscat, they will be landed, under supervision, at Haramil, where they will be detained for a period of nine days since the departure from the last infected port.

Should any case occur whilst in the lazaretto, the case will be segregated and the passengers will be required to undergo a further detention of nine days since the case occurred.

No person other than passengers who go to the lazaretto will be permitted to land.

The effects of passengers landing at the lazaretto to be disinfected on landing, and if any case occurs, all effects to be again disinfected.

Each passenger on landing to pay a quarantine fee of Rs. 5.

The 9th March 1897.

No. 59 Marine.—The following telegrams dated the 12th, 25th and 27th February, from Her Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of Persia, Government of India, Foreign Department, and the Political Resident in the Persian Gulf, and telegrams dated 1st and 2nd March 1897, from the Secretary of State, London, regarding the enforcement of quarantine regulations, are published for general information.

A. D. MCARTHUR, *Col*, R.E.,
Secy. to the Govt. of Bengal.

Copy of a telegram No. 8, dated the 12th February 1897, from Her Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary at the Court of Persia, Teheran, to the Secretary to the Government of India, Foreign Department.

Following quarantine regulations now in force in Persian Gulf. Absolute exclusion except for mails, of vessels with plague or under suspicion. Five days' quarantine for passengers and cargo on healthy vessels at Bushire, seven days for ports nearer India. All dangerous cargo on healthy ships strictly prohibited. Fifteen days' quarantine established on eastern frontier of Persia against Afghanistan and Baluchistan.

Copy of a telegram No. 763I.A., dated the 25th February 1897, from the Secretary to the Government of India, Foreign Department, to Her Britannic Majesty's Chargé d'Affaires, Teheran.

Your telegram 12th February. Please specify cargo classed as dangerous, so that we can inform merchants.

Copy of a telegram dated the 27th February 1897, from the Political Resident in the Persian Gulf, to the Secretary to the Government of India, Foreign Department.

Razais, mattresses, blankets, skins, rags, cotton waste and second-hand clothing classed, dangerous cargo.

Copy of a telegram, dated 1st March 1897, from the Secretary of State, London, to the Viceroy, Calcutta.

Spain. My telegram of 22nd February last. Prohibition to import articles named only applies to Bombay. Arrivals from other Indian ports three days' observation.

Copy of a telegram, dated the 2nd March 1897, from the Secretary of State for India, to the Viceroy of India.

Portugal. My telegram of 20th February last. Quarantine regulations extend to vessels calling at Arabian ports.

The 9th March 1897.

No. 60Marine.—In accordance with the provisions of rule 15, clause (4) of the notification of this Department, No. 62Marine, dated the 21st May 1895, as amended by notification No. 55Marine, dated the 2nd March 1897, the Lieutenant-Governor is pleased to appoint Mr. Graham Robertson, Engineer and Shipwright Surveyor to this Government, to grant certificates of fitness to vessels intended for the carriage of petroleum other than dangerous petroleum in bulk on inland waters.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

The 9th March 1897.

No. 61Marine.—The following telegram, dated the 5th March 1897, from Her Majesty's Secretary of State for India, regarding the enforcement of Quarantine Rules by the authorities at Spain and France, is published for general information.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

Bubonic Plague.

Telegram, dated 5th March 1897.

From—The Secretary of State, London,
To—The Viceroy, Calcutta.

Spain.—Fortnight quarantine passengers from Bombay; more if illness on board.
France.—Prohibition to import certain goods applies equally to arrivals from all Indian ports infected at the time of vessel's departure.

The following rules for regulating the transport of explosives in the Port of Calcutta, which have been made under paragraph 22 of the Notification of the Government of Bengal in the Marine Department, No. 227Marine, dated the 3rd September 1890, are published for general information.

In these rules the term "explosives" is intended to apply only to the classes of explosives noted below, as laid down in the rules prescribed in the Notification of the Government of India, Home Department, No. 1417, dated the 24th June 1887 :—

Class 2.—Nitrate mixture.
„ 3.—Nitro compound.
„ 4.—Chlorate mixture.
„ 5.—Fulminate.

1. No explosives shall be transported through the Port of Calcutta unless covered by a special pass from the Commissioner of Police in addition to the import license.

2. Applications for special passes must be made in writing. They must specify the nature of the explosive, number of cases, the total weight of the explosive, the number of boats required in the transport, and the exact day and hour at which the boats will arrive at Garden House.

3. Every application for a special pass must be accompanied by a copy of a certificate from an officer of the Port Commissioners, certifying that the boat in which the explosives are conveyed through the port complies with the requirements of clauses VI and VII of Rule 4 of the rules to regulate the transport and importation of explosives published in Government of India's Notification No. 1417, dated 24th June 1887.

4. Every boat conveying explosives through the port shall display a red flag 4 feet by 3 feet, hoisted 5 feet above the deck.

5. No boat conveying explosives shall proceed above Garden House unless accompanied by a police boat.

6. All boats containing explosives for transport through the port shall be taken in tow by a steam vessel at Moyapore, and be towed from thence to the northern limits of the port or at Cossipore and be towed to Budge-Budge.

7. No steam-vessel shall have in tow more than two boats containing explosives.

8. Steam-vessels towing boats containing explosives shall pass through the Howrah Bridge only at slack water or against the current.

9. Steam-vessels towing boats containing explosives shall not approach within 400 yards of each other.

10. Boats containing explosives shall not anchor or make fast to any boat or buoy or for any time remain stationery in the port.

11. No fires or lights of any description shall be used on board boats containing explosives.

12. Each consignment of explosives passing through the port will be accompanied by by a police boat.

J. LAMBERT,
Commissioner of Police, Calcutta.

SUBORDINATE CIVIL SERVICE.

No. 1808A.

No. 1753A.—The 6th March 1897.—Babu Hemanto Kumar Moitro, substantive *pro tempore* Sub-Deputy Collector, Jessore, is transferred to the Magura subdivision of that district.

No. 1760A.—The 8th March 1897.—Babu Komul Narain Chuckerbutty, Sub-Deputy Collector, Chandpur, Tippera, is transferred temporarily to the Brahmanbaria subdivision of that district, and is vested with the powers of a Magistrate of the second class.

This cancels the order of the 2nd March 1897, published in the *Calcutta Gazette* of the 3rd idem, transferring Babu Ramesh Chandra Sinha, substantive *pro tempore* Sub-Deputy Collector, to the Brahmanbaria subdivision of the district of Tippera.

No. 1780A.—The 9th March 1897.—Maulvi Syed A. M. Abul Barkaat, substantive *pro tempore* Sub-Deputy Magistrate, Giridih, Hazaribagh, is vested with the powers of a Magistrate of the second class.

No. 1789A.—The 9th March 1897.—Maulvi Syed Tajammul Ali, substantive *pro tempore* Sub-Deputy Collector, is posted to the head-quarters station of the district of Cuttack.

This cancels so much of the order of the 23rd February 1897 as relates to the posting of Maulvi Syed Tajammul Ali to the Giridih subdivision of the district of Hazaribagh.

No. 1793A.—The 9th March 1897.—Babu Girish Chandra Das Gupta, substantive *pro tempore* Sub-Deputy Collector, Cuttack, is transferred to the Giridih subdivision of the district of Hazaribagh.

No. 1797A.—The 9th March 1897.—Maulvi Syed A. M. Abul Barkaat, substantive *pro tempore* Sub-Deputy Collector, Giridih, Hazaribagh, is allowed leave for two months, under article 369-1 of the Civil Service Regulations, with effect from the 18th February 1897.

C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

REGISTRATION DEPARTMENT.

NOTIFICATION—No. 769P.

The 9th March 1897.—In modification of the notification No. 334P.D., dated the 10th October 1896, the Lieutenant-Governor sanctions the location, at Tengra instead of at Rangafulla, of the head-quarters of the office of the Joint-Sub-Registrar of Sultanpur, in the subdivision of Diamond Harbour, in the district of the 24-Parganas.

C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 779P.

The 9th March 1897.—Under the provisions of section 7 of the Indian Registration Act III of 1877, the Lieutenant-Governor sanctions, as an experimental measure for one year, the establishment of offices of Joint-Sub-Registrars at the following places in the district of Tippera:—

(1) At Dhalua, having concurrent jurisdiction with the Sub-Registrar of Chaudagram in the Sadar subdivision of the district.
(2) At Batakandi, having concurrent jurisdiction with the Sub-Registrar of Daudkandi, in the Sadar subdivision of the district.
(3) At Bangordah, having concurrent jurisdiction with the Sub-Registrar of Laksam, in the Sadar subdivision of the district.
(4) At Ramchandrapur, having concurrent jurisdiction with the Sub-Registrar of Moradnagar, in the Sadar subdivision of the district.
(5) At Sorail, having concurrent jurisdiction with the Sub-Registrar of Brahmanbaria, in the Brahmanbaria subdivision of the district.

This notification will take effect on and from the 1st April 1897.

C. W. BOLTON.
Chief Secy. to the Govt. of Bengal.

NOTIFICATION—No. 796P.

The 9th March 1897.—In modification of the notification No. 1641P., dated the 28th May 1895, published at page 544, Part I, of the *Calcutta Gazette* of the 29th idem, the Lieutenant-Governor directs that the office of Joint Sub-Registrar at Harisankarpur, which at present has concurrent jurisdiction with the Sub-Registrar of Jhenidah, in the subdivision of Jhenidah, in the district of Jessore, will henceforth have concurrent jurisdiction with the Sub-Registrar of Sailkopa in the same subdivision.

This Notification will have effect on and from the 1st April 1897.

C. W. BOLTON,
Chief Secy. to the Govt. of Bengal.

No. 761P.—The 9th March 1897.—Maulvi Arefur Rahman is appointed to be Rural Sub-Registrar of Nabinagar, in the district of Tippera.

C. A. MARTIN,
Director of Public Instruction, Bengal.

NOTIFICATION.

AN examination of candidates for English Teachership Certificates of the first, second, and third grade will be held in the Training Schools at Calcutta, Hooghly, Dacca, Patna, and Cuttack on Monday, the 19th April 1897, and two following days. The examination will be both oral and written. The written examination will comprise the following subjects:—

I.	Art of Teaching ...	Two papers (3 hours allowed for each)	150 marks.
II.	Discipline ...	One paper (4 hours)	100 do.
III.	Organisation, &c....	One do. (4 do.)	100 do.

2. Candidates will also be subjected to a practical examination in class-teaching and in notes of lessons, the necessary arrangements for which will be made by the Circle Inspector. One hundred marks will be assigned to it. In the case of a candidate who is a teacher, the Inspector may, at his discretion, conduct the practical examination at the teacher's own school.

3. Deputy Inspectors of Schools are requested to invite out-candidates to appear at the examination, and to furnish, not later than 25th March 1897, their names and other particulars to the Head Master of the Training School in which they wish to be examined. A consolidated list of all the candidates arranged according to the grade of certificates for which they are applicants should be forwarded to the Director of Public Instruction by the Head Master of each of the Training Schools on or before the 31st idem.

4. By out-candidates are to be understood (*a*) those who have passed the B. A. Examination, who may be admitted for examination as candidates for first grade certificates, (*b*) those who have passed the F. A. Examination, and (*c*) those who passed the Entrance Examination, for second and third grade certificates respectively. In the cases of out-candidates (*b*) and (*c*), it is necessary that they should have served with credit as teachers for three years or upwards.

5. The examination of candidates for certificates of different grades will be the same: the grade of certificate depending upon the University qualifications of the candidate.

6. The practical portion of the examination may be conducted by Inspectors of Schools any time between the 25th March and the 15th May 1897.

7. Candidates gaining 50 per cent. of the marks and upwards in each of the subjects, both oral and written, will be declared to have passed, and will be furnished with certificates under the signature of the Director of Public Instruction.

8. Further particulars will be issued hereafter.

N B.—In this connection, the attention of Circle Inspectors is drawn to this office notification forwarded with Circular No. 41, dated 7th April 1896.

C. A. MARTIN,

The 9th March 1897. *Director of Public Instruction, Bengal.*

NOTIFICATIONS OF THE BOARD OF REVENUE.

No. 840B.

NOTICE is hereby given that the Fourth Sale of Opium, the provision of 1895-96, will be held at the Government Opium Sale-room, No. 2, Bankshall Street, on Thursday, the 1st April 1897, at 11 A.M., and will comprise 3,250 chests, viz.—

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

NOTIFICATION.

No. 1235L.S.-G.—The 5th March 1897.—It is hereby notified that, under section 19 of the Bengal Local Self-Government Act III of 1885, the Lieutenant-Governor is pleased to appoint Mr. J. B. Rutherford to be a member of the Chapra Local Board, in the district of Saran, *vice* Mr. S. W. Ayers, deceased.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1237M.—The 4th March 1897.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power conferred on him by section 290 of the Bengal Municipal Act III of 1884, as amended by Bengal Act IV of 1894, to make the following rules and to impose the following conditions, subject to which the Commissioners of the Burdwan Municipality may allow the owners and occupiers of holdings paying a water-rate to lay down communication pipes from the service pipes of the Commissioners for the purpose of leading water to their premises for domestic purposes, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the aforesaid Municipality :—

I. That house-connection shall not be allowed to such holdings as have no masonry house in them.

A "*masonry house*" is a house built of bricks and having a masonry roof. A holding containing one or more masonry houses and also *kutcha houses* shall be deemed to be a masonry house, if the main dwelling house be a masonry one. The tap in such a case must be placed in the masonry house.

II. That house-connections shall not be allowed to a holding of which the annual valuation is less than Rs. 60.

III. That the dimension of pipes, &c., number of taps and number and dimension of vats shall be fixed according to the annual valuation of the holdings as follows:—

Annual valuation of holdings.

Exceeding	Not exceeding	No. of vats with dimension.	No. of taps.	Size of ferrule.	Dimension of pipe and stop-cocks.	Size of bib-cocks.
1	2	3	4	5	6	7
Rs.				Inch.	Inch.	Inch.
59	150	1 of 8 c. ft.	2	$\frac{1}{8}$	$\frac{1}{2}$	$\frac{1}{2}$
150	450	Ditto.	2	$\frac{5}{16}$	$\frac{1}{2}$	$\frac{1}{2}$
450	1,500	2 of 8 c. ft.	3	$\frac{1}{4}$	$\frac{1}{2}$	$\frac{1}{2}$
1,500	3,000	Ditto.	3	$\frac{5}{16}$	$\frac{1}{2}$	$\frac{1}{2}$
3,000	6,000	2 of 12 c. ft.	4	$\frac{3}{8}$	1	$\frac{1}{2}$
6,000	.....	Ditto.	4	$\frac{1}{2}$	1	$\frac{1}{2}$

IV. That an application for a house-connection shall be made by the owner or the occupier paying the water-rate thereof in writing in the form hereto annexed signed by the person requiring the same. In the case of an illiterate person it shall bear his seal or mark.

V. That no bye-connection shall be allowed, nor shall there be more than one connection with the main for one holding.

A bye-connection means an extension from the communication pipe of one holding to another.

VI. That the pipes shall be galvanised inside and outside, and they and the fittings shall be of such quality as shall be approved by the Commissioners.

VII. That the repairs, alterations, removal or extension of all communication pipes and fittings are to be undertaken with the permission of the Commissioners and under the inspection and direction of the officer authorised by them in that behalf, and not otherwise.

VIII. That the fees for inspection are to be paid at the time of making the application for house-connection or for repairs, &c., before commencing the same, according to the scale fixed by the Municipal Commissioners at a meeting.

IX. That the taps may be placed on the second story or upwards at the responsibility of the applicant.

FORM OF APPLICATION FOR HOUSE-CONNECTION.

I. Name of the Municipality.
II. Name of the applicant and his parentage.
III $\frac{\text{Owner}}{\text{Occupier}}$ of holding No. situate at street.
IV. (*a*) Annual valuation of the holding.
(*b*) Number of persons living permanently in the holding.

V. I declare that Part VII of the Bengal Municipal Act, the rules and conditions imposed by the Local Government under section 290 of the said Act, as also the resolution of the Municipal Commissioners passed at a meeting held on relating to house-connections, have been read out $\frac{\text{by}}{\text{to}}$ me, and that I understand their contents, and that having done so, I agree to take the connection (*a*) for domestic, (*b*) ornamental, or (*c*) business purpose in my said holding under the rules, &c., referred to above or which may be made subsequently, and that these will be binding upon me, my heirs and successors generally, that I shall get the connection, repair, extension and removal effected either by an authorised plumber or by the Municipal servants, as the Chairman will direct, and that if the valuation of the holding be hereafter altered, I shall get the size of the ferrules, &c., regulated at my own expense according to the new valuation.

Signature of the applicant with date.

Signed in our presence.
1. ... ...
2. ... ...
} *Witnesses.*

Report of the officer in charge of the water-works—
(*a*) as to the materials;
(*b*) as to labour;
(*c*) as to time when and within which the connection, &c., to be commenced and finished;
(*d*) fee, &c., to be charged from the applicant.

Certificate of the Cashier that the fee, &c., reported by the officer in chargo of the water-works chargeable from the applicant has been credited to the Municipal Fund.

Order of the Chairman.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1292M.—The 9th March 1897.—It is hereby notified for general information that the Lieutenant-Governor intends to confirm, under clause 4, section 3 of Act XX of 1887, the following rules framed by the Commissioners of the Serampore Municipality, in the district of Hooghly, under section 3 of the Act, for the protection of wild birds and game

within the limits of the above municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the said municipality:—

RULES.

I. "Wild bird" for the purpose of these rules shall include jungle-fowl, pea-fowl, pheasants, partridges, quail, snipe, plover, wild duck, teal and ortolans.

II. The Local Government having by notification No. 1294M., dated 9th March 1897, declared that the provisions of section 3, Act XX of 1887, shall apply to hares and deer, the following rules will apply to those animals also, as well as to wild birds.

III. The breeding season for the purposes of these rules shall extend from the 15th March to the 15th August.

IV. Whoever during the breeding season has in his possession in Serampore any wild bird, deer or hare recently killed, or exposes for sale any such bird or animal, living or dead, shall be liable to a fine not exceeding Rs. 5 for each bird or animal.

V. Whoever during the breeding season imports into the town the plumage of any kind of wild bird recently killed or taken, or the fur or skin of any hare or deer recently killed or taken, shall be liable to a fine not exceeding Rs. 5 for each bird or animal.

VI. In the case of a second conviction the fine may extend to Rs. 10 for each bird or animal.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1294M.—The 9th March 1897.—It is hereby notified for general information that, on the application of the Commissioners of the Serampore Municipality, in the district of Hooghly, the Lieutenant-Governor is pleased to declare that the provisions of section 3 of Act XX of 1887 with respect to wild birds shall apply, so far as regards the rules framed by the Municipal Commissioners of Serampore, to deer and hares.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1295M.—The 9th March 1897.—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power vested in the Local Government by section 221 of the Bengal Municipal Act III of 1884, as amended by Acts IV of 1894 and II of 1896, and in accordance with the recommendation of the Commissioners of the Jhalokati Municipality, in the district of Backergunge, made at a meeting, to extend the provisions of Part IX of the said Act to the above Municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the Municipality.

Hooghly Collectorate, the 17th February 1897. D. B. ALLEN, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Burdwan, will be put up to sale at the Burdwan Collectorate on the 29th March 1897, corresponding with the 17th Chaitra 1303.

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchasers of the estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them as revenue free or subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate again to be put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Patna Collectorate, Bankipore, the 23rd February 1897. R. A. N. SINGH, for Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Puri will be put up to sale at the Puri Collectorate on the 28th of April 1897, corresponding with 17th Bysack 1304 Umli :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Price Rs. 20 for 1895-96 Published at the Calcutta Custom House. Previous years' volumes can also be obtained at the same price

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series *including postage*, Rs. 22-8.

	Without postage.	With postage.

Obtainable at the Bengal Secretariat Book Depôt, Writers Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice.

IT is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed:

1st.—Bay of Bengal Daily Weather Report, giving meteorological observations taken at 28 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by peon in Calcutta soon after 11 A.M. Price to subscribers in Calcutta Rs. 2 per mensem, payable in advance up to 30th April 1897.

This report will be issued every year from 1st November to 30th April. From 1st May again the Bay of Bengal and Bengal Report containing observations taken at 64 stations will be issued.

2nd.—A Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 327 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Re. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

C. LITTLE,

Meteorological Reporter to the Govt. of Bengal.

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depôt except *for* Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices and for those frowarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

☞ Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at the Bengal Secretariat Book Depôt.

PART IV.

Bills of the Bengal Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

THE following draft Bill for the suppression of rain-gambling, with Statement of Objects and Reasons, is published by order of the Lieutenant-Governor under Rule 34 of the Rules for the conduct of Legislative Business in the Bengal Council.

A Draft Bill for the suppression of Rain-gambling.

WHEREAS it is expedient to amend the law in force in Bengal so as to secure the suppression of the practice of rain-gambling;

It is hereby enacted as follows:—

Short title and commencement.

1. (*1*) This Act may be called the Bengal Rain-gambling Act, 1897; and

(*2*) It shall come into force on the day on which it is first published in the Calcutta Gazette with the assent of the Governor-General thereto.

(*3*) Section 4 shall further be deemed to be in force on and from the said day in every city, town or place to which Bengal Act II of 1867 (*An Act to provide for the punishment of public gambling and the keeping of common gaming-houses in the territories subject to the Lieutenant-Governor of Bengal*), or any part thereof, has before that day been extended by notification under its second section.

Amendment of Bengal Act IV, 1866, section 3.

2. (*1*) To the definition of "common gaming-house" in section 3 of the Calcutta Police Act, 1866, the following shall be added, namely:— Ben. IV of 1866.

"or in which the form of wagering called rain-gambling is carried on for the profit or gain of any such person as aforesaid."

(2) After the said definition the following shall be inserted, namely :—

"'gaming' shall include rain-gambling; Cf. Bombay Act I, 1890.

'instruments of gaming' shall include books or registers in which rain-gambling wagers are entered, and all documents containing evidence of such wagers."

Amendment of Act XXI, 1857, section 59.

3. To section 59 of Act XXI of 1857 (*An Act to make better provision for the order and good government of the station of Howrah*) the following shall be added, namely :—

"'common gaming-house' shall include any house, tent, room, space or walled enclosure in which the form of wagering called rain-gambling is carried on for the profit or gain of the person owning, occupying, using or keeping such house, tent, room, space or enclosure;

'gaming' shall include rain-gambling; and

'instruments of gaming' shall include books or registers in which rain-gambling wagers are entered, and all documents containing evidence of such wagers."

Amendment of Bengal Act II, 1867, section 1.

4. (1) To the definition of "common gaming-house" in section 1 of Bengal Act II of 1867 (*An Act to provide for the punishment of public gambling and the keeping of common gaming-houses in the territories subject to the Lieutenant-Governor of Bengal*) the following shall be added, namely :—

"or in which the form of wagering called rain-gambling is carried on for the profit or gain of any such person as aforesaid."

(2) After the said definition the following shall be inserted, namely :—

"'gaming' shall include rain-gambling; Cf. Bombay Act I, 1890.

'instruments of gaming' shall include books or registers in which rain-gambling wagers are entered, and all documents containing evidence of such wagers."

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to suppress the practice of rain-gambling, which has assumed such proportions in Calcutta as to become a public nuisance. It is sought to attain this object by amending the Calcutta Police Act so as to make the gaming clauses of the Act applicable to rain-gambling. Corresponding amendments are proposed in the Acts under which public gambling is repressed in Howrah and the mufassal (viz., Act XXI of 1857 and Bengal Act II of 1867), in order to prevent the evil from spreading to other centres.

The proposed legislation is supported by the Calcutta Municipal Corporation, the Indian Association, the Central National Muhammadan Association, and the Muhammadan Literary Society of Calcutta, and there is precedent for it in Bombay Act I of 1890, which was passed for the purpose of suppressing rain-gambling and has, it is understood, had the desired effect.

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 4th March, 1897, and is hereby promulgated for general information.—

ACT NO. VI OF 1897.

An Act to amend the Negotiable Instruments Act, 1881.

XXVI of 1881

WHEREAS it is expedient to amend the Negotiable Instruments Act, 1881; It is hereby enacted as follows:—

Short title and commencement.

1. (*1*) This Act may be called the Negotiable Instruments Act Amendment Act, 1897; and

(*2*) It shall come into force at once.

Amendment of section 72, Act XXVI of 1881.

2. To section 72 of the said Act the following words shall be prefixed, namely, "Subject to the provisions of section 84".

Substitution of new section for section 84, Act XXVI of 1881.

3. For section 84 of the said Act the following section shall be substituted, namely:—

When cheque not duly presented and drawer damaged thereby.

"84. (*1*) Where a cheque is not presented for payment within a reasonable time of its issue, and the drawer or person on whose account it is drawn had the right, at the time when presentment ought to have been made, as between himself and the banker, to have the cheque paid and suffers actual damage through the delay, he is discharged to the extent of such damage, that is to say, to the extent to which such drawer or person is a creditor of the banker to a larger amount than he would have been if such cheque had been paid.

(*2*) In determining what is a reasonable time, regard shall be had to the nature of the instrument, the usage of trade and of bankers, and the facts of the particular case.

(*3*) The holder of the cheque as to which such drawer or person is so discharged shall be a creditor, in lieu of such drawer or person, of such banker to the extent of such discharge and entitled to recover the amount from him.

Illustrations.

(*a*) A draws a cheque for Rs. 1,000, and, when the cheque ought to be presented, has funds at the bank to meet it. The bank fails before the cheque is presented. The drawer is discharged, but the holder can prove against the bank for the amount of the cheque.

(*b*) A draws a cheque at Umballa on a bank in Calcutta. The bank fails before the cheque could be presented in ordinary course. A is not discharged, for he has not suffered actual damage through any delay in presenting the cheque.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 4th March, 1897, and is hereby promulgated for general information :—

ACT NO. VII OF 1897.

An Act to amend the Indian Emigration Act, 1883.

WHEREAS it is expedient to amend the Indian Emigration Act, 1883 ; It is hereby enacted as follows :— XXI of 1883.

Short title and commencement.

1. (*1*) This Act may be called the Indian Emigration Act Amendment Act, 1897 ; and

(*2*) It shall come into force at once.

Amendment of section 102, Act XXI, 1883.

2. In section 102 of the Indian Emigration Act, 1883, as amended by Act No. XVIII of 1890, section 7, for the words "British colony or possession", wherever they occur, the word "country", and for the words "State, colony or possession", wherever they occur, the words "State or country", shall be substituted. XXI of 1883.

PART VI.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th March, 1897 :—

No. 7 OF 1897.

A Bill to amend the Indian Stamp Act, 1897.

WHEREAS it is expedient to amend the Indian Stamp Act, 1879; It is hereby enacted as follows :— I of 1879.

1. After section 7A of the Indian Stamp Act, 1879, as amended by Act No. VI of 1894, section 2, the following section shall be added, namely :— I of 1879.

Addition of new section after section 7A, Act I, 1879.

"7B. (*1*) Notwithstanding anything in this Act, any local authority raising a loan under the provisions of the Local Authorities Loan Act, 1879, or of any other law for the time being in force, by the issue of bonds, debentures or other certificates, shall, in respect of such loan, be chargeable with a duty of eight annas per centum on the total amount of the bonds, debentures or other certificates issued by it, and such bonds, debentures or other certificates need not be stamped and shall not be chargeable with any further duty on renewal, consolidation, sub-division or otherwise. XI of 1879.

Bonds, debentures or other certificates issued on loans under Act XI, 1879.

"(*2*) The provisions of sub-section (*1*) exempting certain bonds, debentures or other certificates from being stamped and from being chargeable with certain further duty shall apply to the bonds, debentures or other certificates of all outstanding loans of the kind mentioned therein, and all such bonds, debentures or other certificates shall be valid, whether the same are stamped or not :

"Provided that nothing herein contained shall exempt the local authority which has issued such bonds, debentures or other certificates from the duty chargeable in respect thereof under the Indian Stamp Act, 1879, prior to its amendment by this Act, when such duty has not already been paid or remitted by order issued under that Act." I of 1879.

2. In Schedule I, No. 60, of the said Act, the word "Lease" wherever it occurs, is hereby repealed ; and after the said No. 60 the following shall be added, namely :—

Amendment of No. 60 and addition of new No. 60A in Schedule I, Act I of 1879.

"60A.	**TRANSFER OF LEASE** by way of assignment and not by way of under-lease.	The same duty as a Conveyance (No. 21).

STATEMENT OF OBJECTS AND REASONS.

THIS Bill contemplates two small, but by no means unimportant, amendments in the Stamp Law, and it is, in the opinion of the Government of India, very desirable that they should be given effect to without delay.

2. The first clause purports to add a new section to the Indian Stamp Act, 1879, providing that the bonds or debentures issued by a local authority need not be separately stamped, either in the first instance or on renewal, subdivision, consolidation or otherwise, but that all that is necessary is for the local authority concerned to pay once for all the *ad valorem* stamp duty (eight annas per cent.) chargeable on the total amount covered by the bonds or debentures. It is further proposed to apply the same provisions to bonds or debentures already issued in respect of outstanding loans raised by local authorities, on the understanding that the full duty leviable under the Act as it now stands shall have been either paid or remitted by an order issued under section 8.

3. The object of the remaining clause is to remove a flaw in Act I of 1879, which has probably resulted in the loss of a considerable amount of stamp-revenue. The assignment of a lease is at present chargeable with the low rate of duty fixed by No. 60 in Schedule I to the Act, and this provision enables conveyances of large and valuable lease-hold estates to be transferred with a merely nominal stamp-duty. It is proposed to add to the schedule a separate No. (60A) expressly providing for this, the references to leases in No. 60 being at the same time repealed.

J. WESTLAND.

The 2nd March, 1897.

J. M. MACPHERSON,
Secretary to the Government of India.

NOTICE TO MARINERS—No. 35.

[Second Publication.]

SOUTH PACIFIC OCEAN—ROTUMAH ISLAND.

Search for dangers reported near that island.

THE British Admiralty has given notice (No. 63 of 1897), that information has been received from Captain A. M. Field, H. M. Surveying Vessel *Penguin*, that he has recently searched unsuccessfully for the undermentioned reported dangers :—

1. Shoal reported west of Rotumah island in lat. 12° 31′ S., long. 176° 41′ E. :—

This shoal, on which the natives of Rotumah were said to fish, was searched for in vain, depths of 1,700 to 1,800 fathoms being found in the locality.

From enquiries made of the natives on Rotumah it is believed no such shoal exists as they knew nothing of it, and moreover would be most unlikely to fish on a bank so far to leeward of the island.

It was probably an exaggerated account of the shallow water stretching off the south-west part of the island, and has therefore been expunged from the Admiralty charts.

2. Eagleston reef, reported as being in lat. 12° 20′ S., long. 177° 50′ E., was searched for without any indication being found of the existence of a shoal in the locality, the depths near its supposed position being from 1,650 to 1,900 fathoms.

If a shoal exists it must be eastward of the meridian of 178° 10′ E.

The position of this shoal on the Admiralty chart has consequently been transferred to lat. 12° 20′ S., long. 178° 15′ E., with P.D. placed against it.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 36.

[Second Publication.]

NEW ZEALAND, North island.

Unsuccessful search for Vision rock.

The British Admiralty has given notice (No. 64 of 1897) that information has been received from Captain A. M. Field, H.M. Surveying Vessel *Penguin*, dated 4th December 1896, of an unsuccessful search for Vision rock, reported in 1885, as situated about 15 miles, E. by S., from the northern of the Tawhiti Rahi (Poor Knights), or approximately in lat. 35° 35½′ S., long. 175° 1½′ E.

The rock has already been searched for unsuccessfully on several occasions by the New Zealand Government steam-vessel *Stella*.

Captain Field reports that the *Penguin* sounded over an area of 120 square miles in the reported locality of Vision rock, and found no indication of a danger, the least depth obtained being 160 fathoms, amongst general depths of 180 fathoms.

The weather was very favourable for the search, and the light so good that it is most probable any danger would have been seen had it existed.

During the search, with the wind against the current, a strong tide ripple was observed from a distance that would have led anyone to believe that a shoal existed, but on sounding over the spot no irregularity whatever was found in the depth.

Vision rock has consequently been expunged from the Admiralty charts.

SOUTH PACIFIC OCEAN—FIJI ISLANDS.

Reported reefs to the north-west.

NOTICE to Mariners No. 71 of 1897 issued by the British Admiralty is republished:—

The following information respecting certain dangers reported to exist in the vicinity of the Fiji islands has been received from Commander J. W. Combe, H.M. Surveying Vessel *Waterwitch*:—

1. Balmoral reef, 2½ miles in length in a north-west and south-east direction and 1¾ miles in breadth, has a least depth of four fathoms near its eastern edge, with general depths of 5 to 7 fathoms.

   Approximate position, 4 fathoms, lat. 15° 40′ 15″ S., long. 175° 52′ 15″ E.

2. Hamond reef, reported as being in lat. 15° 32′ S., long. 175° 20′ E., was searched for without success, the depths in the neighbourhood being 1,600 to 1,700 fathoms.

   As this danger is believed to be identical with Balmoral reef it has been expunged from the Admiralty Charts.

3. Carter reef, reported as being in lat. 15° 42′ S., long. 176° 28′ E., was also searched for without success, the depths being 1,600 to 1,800 fathoms around its position. This danger has also been expunged from the Admiralty Charts as it is believed to be merely another position given of the Balmoral reef.

4. The reef reported to lie 2½ miles S.W. from Navula passage in approximately lat. 17° 57½′ S., long. 177° 10½′ E., was also searched for unsuccessfully, and this danger has been expunged from the Admiralty Charts.

SOUTH PACIFIC OCEAN.

Particulars of certain banks between Ellice and New Hebrides islands.

THE British Admiralty has given notice (No. 72 of 1897) that the Turpie, Alexa, and Hazelholm banks have been recently surveyed by Captain A. M. Field, H.M. Surveying Vessel *Penguin*; also that a new bank, now named Penguin, has been discovered and the position of the Louisa bank ascertained.

The particulars of these banks are as follows:—

1. Turpie bank is 22 miles in length in a north-west and south-east direction, and 10 miles in breadth, with a general depth of 24 to 27 fathoms; but with a narrow ridge running the whole length of its north-eastern edge, the least depth on which is 15 fathoms.

   Approximate position, S.E. extreme, lat. 11° 31′ 30″ S., long. 175° 54′ 0″ E.
   Approximate position, N.W. extreme, lat. 11° 19′ 0″ S., long. 175° 34′ 30″ E.

2. Penguin bank, nearly circular in form, with a diameter of about 8 miles, has a narrow ridge round its edge, on which the depths are from 15 to 20 fathoms, and inside the ridge soundings of from 23 to 26 fathoms.

   Approximate position of its centre, lat. 11° 27′ S., long. 175° 29′ E.

3. Alexa bank is in the form of a triangle, the apex being its west extremity and the base to the eastward, and is 18 miles in length east and west with a base of about 10 miles. Round its edge is a ridge, the depths on which are from 13 to 17 fathoms, whilst in the centre they are from 24 to 27 fathoms. Close search having failed to detect less water, the 8 fathoms and rock previously marked in the Admiralty Chart have been expunged.

   Approximate position, western extreme, lat. 11° 36½′ S., long. 175° 7′ E.
   Approximate position, north-eastern extreme, lat. 11° 29′ S., long. 175° 20′ E.
   Approximate position, south-eastern extreme, lat. 11° 39½′ S., long. 175° 23½′ E.

4. Hazelholm bank is 5 miles in length in a north-east and south-west direction and 2½ miles in breadth, with a general depth over it of 24 fathoms, a ridge with from 17 to 20 fathoms encircling its northern edge.

   Approximate position, centre, lat. 12° 48′ S., long. 174° 1½′ E.

5. Louisa bank:—Depths of 17 fathoms were obtained on the western edge of this bank, in approximately lat. 11° 45′ S., long. 175° 56′ E.; but the bank has not yet been properly examined.

AUSTRALIA—INNER ROUTE.

Dangers recently found between Night island and Zed (z) reef.

THE British Admiralty has given notice (No 73 of 1897) of the existence of the undermentioned dangers between Night island and Zed (z) reef, found in a recent survey of the locality:—

1. Glennie reef, of coral, dries 3 to 4 feet at low water springs, and is about a quarter of a mile long in a north-east and south-west direction and two cables broad; with foul ground stretching half a mile westward of it.
   From the centre of the reef the beacon on Tih Tih (tt) reef bears W. ¼ S., distant 11¼ cables; and beacon on Vee (v) reef N. by W ¼ W.
   Approximate position, on Chart No. 2921, lat. 13° 8′ 40″ S., long. 143° 37′ 15″ E.
2. Morris rock, a small coral knoll with a least depth of 5¾ fathoms on it at low water springs, and 12 to 13 fathoms close around, is situated with the beacon on Vee (v) reef bearing N. by E., distant 1½ miles; and High Round hill (1543) W. ¾ N.
3. Ashton rock, of coral, with a least depth of 5 feet at low water springs near its centre, general depths of 2 to 3 fathoms, and 7 to 8 fathoms around, is about a cable long and half a cable broad. From its centre cape Direction southern summit (500) bears N.W., distant 3 1/10 miles; and Chapman island (No. X) N.E. by E. ¾ E.
4. Halloran rock, of coral, with a depth of 26 feet on it at low water springs, and 15 to 16 fathoms close around, is situated with the beacon on Wye (y) reef bearing S.S.E. ¾ E., distant 10¼ cables; and cape Direction northern summit (411) S.W.

NOTE.—The positions given are with reference to the position of the land in the vicinity, which is not absolutely correct as shown on the present charts.

In due course the charts will be corrected from the recent surveys, and the existing charts will then be cancelled.

SOUTH-WEST PACIFIC—LA BRILIANTE SHOAL.

Further search for this shoal.

WITH reference to Notice to Mariners No. 202, dated 8th October *last*, issued by this office, the British Admiralty has given further notice (No. 74 of 1897) that information has been received from Commander J. W. Combe, H.M. Surveying Vessel *Waterwitch*, that he has recently made a close search, during two days round a beacon anchored in 1,200 fathoms, on the elevation, from a bottom of a general depth of 2,000 fathoms, found in the former examination of La Brillante shoal, in approximately lat. 23° 14′ S., long. 170° 6′ E., but no less water could be found.

La Brillante shoal has consequently been expunged from the Admiralty Charts.

NEW ZEALAND—Cook strait.

(1) South island—Farewell spit light exhibited from new lighthouse.

The British Admiralty has given notice (No. 76 of 1897) that on 19th January 1897, Farewell spit (Bush-end point) light would be exhibited from a new lighthouse, recently erected in a position 176 feet eastward of the old lighthouse:—

Farewell spit light is a *revolving* light with a period of *one minute*, showing the following sectors:—*white* from about S. 79° E., through south and west, to N. 70° W.; and *red* from about N. 76° W. to N. 42° W. (over spit end), as before.

It is elevated 97 feet above the sea and visible in clear weather from a distance of 15 miles.

The lighthouse, 88 feet high, is an open framework, iron structure, painted red and white, in bands. The old lighthouse would be taken down as soon as possible.

Approximate position, lat. 40° 33′ 0″ S., long. 173° 1′ 55″ E.

Note.—The shoal off Spit end has extended recently; depths 2 fathoms less than those shown on the chart having been found for nearly 2 miles in a S.E. by E. direction from Spit end. Vessels should not enter the sector of red light until at least 6 miles distant from Farewell Spit lighthouse.

Further Notice will be given if necessary as to the arcs of the sectors of the new light, their exact limits not having been ascertained.

(2) North island—intended light on Cape Palliser.

Also, that, about June 1897, a light will be exhibited from a lighthouse in course of erection on Rocky point, eastern side of cape Palliser:—

Cape Palliser (Rocky point) light will be a dioptric, *group-flashing white* light with a period of *thirty seconds*, showing *two flashes*, separated by an interval of *three seconds*, in each group.

It will be elevated 258 feet above high water, and visible seaward, over an arc of 214°, distance of 28 miles in clear weather.

Approximate position, lat. 41° 36′ 45″ S., long. 175° 18′ 45″ E.

Further Notice will be given when the date of the exhibition of the light is known.

AUSTRALIA—Fitzroy river.

Additional leading lights near Rocky Point.

The Port-master, Brisbane, has given notice (No. 1 of 1897) that a pair of small white leading lights have been placed on False Point (7 cables below Rocky Point), Fitzroy river, which, in line, bearing S.E. by E., lead through the gut between Rocky Point and the south-west extreme of Egg Sand, with a depth of 11 feet at low-water springs.

The front light is 3½ feet and the back light 18 feet above high water, the distance between them being 950 feet.

After passing Rocky Point a vessel will leave the line of lights and proceed as before.

WATER-SUPPLY.

No. 1243L.S.-G.—The 5th March 1897.—The following reports of the progress made in the several districts of the Dacca and Patna Divisions in collecting and placing on record the chief facts regarding water-supply are published for general information.

H. H. RISLEY.
Secy. to the Govt. of Bengal.

No. 2328G., dated Dacca, the 22nd February 1897.

Memo. by—The Offg. Commissioner of the Dacca Division.

COPY of the following submitted to the Government of Bengal, Municipal Department, in continuation of this office No. 1806G., dated 4th January 1897.

No. 108G., dated Barisal, the 13th February 1897.

From—N. D. BEATSON-BELL, ESQ., Offg. Magistrate of Backergunge,
To—The Commissioner of the Dacca Division.

IN continuation of paragraph 3 of this office No. 962G. of the 31st December last on the subject of improvement of water-supply, I have the honour to state that all the municipalities in this district have opened Registers I and II as prescribed by Government Circular No. 7T.M., dated 15th May 1896. In Pirojpur and Patuakhali Municipalities the Registers have been completely written up and in the others steps are being taken to furnish details.

No. 115G., dated Bankipore, the 24th February 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to acknowledge the receipt of your Circular No. 58L.S.-G., dated the 12th December 1896, asking for a quarterly report on the progress made in each district of this Division in collecting and placing on record the chief facts regarding water-supply, and the steps, if any, that have been taken by Municipalities and District Boards, respectively, to improve existing sources of water-supply and to open new ones.

2. In reply, I beg to forward herewith in original the marginally-noted letters, being quarterly reports of the progress made in the several districts in this Division. The report from Champaran is not yet to hand. It will follow when received.

1. Letter from the Chairman, District Board, Patna, No. 1173, dated 11th February 1897.
2. Letter from the Magistrate of Gaya, No. 17, dated 4th January 1897.
3. Letter from the Magistrate of Shahabad, No. 4820, dated 30th December 1896.
4. Letter from the Magistrate of Saran, No. 47, dated 9th January 1897.
5. Letter from the Magistrate of Muzaffarpur, No. 19, dated 7th January 1897.
6. Letter from the Chairman, District Board, Darbhanga, No. 693, dated 7th January 1897.

3. In a recent Circular I have already called the earnest attention of all District Officers to the great importance of protecting the purity of the water-supply during the next few months, not only on relief works, but on all frequented roads and in the vicinity of all works.

No. 1173, dated Bankipore, the 11th February 1897.

From—T. INGLIS, Esq., Chairman of the District Board, Patna,
To—The Commissioner of the Patna Division.

WITH reference to your No. 518G.Circular, dated the 18th December last, giving cover to the Government Circular No. 58L S.-G., dated the 12th idem, calling for a report on the progress made in water-supply in the district, I regret I am unable to submit a complete report in the forms appended to Government Circular No. 8T.M., dated the 15th May 1896, as I have not been able to collect complete information required under several heads. From what I have on record at my disposal, I am in a position to say that the scheme of water-supply has not been lost sight of since the subject has drawn the attention of Government in late years, and MR. FORBES has in his various circulars insisted on the local bodies to promote the scheme as desired by Government.

2. Since the question has been started, the District Board have been increasing grants under this head as much as the funds at their disposal would permit, and their chief aim has been to provide wells along roadsides for the sake of travellers which is thought more urgent than constructing wells in villages, where it rests with the villagers and the landlords to look out for themselves.

3. The success of the Government scheme depends much on the exertion of the landlords and rich persons of villages, and the spirit of the Government Circular No. 23L S.-G., dated the 11th April 1866, which specially touches this point, has been widely published throughout the district through the members of the District and Local Boards.

4. The District Board have, at their meeting held on the 25th July 1896, made it a rule that wells should be provided along the roadsides, and that sites and estimates should be approved of by the Board before any such works are started, in order to prevent Local Boards undertaking works which should be left to private individuals.

5. The Local Boards which were consulted have made the following suggestions in the furtherance of the scheme:—

(*a*) That wells should be provided on roadsides 2 miles apart.
(*b*) That wells should be furnished with lathas, chains and iron buckets, &c.
(*c*) That headmen and chaukidars of villages should be made responsible to keep wells secure from pollution.
(*d*) That bye-laws should be framed for prosecuting the persons found polluting wells.

6. I have supported their suggestions, and will see that wells are furnished with lathas and chains, &c., as funds permit. The difficulty is to obtain chains of a suitable calibre. Those proposed are too heavy and could raise several tons. In course of a few years this suggestion, I hope, will be fully carried on into effect.

As regards the suggestion (*d*) the bye-laws, which are now under amendment, will be submitted later on for the approval of Government with a complete report on this subject as soon as I am in receipt of the information to be filled up in the forms above alluded to.

No 17, dated Gaya, the 4th January 1897.

From—H. SAVAGE, Esq., Magistrate of Gaya,
To—The Commissioner of the Patna Division.

IN reply to your memorandum No. 518G.Cir., dated 18th December last, and connected papers, respecting the collecting and placing on record of the principal facts regarding water-supply, I have the honour to report as follows.

2. In the three municipalities in the district, complete lists of wells have been prepared, and the Commissioners are considering which should be set aside for drinking purposes.

For the remainder of the district, Register in Form No. I has been completed for Jahanabad and Aurangabad subdivisions by the Local Boards.

In those subdivisions only four villages are found with an inadequate water-supply, and the Local Boards have been directed to submit definite proposals for providing drinking water for those villages.

The Register I from Nawada and the Sadar Local Boards has not yet been received in a complete form.

Register II has not as yet been received from Jahanabad in a complete form.

3. For Gaya town there is a good scheme for water-works, and steps are being taken to raise funds by subscription for carrying out the scheme. In the other municipalities and and over the district generally, there is a plentiful supply of well water, but the difficulty is to keep the wells free from pollution.

In the municipalities the difficulty can be met by setting aside certain wells for drinking purposes, and, if necessary, closing the rest. In the outside villages ,however, there is no law under which certain wells can be set aside for drinking purposes, and even if there were, it would be generally inoperative, in the absence of local police for detecting, local tribunals for fining, or local opinion for restraining those whose view with respect to a well is that it is at once the proper place for drinking, bathing and washing their clothes and culinary utensils.

No. 4820, dated Arrah, the 30th December 1896.

From—C. R. MARINDIN, Esq., District Magistrate of Shahabad,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit the report called for in your memorandum No. 518G.Cir., dated the 18th current, on the subject of collecting and placing on record the chief facts regarding the water-supply and the steps, if any, taken by Municipalities and the District Boards to improve the existing sources of water-supply and to open new ones.

2. As regards municipalities, registers prescribed in Government order No 7T.M., dated 15th May 1896, have been opened in all the municipalities and existing sources of supply recorded. The wells in all were cleansed during the year by permanganate of potassium; wells have been set apart for drinking and other purposes. The existing number of wells is adequate in all of them.

3. In Arrah there are water-works which supply pure filtered water from the river Sone to the large portion of the town. In Jagdispur the water-supply is drawn from wells, of which there is a sufficient number. In Buxar the water of the Ganges river is chiefly used, but there are 130 wells and 23 tanks within the town. Of these 122 wells are considered wholesome and 8 unwholesome. The former have been set apart for drinking purposes. Of the tanks, one is said to contain good water, which is used for drinking purposes, three reserved for bathing, and the rest for other purposes. A new well was sunk at a cost of Rs. 1,312-3-7, of which Rs. 1,212-3-7 was paid by the Municipality, and the remainder by Government.

In Dumraon eight tanks and 96 wells have been registered. Of these, 40 wells have been reserved for drinking purposes. A tank called Ugrah Singh's tank in mahalla Dharamsala is being cleansed and re-excavated and arrangement made to obtain water from the Bhojepur distributary of the Sone Canal. An experiment was made with the Abyssinian tube well, but without success.

In Bhabua 20 wells have been reserved for drinking purposes, and out of seven tanks two have been set apart for drinking and four for bathing purposes and one for washing clothes, &c. Iron chains and buckets have been provided for each well.

In Sasaram there are two wholesome tanks in the Municipality; one is Shershah's tank, which is the main source of water-supply and is set apart for drinking purposes. A guard is appointed by the Municipality; the other tank called "Goshain's tank" is designed for bathing, washing and other purposes. There are 210 wholesome wells in the town.

4. With regard to the District Board, lists of villages, containing 100 houses and over, were prepared by the Magistrate's office and made over to the District Board on the 2nd September 1896. These are embodied in printed forms, which are being distributed to police and other executive officers, whose duties require them to be on the move in the district. When the lists are returned with the necessary information supplied, registers, as required by Government Circular No. 8T.M., dated the 15th May 1896, will be opened. To enable the Local Boards to improve the sources of water-supply, a sum of Rs. 500 has been placed at the disposal of the Chairmen at Buxar, Sassaram and Bhabua.

No. 47, dated Chapra, the 9th January 1897.

From—E. P. CHAPMAN, Esq., Joint-Magistate, Saran,
To—The Commissioner of the Patna Division.

I HAVE the honour to acknowledge receipt of your memorandum No. 518G.Cir., dated the 18th December 1896, forwarding Government Circular No. 581S.-G., dated the 12th December 1896, on the subject of the water-supply of this district.

2. The Chapra Municipality have not yet replied to my enquiry, but I understand that the existing water-supply is ample. The Chairman of the Revilgunge Municipality reports that with the numerous wells in the town and the stream of the Gogra at hand, there can never be any fear of a scarcity of water. In the Siwan Municipality the wells have been recently cleansed and disinfected and fresh wells have been constructed. The Chairman reports the supply to be sufficient. The Municipal Board will be directed not to allow the matter to escape their attention.

3. The District Board have not lost sight of the importance of the subject, and it is hoped that Mr. Berkley will shortly pay a visit to the district and elaborate a scheme for the permanent improvement and extension of the distributions to the Saran Canals. It is generally held that tanks are not of such value except as a source of supply for cattle, and the digging of wells has been encouraged in preference. The matter will not be lost sight of.

No. 19, dated Muzaffarpur, the 7th January 1897.

From—L. HARE, Esq., Magistrate of Muzaffarpur,
To—The Commissioner of the Patna Division.

WITH reference to your memorandum No. 518G., dated 18th ultimo, requesting me to submit report of the progress made in collecting and placing on record the chief facts regarding water-supply and the steps that have been taken by the Municipalities and the District Boards to improve the existing sources of water-supply and to open new ones, I have the honour to report as follows :—

I.—It appears from the report of the District Board that the registers regarding water-supply in this district are being prepared from the Settlement Officer's records and the Census tables, and will be completed by the Famine Circle Officers.

Progress made.

Register for Hajipur thana is nearly completed.

Registers for Katra, Pupri, Belsandh, Sheohar, Lalganj and Mahwa thanas are partly done.

II.—From the reports received from the municipalities, viz., Muzaffarpur, Hajipur, Lalganj and Sitamarhi, it appears that they have opened the registers. They further report that their wells have been cleaned and there is no complaint about the water-supply.

No. 693, dated Darbhanga, the 7th January 1897.

From—The Chairman, District Board, Darbhanga,
To—The Commissioner of the Patna Division.

REFERRING to your memorandum No. 518G.Cir., forwarding Bengal Government Circular No. 58L.S.-G., dated the 12th December 1896, on the subject of the maintenance of a register of the water-supply in the district and the steps taken to improve the existing sources, I have the honour to report that, as directed in paragraph 3 of your letter No. 225G.Cir., dated 29th May 1896, the register showing villages with 100 houses or more has been prepared from the Census tables, and the necessary information has been asked from the police. Reports from all thanas, except Madhepur, Bahera and Rosera, have been received.

The general register embodying all information will be compiled as soon as these remaining reports are received. Printed slips in the prescribed form have also been supplied to the Civil Surgeon for collecing information through the vaccinators to check the figures, &c., received from the police.

2. Beyond clearing silt from some of the existing roadside wells and providing lime and permanganate of potash to purify their water, no other steps have yet been taken to improve the existing sources of water-supply. In the course of the famine relief works now in progress, the re-excavation and clearing of a very considerable number of old tanks will also be taken in hand.

DISTRESS IN THE ORISSA DIVISION.

No. 676.—(Fam.)—The 9th March 1897.—The following papers are published for general information:—

M. FINUCANE,
Secretary to the Government of Bengal.

No. 658Agri. (Fam.), dated Calcutta, the 9th March 1897.

From—M. FINUCANE, Esq., Secretary to the Government of Bengal,
To—The Commissioner of the Orissa Division.

I AM directed to acknowledge the receipt of your letter No. 234R., dated the 5th February 1897, with its enclosures, regarding the condition and prospects of the several districts of the Orissa Division, and in reply to convey the following observations and orders of the Lieutenant-Governor.

2. *Paragraph 6 of your letter.*—The Lieutenant-Governor notices with satisfaction that you do not see any grounds for apprehension at present in the state of the Balasore district generally.

3. *Paragraph 8 of your letter.*—This paragraph deals with the sources from which the Collector of Cuttack derives his information of the outturn of crops; and you describe these sources as being "habitually unreliable." The Lieutenant-Governor shares your suspicion that in this district the officers entrusted with the task of reporting on the outturn of crops have disregarded the instructions of Government, and have habitually used the term "sixteen annas" to represent a bumper and not an average crop. I am to request that you will enquire into this point, and take the necessary steps to correct the misconception, if it is found to exist.

4. *Paragraph 9 of your letter.*—With regard to the district of Cuttack, it is believed that the granaries of zamindars and others will prove a valuable resource during the present year of scarcity, and you say that you have not been informed that they have been depleted. I am to request that you will ascertain positively and report to Government whether these granaries have or have not been depleted.

5. *Paragraph 11 of your letter.*—The Lieutenant-Governor accepts your conclusion that at present there appears to be no cause for alarm in Cuttack, but that the necessity for vigilance is clear, and agrees that the Collector should attend to the mapping out of relief circles and to the preparation of schedules of works for areas in which the appearance of distress is probable. He should also have an organisation ready to administer gratuitous relief should it be required, and should enquire into the sufficiency of communication, &c., as you suggest.

6. The tracts reported by the Collector of Cuttack as likely to be affected include the Kujong and Kanika Wards' estates. His Honour is of opinion that it is the duty of the Court of Wards, as a model landlord, to undertake any relief works that may be needed in these estates.

7. In paragraph 12 of Mr. Growse's letter No. 224G., dated the 24th January 1897, it is stated that there is absolutely no machinery for imports. The Lieutenant-Governor does not understand why rice and other grain cannot be imported into the district of Cuttack by steamer if necessary. Experience in Bihar shows that native dealers who ordinarily export are willing enough to import also if put in the way of doing this at a profit. You should see that information as to the selling price of rice in Calcutta and Rangoon is regularly furnished to all the principal dealers.

8. The Lieutenant-Governor approves the action reported to have been taken in paragraph 13 of Mr. Growse's letter. As suggested, the funds of the District Board should be diverted from schemes which do not supply much earthwork, to projects suitable for purposes of famine relief.

9. *Paragraphs 14 and 18 of your letter.*—It is stated that there can be no question that scarcity prevails in a limited area in the district of Puri, but that you have at present no definite information as to area or population

affected. The Lieutenant-Governor awaits the further report, under section 9 of the Famine Code, which you have called for from the Collector.

10. *Paragraph 14 of your letter and paragraph 7 of letter No. 66, dated the 9th January 1897, from the Collector of Puri.*—With regard to a place called Satpara, which the Collector of Puri visited on the 6th January, it is stated by him that "if lives are to be saved, paddy must be brought here and stored in *godowns*." In the same paragraph Mr. Lee writes—"I have written in to Puri for ten cartloads of paddy every week to Satpara, but *godowns* will also have to be established at Arakhkuda, Parikud and Malud." The Lieutenant-Governor understands from a telegram recently received from you, that the *godowns* referred to have been opened by private traders for the sale of imported grain, at their own risk, and that the Collector has merely advanced them money at interest to enable them to import grain. Sir Alexander Mackenzie is disposed to think that the action taken was under the circumstances judicious, but the orders of Government should have been obtained, before advances for this purpose were made.

11. It is also stated that in Malud a water famine is anticipated in April or May. The daily weather report issued by the Meteorological Reporter shows that in Puri there was a heavy fall of rain on the 17th February 1897, amounting to 4·25 inches. The Lieutenant-Governor hopes that this will have the effect of averting the anticipated danger.

12. *Paragraph 15 of your letter.*—The Lieutenant-Governor agrees that the Collector of Puri should map out his circles of relief, have schedules of works ready in each case, organise gratuitous relief, and enquire into communications, &c., as suggested by you. His Honour would be glad if you could again visit and thoroughly inspect the affected areas in Puri at an early date, and arrange, in concert with the Collector, for such measures of relief as may be required. Full and early report, as required by article 9 of the Famine Code, should be submitted for the affected areas, and regular fortnightly reports should follow. You have funds for gratuitous relief, and no time should be lost in appointing local committees to disburse the money granted from the Charitable Relief Fund.

13. I am also to acknowledge the receipt of your letter No. 329R., dated the 18th February 1897, in which you apply for sanction to the construction of an embankment on the eastern side of the Chilka lake. In reply, I am to request that you will consult with the Superintending Engineer in charge of the Orissa circle, and submit a further report on the subject. Meanwhile the work proposed and the other embankments referred to in paragraph 7 of your letter may, if the Superintending Engineer and you approve of them, be begun in anticipation of sanction.

14. As regards the appointment of Mr. Parish as Circle Officer for the Chilka area, I am to say that a reference has been made to the Madras Government.

No. 329R., dated Camp Balugaun, the 18th February 1897.

From—H. G. Cooke, Esq., Commissioner of the Orissa Division,
To—The Secretary to the Government of Bengal, Revenue Dept.

I have the honour to enclose a copy of letter 290 of 11th February 1897, from the Collector of Puri, and my reply thereto. I have endeavoured in my reply to deal fully with each question that has arisen, and to supplement this by calling the attention of the Collector to various points on which his reports are silent.

2. There has been considerable delay in getting in the report required under section 9, and I still await the material for the same, and the revised schedule of works; there appears too much uncertainty as to whether relief works, that are relied on, have actually been commenced. I have issued clear orders to commence them at Malud, Parikud and Satpara. Mr. Beale is dealing with Chabiskúd, and I apply for sanction to the construction of the embankment proposed in that locality. I am doubtful whether this should be done by the District Board, but propose that the District Board should begin it, and, if necessary, it should be taken over by the Public Works Department. For the

reasons given in my letter to the Collector, it appears certain that the sanction of Government is required for the work under section 19, and I therefore now apply for such sanction.

I also request sanction to the appointment of Mr. Parish, as Circle Officer, for the whole Chilka area, on a horse allowance of Rs. 100, and with the usual establishment.

3. The arrangements for conveying rice to the places where it is wanted, are now in progress, and Mr. Lee speaks confidently as to his resources in this respect, one individual in Khurda being, in Mr. Lee's opinion, capable of supplying all the rice that will be required for Malud and Parikud. I understand that the population of these places is 24,000, of whom about one-third will have to be considered in providing a grain supply, 8,000 persons at even two-thirds of a seer a day gives 5,333 seers, or 133 maunds a day: this appears an enormous quantity of grain to provide from now till the next harvest, and I find it difficult to share Mr. Lee's confidence on this point. I cannot say that the facts are exaggerated; these tracts ordinarily depend entirely on their own resources, and, if these have entirely failed, I do not see how we can estimate for a smaller quantity.

There are, at present, three contractors bringing grain into the Chilka area; depôts are to be opened at Satpara and Malud, and Kaunas near Balbhadrapur, on the Dyab, which may suffice for the present; but unless our estimates are extremely fallacious, I should think more contractors will be necessary.

4. Gratuitous relief remains to be organized, and the agency available seems inadequate. I think that it may be necessary to establish dispensaries under section 84, mainly with a view to gratuitous relief, the accident that there is a dispensary at Satpara, has attracted some 50 or more applicants for gratuitous relief gathered from a few villages.

5. I visited Satpara and some villages in Parikud. I did not see anywhere more indigent persons than could be produced in any year in a similar area; but these are now thrown on public relief, instead of being supported by their neighbours. The people are eating a weed, locally known as *dounna ság*, and the roots of the kanika grass; both are well flavoured, and I think it not improbable that they form articles of diet in ordinary years, as a prosperous Bengal raiyat sets his fish-trap for small fry that one would suppose that none but the poorest would resort to as an article of diet.

6. I am not in a position to gainsay the conclusions of the Collector as to the extent of the evil; indeed, where crops have entirely failed a population which only in ordinary years raises enough rice for its own support, I do not see how his conclusions can be questioned; at the same time it is gratifying to be able to say that, so far as my observations went, I did not see in the condition of the people any cause for uneasiness. In this area famine commenced in 1866, and I think that the relief works ought to be opened at once as, indeed, I supposed they had already been.

7. About one matter I am quite clear, the floods on the Chilka have swept away the protective embankments of Malud, Parikud, Satpara, and Chabiskud, and if these are not restored, there will be no protection from yearly floods and loss of crops; these certainly should be restored, and they afford the most useful relief works possible, and should, I think, take precedence of other works.

8. Grain is reported to be leaving the Puri district for Ganjam in large quantities, and I feel some concern about the grain supply of the district, generally, being unduly depleted. Mr. Dutt estimated a large deficit in the stock available in Orissa, as compared with the actual requirements till next harvest. I should be glad to be informed whether action should be taken by me to induce merchants to import rice from Burma, or is this done in Calcutta? There are Bombay merchants in Cuttack, who are accustomed to export on a large scale, and are quite capable of importing on a large scale; but I hesitate to take any steps in this direction without special instructions, the estimates are of doubtful value, and possibly any arrangements of the kind would be made for the province generally in Calcutta: if grain is to be brought from Burma to Orissa, however, it would be simpler to bring it direct, rather than to trans-ship it at Calcutta.

No. 290, dated Puri, the 11th February 1897.

From—W. H. Lee, Esq., Offg. Collector of Puri,
To—The Commissioner of the Orissa Division, Cuttack.

In continuation of my reports Nos. 66 and 116, dated 9th and 20th January 1897, respectively, on the subject of the distress in the Chilka tracts, I have the honour to report as follows.

2. My predecessor, Mr Bell, believing that distress was prevailing in those tracts, ordered one or two test-works to be undertaken, under the supervision of the District Engineer. The results have not yet been reported, and I have, in the meantime, seen the tracts for myself, and reported my observations in the letters quoted above. I have found that it is necessary to open relief works there at once.

3. I have, therefore, in anticipation of your sanction and Government, appointed Mr. Parish, the Salt Inspector at Satpara, to be the Circle Officer, under the Famine Code, for Malud and Parikud, and Mr. Beale, District Engineer, for Pargana Chabiskud, and beg to propose for them a horse-allowance of Rs. 100 each, with nine clerks at Rs. 30 each to begin with.

4. Protecting the country from the incursion of salt-water, there is an embankment on the eastern side of the Chilka lake. This embankment was done as a relief work in the famine of 1866. It is now in a state of great disrepair. During the floods of July last, which swelled the waters of the Chilka to an unusual height, the embankment was washed away in most places, and the salt-water, passing through them, totally destroyed the crops of a large part of Pargana Chabiskud, including the directly-managed estate of that name, and the Wards' Estate of Rorang. It is necessary that this embankment, a portion of which is already maintained as an embanked road by the District Board, should be repaired within the next two months, as the south wind drives the water up towards the bandh. I have ordered earthwork to be begun on it at once. The work is roughly estimated to cost about Rs. 10,000, and an estimate is being prepared by the District Engineer. Section 52 of the Famine Code says that large works will be the backbone of the system of relief in the latter stage of a famine, while small works should be utilized to the utmost in the early days of the scarcity. But having regard to the provisions of Section 55, and those of paragraph 4 of the rules of Government of North-Western Provinces and Oudh, enclosed with their Resolution No. 18 Public Works of 1896, and forwarded with Bengal Government Circular No. 74, dated 31st December 1896, and also considering the fact that unless the embankment be repaired immediately within the next two months, there is danger to a large amount of Revenue in the directly-managed and the Wards' Estates, I have thought it best to order repairs to be done at once, to the Nuni bundh, as it is commonly called, as a relief work. I propose to disburse money on this account from Government in the first instance, and to adjust it subsequently between us and the Province.

5. I have, in reference to paragraph 30 (*e*) of the Famine Code asked Messrs. Parish and Beale to ascertain and report what works can be carried out in the Circles, with rough estimate of the cost, and when I have their reports, I shall be in a position to report the extent to which Imperial aid is likely to be required for the tracts in question.

6. Your sanction to the arrangements and proposals is solicited.

No 328R., dated Camp Puri, the 15th February 1897.

From—H. G. Cooke, Esq., Commissioner of the Orissa Division,
To—The Collector of Puri.

In reply to your letter No. 290, dated the 11th February, I have the honour to state that it is to be regretted that the result of one or two test-works opened by Mr. Bell was not formally reported, but the fact that you have been to the affected areas on the Chilka, and satisfied yourself as to the necessity for opening relief works, will doubtless be accepted as an equivalent to such report

2. I understand that relief works have actually been opened, and gratuitous relief administered under Chapter III of the Code, and that the relief work is paid for at the minimum rates prescribed by Chapter VII of the Code. As I have already pointed out to you, action taken under Chapter III of the Code should have been preceded by action under Chapter II. The protective embankment for Chabiskud should be commenced; this, I think, is only relief work that has been specifically referred to in your reports. I learn from you verbally that a relief work in the form of a road is contemplated in Malud and Parikhud, but I am unable to ascertain whether any action has been taken in this direction, some information being to the effect that it has not been commenced; other information shows that it was commenced a fortnight ago; it appears to be a fact that no officer is on the spot looking after the work, which makes it probable that nothing is being done. In view of the fact that some weeks ago Malud was described as the worst part of the district, this is not a matter that should remain in uncertainty, and you should at once send out an officer to see that the relief work is opened. Mr. Gupta volunteered to start the work, but it should ultimately be placed under a District Board Overseer, under the supervision of Mr. Parish, whom you have selected as Superintendent. I think that protective embankments should

take precedence of the road in Malud and Parikhud. The only extensive work that has been a considerable time in progress, is the protective embankment made by the Raja of Parikud, which is, I learn, nearly finished, and I presume that other works will be necessary in Parikud ere long. I find that a relief work to be executed out of the Khurda Government Estate Improvement Fund awaits sanction. It consists of an embankment to protect Satpara, Bankijol, Noagown, Bagmunda and Seopukarda hamlets, as well as 18 survey mauzas. It is important that this should be pushed on, as the high tides will do further damage to rice lands if this embankment is not made before they take place. Mr. Gupta should begin the work in anticipation of sanction; if his funds are insufficient, they should be supplemented by the District Board. You tell me that there can be no doubt as to the necessity of reporting under Chapter II that scarcity is apprehended, and famine is imminent in certain portions of your district, and your action in opening relief works and administering gratuitous relief, shows that such has been your conviction for some little time; please therefore report under section 10, supplying me with the information necessary for my report under section 9.

3. It will be necessary to consider what areas should be declared. I understand that a portion of Chabiskud, which is also adjacent to the Chilka lake, is similarly affected to the Malud. Parikud area to the south of the lake you should consider whether this second area should not be dealt with in the same report, and so with the detached villages you speak of on the north shore of the Chilka. From what I gather all these tracts might be simultaneously dealt with.

4. I woud draw your attention to the remission statements for certain villages in Khasmahal Chabiskud which, I think, will establish the fact that these villages normally lose their crop and are allowed abatements, year by year, as a matter of course. The people of these villages apparently have some resources other than their crops which constantly fail; it will have to be considered whether things are really worse than usual in these parts for, in an ordinary year, it would be possible to produce evidence of local destruction of crops, which nevertheless had not called for special relief measures in the past.

5. You inform me that you have, in anticipation of sanction, appointed Mr. Parish, Salt Inspector, as Circle Officer of Malud and Parikud, and Mr. Beale, District Engineer, as Circle Officer of Chabiskud. The area assigned to a Superintendent, that is, an officer of the status of Mr. Parish or Mr. Beale, in Bihar, is two hundred to three hundred square-miles, with a population of 250,000 persons, the Chilka areas collectively would not provide works for one such officer. I see no objection to Mr. Parish being given the post of Superintendent of the whole affected area, with the 100 Rupees horse-allowance. His salt work can, at least, for the present, be left more to subordinates than is perhaps desirable, but I understand that Mr. Shreen may be trusted to see after it; the urgency of the case, and the impossibility of finding suitable officers locally, will doubtless be accepted as adequate reasons for such a course. Mr. Beale, District Engineer's services, cannot be concentrated on the present famine area; his duties lie not in the Chilka area alone, as is the case with Mr. Parish, but all over the district of Puri, and even, should scarcity be confined to the Chilka area, he could not neglect his work in the rest of the district, still more is it important to have his services available wherever scarcity may arise in your district. I cannot therefore approve of Mr. Beale being appointed as Superintendent; his services should be utilized, however, in starting the works in Chabiskund, and, if necessary, in the other affected areas around the Chilka.

6. Mr. Parish will not only require Mr. Beale's assistance, but will also require Inspector's dealing with areas of 30 to 40 miles, with populations of 2,500 to 3,000 persons. I cannot find on what scale Inspectors are paid in Bihar. I presume that they could be had for Rs. 50 a month or less, but I do not see why the work of Inspectors should not be done at present by Overseers and Sub-Overseers of the Board, whose other duties can be entrusted to temporary substitutes.

7. The scale of establishment, allowed to Superintendents in Bihar, will be found at paragraph 2, Resolution No. 5133, of 10th December 1896, together with other details that I quoted above; there is some reference to the pay of Superintendent at page 10 of the Notes of a Conference held at Sonepur on 20th November 1896, forwarded with Circular No. 49Agri. of 26th November 1896; your office establishments are excessive and should be reduced.

8. Your paragraph 4 refers to the construction of an embankment on the eastern shore of the Chilka lake as a relief work; the work is roughly estimated to cost Rs. 10,000, and as the District Board cannot command this sum, and also, as I judge, the work will occupy 1,000 men for three months, it would appear that it comes under the head of 'large works,' section 55 of the code, and it appears open to question whether this work should not be placed under the Public Works Department. I shall be obliged by your informing me, at an early date, whether you think this should be done, or whether the work can be carried out by the District Board. Section 54 of the Code classifies relief works as those done by the Public Works out of Imperial or Provincial funds, and those dealt with by the District Board out of local funds. This would lead to the conclusion that the present one, which will require the assistance of Provincial funds, would ordinarily be made over to the Public Works Department. In any case it appears certain that the previous sanction of Government is necessary, as the cost will fall on Provincial funds; you say that the cost will be ultimately adjusted by the District Board, but supposing the Board capable of refunding Rs. 10,000 which seems scarcely possible in view of the heavy calls that it may have to meet this year and next year, the date of such adjustment is likely to be remote and I think it only right

to treat the work as one made from Government funds, and apply for sanction under section 19 of the Code; this sanction will, therefore, be at once applied for, without waiting for my report under section 9 of the Code: you will be justified in commencing in anticipation of sanction, and, if necessary, the work can be transferred to the Public Works Department hereafter.

9. There are some other points, some of which I have referred to in previous correspondence, to which I desire to call your attention.

(*a*) The schedule of works especially prepared to meet famine requirements, should be pushed on to completion. I understand that Mr. Beale has been engaged on this, and that you believe that it is finished. I need hardly say that the schedule should be comprehensive and not confined to the area at present seriously affected, but should include projects that will adequately meet any requirements that may arise in the way of relief works throughout your district.

(*b*) You should have all parts of the district, where distress is in the least apprehended, mapped out into Superintendents' Charges and Inspectors' Circles, so that if necessity arise, you will only have to appoint officers in each case as occasion requires. Officers competent to hold a Superintendent's charge are not obtainable locally; you should give me the earliest notice of such officers being required, as procuring them will necessarily take some little time; the supply is little better in Cuttack than it is in Puri.

(*c*) With regard to gratuitous relief of "respectable women," I understand that cases of the kind are hardly likely to occur in the Chilka area, and that there is a Manager for Malud, the Raja of Parikud and his servants and two dewans, who could deal with any such cases. I apprehend that you will meet with considerable difficulty in finding a local agency to deal with this matter in the district generally, as there seem but few prominent persons who could be trusted with so delicate a task. This matter will require very careful consideration from you and your Committee, should the necessity for such relief arise.

On the occasion of my visit to Satpara, I found that the dispensary was a centre of gratuitous relief, and that some old and infirm people were in receipt of grain doles. Assuming that these were all really indigent persons who, in other years, would have been supported by the charity of neighbours, who are not now in a position to be charitable, some idea of the requirements of Malud and Parikud in the way of charitable relief can be formed, if the few villages around Satpar give so many cases, the larger areas will give ten or twenty times as many. If the overseer to be placed in charge of the relief works is unable to distribute gratuitous relief in Malud-Parikud, and if no local persons are available, a dispensary should be opened under section 84, and the hospital assistant should be relieving officer as at Satpara.

(*d1*) The question of communications also requires very careful study. The Chilka lake is served on the north side by East Coast Railway, and it is proposed to take rice in boats from the northern shore to central points of the affected area. All that seems necessary is to procure an adequate supply of boats for this purpose. You expressed a doubt as to the resources of the lake in the the matter of boats. I need scarcely say that adequate provision is imperative, and boats will have to be found.

(*d2*) Another portion of the map marked brown, includes parganas Mirichpur, Khodar and Astrang; there appear to be no roads whatever in this locality and the Devi river, as itself an offset of the Kokai, is doubtless as dry as the latter at this season; happily your reports do not show reason to apprehand distress here at present, but in the event of it occurring, you should be prepared to act and know how grain can reach these localities.

(*d3*) The brown tract near Bhubneshwar can be reached by the Railway, but it remains to be seen how distribution is to be effected from the Railway Stations.

(*dh*) Kotdesh, which is colored dark green, is singularly ill provided with roads, though the northern part adjoins both the railway and the Puri road; besides this there is but one unmetalled road from a point Baligai near the east shore of the Sur lake to Madhab on the Cuttack boundary; this road probably extends into the Cuttack district. I do not suppose that water-carriage will be available by the Bargovi and Khushbhodro rivers till the rains, and should distress occur in this large area, I fear that the communications will be found inadequate; at the same time it may, perhaps, be assumed that in ordinary times rice does circulate in this area, at least for export purposes, even if local trade is not great, owing to the agriculturalists keeping their own stores; and if rice leaves the area, it must be able to return to it in the same manner and by the same routes; but it appears that we are at present in the dark as to what the manner is, and what the routes are, and it would be well to ascertain these from the Police or other agency.

(*e*).. You may find it necessary to have a supply of tents, treasure-chests, copper coin, and tools and baskets, see paragraph 8, Resolution 5130 of 10th December 1896 and Government of North-Western Provinces, Resolution page 4, received with Circular 74 of 31st December 1896; there are many points in the North-Western Provinces Resolution, which repay study. These matters have to be dealt with with foresight, as tents, &c., are not to be had at short notice in Puri.

At Satpara. I learn from Mr. Parish that kodalis will not be wanting, and all that the coolies will require is a supply of baskets which can be made locally, and picks.

(*f*). I understand that you have found contractors willing to take advances from Government, and pay interest. This has been done nominally in accordance with paragraph 136 of Resolution 5133 of 10th December 1896; in fact what has been done is not in strict

accordance with the conditions imposed, viz., (1) that "supplies are drawn from districts beyond those in which scarcity extends, or is apprehended in the present instance, all India," and (2) "occasional inspection of grain invoices in order to verify that the persons to whom advances are made do really import grain into the inaccessible tracts, and that it was obtained originally outside Bengal or other provinces threatened with scarcity."

The departure from the above conditions is unfavourable, and I only mention the matter, in order to keep the Government informed of the fact.

(*g*). I would call your attention to paragraph 12 of Resolution 5133 of 10th December 1896, on the subject of well-sinking. As you have already referred to an apprehended water famine, it would be as well to ascertain whether the system of a Government contribution of Re. 1 per well would overcome the apathy of the people, who appear unwilling to stir themselves to procure water which is, I understand, very easily procured.

(*h*). The Chilka area, where tanks have been dug as relief works, has no rivers, but this may not be the case everywhere. That it may be necessary to undertake such works, I therefore invite your attention to what is written in paragraph 19 of Resolution 5133 of 10th December about providing tanks that admit of being flushed from rivers.

DISTRESS IN THE CHOTA NAGPUR DIVISION.

No. 678.—(Fam.).—The 9th March 1897.—The following papers are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 677Agri. (Fam.), dated Calcutta, the 9th March 1897.
From—M. FINUCANE, Esq., Secretary to the Govt. of Bengal,
To—The Commissioner of the Chota Nagpur Division.

I AM directed to acknowledge the receipt of your letter No. 575T.M.R., dated the 24th February 1897, with its enclosures, reporting on the condition and prospects of the districts in the Chota Nagpur Division, and in reply to convey the following observations and orders of the Lieutenant-Governor.

2. *Paragraph 5 of your letter.*—It is stated that you still prefer to regard the works in the district of Palamau as test works, in so far that you still think it unnecessary and undesirable to bring into operation section 67(*1*) of the Famine Code, which lays down that no relief-worker, whether employed individually or in a gang, shall be paid less than the minimum wage prescribed by section 101 of the Code, except temporarily in cases of contumacy. You are persuaded that the condition of the people in Palamau does not at present require this departure from the general system of task work, and that the result would only be harmful. The Lieutenant-Governor accepts your views.

3. In the same paragraph you observe that Mr. Renny is mistaken in thinking that the rates* shown in the column of remarks at page 13 of the Hon'ble Mr. Glass's table of tasks for famine relief workers are the rates to be adopted in the payment of wages to famine labourers. Those rates are, as you rightly understand, the ordinary contract rates. The rates to be paid to relief-workers are those shown at page IV, Appendix IV of the Public Works Department Resolution No. 420M.P.I., dated the 25th January 1897. Explanatory notes are being issued, showing separately how the tasks for diggers, and the tasks for, and numbers of, carriers should be regulated. The principle to be borne in mind is that the full tasks prescribed in page 2 of Mr. Glass's note prefixed to the table of tasks, namely, 200 feet in soft soil, 130 feet in medium, 85 in hard, &c., should be exacted from diggers, and the numbers of carriers should be regulated according to the length of lift and lead, so that they may be able to lift and carry the earth excavated by the diggers.

* Man 2½ annas, Woman 2 „, Boy 1½ „ } per diem.

4. *Paragraph 11 of your letter.*—As regards the grant of loans for village works in the district of Manbhum, under Government notification No. 69Agri.—Fam., dated the 5th January 1897, I am directed to say that there is no objection to giving such loans on adequate security. As suggested by you, the Deputy Commissioner may grant loans for village works wherever he considers that there is a real demand for work, even though the necessity of opening relief works may not as yet have been proved.

5. Orders as to the appointment of a third Superintendent will be passed when it is found that an additional officer is required. The Public Works Department have deputed an upper subordinate, and are unable to spare any more officers at present. You should endeavour, if possible, to obtain suitable men locally for the supervision of relief works, but should you be unable to do so, you should address the Public Works Department of this Government on the subject of deputing an Engineer to Palamau.

No. 575T.—M.R., dated Camp Hazaribagh, the 24th February 1897.

From—A. FORBES, Esq., C.S.I., Offg. Commissioner of the Chota Nagpur Division,
To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of this office No. 474T.—M.R., dated 12th instant, I have the honour to submit the following report under section 13 of the Famine Code for the districts of this Division.

PALAMAU.

2. I enclose a copy of the Deputy Commissioner's report (Appendix I). Up to the end of the week ending the 13th instant, the general rise in prices continued to be felt, as shown by the following figures reported by the Deputy Commissioner:—

	Week ending 16th January 1897.	Week ending 24th January 1897.	Week ending 31st January 1897.	Week ending 13th February 1897.
Number of *hâts* at which rice was selling under eight seers per rupee ...	4	7	7	15
Number of *hâts* at which rice was selling at eight seers and under nine seers per rupee	13	26	36	22
Number of *hâts* at which rice was selling at nine seers and under ten seers per rupee	58	40	28	54
Number of *hâts* at which rice was selling at ten seers and under eleven seers per rupee	10	6	4	...
Number of *hâts* at which rice was selling at eleven seers or over	1	1	1	...
Total number of *hâts* from which returns were received ...	86	80	76	91

I note, however, that some of the returns submitted call for explanation. For instance, it is reported that in all the *hâts* of the Manatu outpost rice was up to 7 seers per rupee, although at Hariarganj, which is only about 30 miles distant, it was selling at 9½ seers. The difference, supposing the figures reported are correct, can only be explained by a rigging of the market by the local traders. I am calling the attention of the Deputy Commissioner to this matter.

3. Since the date of my last report, the proposal to allow a bounty of 8 annas per maund on Burma rice imported to Daltonganj *viâ* Maharajganj has, I am glad to say, been sanctioned by Government. Sanction was accorded by telegram on the 14th instant, and one of the Gaya merchants writes me, under date 17th instant, that he had already despatched 668 maunds to an agent he has appointed for the purpose at Daltonganj. I have every reason to hope that the measure will have the desired effect of unlocking or replenishing the local stores, whichever may turn out to be the remedy needed.

4. In my last report I stated that up to the 9th instant, five relief test-works had been opened, on which 416 men, 168 women and 161 children, total 745 persons were employed; and that 333 persons were stated to be on gratuitous relief. Since then work has been opened in two other places, and the numbers on all the seven works now in hand had risen by the 16th instant (except at Latehar, for which place the return is dated 13th instant), to 2,676 viz., 1,266 men, 966 women, and 440 children, as will be seen from the abstract accompanying this report (Appendix II); while the number of persons on gratuitous relief has increased to 404, viz., 154 men, 188 women, and 62 children. I notice that the *average* number of persons on relief works, as given in the body of the Deputy Commissioner's report, during the week ending the 13th instant, was only 1,312, viz., 671 men, 387 women and 254 children; but there was a cause for such low figures, viz., the inclemency, for several days running, of the weather. This seems to have had the effect—notably at Panki, where the largest work (road construction) is in progress—of keeping all the labourers away for one whole day and two-thirds of them for the next day: not in itself a bad sign. Immediately the weather cleared again, they appear to have returned to the works in increasing numbers.

5. As regards the remarks recorded by the Deputy Commissioner on the subject of my orders respecting rates of wage, I beg to state that I still prefer to regard the works in the Palamau district as test-works, in so far that I still think it unnecessary and undesirable to bring into operation section 67 (1) of the Famine Code, as I am persuaded that the condition of the people does not at present require this relaxation of the general system of task-work, and that the result would only be harmful. I may here mention that, when a month ago, I raised the rate from the former *test-work rate* (viz., Re. 1-4 per 1,000 cubic feet) to the present *relief-work rate* (viz., Rs. 2-3 per 1,000 cubic feet), I did so under a misapprehension of facts. I was guided chiefly by the returns from the test-work then in progress at Lesliganj, the returns from which showed a rapid increase in numbers during several days (23rd to 25th January). It was not, however, until my visit to that place, on the 30th idem, that I found that the numbers had suddenly fallen off from 168 on the 25th to only 15 on the 26th; that they had again risen to 76 on the 27th, to fall back to 24 on the 28th and to 35 on the 29th. I then discovered, on questioning the officer in charge, that he was under the impression that it was his duty to endeavour to attract people to the work, and this he had done (on the 27th) by enlisting the good offices of a neighbouring zamindar in inducing his raiyats to attend, and by also informing the people that the work was only a test-work, and that the rates would be shortly raised if they kept on working. When they found, however, that the rate was not raised, they left off coming. My first impulse, on discovering this, was to recall my order allowing the adoption of *relief-work rates;* but in view of the cessation of imports and of the consequent marked rise in prices, I thought it best to let the order stand. I certainly do not, however, think that any further modification, in the direction desired by the Deputy Commissioner, is at present necessary. I would also point out that Mr. Renny, in making the calculation as to the rate of wage permissible under the Hon'ble Mr. Glass' scheme, is mistaken in thinking that the rates shown in the column of remarks, page 13 of that officer's note, are those to be adopted in the case of famine labourers, viz., annas 2½ per man, annas 2 per woman and annas 1½ per boy. Those are the ordinary *contract rates*, as I understand, given by the Public Works Department. The rates to be paid to relief labourers are those shown at page iv, Appendix IV, Government Resolution No. 420M.P.I., dated 25th January, and (at 9 seers per rupee) come to only 1½ annas to 2 annas per man, 1½ annas per woman, and 1 anna per boy. My views as to the sufficiency of the rate I have for the present fixed (Rs. 2-3 per 1,000 cubic feet) are contained in the accompanying extract from a demi-official letter, dated 18th instant, to the Deputy Commissioner (Appendix III). Most of the works are road works with burrow pits close to the road, and I am not yet prepared to allow any enhancement on such works on account of lead or lift. In tank work there is more need for differentiation, and I am instructing the Deputy Commissioner that he is at liberty to introduce, at such works, the scale prescribed in the Hon'ble Mr. Glass' memorandum taking the daily wage for the present as noted in the margin, with a proviso, in favour of the labourers, that the rate will not be less than Rs. 2-3 per 1,000 cubic feet This will mean that up to 100 feet lead with a 6 feet lift, no enhancement will be allowed on the above rate. For, say, 150 feet lead and 12 feet lift, the wage will be worked out as under:—

With rice at 9 seers—

	As.	P.
Each man	1	6
„ woman	1	6
„ boy	1	0

										As.	P.	As. P.
7 (men)	×	35 c.ft.	=	245 c.ft.	} and {	7	×	1	6	=	10	6
3 (women)	×	28 „	=	84 „		3	×	1	6	=	4	6
3 (boys)	×	21 „	=	63 „		3	×	1	0	=	3	0
				392 or, say, 400 c. ft						annas		18

$$400 : 1{,}000 :: 18 : x$$

$$x = \frac{1{,}000 \times 18}{400} = \text{As. } 45 = \text{Rs. } 2 \text{ A. } 13 \text{ per 1,000 c. ft., and so on.}$$

6. The Deputy Commissioner has been given the services of two overseers and two sub-overseers from the Public Works Department. He has also the

District Engineer and two road-cess overseers under his orders. But the district is a large one, the works are scattered, and the numbers attending them are rapidly rising. Under the circumstances, I am of opinion that an officer of the grade of Assistant Engineer should be deputed to assist in the duty of supervision, and I am addressing the Inspector of Works, Western Circle, on the subject. The Deputy Commissioner suggests that the Public Works Department should be asked to take charge of some of the larger works, *e.g.*, of the road work at Panki on which (as I learn from a post-card from the officer in charge) the numbers at work on the 19th instant had risen to 1,047. There is, however, only one Executive Engineer (at Ranchi, 100 miles by road from Daltonganj), and I do not know whether this could be conveniently arranged; and I think that the deputation of an Assistant Engineer for the present—and of one or two more, if necessary, afterwards—to work under the orders of the Deputy Commissioner, will meet requirements. I should be obliged for orders on this point.

7. For the present the Deputy Commissioner has placed Mr. Sunder in charge as Superintendent of the three western thanas, Husainabad, Garhwa, and Ranka; Deputy Magistrate and Collector Maulvi Muhammad Yusuf Ali of the three southern thanas, Mahuadand, Latehar and Balumath, he himself remaining in charge of the three central thanas, Daltonganj, Patan and Chhatarpur. If Government can give the services of a third officer as Superintendent, I propose to place him in charge of the three western thanas, and to place the three central ones under Mr. Sunder, as they include several important Government estates with which Mr. Sunder is well acquainted and where he could be usefully employed in supervising the construction of irrigation *bundhs* and other works of improvement.

MANBHUM.

8. A copy of the Deputy Commissioner's report, dated 19th instant, is enclosed (Appendix IV). The statements which should have accompanied the Deputy Commissioner's report have not yet arrived. They will follow when received.

9. The report shows clearly the existence of distress in the Gobindpur, Tundi, Nirsha and Chas thanas sufficient to necessitate the opening of relief works. It is true that the first test works, as I suspected when writing my last report, were not properly conducted on task work principles; but the mistake was soon remedied, with the result that on the 17th instant some 1,500 persons still attended on a task-work rate of 2½ annas per 100 cubic feet. The Deputy Commissioner was continuing the test for a few days longer, and I am authorizing him, should the numbers have kept up to this figure for one week, to raise the wage to the authorized relief rate of Rs. 2-3 per 1,000 cubic feet (as in Palamau). I am also requesting him to re-open test-works in the Jhalda thana at 2½ annas per 100 cubic feet, as I consider the former rate of 2 annas, in view of the prevailing high prices, somewhat too low.

10. In my last report I asked that two overseers and two sub-overseers might be placed at the disposal of the Deputy Commissioner in view of the unmistakeable signs of increasing distress. I think that Government should also be prepared to depute one or two officers of the grade of Assistant Engineer to the Manbhum district at short notice, should the necessity arise, as it probably will do shortly.

11. Regarding the question of loans for village works under the rules published with notification No. 69, dated 5th January last, I note that the the Deputy Commissioner proposes to await the result of the existing test-works before taking steps to make such advances and also to restrict his action in this direction to the parts of the district where distress has distinctly declared itself. I should be inclined to support a more liberal policy, and to permit Mr. Lucas to make loans of the kind referred to at once, and whenever he considers that there is a real demand for work, even though the necessity of opening relief works may not as yet have been proved. On this point I should be obliged for instructions from Government. In considering it, I think the effect on the general mass of the people of the high prevailing prices may fairly be allowed weight.

12. I am informing the Deputy Commissioner of Manbhum and Palamau of the arrangements made by Mr. Herald in Hazaribagh to afford relief to

respectable females at their homes by employing them in spinning cotton, through the medium of the educational officers, and am asking them to endeavour to set a similar system at work in their districts.

13. I am also asking Mr. Luson to follow the example of Mr. Renny in making advances to the head raiyats of Government villages where irrigation *bundhs* are needed, the advances to be worked off at a maximum rate which I have for the present fixed at Re. 1-9 per 1,000 cubic feet of earthwork.

HAZARIBAGH.

14. Copy of the Deputy Commissioner's report is submitted (Appendix V). The following is an abstract statement of the prices of common rice ruling at the *hâts* from which returns were received during the three last fortnightly period:—

	1st fortnight of January 1897.	2nd fortnight of January 1897.	1st fortnight of February 1897.
Number of *hâts* in which rice was selling at—			
Less than 8 seers per rupee	4	4	2
„ 8 seers and under 9 seers ...	23	27	25
„ 9 seers and under 10 seers ...	37	33	29
„ 10 seers and under 11 seers ...	11	8	2
Number of *hâts* from which returns were received ...	75	72	58

The above figures would have been more valuable for purposes of comparison, if the returns had been for exactly the same *hâts* in each fortnight. Not having been so, it is difficult to form any opinion from them as to the general rise or fall of prices; but the Deputy Commissioner states that there is no tendency in the prices for rice to get harder, though *makai* (Indian-corn) continues to rise and is now in many places as dear as common rice. I regret that up to the time of writing this, the Deputy Commissioner has not been able to furnish me with particulars regarding imports and exports of food-grains.

15. No relief works have yet been opened, but 37 works of different kinds are going on in 35 places at ordinary rates without, apparently, attracting more than the usual amount of labour. I notice, however, that 19 of the works in question are "building works" or "repairing wells" which, though useful in their way as affording employment, cannot be regarded as of any value as a test. Omitting these, there were 18 places where roads and other earthwork gave employment to 699 men, 81 women and 60 children at the ordinary rate of Re. 1-9 per 1,000 cubic feet. I am inclined myself, in view of the prevailing high prices, to doubt whether these works are in themselves a sufficient test, and I am recommending the Deputy Commissioner to offer work in other places wherever he may hear of there being a demand for it, lest he be suddenly taken unawares. At the same time I admit that the comparatively small number of women and children on the above works does not point to the existence of real distress.

16. The information given by the Deputy Commissioner on the subject of loans is somewhat vague, and I am asking him to give more definite particulars in his future reports, distinguishing between ordinary loans under the Land Improvement Loans Act, loans under the rules covered by notification No. 69, dated 5th January last, loans under the Agriculturists' Loans Act, and advances made for improvements in Government estates. As regards the latter, I am calling his attention to the system adopted by Mr. Renny in the Palamau district.

17. The system of giving relief to respectable females at their homes, by spinning cotton, through the medium of the subordinates of the Educational Department, is being supervised by Rai Jadunath Mukerjee Bahadur, the Honorary Secretary to the Hazaribagh Branch Famine Relief Fund Committee, and promises to work well.

18. The Deputy Commissioner does not, so far, require any assistance in the matter of establishment.

LOHARDAGA AND SINGHBHUM.

19. Up to the time of writing this, I have not received the fortnightly reports from the Deputy Commissioners. But there is no reason to apprehend any distress for the present in either district.

APPENDIX I.

No. 1871R., dated Daltonganj, the 17th February 1897.

From—R. H. RENNY, Esq., Deputy Commissioner of Palamau,

To—The Commissioner of the Chota Nagpur Division.

I HAVE the honour to submit herewith my fortnightly report under section 13 of the Famine Code for the fortnight ending 15th February 1897.

Report required under section 13 of the Famine Code for the fortnight from 1st to 15th February 1897.

2. *Preliminary.*—Under orders of the Commissioner of the Division, all relief works are treated as test-works still.

3. *The general condition during the half-month of the tract or tracts for which anxiety is felt.*—As stated in my previous report, the whole district of Palamau causes anxiety to be felt. The general condition of the district has grown worse since my last report was submitted. At the close of January 43 markets were selling rice under nine seers, 18 at nine seers, 10 above nine but below ten, 3 at ten, 1 over 10 seers but below 11, and one at 11 seers; but now 78 markets are selling at nine seers and under, 13 over nine seers but under 10, and none at over 10 seers. Again the weather has been very unsettled and unfavourable to the *rabi*, *mahua* and mango crops. Supplies have not increased since I last wrote.

4. *Prospect of crops.*—Owing to the unfavourable weather during the greater part of the fortnight under report, for it has been cloudy, stormy and wet with some hail, *khesari*, wheat, barley, gram, *masuri*, peas and mustard have been damaged to some extent, as those crops in blossom have had the flowers blown off by the storm and hail, and those in pod have suffered from the wet and cloudy weather by worms forming with pods and from want of sunshine. The mango crop is said to be lost by all blossom having been knocked off by wind, rain and hail, and the early *mahua* crop is said to have suffered severely from the wet, cool weather and want of sunshine. The weather still continues to be very cloudy and threatening.

5. *Food-stock.*—The food-stock is running low in many parts, and the supplies of edible jungle roots, fruits, sags, &c., are becoming exhausted. I received a telegram from the Commissioner of the Division, informing me that Government have sanctioned a bounty of eight annas per maund of Burma rice imported by traders to Daltonganj. I hope this bounty will prove a sufficient inducement to traders both in and out of the district to pour Burma rice into it. Mr. Savage, Collector of Gaya, also writes me that he is arranging to send me 10,000 maunds of rice by orders of Government, and Ghansom Dass, a Gaya merchant, has sent off a chalan of 600 maunds for sale at Daltonganj as a speculation. If the bounty scheme proves successful, all anxiety on the score of food-supply will be removed.

This has been countermanded in favour of the bounty scheme.
A. FORBES.

6. *Importation and exportation of grains.*—There is a *méla* at Daltonganj, and some rice was brought into the market here from Hariarganj; no doubt it has come from the tracts in the Shahabad and Gaya districts irrigated by the Sone river. It was not much. A little also found its way here from Lohardaga and Burway, both in the Lohardaga district. I have heard of no grain leaving the district.

7. *Rainfall.*—There was rain and small hail during the fortnight under report. On the night of the 11th a severe nor'wester with 68 inches of rain and some hail blew, and on the 12th there was heavy rain again: 59 inches was registered. There was rain also on 7th, 8th and 13th, but slight.

8. *Public health.*—The Civil Medical Officer informs me that the prevailing scarcity and high prices of food which have continued for many months past, has and is still telling more or less severely on the poorer-classes. No epidemics have, I am thankful to say, visited us.

9. *Emigration and immigration of famished people.*—There has undoubtedly been emigration, and chiefly from the Tori and Latehar parganas. There is every year more or less movement from these parts, but this year it has received impetus from the scarcity and high prices prevailing everywhere in the district and neighbouring districts. The people who have left has gone mostly to the tea districts of the Western Duars. No immigration to speak of.

10. *Condition of cattle.*—The weather, which is so unfavourable to crops, is most favourable to cattle, who are flourishing on the fresh grass brought up by the rain. There is very little, if any, cattle-disease prevalent up to date.

11. *Number and nature of public works open in or near the tract, distinguishing works—(a) under District Board or Municipal Committee, (b) under Public Works Department (Executive or Superintending Engineer.)*—All works open are managed by the Deputy Commissioner out of funds placed at his disposal by the District Road Committee. The Public Works Department have not been called as yet, but the time has arrived when the Executive Engineer, Chota Nagpur Division, should be sent down here with an adequate staff to take some of the works, in which the labourers nearing 1,000, off my hands. The time has also arrived when the Commissioner of the Division might with advantage allow us to drop styling our works "test" works, for a test is no longer needed, considering the number of people who resort to the works.

The works open are—

(1) At Panki	... ...	Road construction.
(2) At Lesliganj	... ...	Excavation of a tank.
(3) At Nowajaipur	... ...	Road construction.
(4) At Shahpur	... ...	Reservoir repairs.
(5) At Garhwa	... ...	Excavation of a tank.
(6) At Untari	... ...	Road construction.
(7) Latehar	... ...	Ditto.

and officers have been deputed to open works at Balumath and Ranka.

12. *Daily average number of persons employed on the works in each week of the half-month, distinguishing (i) men, (ii) women, (iii) children, as compared with the number employed in the previous half-month.*—The following statement gives the average number of persons attending daily at the so-called test relief works during the week ending 6th February 1897 :—

	Number of men.	Number of women.	Number of children.	Total.	Remarks.
1	2	3	4	5	6
1. Panki	98	65	82	245	
2. Lesliganj	117	46	35	198	
3. Latehar	7	3	2	12	
4. Garhwa	24	7	...	31	
5. Nawa	11	1	4	16	
Total ...	257	122	123	502	

The following statement gives similar information for the week ending 13th February 1897:—

	Number of men.	Number of women.	Number of children.	Total.	Remarks.
1	2	3	4	5	6
1. Panki	143	93	143	379	
2. Lesliganj	123	48	30	201	
3. Latehar	73	48	14	135	
4. Garhwa	104	49	...	153	
5. Nawa	47	17	19	83	
6. Shahpur	39	16	6	61	
7. Untari	142	116	42	300	
Total ...	671	387	254	1,312	

Figures for the average number of persons attending daily at test relief works in the previous half-month are as follows :—

	Number of men.	Number of women.	Number of children.	Total.	Remarks.
1	2	3	4	5	6
1. Lesliganj	39	12	21	72	
2. Panki	20	22	29	71	
Total ...	59	34	50	143	

As reported already, the distribution of gratuitous relief has been left in the hands of a Relief Committee appointed in each thana and outpost.

The following is the statement of average number of persons daily receiving gratuitous relief for the week ending 6th February 1897:—

	Number of men.	Number of women.	Number of children.	Total.	Remarks.
1	2	3	4	5	6
1. Ranka	12	20	24	56	
2. Latehar	...	5	2	7	
3. Lesliganj	14	17	2	33	
4. Garhwa	17	21	1	39	
5. Bisrampur	18	30	...	48	
6. Hariarganj	12	13	...	25	
7. Panki	12	8	3	23	
8. Chandwa	18	20	1	39	
9. Untari	6	11	...	17	
10. Bhownathpur	2	10	...	12	
11. Daltonganj	15	10	5	30	
Total ...	126	165	38	329	

The following statement gives the average number of persons daily receiving gratuitous relief for the week ending 13th February 1897:—

	Number of men.	Number of women.	Number of children.	Total.	Remarks.
1	2	3	4	5	6
1. Ranka	17	28	29	74	
2. Latehar	7	15	4	26	
3. Lesliganj	12	19	2	33	
4. Garhwa	16	22	1	39	
5. Bisrampur	15	23	...	38	
6. Hariarganj	10	13	...	23	
7. Panki	14	12	3	29	
8. Chandwa	20	27	1	48	
9. Untari	7	13	...	20	
10. Bhownathpur	8	11	7	26	
11. Chhatarpur	7	10	2	19	
12. Daltongnaj	26	20	10	56

13. There are two reasons for there not being more persons on the relief test-works during the fortnight under report, viz., (1) that owing to the rainfall it became possible to do some field work, and many persons left the relief works for the field works. This is as it should be; and (2) that the rate fixed by the Commissioner of the Division for all works, viz., Rs. 2-3 per 1,000 cubic feet, is nearly less by half in some cases, particularly tank excavation work, than what people are entitled to be paid under the note prepared by the Hon'ble Mr. J. G. H. Glass, C.I.E., Chief Engineer to the Government of Bengal, dated 24th December 1896, published with Bengal Government Revenue Department Circular No. 74, dated the 31st December 1896, and forwarded to all District Officers for information and guidance.

For example, let me cite a case falling under Table No. 3 (A), stiff and hard soil. According to Mr. Glass, the gang should consist of seven diggers, three women and three boys, and the task to be assigned would be 352 cubic feet; the cost at the rates given by Mr. Glass would be Rs. 4-15-6 per 1,000 cubic feet:—

$7 \times 32 = 224$
$3 \times 26 = 78$
$3 \times 20 = 60$

362 cubic feet the task.

362 : 1,000 :: Re. 1-12-0

$$\frac{1{,}000 \times \text{Re. } 1\text{-}12}{362} = \frac{28{,}000}{362} = \text{Rs. A. P. } 4\ 13\ 6$$

At the Commissioner's rate of—

	As. P.
Per man	1 10
„ woman	1 7
„ child	0 11

applied to the said gang of seven men, three women and three children, the wage would come to Re. 1-6-4, and this wage, applied to the aforementioned task of 362 cubic feet, would be Rs. 3-13-8, thus:—

362 : 1,000 :: Re 1-6-4

$$\frac{1{,}000 \times \text{Re. } 1\text{-}6\text{-}4}{362} = \frac{268{,}000}{362} = \text{Rs. A. P. } 3\ 13\ 8$$

But I am, under Commissioner's orders, allowed to pay only Rs. 2-3 for 1,000 cubic feet, no matter what the depth or lead; the difference therefore at Commissioner's rate is Rs. 3-13-8—Rs. 2-3 = Re. 1-10-8 per 1,000 cubic feet. This is a very large difference; and it is, therefore, no wonder that the people refuse to work on tank work, and leave such work and go long distances to other works. The importance of tank work is being pressed on Collectors of famine districts by Government, but I do not see my way to giving effect to the wishes of Government until the Commissioner is pleased to sanction tank work at the rates given in Mr. Glass' note.

14. No cases of relief under section 12 of the Famine Code were reported during the fortnight.

Statement showing particulars of advances under the Agriculturists' Loans Act in this district up to 15th February 1897.

Name of thana.	Name of village in which improvement is to be made.	Nature of improvement.	Amount of loans applied for.	Amount of instalments already advanced.			Average daily number of labourers during fortnight under review.	Rate of wage per 1,000 cubic feet.	Remarks.
				Up to end of previous fortnight.	During fortnight under review.	Total of columns 5 and 6.			
1	2	3	4	5	6	7	8	9	10
				Rs. 477	.....	Rs. 477			

No advances given in this fortnight, as under orders of the Commissioner the giving of such advances have been limited to purchase of cattle by tenants paying rents direct to Government, and this, too, under certain specified restrictions only. Under this Act, 356 applications covering Rs. 42,462 have been previously filed, and 13 applications covering Rs. 1,270, during the period under report.

Statement giving particuldrs of advances sanctioned under the Land Improvement Loans Act in the District of Palamau up to 15th February 1897.

Name of thana.	Name of village in which improvement is to be made.	Nature of improvements.	Amount of loans applied for.	Amount of instalment already advanced.			Average daily number of labourers during fortnight under review.	Rate of wage per 1,000 cubic feet.	Remarks (here state terms on which loan in each case has been made.)
				Up to end of previous fortnight.	During fortnight under review.	Total of columns 5 and 6.			
1	2	3	4	5	6	7	8	9	10
				Nil.					

No advances sanctioned during the half-month under report owing to there being no officer available for making the preliminary enquiries required by the rule. Officers have now been posted to the district, and I expect to do much in the line during the ensuing fortnight. Under this Act, 29 applications covering Rs. 19,475 have been previously filed and 8 applications covering Rs. 3,350 during period under report.

Statement showing particulars of expenditure on Agricultural Improvements in Government Estates in the District of Palamau for the fortnight ending the 15th February 1897.

Name of Estate.	Name of village.	Nature of improvements.	Estimated total cost of improvement.	Amount of instalments already advanced.			Average daily number of labourers during fortnight under review.			Rate of wages per 1,000 cubic feet.	Remarks.
				Up to end of previous fortnight.	During fortnight under review.	Total of columns 5 and 6.	Men.	Women.	Children.		
1	2	3	4	5	6	7	8	9	10	11	12
			Rs. (*Vide* preceding statement.)	Rs. A. P. 4,358 12 9	Rs.	Rs. A. P.					
Palamau Government estate.	Mundaria ...	Embankment ...	300	.....	100					The same as given in the previous statement.	
	Cheohandha ...	Do. ...	150	...	75						
	Jungoor	Do. ...	(Already shown in the previous statement.)		50						
	Budhuchak	Do. ..	100	.....	50						
	Kundri	Do, ...	100	.....	50						
		Total ...	.....	4,358 12 9	325	4,683 12 9	Not available.				

Resolution), at 9 seers per rupee, will be—

		As.	P.
7	× 1·6 =	10	6
3	× 1·6 =	4	6
3	× 1· =	3	0
Total	...	18	0

annas for 600 cubic feet = Re 1-14 for 1,000 cubic feet, or if the men are all paid as *able-bodied*—

		As.	P.
7	× 2 =	14	0
3	× 1·6 =	4	6
3	× 1 =	3	0
Total	...	21	6

for 600 cubic feet = Rs. 2-3-10 for 1,000 cubic feet. Again, if you take an equal number of men, women and children, you get $\frac{1800}{93}$ = 19 men, $\frac{1800}{78}$ = 23 women, $\frac{1800}{57}$ = 31 boys—

		As.
and	19 × 2 =	38
	23 × 1·6 =	35
	31 × 1 =	31

3)104

35 or about Rs. 2-3 per 1,000 cubic feet.

So that the rate I fixed, viz., Rs. 2-3 per 1,000 cubic feet is the *highest* rate allowable, taking all the men as *able-bodied*. If you take them as "adult men unable to do a full task," then the rate should be cut down to Re. 1-14 per 1,000 cubic feet, but I do not wish to do this yet. But if rice falls to 10 seers per rupee, we shall have to make a reduction.

Our rates at present are *full* rates, and I agree with Sir A. P. MacDonnell that in ordinary works lead and lift may be disregarded. It is only where, in the centre of a big tank, for instance, the lead becomes excessive, any increase should be allowed. This is another reason why I wish Sunder to be in charge of the big tanks about Lesliganj, &c. He is a thoroughly intelligent man, and will understand my instructions much better than most native Deputies or Sub-Deputies.

APPENDIX IV.

No. 1555R., dated Purulia, the 19th February 1897.

From—H. LUSON, Esq., I.C.S., Deputy Commissioner of Manbhum,
To—The Commissioner of the Chota Nagpur Division.

I HAVE the honour to submit my fortnightly report for the period 1st to 15th January 1897 in accordance with section 24 of the Bengal Famine Code.

2. (*1*) *Area affected during the period under report and approximate estimate of the portion of the population affected; number of relief circles and of officers in charge.*—In my report No. 1459R., dated the 3rd instant, for the period 16th to 31st January 1897, submitted in accordance with section 13 of the Code, I gave the following areas, with population, as those for which anxiety was felt:—

Thanas.	Area in question.	pulation.
1	2	3
Gobindpur and Tundi ...	478	109,530
Nirsha	170	58,675
Chas	237	100,487
Jhalda	396	102,320
Total ...	1,281	371,012
Figures for whole district ...	4,147	1,193,328

In my report No. 1356R., dated the 19th ultimo, submitted in accordance with section 10 of the Code, I did not include the Jhalda thana in the area likely to be affected. It

was added in my report of the 3rd instant, as the police report under section 161 of the Code stated that the labouring classes were in distress, and some people were not getting two meals a day; and as the tahsildar of the Begunkodar Ward's Estate in a similar report stated that the poorer classes in his tahsil were in distress, being unable to get work or sufficient food, a test work was accordingly opened at the village of Khatgaon, in the Jhalda thana, on the 9th instant, under the personal superintendence of the District Engineer. This work was to be the construction of the *bundh* on a somewhat extensive scale, which had been sanctioned from the funds of the Begunkodar Ward's Estate. The District Engineer reports that as a test work it has been a failure, as only 12 men were attracted to it at the rates allowed, viz., 2 annas per 100 cubic feet, with a lead of not more than 50 feet, and half an anna more for every additional 50 feet of lead. The District Engineer was interviewed by a large number of labourers and the poorer class of cultivators, who complained of very great privations, but they declined to work for less than 3 annas a 100 cubic feet. Regarding his recent visit to Khatgaon to start this work, he states:—"I have seen several parts of the Jhalda thana, and from what I heard and saw, I have no hesitation in saying that there is some abnormal distress amongst the poor cultivators and labourers; but they did not appear to me to have come to the end of their own resources. I quite believe that many of them have to supplement their little stock of rice with a good deal of jungly fruits, bulbs, roots, &c., but they did not appear to be any worse in health for all that."

It is the custom in this district for the lower classes to eat jungle products, and in view of the failure of the test-work at Khatgaon and the District Engineer's report I think the Jhalda thana need not be considered an affected area for the present. The reports of the Jhalda police and the tahsildar recently received are also somewhat more reassuring; but as regards the other areas I think they are clearly affected, viz.:—

Thana.	Area in question.	Population.
1	2	3
Gobindpur and Tundi ...	478	109,530
Nirsha	170	58,675
Chas	237	100,487
Total ...	885	268,692
Figures for the whole district ...	4,147	1,193,328

During the fortnight I myself visited the thanas of Gobindpur, Tundi and Nirsha, and I despatched the Sub-Deputy Collector, lately in charge of settlement operations in this district, to Chas. Three best relief works were opened, as mentioned in my last report, in the Tundi thana on the border of the Nirsha jurisdiction. On my visit to these works, I found (see below) that they were not being conducted on the task work system. I closed one entirely, and reopened the other two on strictly task principles. They have not yet been in work on these principles for a sufficient time to enable me to judge with certainty of their result. A test-work is in progress at Chas, but the result will not be certain for some days. Notwithstanding that distress has not yet been fully established by test-works in the Gobindpur, Tundi, Nirsha, and Chas thanas, I have little doubt of its existence. I myself examined, with the Civil Hospital Assistant at Gobindpur, a large number of the persons in receipt of gratuitous relief there, and found most of them anæmic and emaciated. I also examined various of the persons being relieved in this way at Pokhuria. At the beginning of the fortnightly period I was on tour in the south and centre of the district, and have thus been able to make a comparison, from what I have seen myself, of the parts of the district which are best off with those which are mentioned above as affected. No relief circles have yet been formed. As soon, however, as the test-works declare the necessity, which I expect will be in a few days, I shall form four relief circles corresponding with the four thanas above mentioned.

3. (2) *General state of the affected tracts during the half-month under report; crop prospects; foods-tocks; importation or exportation of food-grains; rainfall; public health; emigration or immigration of famished people: condition of cattle.*—In the areas in question, the chief features are want of work for the labourers, and failure of many of the very poor, who are usually dependent upon charity, to obtain sufficient food to keep them in health. The labourers are not yet reduced for want of food. I went round all the gangs on the test-works near Pokhuria, and agree with the Revd. A. Campbell, who accompanied me, that they did not show signs of emaciation. A number of cultivators complained to me at Gobindpur, and the least seemly of them said that their appearance was due to hunger; but the Civil Hospital Assistant by whom I had them examined declared that they showed no signs of want of nourishment, being lean from old age and other causes. Our chief care in the affected thanas should, I think, be devoted just now to the beggars, widows, orphans and others without support who are unable to work.

Regarding crop prospects, I have to say that in these thanas there is very little on the ground except sugarcane which has lately been transplanted and will not be reaped for ten months, and some *arhar* in the Chas thana There are in places patches of *rabi* (wheat and barley chiefly), but in the Tundi thana there is scarcely any *rabi* at all. There in, however, a great food staple in all the affected thanas, and especially in Gobindpur, Tundi and Nirsha, viz., the *mahua* tree. If this yields a full crop, a very great deal of our anxiety will for the present be removed. It is reported that the *mahua* was damaged somewhat in thana Chandil by hail, but in the affected thanas and in the rest of the district it has been benefited by the recent rain. If during the next few weeks we have fine weather, the crop should be a good one. Mangoes this season will yield very poorly, but they are not of much account.

As to food-stocks, I think that the mahajans and the better class of cultivators have stocks sufficient to support the population in their neighbourhoods for a considerable time; but as long as there is no work to do in the fields, they will not share their grain with those who have none.

Two thousand five hundred and sixty-two maunds of food-grains were imported during the week ending the 13th instant from outside the district at the stations on the Jharia extension of the East Indian Railway, which runs through thanas Gobindpur and Nirsha, and not far from thanas Tundi and Chas, as compared with 1,850 maunds in the previous week. I found that there is also a considerable importation of grain from Barakar by road into thanas Nirsha and Tundi. I am endeavouring to have this registered. There is, I am glad to say, little difficulty about the supply of grain in the affected areas. Its exceedingly high price and the poverty of the poorer classes cause the trouble here. The number of people wishing to emigrate from the district to Assam is increasing, but more people go to the railway works in the next district: numbers of people are reported to have gone to the Raniganj subdivision to find work at the collieries, but have returned unsuccessful, as the coal trade is dull. A good many up-country men have come into this jurisdiction to find work in the coal-mines here, but many of such mines have closed or reduced their establishment.

No cattle-disease is reported from the affected thanas. Cow-pox exists in several other thanas, and I am arranging with the Civil Veterinary Department to obtain the services of a suitable officer to investigate it. The recent rain has for a time improved the supply, of food and drink for cattle.

4. (*3*) *Number of relief works open in or near the affected tracts; the numbers, if any, paid by daily wages and those paid by task work.*—There is no "relief work" open in the district, but there are nine test-works in progress; of these, seven are being carried out at the expense of the District Road Cess Fund, one at the expense of a Coutr of Ward's estate, and one at the expense of an Encumbered Estate.

The first test-works opened were those in the Gobindpur subdivision which were started on the 30th ultimo. On the 31st idem there were employed on them (i) 104 men, (ii) 58 women and (iii) 18 children. By the 3rd instant the total number had risen to 1,558. The numbers further increased till they reached with dependents 2,871. Last week I visited these works and superintended the measurement by the subdivisional overseer of the work done. Two of the works were the excavation of new tanks, and the third was the re-excavation of an existing tank. The workers were paid daily wages at the following rates, 6 pice for a man, 5 pice for a woman and 3 pice for a child. The soil on which these works were being executed was very stony and hard, and stout pickaxes were required. Taking, however, the lowest tasks for work in hard soil under famine conditions given in the table forwarded with Bengal Government's Revenue (Agriculture) Circular No. 74, dated the 31st December 1896, viz., 53 cubic feet a day for a man, 43 cubic feet for a woman and 32 cubic feet for a child, and reducing these figures to 50, 40, and 30, for easy calculation, I worked out the following results:—

	Cubic ft.
Pokhuria East Tank—	
Work which should have been done at these rates ...	275,400
Work actually done (a little less than)	100,000
Pokhuria West Tank—	
Work which should have been done	169,290
Work actually done (about)	44,000
Pandua Tank (*re-excavation*)—	
Work which should have been done	202,300
Work actually done (a little less than)	40,000

The ground is, however, generally much harder than that of the Gangetic plain for which the tasks in question were prescribed; the soil of the Pokhuria west tank is particularly hard; and the work on the Pandua tank consisted of removing mud (an unsuitable work as a test, and I have closed this work). It was nevertheless clear that full tasks were not exacted. The workers were all arranged in suitable gangs and their places properly marked out, but their work was not properly measured up, and there was no doubt idling. The Subdivisional Officer explains that more work might have been done, but at first there were only a few suitable implements. The Subdivisional Officer, however, neglected to observe the provision in section 11 of the Famine Code, that test-works are to be opened on the strict condition that labour is paid for at task rates, not daily wages. He treated these works

as relief works. As soon as I found out, after measurement of the work, the state of affairs, I stopped further payment on daily wages, closed the Pandua work as unsuitable for several reasons, and directed the reopening of the other two works strictly on the task-work system of 2½ annas a hundred cubic feet. Heavy rain just then happened to soften the soil, and the workers consented to work at this rate. A report which I have just received from the Subdivisional Officer states that, although the supply of tools is not yet quite sufficient, both the works are fully occupied with workers (about 1,500, including men, women and children), and there were on Tuesday, the 17th instant hundreds of others begging for work and offering to work for less than 2½ annas a 100 cubic feet. Thus, though a mistake was made by the Subdivisional Officer in the method of conducting these works, it appears now that they disclose the existence of distress. I consider, however, that they should be tried for some days further at the rates above quoted. In consequence of the recent rain, ploughing is now going on apace in most of the districts, and it is desirable to see how this affects the workers on the test-works.

I have no exact information as to the works being conducted by private agency. A few such works are being carried out on a small scale by zamindars, talukdars, &c., but the amount of work on this account is less than usual at this time of year, as the persons mentioned cannot, owing to the high price of food, afford to spend much on them. In the Tundi Encumbered Estate and the Nagarkeari Wards' Estate in the Gobindpur thana, I have already allowed a number of applications for small works such as petty embankments. In this district not much assistance is to be expected from the zamindars; but as a number of their estates are under management, I am able to afford considerable aid to the tenants and their dependents. I have already thrown open to free grazing all the forests on such estates, and have declined, in accordance with what I believe is generally customary, to enforce for the present at least any claims by tahsildars for payments for woods, &c., taken by persons from these forests for their own use.

(4) *Number of poor-houses open and scale of food distributed.*—No poor-house has been opened, but gratuitous relief is being administered at Gobindpur under the superintendence of the Sub-Registrar and at Pokhuria under the superintendence of the Revd. A. Campbell of the Sonthal Free Church Mission. At all the police thanas and outposts in the district funds are at the disposal of the officers in charge for gratuitous relief. The provisions of Chapter V of the Code are being followed. The District Superintendent of Police is devoting his attention to this. Grain doles are almost invariably given. The recipients are mostly old men, women and children and disabled persons. The scale is ½ a seer of rice for an adult and ¼ seer for a child. Section 44 of the Code only provides for such doles being in grain. I have found it necessary, however, to add salt at the rate specified in section 99, viz., ¾ oz. to a pound of rice. I discovered that a number of the people who received doles of rice were eating it without salt. This much diminished the value of the doles to them. The doles are made in the presence of the distributing officer.

I have, in consultation with the Subdivisional Officer, selected a site for a poor-house at Gobindpur, but the time has not yet come for opening such an institution I think. If the *mahua* crop is a good one, the necessity for poor-houses will be deferred.

The gratuitous doles appear to me to be the best form of relief for the poorest and most helpless people at present.

(5) *Organisation for employment of artizans, women, &c., at their houses.*—Nil.

(6) *Organisation for the distribution of grain doles or money doles.*—See above under (4).

(7) *Relief in kitchens.*—Nil.

(8) *Number of persons to whom loans under the Land Improvement Act or under the Agriculturists' Loans Act have been made.*—I have not made any such advances during the fortnight. I have Rs. 7,950 in hand for such grants. By the orders of the Government of India this money is to be used for the employment of labour under famine relief conditions and restrictions. I am accordingly waiting to see where, on the results of the various test-works in progress, this money can be most advantageously allotted: 112 applications for such loans have been received during the fortnight; of these, 89 were filed at Barrabazar in the south of the district in the neighbourhood of which I was in camp on the 5th, 6th and 7th instant There is no apprehension of distress in that part of the district at present.

(9) *Financial statement for the fortnight*—

	Rs.	A.	P.
A.—Receipts—			
Grants from the district Road Cess Fund	2,435	11	0
B.—Expenditure—			
(*a*) On 3 test-works opened in Gobindpur subdivision on 30th January 1897 (inclusive of amount spent on 30th and 31st January)	1,204	3	9
Tools and baskets	546	15	0
(*b*) On relief by grain or money doles	395	0	0
Total expenditure	2,146	2	9
C.—Balance	289	8	3

(*10*) *Account of economic condition of the affected tracts and of crops affected and extent to which they have suffered; the contingencies on which the probable duration of distress depends; the position of the affected area as to local trade; food-supply and communications and other general information which may be useful.*—These items have been dealt with in my previous reports quoted above and in this report *supra*.

The following regarding the affected thanas are taken from the police reports submitted under sections 1 and 161 of the Code.

Thana Gobindpur.—Some 10 or 15 strangers in a destitute condition daily pass down the Grand Trunk Road, and are relieved. Many people in the thana require gratuitous relief, and are receiving it.

Thana Nirsha.—The people who cannot work and the labouring people who have others to support are in distress, and are coming to the thana for relief.

Thana Tundi.—Most of the poorer people are in distress, but only those who cannot work are being relieved at the thana.

Thana Chas.—Needy and starving persons are coming to the thana and getting relief. The reports of the tahsildars employed in Wards' and Encumbered Estates in these thanas are to the effect that the poorer people are destitute, and the poorer labourers do not get sufficient food.

The Sub-Deputy Collector's report concerning thana Chas is to the effect that relief will be required there. A relief work is in progress under a sub-overseer.

(*11*) *The condition of the tract outside the affected thanas.*—The reports do not show that, except in the case of the Katras outpost of the Topchanchi thana adjoining the Gobindpur thana, any material change has taken place during the fortnight. In areas adjoining the thanas which I have mentioned above as affected, four test works in different places are in progress, and I am about to open another.

A death from starvation—the only one reported in the district—was reported from the Katras outpost as having occurred on the 10th instant. The District Superintendent of Police who was in camp with me in Gobindpur on receipt of this information at once visited the village (and adjoining villages) in which this death was said to have occurred. He reports that the person in question was a young man of 25 or 30, whose crops had failed and who had been unable to obtain work. He had been to Katras to borrow money, and on his return was taken ill with purging and vomitting, and died shortly afterwards. The District Superintendent is not sure that he died of starvation, but thinks that he ate some jungle products which poisoned him. The people in the neighbourhood clamoured for assistance from Government, but told Mr. Briscoe that they would work at earth-cutting for 9 pice a 100 cubic feet; they said they would work for the usual rates. He thinks that test-works there would probably not draw at present. Such a work is being opened at Katras to-day.

On the 17th instant I telegraphed to you that the recent rain throughout the district had been very timely in benefiting the *mahua* and in rendering the soil fit for ploughing. I have recently seen many ploughs at work, and am in hopes of a good *mahua* crop. The outlook is therefore somewhat higher than when I submitted my last report. My action is now being devoted to the effective working of test-works in different places and to the distribution of gratuitous relief freely, but not unduly, to the helpless poor. I expect, during the present fortnight, to have to open two regular relief works in the Gobindpur subdivision and to give out a large portion of the amount I have available for advances.

The map prescribed in section 27 of the Code is herewith submitted. The statements prescribed in sections 26 and 27 idem will follow immediately.

APPENDIX V.

No. 1619R., dated Hazaribagh, the 17th February 1897.

From—The Deputy Commissioner of Hazaribagh,
To—The Commissioner of the Chota Nagpur Division.

Fortnightly Famine Report of the district of Hazaribagh under sections 13 and 24 for the fortnight ending 15th February 1897.

General condition.—There has been no marked change during the fortnight. In view of possible distress among certain sections owing to continued high prices of food-grains, I have developed plans for assisting those in want of every grade by providing work in aid for them. Road work and works of improvements have been arranged for at 35 different places in the district. Cotton thread-making will be given to *bhadralok* and zenana women. Kitchens will be opened where helpless people are found from enquiries now in progress. I do not yet see reason for thinking there will be "pressure before April."

2. *Prospects of crops.*—*Rabi* promises well. *Mahua* not cut yet. There has been much cloud and rain, which is unfavourable, if it continues another week, to the *mahua* crop.

3. *Prices.*—Statements showing number of *hâts* and the selling price (per rupee) of rice, *marua*, *makai* and *mahua* for the first two weeks of January and of February are submitted herewith. Prices of rice show no tendency to get harder, but *makai* is now in many places as dear as common rice.

4. *Importation by rail.*—Statements 8 and 9 will follow.

5. *Statistics of traffic on the Grand Trunk Road (Dunwa).*—I ordered statistics of traffic down the Grand Trunk Road to be prepared, and will give this fortnight, if the figures are received, or next fortnight at latest.

6. *Rainfall*—

At Sadar	...	...	...	...	1·16
„ Giridih	...	...	...	...	0·80

7. *Public health.*—Very good.

8. *Emigration.*—Three thousand one hundred and forty-four persons emigrated from this district during the month of January 1897, against 959 persons in January 1896. This is emigration through depôts and irrespective of free emigration to the Duars, of which no figures are kept.

9. *Number and nature of public works opened in the district.*—A comparative statement showing the particulars required is submitted herewith. Works opened within the last few days are not shown.

10. *Test works.*—The works shown in the above statement against Road Cess Department are to be treated as test-works. If they attract large crowds of labourers, they will be converted into regular famine works.

11. *Relief under section 12, additional.*—Rupees 230 have been paid to the thanas and outpost officers for giving gratuitous relief as directed in section 12 of the Famine Code. Every thana has been giving small amount of relief.

12. *Loans.*—Five applications for loan of Rs. 1,650 have been received up to date against nil in the previous year. Further applications are expected. *Parwanas* have been issued everywhere calling for them. Applications will be dealt with next month when the full number has been received.

13. *Condition of cattle* —Very little disease reported.

14. *Rates of wages.*—The rate given on ordinary works is Re. 1-9 per 1,000 cubic feet for municipal estate and road cess, or As. 2-6 per *laggi* of 10 × 10 feet Public Works Department rates remain unchanged.

15. *Organisation for employment of artisans, women, &c.*—*Parwanas* have been issued to all thana and outpost officers to prepare, with the assistance of the chaukidar of each village, lists of *bhadralok* and other persons unable to work at earthwork who require relief. The system of making thread from cotton has already been introduced into the town of Hazaribagh. The number of persons employed in cotton-spinning during the fortnight under report was 109 women. The quantity of 3 maunds and 15 seers of cotton was distributed during the fortnight. Only one seer of thread was received from one woman, and annas 6 was paid to her as compensation for the labour. When the mufassal lists are ready, the services of the gurus and inspecting pandits will be utilized in distributing cotton and doles in the mufassal, unless regular relief circles are called for in any locality.

16. *Relief in kitchens.*—Particulars are given in Statement 6 annexed.

STATISTICAL DEPARTMENT,
The 8th March 1897.

M. FINUCANE,
Secretary to the Government of Bengal

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 586Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 9th March 1897.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 28th February 1896 and 1897 is shown in the following statement:—

	22ND TO 28TH FEBRUARY			
	1896.		1897.	
1	2	3	4	5

Other food-grains, such as jowar, barley, oats, &c.	.....	.....	1	1
Total ...	41,859	56,975	197,727	2,69,128

The total quantity of rice received from Burma was 102,395 cwts., against 89,635 cwts. in the preceding week. The entire supply imported from Burma since the 1st November 1896 aggregates 1,313,544 cwts. No grain came from Chandbali in the week under report against 19,067 cwts. of rice and 8,696 cwts. of paddy in the corresponding period of last year. The importation of rice and paddy from Balasore fell off from 9,215 cwts. in the corresponding period of last year to 4,980 cwts. For the third time since December last a considerable supply of wheat arrived from the United States; this third supply amounted to 82,152 cwts., the total quantity received up to date being 394,134 cwts. The decline under gram and pulses was due to the cessation of imports from Chandbali, which contributed 3,728 cwts. in the same period in 1896.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the last week of February 1897 is compared with the figures for the corresponding period of 1896 :—

	22ND TO 28TH FEBRUARY			
	1896.		1897.	
1	2	3	4	5
Food-grains.	Cwts.	Mds.	Cwts.	Mds.
Rice	274,815	3,74,054	66,223	90,137
Paddy	736	1,002	.....	.....
Wheat	1,025	1,395	125	170
Gram and pulses	17,403	23,687	7,421	10,101
Other food-grains, such as jowar, barley, oats, &c.	1,683	2,291	3,070	4,178
Total ...	295,662	4,02,129	76,839	1,04,586

Foreign Ports.

The export trade in rice with foreign ports declined from 231,023 cwts. in the corresponding period of last year to 64,955 cwts. during the week under report. The exports in the preceding week were 137,657 cwts. There were no exports at all to the United Kingdom, Barbadoes, Muscat, Ceylon, Port Elizabeth, Aden, Persia and ports in the east coast of Africa, against 175,184 cwts. carried to those ports in the corresponding week of last year. To States other than Muscat, in Arabia 16,920 cwts. of rice were shipped during the week, against nil in 1896, while Mauritius imported 43,049 cwts., against only 22,996 cwts. in the corresponding week of last year. On the other hand, shipments to Natal were reduced from 21,286 cwts. to a trifling figure, namely, 439 cwts.

Indian Ports.

In the case of the coasting trade, the exports of rice decreased from 43,787 cwts. to 1,268 cwts.; those of paddy from 736 cwts. to nil; those of wheat from 878 cwts. to 125 cwts.; those of gram and pulses from 7,765 cwts. to 1,843, and those of miscellaneous food-grains from 487 cwts. to 10 cwts. The decrease in the rice trade was chiefly in the supplies carried to Bombay and Madras.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 28th February 1896 and 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 587*Statistics.*—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 9th March 1897.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 14th February 1897, as compared with the trade of the corresponding period of 1896 :—

IMPORTS.

	1897 ...	47,013	8,917	55,930	76,127

Imports. Of the total increase of 8,635 cwts. in the import trade of Chittagong, 4,203 cwts. were in paddy and 3,092 cwts. in rice received from Burma. The imports into Balasore fell off by and 352 cwts. on account of smaller despatches of wheat and gram and pulses from Calcutta.

Exports. In the case of Puri, the total exports showed an improvement of 3,626 cwts. The shipments of rice to Mauritius amounted to 14,106 cwts., against *nil* in 1896, while nothing was shipped to Madras and Columbo during the week under report, against 4,158 cwts. and 6,322 cwts., respectively, in 1896. The falling off of 37,314 cwts. under Balasore is attributed to smaller supplies of rice, paddy and gram and pulses sent to Calcutta. In consequence of the cessation of the exports of rice and gram and pulses to Indian ports, the trade of Cuttack also declined by 12,452 cwts.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 585 Statistics.—The following statement shows the quantities of rice and other food-grains carried by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 27th February 1897, both dates inclusive. The total quantity so exported was 18,12,050 maunds, but information is available regarding the destination of 16,64,028 maunds only. Of the latter quantity, 11,82,395 maunds (or more than seven-tenths) were exported to the North-Western Provinces and Oudh; 2,31,852 maunds (or a little over one-seventh) to various parts of Bengal; and the rest (2,49,781 maunds) to other parts of India.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 9th March 1897.

COMPARATIVE STATEMENT OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of January and February 1897, as compared with the corresponding fortnights of January and February in 1896, are published for general information. The latest available prices of common rice in Cachar and Sylhet are also published.

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT, *the 9th March 1897.*

Quantity obtainable for a rupee.

WEATHER AND CROP REPORT.

For the week ending the 8th March 1897.

Burdwan.—No rain. Weather hot. *Rabi* being harvested. A fair outturn is expected in Sadar and Katwa subdivisions. Outturn in Kalna and Raniganj not as good. Sugarcane is being pressed and *til* is being sown. Fodder and water sufficient. Common rice selling as follows:—

	Srs. c.	Srs. c.	
Sadar	10 0	to 12 0	per rupee.
Kalna	10 8	to 11 0	
Katwa	10 15	to 11 2	
Raniganj		10 8	

Birbhum.—No rain. Weather getting hot. *Rabi* crops poor for want of rain. Price of common rice at Sadar 9¾ seers, and Rampur Hát 11 seers per rupee.

Bankura.—No rain. Weather becoming hot. Pressing of sugarcane still continues. Ploughing stopped again, and harvesting of *rabi* has begun in places. Fodder is everywhere sufficient. Water insufficient in a few places. Rice selling at 11½ seers per rupee at Bankura and Vishnupur. Considerable export of rice.

Midnapore.—No rain. Weather hot. Threshing of *aman* still going on. *Boro* is being sown in Gopiballavpur and Binpur. Prospect of indigo and *rabi* good. Sugarcane is still being pressed. Cattle-disease reported from Jhargram, Dantun, Salbani, Sabang, Naraingarh, Binpur, and Ramnagar. Fodder and water sufficient. Common rice selling as follows:—

	Srs		
Sadar		11	per rupee.
Contai	12	to 14	
Tamluk		10½	
Ghatal		12	

Hooghly.—No rain. Want of rain felt throughout the district. *Rabi* suffering for want of moisture. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather hot with strong south-easterly wind. Prospect of *rabi* not good. Fodder and water sufficient. Common rice sells from 8½ to 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather hot with south wind. Prospects of crops poor. Some preparation of lands is going on, but more rain is wanted for ploughing. Common rice sells as follows:—

	Srs. c.	
Sadar	9 to 11 0	per rupee.
Barasat	10 0	
Basirhat	10 8	
Diamond Harbour	10 10	

Nadia.—Rainfall nil. Weather getting very hot. Wheat and barley are being reaped and threshed in places. Ploughing almost stopped for want of rain. Water-supply generally deficient. Fodder insufficient in places. Common rice sells from 8 to 10 seers 11 chitaks per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers on relief on Saturday, 6th March—

		Total	...	10,329

Murshidabad.—No rain. Weather seasonable. Harvesting of *rabi* crops commenced. Pressing of sugarcane still continues. State of indigo and mulberry good. Fodder sufficient. Common rice sells as follows:—

	Srs.	
Sadar	10	per rupee.
Kandi	11	
Jangipur	10½	

Four test-works open. Numbers on relief on Saturday, 6th March—

	Men.	Women.	Children.	Total.
Test-workers	324	42	9	375

Jessore.—No rain. Days hot, nights cool. Harvesting of *rabi* crops nearly over. Sugarcane is being pressed. Rain badly wanted for sowing *til* and *boro* seedlings, and for preparation of lands for *aus* and jute. No cattle-disease reported Fodder sufficient. Want of water is being felt in some places. Common rice sells as follows:—

	Srs. c.	
Jessore	10 to 11 8	per rupee.
Jhenida	10 0	
Magura	10 to 10 14	
Narail	10 10⅜	
Bangaon	10 to 11 0	

Khulna.—No rain. Weather hot. *Boro* crop fair. Rain wanted. Common rice sells as follows:—

	Srs.	
Khulna	10 to 11	per rupee.
Bagerhat	12½	
Satkhira	9½	

Wages calculated at 10 seers per rupee. Five deaths of cattle reported from Paskohima in Baliaghata. Fodder available. Water getting scarce. Numbers employed on four relief-works—

	Men.	Women.	Children.	Total.
Relief-workers	436	Nil	43	479
Otherwise relieved	301	1,136	586	2,023
Total ...				2,502

Rajshahi.—Rainfall at Naogaon 0·39; no rain elsewhere. Prospects of existing standing crops very poor. Transplantation of *boro* paddy still going on in Nator. Sowing of jute and *bhadoi* crops commenced in places. Lands are being prepared for *aman* paddy. Fodder available everywhere. Scarcity of drinking-water reported from some places. Price of rice ranges between 8¾ and 12 seers per rupee. Three test-works open. Numbers employed on Saturday, 6th March—

	Men.	Women.	Children.	Total.
Test-workers ...	426	Nil	9	435

Price of rice at relief-works, 9½ to 10 seers per rupee.

Jalpaiguri.—No rain. Days warm, nights cool. Sowing of *betri* paddy and jute retarded for want of rain, and standing crops getting bad for want of moisture. Drinking-water and fodder-supply fair. Average price of common rice, 8½ seers per rupee.

Darjeeling.—No rain. Weather seasonable. Hills—Wheat, *tori* and barley coming to perfection; lands being prepared for planting *bhutta* and other crops. Terai.—Tobacco on the ground; ploughing for sugarcane, jute and *bhadoi dhan* going on. Price of coarse rice:—

	Srs.	
Hills	8	per rupee.
Terai	9 to 11	

Bhutta sells at 13 to 22 seers per rupee.

Rangpur.—District average rainfall 0·16. No rain at Sadar. Lands mostly prepared for *aus* and jute, and sowing of *aus* going on. More rain wanted. Common rice selling at 9 to 11 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall ·95. Sowing of jute and *kavni* commenced. Prospects of jute and *aus* much improved. Fodder and water sufficient. Common rice selling at head-quarters 10½ seers per rupee, and in the interior from 9 to 11½ seers per rupee.

Pabna.—Rainfall at Sadar 0·13, Sirajganj 0·47. Weather warm and partially cloudy. Prospects of standing crops indifferent. *Cheena* very fair where sown. Common rice selling from 8 to 10 seers per rupee in different places. Fodder sufficient. Number of test-workers on 8th March—men 52 and children 55.

Dacca.—Rainfall at Sadar 1·18, Manickganj ·31, Narainganj ·04. Weather hot. The recent rain has done some good to the standing crops. More rain is wanted. Fodder available. There is want of drinking-water in some parts of the district. No cattle-disease. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·00. Weather cloudy with prospect of rain. The recent rain will be beneficial to *boro* and other spring crops. Cultivation for *aus* and jute going on. Average price of common rice 10 seers per rupee.

Faridpur.—No rain. Weather seasonable. Harvesting of *rabi* in progress. Common rice selling at 10 to 11 seers per rupee. Fodder and water available.

Backergunge.—Rainfall nil. Weather seasonable. Prospects of crops poor. Common *aman* rice sells from 9½ to 12 seers per rupee.

Tippera.—Rainfall at Sadar 2·27. Weather unsettled; cloudy and warm with high winds. The rain will do much good to standing crops. Prices of rice:—

	Srs. c.	Srs. c.	
Sadar	10 0	to 11 0	per rupee.
Chandpur	10 8	to 11 8	

Noakhali.—No rain. Prospects of crops not good. No cattle-disease. Fodder and water available. Price of common rice 9 to 11 seers per rupee.

Chittagong.—Rainfall 1·15. Weather warm and occasionally cloudy. Prospects not good. More rain wanted for *rabi* crops. Water and fodder sufficient. Rice selling at 10 seers per rupee. Sporadic cattle-disease continues.

Patna.—No rain. *Rabi* being harvested. Sugarcane being pressed. Lancing of poppy continues. *Rahar* being reaped. Prospects favourable all round. Fodder and water for cattle sufficient. Prices rising slightly in Barh and rice in Bihar. Numbers on relief on Saturday, 6th March—

Otherwise relieved	...	229	549	299	1,077

Purnea.—No rain. Mustard and tobacco harvest continues; outturn good. Standing *rabi* crops doing fairly. Molasses being manufactured at Kishanganj. Lands being prepared for next jute and *bhadoi* crops. A few cases of cattle-disease reported from Araria and Raniganj thanas. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	...	...	...	9½	per rupee.
Kishanganj	...	...	...	9	
Araria	...	...	...	11	

Malda.—No rain. Days warm; mornings and evenings cool. Ploughing for *bhadoi* paddy going on. Prospects of standing *rabi* crops fair. Want of drinking-water has begun to be felt in the Barind tract. Fodder sufficient. Ordinary rice selling at 9 to 11 seers per rupee.

Sonthal Parganas.—No rain. *Rabi* and *mahua* fair. Water and fodder beginning to fail. Price of rice 10 to 11 seers, and of maize 11 to 13 seers per rupee.

Cuttack.—No rain. Weather hot. *Dalua* in ear. Ploughing for next *beali* and *sarad* in progress. Rice more or less available in all places. Cattle-disease prevalent in places Fodder sufficient. Common rice sells as follows:—

				Srs.	c.	
Cuttack	...	...	...	11	13	per rupee.
Jajpur	...	...	...	14	7	
Kendrapara	...	...	...	14	7	
Banki	...	...	...	15	12	

Balasore.—No rain. *Sarad* rice being threshed. *Dalua* crop flourishing, and is in ear in places. Sugarcane being pressed. Ploughing going on. Price of rice varies from 12 to 14 seers per rupee in the interior. Rice sells at 12 and 14 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Puri.—No rain. *Dalua*, *mandia*, *cheena*, and *mug* growing fairly well. Land being prepared for next rice crop. Fodder and food-supply fair. Price of common rice stationary.

Angul.—Rainfall nil. There are no edible crops on the ground, though sugarcane is being planted. Quite 50 per cent. of the culturable area has been ploughed by aid of the recent rain in February. There is no demand for labour. No disease among cattle reported. Price of coarse rice, 14 to 16 seers per rupee in Angul and 15 seers in Khondmals.

Hazaribagh.—No rain. Weather bright and warm. *Mahua* promising full crop. Price of rice 8½ to 10 seers per rupee. 1,200 on test-works.

Lohardaga.—No rain. Ploughing continues. Prospect of *mahua* good. Rice sells at Ranchi 8 seers per rupee, and in the interior from 8 to 12 seers. Cattle-disease reported from Bunda, Palkote, and Lohardaga. Fodder and water sufficient. Grain stock sufficient for the present.

Palamau.—Rainfall nil. Weather getting warm. *Rabi* in good condition being reaped in places; about 8 annas of a normal outturn expected. Prices still rising. In 72 markets rice selling below 9 seers, against 63 markets in the previous week; 12 markets against 17 at 9 seers; and 4 markets against 10 above 9, but below 10 seers. Bounty rice imported all sold. Supply not equal to demand. *Mahua* very backward, but coming on. *Phalgoni mahua* crop nil, and mango crop very poor. Cattle-disease reported from eastern thanas:—

		Men.	Women.	Children.	Total.
Relief-workers ...	...	1,681	1,226	751	3,658
Otherwise relieved ...	...	276	392	145	813

Manbhum.—Rainfall nil. Weather seasonable. *Mahua* promising well. Rinderpest in thanas Chandil, Raghunathpur, and Purulia. Fodder and drinking-water sufficient at present. Price of common rice 10 seers at Sadar and 9 seers at Govindpur. 1,719 men, 1,086 women, 218 children and 328 dependants on nine test works on 6th instant; 4,500 others on gratuitous-relief.

Singhbhum.—No rain. Rice plentiful. Price, 10 to 12 seers per rupee.

General Summary.—There was rain in parts of Northern and Eastern Bengal during the week. More and general rain is required for the cultivation of autumn rice and jute in Bengal Proper. In Orissa the ploughing of lands is in progress. Spring rice is doing well. The harvesting of the *rabi* crops is in progress, and the collection of opium is going on. The *mahua* crop in Chota Nagpur is promising, but in Palamau it is said to be very backward. Sugarcane pressing continues. Prices show but little change during the week. In the distressed districts the prices of the staple grain on which the famine wage is based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 9½ to 10 seers, Shahabad (common rice) 9½ seers, Saran (Indian-corn) 10 seers 9 chitaks, Champaran (Indian-corn) 10¼ seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) 9¾ seers, Bhagalpur (common rice) 9½ seers. These figures show a slight fall in Saran and Champaran, and a slight rise in Darbhanga and Bhagalpur: elsewhere prices remained unchanged.

The numbers on relief on Saturday, 6th March, were—

Nadia	...	10,329
Murshidabad	...	375
Khulna	...	2,502
Rajshahi	...	435
Pabna	...	107
Patna	...	599

M. FINUCANE,

Secretary to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of February 1897.

	Inches.	Date.	Hour.
The mean pressure of the month	29·919		
The average pressure of February from 24 years' registers ...	29·945		
The highest pressure in the month	30·083	12th	10
The lowest pressure in the month	29·761	26th	16
The range of pressure	0·322		
	Hours		
The total number of hours of bright sunshine during the month	184·3		
The maximum possible number of hours of sunshine ...	318·0		
	⊖		
The mean temperature of the month	72·8		
The average temperature of February from 24 years' registers	73·0		
The highest temperature in the month	91·6	25th	
The lowest temperature in the month	53·2	19th	
The range of temperature during the month	38·4		
The mean daily range of temperature	18·8		
The greatest range of temperature in one day	29·4	24th	
	Per cent.		
The mean humidity of the month	72		
The average humidity of February from 24 years' registers ...	67		
	Inches.		
The mean vapour tension of the month	0·564		
The average vapour tension of February from 9 years' registers	0·538		
The mean cloud proportion of the month	3·06		
The average cloud proportion of February from 20 years' registers	1·89		
	Ins.		
The total rainfall of the month	1·59		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	?		
The average fall of February from 48 years' registers ...	0·87		
The greatest fall in 24 hours	1·26	2nd	
	Days.		
The number of rainy days in the month	7		
The average number of rainy days in February from 24 years' registers	3		
	⊖		
The mean maximum equilibrium temperature of solar radiation during the month	131·9		
The mean difference of sun and air temperatures	49·3		
The greatest sun temperature	143·2	25th	
The greatest excess of sun over air temperature	57·3	20th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	57·8		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	6·4		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	10·8	25th	
	Miles.		
The mean movement of the wind per day	81·1		
The greatest movement of the wind in one day	172·0	12th	
The greatest movement of the wind in one hour	?		

The number of hours with winds from each of the 8 points—
N. 37, N.E. 25, E. 25, S.E. 37, S. 35, S.W. 101, W. 83, N.W. 56, Calm 33.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·1° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

NOTE.—The wind directions are for 18 days, as during the remaining period of the month the anemograph was under repair.

J. H. GILLILAND,

METEOROLOGICAL OFFICE, INDIA,
Calcutta, the 8th March 1897.

For *Meteorological Reporter to the Govt. of India.*

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of February 1897.

	Inches.	Date.
The mean pressure at 10 A.M. during the month	30·002

The average fall of the corresponding period for 24 years, Surveyor-General's Office	2·05

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

≏, dew; = fog; o, overcast.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

PLAGUE NOTIFICATION—No. 6.

The 12th March 1897.—In exercise of the powers conferred by sub-section (1) of section 2 of the Epidemic Diseases Act, 1897, and by the Notification of the Government of India in Home Department, No. 302, dated the 4th February 1897, the Lieutenant-Governor is pleased to prescribe the following regulations for preventing the spread of the bubonic plague in villages and in municipal towns in which the regulations prescribed by plague Notification No. 5 have not yet come into force:—

1. In these regulations "Health Officer" means the Civil Surgeon of the district, and includes a Civil Medical Officer and an Assistant Surgeon in medical charge.

2. If on examination of a sick person in any town or village, the Health Officer suspects that such person is suffering from or infected with plague, he may cause such person to be removed to a temporary hospital or isolation shed, and may arrange for his detention, dieting and medical treatment therein. He may also cause the other occupants of the house in which such person resides to be removed to segregation huts, tents or other suitable places, and to be detained under observation for seven days.

3. All persons referred to in regulation 2 shall comply with the instructions given to them by the Health Officer, and shall not leave the place appointed by him for their detention without his written permission.

4. Any masonry house occupied by persons detained under regulation 2 shall be thoroughly cleansed and disinfected and shall not be re-occupied without the written permission of the Health Officer.

5. If in the opinion of the Health Officer the destruction of any hut or shed is necessary to prevent the spread of the disease, the District Magistrate may, after giving reasonable notice, cause such hut or shed and the materials of which it is composed to be dismantled and destroyed by fire.

6. The clothing bedding and personal effects of all persons detained under regulation 2 shall be thoroughly disinfected, and may, at the discretion of the Health Officer, be destroyed by fire.

7. In the event of death occurring from plague, the Health Officer shall arrange for the disposal of the body. In the case of a European or Muhammadan, the body shall be buried at least six feet deep and be covered with quick-lime. The place of burial, if not an authorised cemetery, should be well away from habitations and sources of water-supply. In the case of a Hindu, the body shall be thoroughly and completely burned in an isolated locality in the presence of a responsible official. The clothing, bedding and all personal effects of the deceased that are liable, in the opinion of the Health Officer, to carry infection shall be destroyed by fire.

8. Any conveyance, public or private, that has been used by a person infected with, or suspected of being infected with, plague shall be thoroughly disinfected and exposed to air and sunlight for seven days before being again used, and all articles of furniture belonging to it which, in the opinion of the Health Officer, cannot be properly disinfected shall be destroyed by fire.

9. The District Magistrate may, in his discretion, pay compensation to any person who has sustained substantial loss or damage by reason of anything done under these regulations; provided, however, that no person shall be entitled as of right to claim any compensation whatsoever.

10. All Police Officers shall give to the Health Officer such assistance as he may consider necessary in carrying out these regulations.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

JUDICIAL DEPARTMENT.

No. 1961A.

No. 1878A.—The 15th March 1897.—Mr. A. S. M. Ziaur Rahman, Barrister-at-Law, is appointed to act as a Munsif in the district of Bankura, to be ordinarily stationed at Khatra, during the absence, on leave, of Babu Pares Nath Chatterjee, or until further orders.

No. 1912A.—The 16th March 1897.—Babu Girindra Nath Mukerji, B.L., is appointed to act as a Munsif in the district of Tippera, to be ordinarily stationed at Nabinagar, during the absence, on leave, of Babu Kali Nath Dhur, or until further orders.

No. 1942A.—The 16th March 1897.—Babu Monmohan Neogy, B.L., is appointed to act as a Munsif in the district of Faridpur, to be ordinarily stationed at Bhanga, during the absence, on leave, of Babu Behari Lal Banerjee, or until further orders.

This cancels the order of the 1st March 1897, appointing Babu Bijoy Keshub Mitter to act as Munsif of Bhanga.

GRANT OF LEAVE TO MUNSIFS.—*No. 1900A.—The 11th March 1897.*—Babu Pares Nath Chatterjee, Munsif of Khatra, in the district of Bankura, is allowed leave for seventy-three days, viz., thirteen days under article 309 of the Civil Service Regulations and the remaining period under article 306 (*b*) of the same Regulations, with effect from the 5th April 1897, or from the date on which he may be relieved.

No. 1901A.—The 12th March 1897.—Mr. Latifur Rahman, Munsif of Patna, is allowed leave for fifteen days, under article 306 (*b*) of the Civil Service Regulations, in extension of the leave granted to him on the 15th February 1897.

The 12th March 1897.—Babu Jogendra Nath Mukerji, Munsif of Sealdah, in the district of the 24-Parganas, on deputation to Baruipur, is allowed leave for two weeks, under article 306 (*b*) of the Civil Service Regulations, with effect from the 3rd March 1897, or from the date on which he availed himself of it.

No. 1535J.—The 12th March 1897.—The Lieutenant-Governor accepts the resignation tendered by Babu Aghor Nath Ghose of his appointment as an Honorary Magistrate of the First Independent Bench at Hooghly.

No. 1567J.—The 15th March 1897.—Dr. Walter Saise is appointed to be an Honorary Magistrate of the Regular Bench at Giridih, in the district of Hazaribagh, and is vested with the powers of a Magistrate of the 3rd class.

No. 1569J.—The 15th March 1897.—The Lieutenant-Governor accepts the resignation tendered by Babu Jagannath Sahai of his appointment as an Honorary Magistrate of the Sadar Independent Bench in the district of Monghyr.

Prohibition to import vegetable and animal textile products unless packed bales compressed bound hoofs. Arsenicated hides admitted ; all goods admissible must be disinfected at Doel.

The 16th March 1897.

No. 68Marine.—In exercise of the powers conferred upon him by section 18 of the Calcutta Port Act, 1890, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to authorize the Commissioners of the Port of Calcutta to raise a debenture loan of fifteen lakhs of rupees, bearing interest at 4 per cent per annum, and repayable in thirty years, for the purpose of carrying out certain works connected with the Port of Calcutta.

A. D. McARTHUR, *Col.*, R.E.,
Secy. to the Govt. of Bengal.

The following rules for regulating the transport of explosives in the Port of Calcutta, which have been made under paragraph 22 of the Notification of the Government of Bengal in the Marine Department, No. 227Marine, dated the 3rd September 1890, are published for general information.

In these rules the term "explosives" is intended to apply only to the classes of explosives noted below, as laid down in the rules prescribed in the Notification of the Government of India, Home Department, No. 1417, dated the 24th June 1887 :—

Class 2.—Nitrate mixture.
" 3.—Nitro compound.
" 4.—Chlorate mixture.
" 5.—Fulminate.

1. No explosives shall be transported through the Port of Calcutta unless covered by a special pass from the Commissioner of Police in addition to the import license.

2. Applications for special passes must be made in writing. They must specify the nature of the explosive, number of cases, the total weight of the explosive, the number of boats required in the transport, and the exact day and hour at which the boats will arrive at Garden House.

3. Every application for a special pass must be accompanied by a copy of a certificate from an officer of the Port Commissioners, certifying that the boat in which the explosives are conveyed through the port complies with the requirements of clauses VI and VII of Rule 4 of the rules to regulate the transport and importation of explosives published in Government of India's Notification No. 1417, dated 24th June 1887.

4. Every boat conveying explosives through the port shall display a red flag 4 feet by 3 feet, hoisted 5 feet above the deck.

5. No boat conveying explosives shall proceed above Garden House unless accompanied by a police boat.

6. All boats containing explosives for transport through the port shall be taken in tow by a steam vessel at Moyapore, and be towed from thence to the northern limits of the port or at Cossipore and be towed to Budge-Budge.

7. No steam-vessel shall have in tow more than two boats containing explosives.

8. Steam-vessels towing boats containing explosives shall pass through the Howrah Bridge only at slack water or against the current.

9. Steam-vessels towing boats containing explosives shall not approach within 400 yards of each other.

10. Boats containing explosives shall not anchor or make fast to any boat or buoy or for any time remain stationery in the port.

11. No fires or lights of any description shall be used on board boats containing explosives.

12. Each consignment of explosives passing through the port will be accompanied by by a police boat.

J. LAMBERT,
Commissioner of Police, Calcutta.

NOTIFICATION.

No. 1395M.—The 12th March 1897.—Whereas a notification No. 912T.M., dated the 8th October 1896, was published at pages 217-218, Part IB of the *Calcutta Gazette* of the 28th idem, declaring the intention of the Lieutenant-Governor to subdivide the South Suburban Municipality into two Municipalities by separating the Garden Reach, Mudially

and Dhobapara Wards (Wards Nos. XIII, VI and VII) from that Municipality and constituting those wards a new Municipality, and whereas no valid objection has been raised to the proposal within six weeks from the date of the publication of the notification within the Municipality, it is hereby notified for general information that, in exercise of the power vested in the Local Government by section 9A (2) of the Bengal Municipal Act, III of 1884, as amended by Act IV of 1894, the Lieutenant-Governor has been pleased to sanction the subdivision of the South Suburban Municipality into two Municipalities as aforesaid, with effect from the 12th March 1897.

2. The two Municipalities thus formed will be called the South Suburban and the Garden Reach Municipalities, and their respective boundaries will be as follows:—

I.—BOUNDARIES OF THE SOUTH SUBURBAN MUNICIPALITY.

The Northern boundary—Commences at north-eastern corner of Tangra Road at Hatgachia, thence westward along the southern edge of the said Tangra Road, then southward along the eastern edge of Tangra Road to its junction with Topsi Road, thence westward along Teeljalla Road up to the point where it meets the Eastern Bengal State Railway, Southern Section, thence southward along the eastern edge of the said Railway to its junction with the Port Commissioners' Railway (to Budge-Budge), thence westward along the south of the said railway to the point where it crosses Russa Road, thence southward along the eastern edge of the Russa Road to its junction with Tollygunge Bridge Road, thence westward across the bridge over Tolly's Nala to Tollygunge Circular Road, Shahapur Road, Goragacha Road, Taratulla Road, up to the point opposite which Sonai 3rd lane commences.

The Eastern boundary—Commences at the western border of Gariffa, thence northward along the western border of Haltoo Luskkar Ghat, Nonadanga, Choubaga, Dhallenda, Bynchtolla and Hatgacha.

The Southern boundary—Commences at the northern border of Joka, where it is cut by the Bukrahat Road, thence eastward till it meets the Diamond Harbour Road at Thakurpuker outpost, thence eastward to Kalagachia along the northern edge of that road till it meets the south-western limit of the Thakurun Chuck, thence northward along the western border of the Thakurun Chuck, Chuck Banban, Kalupur and Sodepur, thence eastward along the northern border of Sodepur and the Sodepur Lane till it meets the Haridaspore Lane, thence southward and along the western edge of Kowrapuker Road up to the culvert across the Thakurpuker and Kowrapuker Roads, a little to the south of Kowrapuker outpost building, thence northward along the western bank of Kowrapuker khal, till it meets Tolly's Nala, thence eastward along the northern boundaries of villages Shibpur, Roypur, Bajeh Roypur and Ibrahimpur, thence again to the south, commencing at the north-western corner of Garia and passing southward along the Garia Hát Road till it meets the Russa Road, thence westward till it meets the Tolly's Nala, thence southward along the Tolly's Nala and Gunga Nala, thence eastward to the south-eastern extremity of Barhash.

The Western boundary—Commences at the point in the Taratollah Road opposite which the Sonai 3rd lane commences, thence a little to the north-west, and then turning southward through Bhatchana along the Jenjirpol khal, crossing the Budge-Budge Road, and thence along Bagir khal, till it meets Gungarampur Road, thence turning westward along the southern edge of Gungarampur Road meets the Shibrampore Road, thence turning south along the Shibrampore Road, thence turning east along the Kastdanga Road, then turning southward along the Kastdanga branch road, and the eastern borders of villages Bagpatha and Kalagachia.

II.—BOUNDARIES OF THE GARDEN REACH MUNICIPALITY.

On the north.—A line drawn along the southern bank of the river Hooghly from the north-eastern corner of Nundiyal village boundary to the point where is meets the Neemukmahal Ghat Road.

On the east.—Thence southward along the western edge of the Neemukmahal Ghat Road crossing the Garden Reach Road and Circular Garden Reach Road, and continuing south-easterly along the western edge of Taratala Road till it meets the point opposite the junction of Taratala Road and Sonai 3rd lane.

On the south.—Thence in a north-westerly direction along the northern borders of Daulatpur, Kristopur, Gungooah, Belpukuria, Ramdashatee, Mankalhate, and kismut Dum-Duma.

On the west.—Thence turning northward along the eastern borders of Kadampore, kismut Satghara and Nundiyal villages, as far as the river bank at the north-east corner of Nundiyal village boundary.

3. The Lieutenant-Governor is also pleased to direct that the name of the Garden Reach Municipality shall be inserted both in the first and second Schedules of the Act, and that the number of Commissioners of the Municipality shall be twelve.

4. The following statement showing the number and names of the wards into which the new South Suburban Municipality will be divided for the purposes of the election of Municipal Commissioners under section 14 of the Act and the number of Commissioners

to be elected for each ward is published for general information in accordance with the provisions of section 15 of the Act:—

NAME OF MUNICIPALITY.	Number of wards.	Names of wards.	Number of Commissioners to be elected for each ward.
1	2	3	4
South Suburban Municipality.	I	Tollygunge	2
	II	Dhakuria	1

	IX	Gurnea	1
	X	Tiljulla ...	1
	XI	Mottahati	1

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1413M.—The 13th March 1897.—It is hereby notified for general information that in accordance with the recommendation of the Commissioners of the Chaibassa Municipality in the district of Singhbhum, made at a meeting, and in exercise of the power vested in the Local Government by section 9 (*c*) of the Bengal Municipal Act, III of 1884, as amended by Act IV of 1894, the Lieutenant-Governor intends to revise the boundaries of the said municipality so as to include within its limits the basti known as Kol-Nimdih, lying outside its limits, unless good reasons are shown to the contrary within six weeks from the date of the publication of this notification within the municipality.

2. The revised boundaries of the municipality, after the inclusion within municipal limits of the Kol-Nimdih basti, will be as follows:—

South.—From the point on the Jointgarh road where the Nimdih Chakar road meets it the Nimdih Chakar road forms the boundary till it meets the boundary of Kol-Nimdih and Chaibassa; thence the boundary of Kol-Nimdih forms the boundary as far as the Roro river.

West.—The western bank of the Roro river forms the boundary as far as a point opposite the spot at which the boundary of Bandtoli and Dilliamarcha villages meets the Roro river at the trijunction of Tonto, Dilliamarcha at Bandtoli.

North.—From the Roro river the boundary follows the nala between Dilliamarcha and Bandtoli as far as the first bridge; thence the road from the bridge to the Seraikella road forms the boundary.

East.—Thence the Seraikella road running south forms the boundary as far as the bridge, from the bridge a straight line to the outlet of the Saheb-band; thence the road running to the east and south of the Saheb-band as far as the last bridge; thence a straight line to a point 100 yards east of the south-east corner of Davie's Bagan to the Jointgarh road, which then forms the boundary. Where roads are mentioned as boundaries, the road is within the municipality.

ERRATUM.

No. 1475M.—The 15th March 1897.—In the notification No. 1279M., dated the 9th March 1897, published at page 61, Part IB of the *Calcutta Gazette* of the 10th idem, appointing certain gentlemen to be Commissioners of the Darjeeling Municipality, *for* "Mr. M. Power" *read* "Captain M. Power."

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 1480L.S.-G.—The 16th March 1897.—In supersession of Notification No. 4635L.S.-G., dated the 5th December 1896, published at page 255, Part IB of the *Calcutta Gazette* of the 9th idem, it is hereby notified for general information that, under rule 32 of the rules framed under section 138 (*a*) of the Bengal Local Self-Government Act, III of 1885, the Lieutenant-Governor is pleased to fix Monday, the 5th April 1897, as the date for holding an election, under section 19 of the Act, in thana Nalchiti, in the district of Backergunge, for the purpose of filling the vacancy in the representation of that thana on the Sadar Local Board of that district.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 1422M.—The 11th March 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Darbhanga Municipality for a public purpose, viz. for a trenching-ground in Ward No. III, Mohalah Subhankerpur in the town of Darbhanga, pargana Puruhbhigo, district Darbhanga, it is hereby declared that for the above purpose three pieces of land measuring, more or less, 2 acres 3 roods and 27 poles, equivalent to 3 bighas 6 cottahs and 13½ dhurs of local measurement, are required. The boundaries of the plots of land are as follows :—

1st Plot.—1 bigha 5 cottahs and 18½ dhurs, bounded on the north by Lalji Kurmi and Karma Kurmi's wife's field; on the south by Gopal Dosadh and Matook Mali's field; on the east by Bitta Kurmi's Kolambagh; and on the west by Muchli Kurmi's field and trenching-ground.

2nd Plot.—1 bigha and 12 cottahs, bounded on the north by Lalji Kurmi's wife's field; on the south-east by Bondha and Surja Goala's field; and on the west by trenching-ground.

3rd Plot.—8 cottahs and 15 dhurs, bounded on the north by Pitumber Dhohi and Kapur Kurmi's field; on the south by Surju Goala and wife of Lalji's field; on the east by Lalji's and Jhantoo Babu's parti-land; and on the west by trenching-ground.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 1437L.S.-G.—The 13th March 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the District Board of Nadia for a public purpose, viz., for the excavation of a tank in the village of Chenga, pargana and thana Nakasipara, zilla Nadia, it is hereby declared that for the above purpose a piece of land measuring, more or less, 10 bighas 8 cottahs 6 chitaks of standard measurement, is required. The land is bounded on the north by the lands of Akul Shekh, Rupchand Shekh and Maizuddi Shekh, on the east by the lands of Badal Shekh, Khokai Shekh, Shartak Shekh and Kalachand Ghorami, on the south by the lands of Trailokya Madak, Maizuddi Shekh and Chinibash Shekh, and on the west by the lands of Edu Shekh and Nilu Karmakar.

The plan and specification of the land are filed in the office of the Collector of Nadia for public inspection.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 1441M.—The 15th March 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz. for the drainage of the suburban area (Hazra Road to Old Ballygunge Road), it is hereby declared that for the above purpose pieces of land, No. 1, Panditea Road, Nos. 6, 7, 8, 9, 14, 14-1, 15, 16, 17, 19, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 34-1, 35, 36, 52, 66, 67, 68, 69, 70, 71, 72, 73, 75, 76 and 78, Garcha Road, Nos. 34 and 35, Garcha 1st Lane, Nos. 55 and 56, Gurriahatta Road, and No. 38, Ballygunge Circular Road, in thana Ballygunge, Dehi Panchannogram, district 24-Parganas, measuring more or less 13 bighas 9 cottahs 7 chitaks and 4 square feet, are required. The boundaries of the land are as follows :—

Plot A on plan.—On the north the remaining portions of No. 1, Panditea Road, and No. 78, Garcha Road, and a public drain and Garcha Road, on the south the remaining portions of No. 1, Panditea Road, and Nos. 78, 76 and 75, Garcha Road, on the east Garcha Road, and on the west Hazra Road and a public drain.

Plot B on plan.—On the north the remaining portions of No. 35, Garcha 1st Lane, and Nos. 7, 8 and 9, Garcha Road, and No. 36, Garcha 1st Lane, on the south Garcha Road, on the east Garcha Road and the remaining portion of No. 7, Garcha Road, and on the west Garcha Road and the remaining portion of No. 35, Garcha 1st Lane.

Plot C on plan.—On the north the remaining portions of Nos. 14 to 17, 19, 22 and 24 to 35, Garcha Road, and a public drain, on the south Garcha Road and a public drain, and the remaining portions of Nos. 34 to 36, Garcha Road, and No. 55, Gurriahatta Road, on the east a public drain and the remaining portions of Nos. 34 to 35, Garcha Road and Garcha Road, and on the west Garcha Road and a public drain.

Plot D on plan.—On the north the remaining portions of No. 38, Ballygunge, Circular Road, and No. 56, Gurriahatta Road, on the south a public drain and the remaining portion of No. 56, Gurriahatta Road, on the east Gurriahatta Road and Old Ballygunge Road, and on the west a public dain.

Plot E on plan.—On the north, east and west Garcha Road, and on the south the remaining portion of No. 52, Garcha Road.

Plot F on plan.—On the north, east and west Garcha Road, and on the south the remaining portions of Nos. 66 to 73, Garcha Road, and No. 34, Garcha 1st Lane.

The plan and specifications of the land are filed in office of the Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 1449M.—The 15th March 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Khulna Municipality for a public purpose, viz., for the excavation of a tank in the village of Boyra, pargana Khalishpur, zilla Khulna, it is hereby declared that for the above purpose a piece of land measuring, more or less, 4 bighas 19 cottahs and 14 chitaks of standard measurement, is required. The land is bounded on the north by Alimamud's paddy land, on the east by Nasim Shekh and Pancharam Biswas' land, on the south by Pancharam Biswas' and Prasanna Kuri's land, and on the west by Azgar Mandal's land, Prasanna Kuri's land and Pancharam Biswas' land.

Plan and specification of the land are filed in the office of Municipal Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

DECLARATION.

No. 1477M.—The 16th March 1897.—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for the drainage of the suburban area (Old Bally-

gunge Road to Maulvi Ahmed Khan Bahadur's Road), it is hereby declared that for the above purpose pieces of land No. 1, Gurriah Hât Road, Nos. 13, 14 and 15, Old Ballygunge Road, Nos. 8, 9, 96-1, 97 and 98, Bundle Road, Nos. 15, 16, 17, 18, 19, 20, 21 and 24, Old Ballygunge 2nd Lane, Nos. 9, 11, 12, 38, 39, 24, 25, 40, 41 and 42, Old Ballygunge 1st Lane, Nos. 1, 1-1, 1-2, 2, 24, 27, 27-1, 29 and 32, Ghoogoodanga Lane, Nos. 1-1, 1-2, and 1-3, Tiljulla 1st Lane, and land belonging to Sreenath Howlee in the Dihi Punchannogram, district 24-Parganas, measuring, more or less, 10 bighas 13 cottahs and 13 chitaks only, are required.

The boundaries of the land are as follows :—

Plot marked A on the plan.—On the north a public lane; on the south and east the remaining portions of No. 1, Gurriah Hât Road, and Nos. 14 and 15, Gurriah Hât Road; on the west Old Ballygunge Road.

Plot marked B on the plan.—On the north and west the remaining portion of No. 13, Old Ballygunge Road; on the south a public lane; and on the east a public drain.

Plot marked C on the plan.—On the north partly a remaining portion of No. 98, Bundle Road, and partly Bundle Road; on the south the remaining portions of Nos. 96-1, 97 and 98, Bundle Road; on the east Bundle Road; and on the west partly a public drain and partly the remaining portion of No. 98, Bundle Road.

Plot marked D on the plan.—On the north and west the remaining portions of No. 8, Bundle Road, and No. 24, Old Ballygunge 2nd Lane; on the south Bundle Road; and on the east Old Ballygunge 2nd Lane.

Plot marked E on the plan.—On the north the remaining portions of Nos. 16, 17, 18 and 21, Old Ballygunge 2nd Lane; on the south partly the remaining portions of Nos. 16, 19 and 21, Old Ballygunge 2nd Lane, and partly the remaining portions of No. 38, Old Ballygunge 1st Lane, and No. 9, Bundle Road; on the east partly the junction of Old Ballygunge 1st and 2nd Lane and partly the remaining portions of No. 17, Old Ballygunge 2nd Lane, and No. 38, Old Ballygunge 1st Lane; on the west partly Old Ballygunge 2nd Lane and partly the remaining portions of Nos. 19 and 21, Old Ballygunge 2nd Lane.

Plot marked F on the plan—On the north the remaining portions of No. 15, Old Ballygunge 2nd Lane, and No. 39, Old Ballygunge 1st Lane; on the south and west old Ballygunge 1st Lane; and on the east by a public lane.

Plot marked G on the plan.—On the north, east and west, Old Ballygunge 1st Lane; on the south the remaining portions of Nos. 24 and 25, Old Ballygunge 1st Lane.

Plot marked H on the plan.—On the north the remaining portions of Nos. 40 and 42, Old Ballygunge 1st Lane; on the south partly Old Ballygunge 1st Lane and partly the remaining portion of No. 41, Old Ballygunge 1st Lane; on the east partly Old Ballygunge 1st Lane and partly the remaining portion of No. 41, Old Ballygunge 1st Lane; and on the west partly Old Ballygunge 1st Lane, partly the remaining portion of No. 41, Old Ballygunge 1st Lane, and a public lane.

Plot marked I on the plan.—On the north and east the Ghoogoodanga Lane; on the south the remaining portion of No. 12, Old Ballygunge 1st Lane; and on the west Old Ballygunge 1st Lane.

Plot marked J on the plan.—On the north the remaining portions of Nos. 9 and 11, Old Ballygunge 1st Lane, and Nos. 29, 27 and 32, Ghoogoodanga Lane; on the south partly Ghoogoodanga Lane and partly the remaining portions of Nos. 24, 27, 29, 27-1 and 32, Ghoogoodanga Lane; on the east partly Ghoogoodanga Lane and partly the remaining portion of No. 24, Ghoogoodanga Lane; on the west Ghoogoodanga Lane.

Plot marked K on the plan.—On the north partly the public drains, partly the remaining portions of Nos. 1 and 1-2, Ghoogoodanga Lane, and No. 1-1, Tiljulla 1st lane, and partly No. 1, Tiljulla 1st Lane; on the south partly the remaining portions of Nos. 2 and 1-1, Ghoogoodanga Lane, partly the remaining portions of Nos. 1-2 and 1-3, Tiljulla 1st Lane, and public drains; on the east partly No. 1, Tiljulla 1st Lane, partly public drains, and partly the remaining portion of No. 1-1, Ghoogoodanga Lane; on the west Ghoogoodanga Lane, remaining portions of Nos. 1-1 and 2, Ghoogoodanga Lane, and public drains.

Plot marked L on the plan.—On the north and south the remaining portions of the garden belonging to Sreenath Howlee; on the east Maulvi Ahmad Khan Bahadur's Road; and on the west the Railway Line.

This declaration is made under the provisions of section 6 of Act I of 1894 to all whom it may concern.

Hooghly Collectorate, the 17th February 1897. D. B. ALLEN, Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estates situate in the district of Burdwan, will be put up to sale at the Burdwan Collectorate on the 29th March 1897, corresponding with the 17th Chaitra 1303.

The purchasers will be subject to the following conditions of sale:—

Conditions of Sale.

1st.—The estates to be sold to the highest bidder above the upset price, which will be fixed by the Collector at the time of sale. The purchasers of the estates will be considered as the proprietors of the estates, and the entire proprietary right of Government in such estates will be transferred to them as revenue free or subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the authorities.

3rd.—If the amount of purchase-money do not exceed Rs. 100, the whole amount to be paid down at once.

4th.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate again to be put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

Patna Collectorate, Bankipore, the 23rd February 1897. R. A. N. SINGH, for Collector.

Advertisement of Sale.

NOTICE is hereby given that the proprietary right of Government, as specified in the conditions of sale below, to the undermentioned estate situate in the district of Puri will be put up to sale at the Puri Collectorate on the 28th of April 1897, corresponding with 17th Bysack 1304 Umli :—

Conditions of Sale.

1st.—The estate to be sold to the highest bidder above the upset price which will be fixed by Collector at the time of sale. The purchaser of this estate will be considered as the proprietor of the estate, and the entire proprietary right of Government in such estate will be transferred to him subject to the revenue fixed in perpetuity.

2nd.—The sale to be subject to existing leases and to the rights conferred by the settlement proceedings and by the laws in force, and purchasers to be bound to respect the rights of resident cultivators who have signed the schedule of assessment prepared by the revenue authorities.

3rd.—If the amount of purchase-money do not exceed Rs 100, the whole amount to be paid down at once.

4th.—If the amount of purchase money exceed Rs. 100, one fourth of the amount bid to be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or, if that day be a close holiday, then by noon of the first succeeding office day, the sale is to be cancelled (the sum deposited being forfeited to Government), and the estate to be again put up to sale at the risk of the defaulting purchaser after issue of advertisement as in the case of original sale.

The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

Terms of subscription payable annually in advance.

For the complete series *including postage*, Rs. 22-8.

Obtainable at the Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depot.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

Notice.

IT is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date wil understand that copies will be supplied only if available.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed :

1st.—Bay of Bengal Daily Weather Report, giving meteorological observations taken at 28 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by peon in Calcutta soon after 11 A.M. Price to subscribers in Calcutta Rs. 2 per mensem, payable in advance up to 30th April 1897.

This report will be issued every year from 1st November to 30th April. From 1st May again the Bay of Bengal and Bengal Report containing observations taken at 64 stations will be issued.

2nd.—A Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 327 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Monthly Summary Rs. 2 per annum, payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal Daily Weather Report, and to the Accountant and Treasurer, Bengal Secretariat, for the Monthly Report.

C. LITTLE,

Meteorological Reporter to the Govt. of Bengal.

Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Book Depôt except *for* Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices and for those frowarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

☞ Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal.

Copies are available for purchase at the Bengal Secretariat Book Depôt.

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 11th March, 1897, and is hereby promulgated for general information:—

ACT NO. VIII OF 1897.

THE REFORMATORY SCHOOLS ACT 1897.

CONTENTS.

I.—Preliminary.

SECTIONS.

1. Title, commencement and extent.
2. Repeal of Act V of 1876.
3. Section 399 of Act X of 1882 repealed on date fixed by a notification under section 1, sub-section (3).
4. Definitions.

II.—Reformatory Schools.

5. Power to establish and discontinue Reformatory Schools.
6. Requisites of schools.
7. Inspection of Reformatory Schools.
8. Power of Courts to direct youthful offenders to be sent to Reformatory Schools.
9. Procedure where Magistrate is not empowered to pass an order under section 8.
10. Power of Magistrates to direct boys under sixteen sentenced to imprisonment to be sent to Reformatory Schools.
11. Preliminary enquiry and finding as to age of youthful offender.
12. Government to determine Reformatory School to which such offenders shall be sent.
13. Persons found to be over eighteen years not to be detained in Reformatory Schools.
14. Discharge or removal by order of Government.
15. Power to Governor General in Council to direct use of Reformatories in one province for reception of youthful offenders from another.
16. Certain orders not subject to appeal or revision.

III.—Management of Reformatory Schools.

17. Appointment of Superintendent and Committee of Visitors or Board of Management.
18. Superintendent may license youthful offenders to employers of labour.
19. Cancellation of license.
20. Determination of license.
21. Cancellation of license in case of ill-treatment.
22. Superintendent to be deemed guardian of youthful offenders.
Power to apprentice youthful offender.
23. Duties of Committee of Visitors.
24. Powers of Board of Management.
25. Power to appoint Trustees or other Managers of a school to be a Board of Management.
26. Power of Board to make rules.

IV.—Offences in relation to Reformatory Schools.

27. Penalty for introduction or removal or supply of prohibited articles and communication with youthful offenders.
28. Penalty for abetting escape of youthful offender.
29. Arrest of escaped youthful offender.

V.—Miscellaneous.

30. Application of Act XV of 1869 to youthful offenders detained in Reformatory Schools.
31. Power to deal in other ways with youthful offenders including girls.
32. Procedure when youthful offender under detention in a Reformatory School is again convicted and sentenced.

An Act to amend the law relating to Reformatory Schools and to make further provision for dealing with youthful offenders.

WHEREAS it is expedient to amend the law relating to Reformatory Schools and to make further provision for dealing with youthful offenders; It is hereby enacted as follows:—

I.—Preliminary.

Title, commencement and extent.

1. (*1*) This Act may be called the Reformatory Schools Act, 1897; and

(*2*) It shall come into force at once.

(*3*) This section and section 2 shall extend to the whole of British India. The other sections shall extend in the first instance to the whole of British India except the territories for the time being administered by the Lieutenant-Governor of the Punjab and the Chief Commissioner of Coorg, but either of the said Local Governments may at any time, by notification in the local official Gazette, extend these sections to their territories from such day as may be fixed in any such notification.

V of 1876.

Repeal of Act V of 1876.

2. (*1*) The Reformatory Schools Act, 1876, is hereby repealed.

(*2*) But all proceedings taken, orders passed, officers appointed or authorised and rules made under the said Act shall, as far as may be, be deemed to have been respectively passed, appointed or authorised and made under this Act.

(*3*) Any enactment or document referring to the said Act shall, as far as may be, be construed to refer to this Act, or to the corresponding portion thereof.

X of 1882.

Section 399 of Act X of 1882 repealed on date fixed by a notification under section 1, sub-section (3).

3. From the date fixed by any notification issued under section 1, sub-section (*3*), section 399 of the Code of Criminal Procedure, 1882, shall be repealed in the province to which the notification relates.

Definitions.

4. In this Act, unless there is anything repugnant in the subject or context,—

(*a*) "youthful offender" means any boy who has been convicted of any offence punishable with transportation or imprisonment and who, at the time of such conviction, was under the age of fifteen years;

(*b*) "Inspector-General" includes any officer appointed by the Local Government to perform all or any of the duties imposed by this Act on the Inspector-General: and

(*c*) "District Magistrate" shall include a Chief Presidency Magistrate.

II.—Reformatory Schools.

Power to establish and discontinue Reformatory Schools.

5. With the previous sanction of the Governor General in Council, the Local Government may—

(*a*) establish and maintain Reformatory Schools at such places as it may think fit;

(*b*) use as Reformatory Schools schools kept by persons willing to act in conformity with such rules, consistent with this Act, as the Local Government may prescribe in this behalf;

(*c*) direct that any school so established or used shall cease to exist as a Reformatory School or to be used as such.

Requisites of schools.

6. Every school so established or used must provide—

(*a*) sufficient means of separating the inmates at night;

(*b*) proper sanitary arrangements, water-supply, food, clothing and bedding for the youthful offenders detained therein;

(*c*) the means of giving such youthful offenders industrial training;

(*d*) an infirmary or proper place for the reception of such youthful offenders when sick.

Inspection of Reformatory Schools.

7. (*1*) Every school intended to be established or used as a Reformatory School shall, before being used as such, be inspected by the Inspector-General, and if he finds that the requirements of section 6 have been complied with, and that, in his opinion, such school is fitted for the reception of such youthful offenders as may be sent there under this Act, he shall certify to that effect, and such certificate shall be published in the local official Gazette, together with an order of the Local Government establishing the school as a Reformatory School or directing that it shall be used as such, and the school shall thereupon be deemed to be a Reformatory School.

(*2*) Every such school shall, from time to time, and at least once in every year, be visited by the said Inspector-General, who shall send to the Local Government a report on the condition of the school in such form as the Local Government may prescribe.

Power of Courts to direct youthful offenders to be sent to Reformatory Schools.

8. (*1*) Whenever any youthful offender is sentenced to transportation or imprisonment, and is, in the judgment of the Court by which he is sentenced, a proper person to be an inmate of a Reformatory

School, the Court may, subject to any rules made by the Local Government, direct that, instead of undergoing his sentence, he shall be sent to such a school, and be there detained for a period which shall be not less than three or more than seven years.

(2) The powers so conferred on the Court by this section shall be exercised only by (*a*) the High Court, (*b*) a Court of Session, (*c*) a District Magistrate, and (*d*) any Magistrate specially empowered by the Local Government in this behalf, and may be exercised by such Courts whether the case comes before them originally or on appeal.

(3) The Local Government may make rules for—

(*a*) defining what youthful offenders should be sent to Reformatory Schools, having regard to the nature of their offences or other considerations, and

(*b*) regulating the periods for which youthful offenders may be sent to such schools according to their ages or other considerations.

Procedure where Magistrate is not empowered to pass an order under section 8.

9. (1) When any Magistrate not empowered to pass an order under the last foregoing section is of opinion that a youthful offender convicted by him is a proper person to be an inmate of a Reformatory School, he may, without passing sentence, record such opinion and submit his proceedings and forward the youthful offender to the District Magistrate to whom he is subordinate.

(2) The Magistrate to whom the proceedings are so submitted may make such further inquiry (if any) as he may think fit and pass such sentence and order for the detention in a Reformatory School of the youthful offender, or otherwise, as he might have passed if such youthful offender had been originally tried by him.

Power of Magistrates to direct boys under sixteen sentenced to imprisonment to be sent to Reformatory Schools.

10. The officer in charge of a prison in which a youthful offender is confined, in execution of a sentence of imprisonment, may bring him, if he has not then attained the age of fifteen years, before the District Magistrate within whose jurisdiction such prison is situate; and such Magistrate may, if such youthful offender appears to be a proper person to be an inmate of a Reformatory School, direct that, instead of undergoing the residue of his sentence, he shall be sent to a Reformatory School, and there detained for a period which shall be subject to the same limitations as are prescribed by or under section 8, with reference to the period of detention thereby authorised.

Preliminary enquiry and finding as to age of youthful offender.

11. (1) Before directing any youthful offender to be sent to a Reformatory School under section 8, section 9 or section 10, the Court or Magistrate shall inquire into the question of his age and, after taking such evidence (if any) as may be deemed necessary, shall record a finding thereon, stating his age as nearly as may be.

(2) A similar inquiry shall be made and finding recorded by every Magistrate not empowered to pass an order under section 8 before submitting his proceedings and forwarding the youthful offender to the District Magistrate as required by section 9, sub-section (1).

Government to determine Reformatory School to which such offenders shall be sent.

12. Every youthful offender directed by a Court or Magistrate to be sent to a Reformatory School shall be sent to such Reformatory School as the Local Government may by general or special order appoint for the reception of youthful offenders so dealt with by such Court or Magistrate:

Provided that, if accommodation in a Reformatory School is not immediately available for such youthful offender, he may be detained in the juvenile ward or such other suitable part of a prison as the Local Government may direct—

(*a*) until he can be sent to a Reformatory School, or

(*b*) until the term of his original sentence expires,

whichever event may first happen. Should the term of his original sentence first expire, he shall thereupon be released, but, should he be sent to a Reformatory School, then the period of detention previously undergone shall be treated as detention in a Reformatory School.

Persons found to be over eighteen years not to be detained in Reformatory Schools.

13. (1) If at any time after a youthful offender has been sent to a Reformatory School it appears to the Committee of Visitors or Board of Management, as the case may be, that the age of such youthful offender has been understated in the order for detention, and that he will attain the age of eighteen years before the expiration of the period for which he has been ordered to be detained, they shall report the case for the orders of the Local Government.

(2) No person shall be detained in a Reformatory School after he has been found by the Local Government to have attained the age of eighteen years.

Discharge or removal by order of Government.

14. The Local Government may at any time order any youthful offender—

(*a*) to be discharged from a Reformatory School;

(*b*) to be removed from one Reformatory School to another such school situate within the territories subject to such Government: Provided that the whole period of his detention in a Reforma-

tory School shall not be increased by such removal.

Power to Governor General in Council to direct use of Reformatories in one province for reception of youthful offenders from another.

15 (*1*) The Governor General in Council may by general or special order direct that any Reformatory School situated in one province shall be available for the reception of youthful offenders directed to be sent to any Reformatory School by any Court or Magistrate in any other province.

(*2*) Any such order may also provide for the removal of the youthful offender, and the cost of his maintenance, and may give any such further directions as may be necessary.

X of 1882.

Certain orders not subject to appeal or revision.

16. Nothing contained in the Code of Criminal Procedure, 1882, shall be construed to authorise any Court or Magistrate to alter or reverse in appeal or revision any order passed with respect to the age of a youthful offender or the substitution of an order for detention in a Reformatory School for transportation or imprisonment.

III.—Management of Reformatory Schools.

Appointment of Superintendent and Committee of Visitors or Board of Management.

17. (*1*) For the control and management of every Reformatory School, the Local Government shall appoint either (*a*) a Superintendent and a Committee of Visitors, or (*b*) a Board of Management.

(*2*) Every Committee and every Board so appointed must consist of not less than five persons, of whom two at least shall be Natives of India.

(*3*) The Local Government may suspend or remove any Superintendent or any Member of a Committee or Board so appointed.

Superintendent may license youthful offenders to employers of labour.

18. (*1*) Every Superintendent so appointed may, with the sanction of the Committee, by license under his hand permit any youthful offender sent to a Reformatory School, who has attained the age of fourteen years, to live under the charge of any trustworthy and respectable person named in the license, or any officer of Government or of a Municipality, being an employer of labour and willing to receive and take charge of him, on the condition that the employer shall keep such youthful offender employed at some trade, occupation or calling.

(*2*) The license shall be in force for three months and no longer, but may, at any time and from time to time until the expiration of the period for which the youthful offender has been directed to be detained, be renewed for three months at a time.

Cancellation of license.

19. The license shall be cancelled at the desire of the employer named in the license.

Determination of license.

20. If during the term of the license the employer named therein dies, or ceases from business or to employ labour, or the period for which the youthful offender has been directed to be detained in the Reformatory School expires, the license shall thereupon cease and determine.

Cancellation of license in case of ill-treatment.

21. If it appears to the Superintendent that the employer has ill-treated the youthful offender, or has not adequately provided for his lodging and maintenance, the Superintendent may cancel the license.

Superintendent to be deemed guardian of youthful offenders.

22. (*1*) The Superintendent of a Reformatory School shall be deemed to be the guardian of every youthful offender detained in such school, within the meaning of Act No XIX of 1850 (*concerning the binding of apprentices*).

Power to apprentice youthful offender.

(*2*) If it appears to the Superintendent that any youthful offender licensed under section 18 has behaved well during one or more periods of his license, the Superintendent may, with the sanction of the Committee, apprentice him under the provisions of the said Act, and on such apprenticement the right to detain such youthful offender in a Reformatory School shall cease and the unexpired term (if any) of his sentence shall be cancelled.

Duties of Committee of Visitors.

23. (*1*) Every Committee of Visitors appointed under section 17 for a Reformatory School shall, at least once in every month,—

(*a*) visit the school, to hear complaints and see that the requirements of section 6 have been complied with, and that the management of the school is proper in all respects;

(*b*) examine the punishment-book;

(*c*) bring any special cases to the notice of the Inspector-General; and

(*d*) see that no person is illegally detained in the school.

(*2*) If any member of a Committee of Visitors so appointed fails or neglects, during a period of six consecutive months, to visit the school and assist in the discharge of the duties aforesaid, he shall cease to be a member of such Committee.

Powers of Board of Management.

24. If, in exercise of the power conferred by section 17, the Local Government appoints a Board of Management for any Reformatory School, such Board shall have the powers and perform the functions of the Superintendent under sections 18 to 22, both inclusive; and the license mentioned in section 18 may be under

the hand of their chairman; and they shall be deemed to be the guardians of the youthful offenders detained in such school.

Power to appoint Trustees or other Managers of a school to be a Board of Management.

25. The Local Government may declare any body of Trustees or Managers of a School, who are willing to act in conformity with the rules referred to in section 5, clause (*b*), to be a Board of Management under this Act, and thereupon such body or Managers shall have all the powers and perform all the functions of such Board of Management.

Power of Board to make rules.

26 (*1*) With the previous sanction of the Local Government, every Board of Management of a Reformatory School may from time to time make rules consistent with this Act—

(*i*) to prescribe the articles which are to be deemed to be "prohibited articles"; and

(*ii*) to regulate—

(*a*) the conduct of business of the Board;

(*b*) the management of the school;

(*c*) the education and industrial training of youthful offenders;

(*d*) visits to, and communication with, youthful offenders;

(*e*) the terms and conditions under which any articles declared by the Board to be "prohibited articles" may be introduced into or removed out of the school;

(*f*) the manner in which such articles are to be removed when introduced without due authority;

(*g*) the conditions and limitations under which such articles may be supplied outside the school to any youthful offender under order of detention therein;

(*h*) the conditions on which the possession by any such youthful offender of such articles may be sanctioned;

(*i*) the penalties to be imposed for the supply or possession of such articles when supplied or possessed without due authority;

(*j*) the punishment of offences committed by youthful offenders; and

(*k*) the granting of licenses for the employment of youthful offenders.

(*2*) In the absence of a Board of Management the Local Government may make rules consistent with this Act to regulate for any Reformatory School the matters mentioned in any clause of sub-section (*1*), other than clause (*ii*) (*a*), and also the mode in which the Committee of Visitors shall conduct their business.

IV.—Offences in relation to Reformatory Schools.

Penalty for introduction or removal or supply of prohibited articles and communication with youthful offenders.

27. Whoever, contrary to any rule made under section 26, introduces or removes or attempts by any means whatever to introduce or remove into or from any Reformatory School, or supplies or attempts to supply outside the limits of any Reformatory School to any youthful offender under order of detention therein, any prohibited article,

and every officer or person in charge of a Reformatory School who, contrary to any such rule, knowingly suffers any such article to be introduced into or removed from any Reformatory School, to be possessed by any youthful offender detained therein, or to be supplied to any such youthful offender outside its limits,

and whoever, contrary to any such rule, communicates or attempts to communicate with any such youthful offender,

and whoever abets any offence made punishable under this section,

shall, on conviction before a Magistrate, be liable to imprisonment for a term not exceeding six months, or to fine not exceeding two hundred rupees, or to both.

Penalty for abetting escape of youthful offender.

28. Whoever abets an escape, or an attempt to escape, on the part of a youthful offender from a Reformatory School, or from the employer of such youthful offender, shall be punishable with imprisonment for a term which may extend to six months, or with fine not exceeding two hundred rupees, or with both.

Arrest of escaped youthful offender.

29. A Police-officer may, without orders from a Magistrate and without a warrant, arrest any youthful offender sent to a Reformatory School under this Act, who has escaped from such school or from his employer, and take him back to such school or to his employer.

V.—Miscellaneous.

Application of Act XV of 1869 to youthful offenders detained in Reformatory Schools.

30. The provisions of the Prisoners' Testimony Act, 1869, shall be applied, so far as they can be made applicable, to youthful offenders detained in Reformatory Schools as if they were persons confined in jail within the meaning of that Act. XV of 1869.

Power to deal in other ways with youthful offenders including girls.

31. (*1*) Notwithstanding anything contained in this Act or in any other enactment for the time being in force, any Court may, if it shall think fit, instead of sentencing any youthful offender to transportation or imprisonment or directing him to be detained in a Reformatory School, order him to be—

(*a*) discharged after due admonition, or

(*b*) delivered to his parent or to his guardian or nearest adult relative, on such parent, guardian or relative executing a bond, with or without sureties, as the Court may require, to be responsible for the good behaviour of the youthful offender for any period not exceeding twelve months.

(*2*) For the purposes of this section the term "youthful offender" shall include a girl.

(*3*) The powers conferred on the Court by this section shall be exercised only by Courts empowered by or under section 8.

(*4*) When any youthful offender is convicted by a Court not empowered to act under this section and the Court is of opinion that the powers conferred by this section should be exercised in respect of such youthful offender, it may record such opinion and submit the proceedings and forward the youthful offender to the District Magistrate to whom such Court is subordinate.

(*5*) The District Magistrate to whom the proceedings are so submitted may thereupon make such order or pass such sentence as he might have made or passed if the case had originally been tried by him.

Procedure when youthful offender under detention in a Reformatory School is again convicted and sentenced.

32. When a youthful offender during his period of detention in a Reformatory School is again convicted by a criminal Court, the sentence of such Court shall commence at once, notwithstanding anything to the contrary in section 397 of the Code of Criminal Procedure, 1882, but the Court shall forthwith report the matter to the Local Government, which shall have power to deal with the matter in any way in which it thinks fit. X of 1882.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 11th March, 1897, and is hereby promulgated for general information :—

ACT NO. IX OF 1897.

An Act to amend the law relating to Government and other Provident Funds.

WHEREAS it is expedient to amend the law relating to Government and other Provident Funds; It is hereby enacted as follows :—

Title, extent and commencement.

1. (*1*) This Act may be called the Provident Funds Act, 1897.

(*2*) It extends to the whole of British India, including Upper Burma and British Baluchistan; and

(*3*) It shall come into force at once.

Definitions.

2. In this Act—

(*1*) "Provident Fund" means a fund in which the subscriptions or deposits of any class or classes of employees are received and held on their individual accounts, and includes any contributions credited in respect of, and any interest accruing on, such subscriptions or deposits under the rules of the Fund :

(*2*) "Government Provident Fund" means a Provident Fund constituted by the authority of the Government for any class or classes of its employees :

(*3*) "Railway Provident Fund" means a Provident Fund constituted by the authority of the Government of India or of any company which administers a railway or tramway in British India, either under a special Act of Parliament or under contract with the Secretary of State in Council or the Government of India, for any class or classes of the employees on, or in connection with, such railway or tramway : and

(*4*) "compulsory deposit" means a subscription or deposit which is not repayable on the demand, or at the option, of the subscriber or depositor, and includes any contribution which may have been credited in respect of, and any interest or increment which may have accrued on, such subscription or deposit under the rules of the Fund.

Payment from Government or Railway Provident Fund on death of subscriber or depositor.

3. (*1*) When a subscriber to, or depositor in, any Government or Railway Provident Fund dies and the sum standing to his credit in the books of the Fund does not exceed two thousand rupees, the officer or person whose duty it is to make payment of such sum may pay it as follows :—

(*a*) he may pay it to any person entitled to receive it according to the rules of the Fund or, in the absence of any rule of the Fund to the contrary, to any person nominated in writing by the deceased subscriber or depositor to receive it ;

(*b*) in any case not hereinbefore provided for, he may pay it to any person appearing to him to be entitled to receive it.

(*2*) The provisions of sub-section (*1*) shall apply to any such sum which, at the commencement of this Act, stands to the credit of any subscriber or depositor already deceased.

(*3*) Nothing in this section shall affect the validity of the rules of any Fund in so far as such rules may provide for the disposal of sums exceeding two thousand rupees.

Government and Railway Provident Funds not to be attached.

4. After the commencement of this Act, the compulsory deposits in any Government or Railway Provident Fund shall not be liable to attachment under any decree or order of a Court of Justice in respect of any debt or liability incurred by a subscriber to, or depositor in, such Fund, and neither the Official Assignee, nor a Receiver appointed under Chapter XX of the Code of Civil Procedure, shall be entitled to, or have any claim on, any such compulsory deposit.

XIV of 1882

Protection for anything done in good faith under this Act.

5. No suit or other legal proceeding shall lie against any person in respect of anything done or in good faith intended to be done in pursuance of the provisions of this Act.

Power to extend Act to other Provident Funds.

6. The Governor General in Council may, in his discretion, by notification in the official Gazette, extend the provisions of this Act to any Provident Fund established for the benefit of its employees by any local authority within the meaning of the Local Authorities Loan Act, 1879.

XI of 1879.

Saving as to estates of soldiers.

7. Nothing in section 3 shall apply to money belonging to the estate of any European officer, non-commissioned officer or soldier dying in Her Majesty's service in India, or of any European who at the time of his death was a deserter from such service.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 11th March, 1897, and is hereby promulgated for general information:—

ACT No. X OF 1897.

THE GENERAL CLAUSES ACT, 1897.

THE SCHEDULE.

ENACTMENTS REPEALED.

An Act to consolidate and extend the General Clauses Acts, 1868 and 1887.

WHEREAS it is expedient to consolidate and extend the General Clauses Acts, 1868 and 1887; It is hereby enacted as follows:—

I of 1868. I of 1887.

Preliminary.

Short title and commencement.

1. (*1*) This Act may be called the General Clauses Act, 1897; and

(*2*) It shall come into force at once.

Repeal.

2. The Acts mentioned in the schedule are repealed to the extent specified in the fourth column thereof.

General Definitions.

Definitions.

3. In this Act, and in all Acts of the Governor General in Council and Regulations made after the commencement of this Act, unless there is anything repugnant in the subject or context,—

"Abet."

(*1*) "abet," with its grammatical variations and cognate expressions, shall have the same meaning as in the Indian Penal Code;

XLV of 1860.

"Act."

(*2*) "act," used with reference to an offence or a civil wrong, shall include a series of acts, and words which refer to acts done extend also to illegal omissions:

"Affidavit."

(*3*) "affidavit" shall include affirmation and declaration in the case of persons by law allowed to affirm or declare instead of swearing:

"Barrister."

(*4*) "barrister" shall mean a barrister of England or Ireland, or a member of the Faculty of Advocates in Scotland:

"Bengal Act." 24 & 25 Vict., c. 67; 55 & 56 Vict., c. 14.

(*5*) "Bengal Act" shall mean an Act made by the Lieutenant-Governor of Bengal in Council under the Indian Councils Acts, 1861 and 1892:

"Bombay Act." 24 & 25 Vict., c. 67; 55 & 56 Vict., c. 14.

(*6*) "Bombay Act" shall mean an Act made by the Governor of Bombay in Council under the Indian Councils Acts, 1861 and 1892:

"British India."

(*7*) "British India" shall mean all territories and places within Her Majesty's dominions which are for the time being governed by Her Majesty through the Governor General of India or through any Governor or other officer subordinate to the Governor General of India:

"British possession."

(*8*) "British possession" shall mean any part of Her Majesty's dominions, exclusive of the United Kingdom, and, where parts of those dominions are under both a central and a local legislature, all parts under the central legislature shall, for the purposes of this definition, be deemed to be one British possession:

"Chapter."

(*9*) "Chapter" shall mean a Chapter of the Act or Regulation in which the word occurs:

"Collector."

(*10*) "Collector" shall mean, in a Presidency-town, the Collector of Calcutta, Madras or Bombay, as the case may be, and, elsewhere, the chief officer in charge of the revenue administration of a district:

"Colony."

(*11*) "Colony" shall mean any part of Her Majesty's dominions, exclusive of the British Islands and of British India, and, where parts of those dominions are under both a central and a local legislature, all parts under the central legislature shall, for the purposes of this definition, be deemed to be one colony:

"Commencement."

(*12*) "commencement," used with reference to an Act or Regulation, shall mean the day on which the Act or Regulation comes into force:

"Commissioner."

(*13*) "Commissioner" shall mean the chief officer in charge of the revenue-administration of a division:

"Consular officer."

(*14*) "consular officer" shall include consul-general, consul, vice-consul, consular agent, pro-consul and any person for the time being authorized to perform the duties of consul-general, consul, vice-consul or consular agent:

"District Judge."

(*15*) "District Judge" shall mean the Judge of a principal Civil Court of original jurisdiction, but shall not include a High Court in the exercise of its ordinary or extraordinary original civil jurisdiction:

"Document."

(*16*) "document" shall include any matter written, expressed or described upon any substance by means of letters, figures or marks, or by more than one of those means, which is intended to be used, or which may be used, for the purpose of recording that matter:

"Enactment."

(*17*) "enactment" shall include a Regulation (as hereinafter defined) and any Regulation of the Bengal, Madras or Bombay Code, and shall also include any provision contained in any Act or in any such Regulation as aforesaid:

"Father." (18) "father", in the case of any one whose personal law permits adoption, shall include an adoptive father:

"Financial year." (19) "financial year" shall mean the year commencing on the first day of April:

"Good faith." (20) a thing shall be deemed to be done in "good faith" where it is in fact done honestly, whether it is done negligently or not:

"Government." (21) "Government" or "the Government" shall include the Local Government as well as the Government of India:

"Government of India." (22) "Government of India" shall mean the Governor General in Council or, during the absence of the Governor General from his Council, the President in Council, or the Governor General alone, as regards the powers which may be lawfully exercised by them or him respectively:

"Her Majesty" or "the Queen." (23) "Her Majesty" or "the Queen" shall include Her successors:

"High Court." (24) "High Court," used with reference to civil proceedings, shall mean the highest Civil Court of appeal in the part of British India in which the Act or Regulation containing the expression operates:

"Immoveable property." (25) "immoveable property" shall include land, benefits to arise out of land, and things attached to the earth, or permanently fastened to anything attached to the earth:

"Imprisonment." (26) "imprisonment" shall mean imprisonment of either description as defined in the Indian Penal Code: XLV of 1860.

"India." (27) "India" shall mean British India, together with any territories of any Native Prince or Chief under the suzerainty of Her Majesty exercised through the Governor General of India or through any Governor or other officer subordinate to the Governor General of India:

"Local authority." (28) "local authority" shall mean a municipal committee, district board, body of port commissioners or other authority legally entitled to, or entrusted by the Government with, the control or management of a municipal or local fund:

"Local Government" (29) "Local Government" shall mean the person authorized by law to administer executive government in the part of British India in which the Act or Regulation containing the expression operates, and shall include a Chief Commissioner:

"Madras Act." (30) "Madras Act" shall mean an Act made by the Governor of Fort St. George in Council under the Indian Councils Acts, 1861 and 1892: 24 & 25 Vict., c. 67 55 & 56 Vict., c. 14.

"Magistrate." (31) "Magistrate" shall include every person exercising all or any of the powers of a Magistrate under the Code of Criminal Procedure for the time being in force: X of 1882.

(32) "master," used with reference to a ship, shall mean any person (except a pilot or harbour-master) having for the time being control or charge of the ship: "Master" (of a ship).

(33) "month" shall mean a month reckoned according to the British calendar: "Month."

(34) "moveable property" shall mean property of every description, except immoveable property: "Moveable property."

(35) "North-Western Provinces and Oudh Act" shall mean an Act made by the Lieutenant-Governor of the North-Western Provinces and Oudh in Council under the Indian Councils Acts, 1861 and 1892: "North-Western Provinces and Oudh Act." 24 & 25 Vict., c. 67; 55 & 56 Vict., c. 14.

(36) "oath" shall include affirmation and declaration in the case of persons by law allowed to affirm or declare instead of swearing: "Oath."

(37) "offence" shall mean any act or omission made punishable by any law for the time being in force: "Offence."

(38) "Part" shall mean a Part of the Act or Regulation in which the word occurs: "Part."

(39) "person" shall include any company or association or body of individuals, whether incorporated or not: "Person."

(40) "Political Agent" shall include— "Political Agent."

(a) the principal officer representing the Government in any territory or place beyond the limits of British India, and

(b) any officer of the Government of India or of any Local Government appointed by the Government of India or the Local Government to exercise all or any of the powers of a Political Agent for any place not forming part of British India under the law for the time being in force relating to foreign jurisdiction and extradition:

(41) "Presidency-town" shall mean the local limits for the time being of the ordinary original civil jurisdiction of the High Court of Judicature at Fort William, Madras or Bombay, as the case may be: "Presidency-town."

(42) "Privy Council" shall mean the Lords and others for the time being of Her Majesty's Most Honourable Privy Council: "Privy Council."

(43) "province" shall mean the territories for the time being administered by any Local Government: "Province."

(44) "public nuisance" shall mean a public nuisance as defined in the Indian Penal Code: "Public nuisance." XLV of 1860.

(45) "registered," used with reference to a document, shall mean registered in British India under the law for the time being in force for the registration of documents: "Registered."

'Regulation.' (46) "Regulation" shall mean a Regulation made under the Government of India Act, 1870:

33 Vict., c. 3.

"Rule." (47) "rule" shall mean a rule made in exercise of a power conferred by any enactment, and shall include a regulation made as a rule under any enactment:

"Schedule." (48) "schedule" shall mean a schedule to the Act or Regulation in which the word occurs:

XIV of 1874.

Scheduled District" (49) "Scheduled District" shall mean a "Scheduled District" as defined in the Scheduled Districts Act, 1874:

"Section." (50) "section" shall mean a section of the Act or Regulation in which the word occurs:

"Ship." (51) "ship" shall include every description of vessel used in navigation not exclusively propelled by oars:

"Sign." (52) "sign," with its grammatical variations and cognate expressions, shall, with reference to a person who is unable to write his name, include "mark", with its grammatical variations and cognate expressions:

"Son." (53) "son", in the case of any one whose personal law permits adoption, shall include an adopted son:

"Sub-section." (54) "sub-section" shall mean a sub-section of the section in which the word occurs:

"Swear." (55) "swear", with its grammatical variations and cognate expressions, shall include affirming and declaring in the case of persons by law allowed to affirm or declare instead of swearing:

"Vessel." (56) "vessel" shall include any ship or boat or any other description of vessel used in navigation:

"Will." (57) "will" shall include a codicil and every writing making a voluntary posthumous disposition of property:

"Writing." (58) expressions referring to "writing" shall be construed as including references to printing, lithography, photography and other modes of representing or reproducing words in a visible form: and

"Year." (59) "year" shall mean a year reckoned according to the British calendar.

Application of foregoing definitions to previous enactments.

4. (1) The definitions in section 3 of the following words and expressions, that is to say "affidavit," "barrister," "British India," "District Judge," "father," "Government of India," "Her Majesty" or "the Queen," "High Court," "immoveable property," "imprisonment," "Local Government," "Magistrate," "month," "moveable property," "oath," "person," "section," "son," "swear," "will" and "year," apply also, unless there is anything repugnant in the subject or context, to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

(2) The definitions in the said section of the following words and expressions, that is to say, "abet," "Chapter," "commencement," "financial year," "local authority," "master," "offence," "Part," "public nuisance," "registered," "schedule," "ship," "sign," "sub-section" and "writing," apply also, unless there is anything repugnant in the subject or context, to all Acts of the Governor General in Council and Regulations made on or after the fourteenth day of January, 1887.

General Rules of Construction.

Coming into operation of enactments.

5. (1) Where any Act of the Governor General in Council is not expressed to come into operation on a particular day, then it shall come into operation on the day on which it receives the assent of the Governor General.

(2) Where any Act of the Governor General in Council is reserved under the Indian Councils Act, 1861, section 20, for the signification of Her Majesty's pleasure thereon, then, if no later date is expressed, it shall come into operation, if assented to by Her Majesty, on the day on which the assent of Her Majesty is duly proclaimed.

24 & 25 Vict., c 67.

(3) Unless the contrary is expressed, an Act of the Governor General in Council or Regulation shall be construed as coming into operation immediately on the expiration of the day preceding its commencement.

Effect of repeal.

6. Where this Act, or any Act of the Governor General in Council or Regulation made after the commencement of this Act, repeals any enactment hitherto made or hereafter to be made, then, unless a different intention appears, the repeal shall not—

(a) revive anything not in force or existing at the time at which the repeal takes effect; or

(b) affect the previous operation of any enactment so repealed or anything duly done or suffered thereunder; or

(c) affect any right, privilege, obligation or liability acquired, accrued or incurred under any enactment so repealed; or

(d) affect any penalty, forfeiture or punishment incurred in respect of any offence committed against any enactment so repealed; or

(e) affect any investigation, legal proceeding or remedy in respect of any such right, privilege, obligation, liability, penalty, forfeiture or punishment as aforesaid;

and any such investigation, legal proceeding or remedy may be instituted, continued or enforced, and any such penalty, forfeiture or punishment may be imposed as if the repealing Act or Regulation had not been passed.

Revival of repealed enactments.

7. (*1*) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be necessary, for the purpose of reviving, either wholly or partially, any enactment wholly or partially repealed, expressly to state that purpose.

(*2*) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Construction of references to repealed enactments.

8. (*1*) Where this Act, or any Act of the Governor General in Council or Regulation made after the commencement of this Act, repeals and re-enacts, with or without modification, any provision of a former enactment, then references in any other enactment or in any instrument to the provision so repealed shall, unless a different intention appears, be construed as references to the provision so re-enacted.

Commencement and termination of time.

9. (*1*) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be sufficient, for the purpose of excluding the first in a series of days or any other period of time, to use the word "from," and, for the purpose of including the last in a series of days or any other period of time, to use the word "to".

(*2*) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Computation of time.

10. (*1*) Where, by any Act of the Governor General in Council or Regulation made after the commencement of this Act, any act or proceeding is directed or allowed to be done or taken in any Court or office on a certain day or within a prescribed period, then, if the Court or office is closed on that day or the last day of the prescribed period, the act or proceeding shall be considered as done or taken in due time if it is done or taken on the next day afterwards on which the Court or office is open:

Provided that nothing in this section shall apply to any act or proceeding to which the Indian Limitation Act, 1877, applies.

XV of 1877.

(*2*) This section applies also to all Acts of the Governor General in Council and Regulations made on or after the fourteenth day of January, 1887.

Measurement of distances.

11. In the measurement of any distance, for the purposes of any Act of the Governor General in Council or Regulation made after the commencement of this Act, that distance shall, unless a different intention appears, be measured in a straight line on a horizontal plane.

Duty to be taken *pro rata* in enactments.

12. Where, by any enactment now in force or hereafter to be in force, any duty of customs or excise, or in the nature thereof, is leviable on any given quantity, by weight, measure or value of any goods or merchandize, then a like duty is leviable according to the same rate on any greater or less quantity.

Gender and number.

13. In all Acts of the Governor General in Council and Regulations, unless there is anything repugnant in the subject or context,—

(*1*) words importing the masculine gender shall be taken to include females; and

(*2*) words in the singular shall include the plural, and *vice versâ*.

Powers and Functionaries.

Powers conferred on the Government to be exercisable from time to time.

14. (*1*) Where, by any Act of the Governor General in Council or Regulation made after the commencement of this Act, any power is conferred on the Government, then that power may be exercised from time to time as occasion requires.

(*2*) This section applies also to all Acts of the Governor General in Council and Regulations made on or after the fourteenth day of January, 1887.

Power to appoint to include power to appoint *ex officio*.

15. Where, by any Act of the Governor General in Council or Regulation, a power to appoint any person to fill any office or execute any function is conferred, then, unless it is otherwise expressly provided, any such appointment, if it is made after the commencement of this Act, may be made either by name or by virtue of office.

Power to appoint to include power to suspend or dismiss.

16. Where, by any Act of the Governor General in Council or Regulation, a power to make any appointment is conferred, then, unless a different intention appears, the authority having power to make the appointment shall also have power to suspend or dismiss any person appointed by it in exercise of that power.

Substitution of functionaries.

17. (*1*) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be sufficient, for the purpose of indicating the application of a law to every person or number of persons for the time being executing the functions of an office, to mention the official title of the officer at present executing the functions, or that of the officer by whom the functions are commonly executed.

(*2*) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Successors.

18. (*1*) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be sufficient, for the purpose of indicating the relation of a law to the successors of any functionaries or of corporations having perpetual succession, to express its relation to the functionaries or corporations.

(*2*) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Official chiefs and subordinates.

19. (1) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be sufficient, for the purpose of expressing that a law relative to the chief or superior of an office shall apply to the deputies or subordinates lawfully performing the duties of that office in the place of their superior, to prescribe the duty of the superior.

(2) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Provisions as to Orders, Rules, etc., made under Enactments.

Construction of orders, etc., issued under enactments.

20. Where, by any Act of the Governor General in Council or Regulation, a power to issue any order, scheme, rule, form or bye-law is conferred, then expressions used in the order, scheme, rule, form or bye law, if it is made after the commencement of this Act, shall, unless there is anything repugnant in the subject or context, have the same respective meanings as in the Act or Regulation conferring the power.

Power to make, to include power to add to, amend, vary or rescind, orders, rules or bye-laws.

21. Where, by any Act of the Governor General in Council or Regulation, a power to make orders, rules or bye-laws is conferred, then that power includes a power, exercisable in the like manner and subject to the like sanction and conditions (if any), to add to, amend, vary or rescind any orders, rules or bye-laws so made.

Making of rules or bye-laws and issuing of orders between passing and commencement of enactment.

22. Where, by any Act of the Governor General in Council or Regulation which is not to come into force immediately on the passing thereof, a power is conferred to make rules or bye-laws, or to issue orders with respect to the application of the Act or Regulation, or with respect to the establishment of any Court or office or the appointment of any Judge or officer thereunder, or with respect to the person by whom, or the time when, or the place where, or the manner in which, or the fees for which, anything is to be done under the Act or Regulation, then that power may be exercised at any time after the passing of the Act or Regulation; but rules, bye-laws or orders so made or issued shall not take effect till the commencement of the Act or Regulation.

Provisions applicable to making of rules or bye-laws after previous publication.

23. Where, by any Act of the Governor General in Council or Regulation, a power to make rules or bye-laws is expressed to be given subject to the condition of the rules or bye-laws being made after previous publication, then the following provisions shall apply, namely :—

(1) the authority having power to make the rules or bye-laws shall, before making them, publish a draft of the proposed rules or bye-laws for the information of persons likely to be affected thereby;

(2) the publication shall be made in such manner as that authority deems to be sufficient, or, if the condition with respect to previous publication so requires, in such manner as the Governor General in Council or the Local Government prescribes;

(3) there shall be published with the draft a notice specifying a date on or after which the draft will be taken into consideration;

(4) the authority having power to make the rules or bye laws, and, where the rules or bye laws are to be made with the sanction, approval or concurrence of another authority, that authority also, shall consider any objection or suggestion which may be received by the authority having power to make the rules or bye laws from any person with respect to the draft before the date so specified;

(5) the publication in the Gazette of a rule or bye-law purporting to have been made in exercise of a power to make rules or bye-laws after previous publication shall be conclusive proof that the rule or bye-law has been duly made.

Continuation of orders, etc., issued under enactments repealed and re-enacted.

24. Where any Act of the Governor General in Council or Regulation is, after the commencement of this Act, repealed and re-enacted with or without modification, then, unless it is otherwise expressly provided, any order, scheme, rule, form or bye law, issued under the repealed Act or Regulation, shall, so far as it is not inconsistent with the provisions re-enacted, continue in force, and be deemed to have been issued under the provisions so re enacted, unless and until it is superseded by any order, scheme, rule, form or bye-law issued under the provisions so re-enacted.

Miscellaneous.

XLV of 1860. Recovery of fines.

25. Sections 63 to 70 of the Indian Penal Code and the provisions of the Code of Criminal Procedure for the time being in force in relation to the issue and the execution of warrants for the levy of fines shall apply to all fines imposed under any Act, Regulation, rule or bye law, unless the Act, Regulation, rule or bye-law contains an express provision to the contrary.

Provision as to offences punishable under two or more enactments.

26. Where an act or omission constitutes an offence under two or more enactments, then the offender shall be liable to be prosecuted and punished under either or any of those enactments, but shall not be liable to be punished twice for the same offence.

Meaning of service by post.

27. Where any Act of the Governor General in Council or Regulation made after the commencement of this Act authorizes or requires any document to be served by post, whether the expression "serve" or either of the expressions "give" or "send" or any other expression is used, then, unless a different intention appears, the service shall be deemed to be effected by properly addressing, pre-paying and posting, by registered post, a letter containing the document, and, unless the contrary is proved, to have been effected at the time at which the letter would be delivered in the ordinary course of post.

Citation of enactments

28. (*1*) In any Act of the Governor General in Council or Regulation, and in any rule, bye-law, instrument or document, made under, or with reference to, any such Act or Regulation, any enactment may be cited by reference to the title or short title (if any) conferred thereon or by reference to the number and year thereof, and any provision in an enactment may be cited by reference to the section or sub-section of the enactment in which the provision is contained.

(*2*) In this Act and in any Act of the Governor General in Council or Regulation made after the commencement of this Act, a description or citation of a portion of another enactment shall, unless a different intention appears, be construed as including the word, section or other part mentioned or referred to as forming the beginning and as forming the end of the portion comprised in the description or citation.

Saving for previous enactments, rules and bye-laws.

29. The provisions of this Act respecting the construction of Acts, Regulations, rules or bye-laws made after the commencement of this Act shall not affect the construction of any Act, Regulation, rule or bye-law made before the commencement of this Act, although the Act, Regulation, rule or bye-law is continued or amended by an Act, Regulation, rule or bye-law made after the commencement of this Act.

THE SCHEDULE.

ENACTMENTS REPEALED.

(*See section 2.*)

Year.	No.	Title or subject.	Extent of repeal
1868	I	The General Clauses Act, 1868.	The whole.
1872	I	The Indian Evidence Act, 1872.	So much as relates to Act I of 1868.
1887	I	The General Clauses Act, 1887.	The whole
1891	XII	The Repealing and Amending Act, 1891.	So much as relates to Act I of 1868.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 47.

[First Publication.]

AUSTRALIA, SOUTH—GULF OF ST. VINCENT.

Port Adelaide river—Beacons lighted by electricity.

IN continuation of Notice to Mariners No. 15, dated 20th January 1897, issued by this office, the following further notice (No. 1 of 1897) by the President, Marine Board, Port Adelaide, is republished :—

Referring to Notice to Mariners (No. 6 of 1896) dated December 14th, 1896, notice is hereby given that on and after Monday, the 8th February 1897, the beacons in the Port Adelaide river will be lighted by electricity.

Consequent on the above the whole system of buoys and light beacons will be re-arranged.

Light beacons Nos. 1, 2, 3, and 4 of the present system will be discontinued.

All buoys marking the channel will be removed on the 8th instant except the two outside of the light-house, two black buoys near the old boat channel, and two mooring buoys (for vessels with explosives) in Lipson Reach.

The new system consists of (5) five pairs of leading lights and (8) eight single light beacons.

The pairs of leading lights and single light beacons will be numbered from seaward, instead of in the opposite way, as at present, that is to say, No. 12 and the light behind it of the old system will be No. 1 of the new, and so on.

The near light of each lead will be red, and the far one white, except in the case of No. 1 lead, where the far light will be red, as at present, and the near one white; these two have not been altered, because the red light of No. 1 on with No. 2 is an established lead over the ocean steamers' mooring buoy, and the white light of No. 1 on with No. 2 leads over the bell buoy on Wonga shoal.

The two lights of No. 1 lead through the outer cutting near the light-house, as at present.

Nos. 2 to 9, inclusive, are single lights, and will mark the edge of the channel from opposite the old boat channel to Mutton Cove.

Nos. 10, 11, 12, and 13 are leads, *i.e.*, pairs.

No. 10 is placed on the shore abreast of the two mooring buoys for vessels with explosives, and leads from Mutton Cove half way up Lipson Reach.

No. 11 is placed near the Torpedo station, and leads up the other half of Lipson Reach to the North Arm.

No. 12 is placed on the Swamp south of the False Arm, and leads from the North Arm to the False Arm.

No. 13 is placed on Snowden Beach, and leads from the False Arm to Luff Point.

The following sailing directions are published for general information:—

By night.—In approaching the entrance to the river the lights of No. 1 lead should, as formerly, be brought in line on a N.E. by E. bearing and be kept in line, which will lead between the outer black and red buoys and through the outter cutting. After passing the reflecting beacon gradually alter the course so as to pass the white light of No. 1 lead at a reasonable distance.

From a safe distance off No. 1, steer for a like distance off No. 2, and so on from beacon to beacon round the point until No. 9 is reached. From a safe distance off No. 9 the lights of No. 10 lead will be seen. Keep them in line until the red light is about a quarter of a point open to the right of the white light of No. 11 lead, then gradually alter the course to bring the lights of No. 11 lead in line. Keep them in line (a sharp look-out being kept for the mooring buoys on the starboard hand) until the lights of No. 12 lead are seen coming into line. Proceed as before by altering the course before the lights are on with each other. The same applies in the change from No. 12 to 13 leads. When the lights on the wharves are seen opening out off Luff Point alter the course so as to round the point at a safe distance, and then up the centre of the channel, looking out for the mooring buoy on the starboard hand.

By day.—The directions by day are the same as by night, merely substituting the beacons for the lights.

In going outwards the directions are just the opposite to those given for coming inwards; but in such case in changing from one lead to another the course should be gradually altered when abreast of the low (red) beacon of each lead.

NOTE.—The beacons from Nos. 1 to 9, inclusive, are placed from 15 to 20 feet shorewards from the edge of the cutting.

A new chart of the Port Adelaide Harbour and river and the Semaphore anchorage, showing the alterations herein referred to as well as other corrections to January last, may now be obtained at the Marine Board Offices, price 2*s*.

This affects charts Nos. 2389 A and B, plan 1750.

AUSTRALIA—FITZROY RIVER.

Additional leading lights near Rocky Point.

WITH reference to Notice to Mariners No. 32, dated 23rd February 1897, issued by this office, the Portmaster, Brisbane, has given notice that the Notice to Mariners No. 1 of 1897 is amended to read as follows, viz.:—

A pair of small white leading lights has been placed on False Point (about 7 cables below Rocky Point), Fitzroy river, which in line bearing about S.E. by E. lead through the gut between the ledge of rock 2½ cables below Rocky Point and the south-west extreme of Egg Sand, with a depth of 11 feet at low-water springs.

The front light is 8½ feet and the back light 18 feet above high water, the distance between them being about 950 feet. After passing the ledge a vessel must leave the line of lights and proceed as hitherto.

Chart affected—No. 363; and Australia Directory, Volume II.

NOTICE TO MARINERS—No. 35.

[Third Publication.]

SOUTH PACIFIC OCEAN—ROTUMAH ISLAND.

Search for dangers reported near that island.

THE British Admiralty has given notice (No. 63 of 1897), that information has been received from Captain A. M. Field, H. M. Surveying Vessel *Penguin*, that he has recently searched unsuccessfully for the undermentioned reported dangers:—

1. Shoal reported west of Rotumah island in lat. 12° 31′ S., long. 176° 41′ E.:—

This shoal, on which the natives of Rotumah were said to fish, was searched for in vain, depths of 1,700 to 1,800 fathoms being found in the locality.

From enquiries made of the natives on Rotumah it is believed no such shoal exists as they knew nothing of it, and moreover would be most unlikely to fish on a bank so far to leeward of the island.

It was probably an exaggerated account of the shallow water stretching off the south-west part of the island, and has therefore been expunged from the Admiralty charts.

2. Eagleston reef, reported as being in lat. 12° 20′ S., long. 177° 50′ E., was searched for without any indication being found of the existence of a shoal in the locality, the depths near its supposed position being from 1,650 to 1,900 fathoms.

If a shoal exists it must be eastward of the meridian of 178° 10′ E.

The position of this shoal on the Admiralty chart has consequently been transferred to lat. 12° 20′ S., long. 178° 15′ E., with P.D. placed against it.

NOTICE TO MARINERS—No. 36.

[Third Publication.]

NEW ZEALAND, NORTH ISLAND.

Unsuccessful search for Vision rock.

THE British Admiralty has given notice (No. 64 of 1897) that information has been received from Captain A. M. Field, H.M. Surveying Vessel *Penguin*, dated 4th December 1896, of an unsuccessful search for Vision rock, reported in 1885, as situated about 15 miles, E. by S., from the northern of the Tawhiti Rahi (Poor Knights), or approximately in lat. 35° 35½′ S., long. 175° 1½′ E.

The rock has already been searched for unsuccessfully on several occasions by the New Zealand Government steam-vessel *Stella*.

Captain Field reports that the *Penguin* sounded over an area of 120 square miles in the reported locality of Vision rock, and found no indication of a danger, the least depth obtained being 160 fathoms, amongst general depths of 180 fathoms.

The weather was very favourable for the search, and the light so good that it is most probable any danger would have been seen had it existed.

During the search, with the wind against the current, a strong tide ripple was observed from a distance that would have led anyone to believe that a shoal existed, but on sounding over the spot no irregularity whatever was found in the depth.

Vision rock has consequently been expunged from the Admiralty charts.

BAY OF BENGAL—BURMA COAST.

Gulf of Martaban—Amended position of Krishna shoal light-vessel.

THE British Admiralty has given notice (No. 67 of 1897) that Krishna shoal light-vessel (*group-flashing white* light) is now moored N. 50° E., distant $2\frac{5}{10}$ miles, from the position given in the above Notice, or approximately in lat. 15° 37′ 30″ N., long. 95° 36′ 30″ E.

(2) *Baragua flats light-vessel and position buoy.*

Also that the watch buoy (black) of Baragua flats light-vessel is moored in a depth of 5 fathoms, in approximately lat. 15° 29′ 45″ N., long. 95° 11′ 30″ E.

And Baragua flats light-vessel light is visible in clear weather from a distance of 12 miles.

SOUTH PACIFIC OCEAN—FIJI ISLANDS.

Reported reefs to the north-west.

NOTICE to Mariners No. 71 of 1897 issued by the British Admiralty is republished:—

The following information respecting certain dangers reported to exist in the vicinity of the Fiji islands has been received from Commander J. W. Combe, H.M. Surveying Vessel *Waterwitch*:—

1. Balmoral reef, $2\frac{1}{2}$ miles in length in a north-west and south-east direction and $1\frac{1}{2}$ miles in breadth, has a least depth of four fathoms near its eastern edge, with general depths of 5 to 7 fathoms.

   Approximate position, 4 fathoms, lat. 15° 40′ 15″ S., long. 175° 52′ 15″ E.

2. Hamond reef, reported as being in lat. 15° 32′ S., long. 175° 20′ E., was searched for without success, the depths in the neighbourhood being 1,600 to 1,700 fathoms.

   As this danger is believed to be identical with Balmoral reef it has been expunged from the Admiralty Charts.

3. Carter reef, reported as being in lat. 15° 42′ S., long. 176° 28′ E., was also searched for without success, the depths being 1,600 to 1,800 fathoms around its position. This danger has also been expunged from the Admiralty Charts as it is believed to be merely another position given of the Balmoral reef.
4. The reef reported to lie 2½ miles S.W. from Navula passage in approximately lat. 17 57¼′ S., long. 177° 10½′ E., was also searched for unsuccessfully, and this danger has been expunged from the Admiralty Charts.

SOUTH PACIFIC OCEAN.

Particulars of certain banks between Ellice and New Hebrides islands.

The British Admiralty has given notice (No. 72 of 1897) that the Turpie, Alexa, and Hazelholm banks have been recently surveyed by Captain A. M. Field, H.M. Surveying Vessel *Penguin*; also that a new bank, now named Penguin, has been discovered and the position of the Louisa bank ascertained.

The particulars of these banks are as follows:—

1. Turpie bank is 22 miles in length in a north-west and south-east direction, and 10 miles in breadth, with a general depth of 24 to 27 fathoms; but with a narrow ridge running the whole length of its north-eastern edge, the least depth on which is 15 fathoms.

   Approximate position, S.E. extreme, lat. 11° 31′ 30″ S., long. 175° 54′ 0″ E.
   Approximate position, N.W. extreme, lat. 11° 19′ 0″ S., long. 175° 34′ 30″ E.

2. Penguin bank, nearly circular in form, with a diameter of about 8 miles, has a narrow ridge round its edge, on which the depths are from 15 to 20 fathoms, and inside the ridge soundings of from 23 to 26 fathoms.

   Approximate position of its centre, lat. 11° 27′ S., long. 175° 29′ E.

3. Alexa bank is in the form of a triangle, the apex being its west extremity and the base to the eastward, and is 18 miles in length east and west with a base of about 10 miles. Round its edge is a ridge, the depths on which are from 13 to 17 fathoms, whilst in the centre they are from 24 to 27 fathoms. Close search having failed to detect less water, the 8 fathoms and rock previously marked in the Admiralty Chart have been expunged.

   Approximate position, western extreme, lat. 11° 36½′ S., long. 175° 7′ E.
   Approximate position, north-eastern extreme, lat. 11° 29′ S., long. 175° 20′ E.
   Approximate position, south-eastern extreme, lat. 11° 39½′ S., long. 175° 23½′ E.

4. Hazelholm bank is 5 miles in length in a north-east and south-west direction and 2½ miles in breadth, with a general depth over it of 24 fathoms, a ridge with from 17 to 20 fathoms encircling its northern edge.

   Approximate position, centre, lat. 12° 48′ S., long. 174° 1½′ E.

5. Louisa bank:—Depths of 17 fathoms were obtained on the western edge of this bank, in approximately lat. 11° 45′ S., long. 175° 56′ E.; but the bank has not yet been properly examined.

AUSTRALIA—INNER ROUTE.

Dangers recently found between Night island and Zed (z) reef.

THE British Admiralty has given notice (No. 73 of 1897) of the existence of the undermentioned dangers between Night island and Zed (z) reef, found in a recent survey of the locality :—

1. Glennie reef, of coral, dries 3 to 4 feet at low water springs, and is about a quarter of a mile long in a north-east and south-west direction and two cables broad ; with foul ground stretching half a mile westward of it.
   From the centre of the reef the beacon on Tih Tih (tt) reef bears W. ½ S., distant 11¼ cables ; and beacon on Vee (v) reef N. by W ¼ W.
   Approximate position, on Chart No. 2921, lat. 13° 8′ 40″ S., long. 143° 37′ 15″ E.
2. Morris rock, a small coral knoll with a least depth of 5¾ fathoms on it at low water spings, and 12 to 13 fathoms close around, is situated with the beacon on Vee (v) reef bearing N. by E., distant 1½ miles; and High Round hill (1543) W. ¾ N.
3. Ashton rock, of coral, with a least depth of 5 feet at low water springs near its centre, general depths of 2 to 3 fathoms, and 7 to 8 fathoms around, is about a cable long and half a cable broad. From its centre cape Direction southern summit (500) bears N.W., distant 3 1/10 miles; and Chapman island (No. X) N.E. by E. ¾ E.
4. Halloran rock, of coral, with a depth of 26 feet on it at low water springs, and 15 to 16 fathoms close around, is situated with the beacon on Wye (y) reef bearing S.S.E. ¾ E., distant 10½ cables ; and cape Direction northern summit (411) S.W.

NOTE.—The positions given are with reference to the position of the land in the vicinity, which is not absolutely correct as shown on the present charts.

In due course the charts will be corrected from the recent surveys, and the existing charts will then be cancelled.

SOUTH-WEST PACIFIC—LA BRILLANTE SHOAL.

Further search for this shoal.

WITH reference to Notice to Mariners No. 202, dated 8th October *last*, issued by this office, the British Admiralty has given further notice (No. 74 of 1897) that information has been received from Commander J. W. Combe, H.M. Surveying Vessel *Waterwitch*, that he has recently made a close search, during two days round a beacon anchored in 1,200 fathoms, on the elevation, from a bottom of a general depth of 2,000 fathoms, found in the former examination of La Brillante shoal, in approximately lat 23° 14′ S., long. 170° 6′ E., but no less water could be found.

La Brillante shoal has consequently been expunged from the Admiralty Charts.

NEW ZEALAND—Cook strait.

(1) South island—Farewell spit light exhibited from new lighthouse.

The British Admiralty has given notice (No. 76 of 1897) that on 19th January 1897, Farewell spit (Bush-end point) light would be exhibited from a new lighthouse, recently erected in a position 176 feet eastward of the old lighthouse:—

Farewell spit light is a *revolving* light with a period of *one minute*, showing the following sectors:—*white* from about S. 79° E., through south and west, to N. 76° W.; and *red* from about N. 76° W. to N. 42° W. (over spit end), as before.

It is elevated 97 feet above the sea and visible in clear weather from a distance of 15 miles.

The lighthouse, 88 feet high, is an open framework, iron structure, painted red and white, in bands. The old lighthouse would be taken down as soon as possible.

Approximate position, lat. 40° 33′ 0″ S., long. 173° 1′ 55″ E.

Note.—The shoal off Spit end has extended recently; depths 2 fathoms less than those shown on the chart having been found for nearly 2 miles in a S.E. by E. direction from Spit end. Vessels should not enter the sector of red light until at least 6 miles distant from Farewell Spit lighthouse.

Further Notice will be given if necessary as to the arcs of the sectors of the new light, their exact limits not having been ascertained.

(2) North island—intended light on Cape Palliser.

Also, that, about June 1897, a light will be exhibited from a lighthouse in course of erection on Rocky point, eastern side of cape Palliser:—

Cape Palliser (Rocky point) light will be a dioptric, *group-flashing white* light with a period of *thirty seconds*, showing *two flashes*, separated by an interval of *three seconds*, in each group.

It will be elevated 258 feet above high water, and visible seaward, over an arc of 214°, distance of 23 miles in clear weather.

Approximate position, lat. 41° 36′ 45″ S., long. 175° 18′ 45″ E.

Further Notice will be given when the date of the exhibition of the light is known.

AUSTRALIA—Fitzroy river.

Additional leading lights near Rocky Point.

The Port-master, Brisbane, has given notice (No. 1 of 1897) that a pair of small white leading lights have been placed on False Point (7 cables below Rocky Point), Fitzroy river, which, in line, bearing S.E. by E., lead through the gut between Rocky Point and the south-west extreme of Egg Sand, with a depth of 11 feet at low-water springs.

The front light is 3½ feet and the back light 18 feet above high water, the distance between them being 950 feet.

After passing Rocky Point a vessel will leave the line of lights and proceed as before.

The Hon'ble GURU PROSHAD SEN.
The Hon'ble M. S. DAS.
The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH.

PUBLIC DEMANDS RECOVERY ACT, 1895, AMENDMENT BILL.

The Hon'ble MR. FINUCANE moved that the Report of the Select Committee on the Bill to amend the Public Demands Recovery Act, 1895, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. FINUCANE also moved that the clauses of the Bill be considered for settlement in the form recommended by the Select Committee.

The Motion was put and agreed to.

The Hon'ble MR. FINUCANE said:—"The Report has been in the hands of Hon'ble Members for some time, and I hope it sufficiently explains what we have done.

"When introducing this Bill I stated that the sole object of it was to correct certain clerical errors and to supply certain omissions which had inadvertently occurred in the Act of 1895, so as to give effect to the intention of the framers of that Act. It was then proposed that instead of a small amending Bill an altogether new Bill should be introduced embodying all the provisions of the law for recovery of public demands, and in reply to that proposal, I said that the object and intention of this Bill was not to re-open discussion on the substantive law, or to make a new law on the subject, but merely to give effect to the intention of the existing law.

"I should not have thought it necessary to occupy the time of the Council by entering into an explanation of the details of the manner in which we propose to effect the object of the Bill, or to say anything on the present occasion more than to make a formal motion, were it not that I see a formidable number of amendments on the list of business which seem to me to be based on a misapprehension of the scope of this Bill and to be entirely inconsistent with its principle, and therefore, as I shall presently submit, out of order.

"My object in doing so is not to stifle discussion, for all but one of the questions which it is proposed to raise now in an irregular manner, were fully discussed when the Act was under consideration; conclusions were deliberately come to on them, and it would be obviously most inconvenint and contrary to precedent, when a small Bill is introduced amending an existing Act, with a view to correct clerical mistakes, to permit the whole of the Act to be brought again under consideration. All that would result from allowing a procedure of this kind would be wanton waste of the time of the Council. The very same arguments would be advanced and refuted as were advanced and refuted less than two years ago (when the *personnel*, of the non-official elements of the Council, was very much the same as it now is), and with the same results.

"I think I may appeal to the Hon'ble the Advocate-General, the oldest and most experienced Member of this Council, and ask if this view be correct. If it be then the only amendment on the Bill as settled by the Select Committee in the long list of amendments before us—is the first amendment proposed by the Hon'ble Guru Proshad Sen. That amendment would, if carried, have the effect of omitting clauses (*c*) and (*e*) of section 6 of the Bill. These clauses are new and of little importance. By them it is proposed to make the certificate procedure applicable to the recovery of pleaders' and mukhtears' fees and costs when awarded by Revenue Officers under any law or rule having the force of law, in revenue proceedings before these officers, and where the award is final. Under the law as it stands the fees and costs in such cases, if not voluntarily paid, can be recovered only by suit in a Civil Court. The Select Committee were of opinion that the Certificate Procedure should obviously apply in these cases, and thought that it was only by an oversight that it had not been made applicable before. I admit that the clauses are new and so far inconsistent with the principle of the Bill. If they are not unanimously accepted, I am prepared to withdraw them.

"I hope in light of this explanation that all the amendments will be withdrawn, and that the Bill will be at once passed.

"If the amendments are pressed, I shall submit in respect of each of them *seriatim* that it is out of order and have to give my reasons."

The Hon'ble THE PRESIDENT said:—"I may say at once in connection with this Bill that I cannot allow the substantive law which was settled so recently to be re-opened. It is entirely out of order, as the Hon'ble Mr. Finucane rightly submitted, that we should travel again over the whole ground of the discussion which took place before. This Bill was introduced for certain definite limited purposes, and we have not the consent of the Government of India to re-open legislation which was settled so short a time ago and which has received the sanction of the Viceroy and is the settled law of the land. I hold, therefore, that unless it can be shown that the amendments which are on the notice paper deal with new matters which have been introduced by the Select Committee, they are out of order, and I cannot allow them to be discussed. If any Hon'ble Member can show that any particular amendment of his does not fall within the scope of the bar which I feel bound, as a matter of order, to place over these proposals, I shall be prepared to consider it; but anything which attempts to re-open the substantive law as it stands cannot be considered at all."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I desire, with your Honour's permission, to point out that, although the Hon'ble Member in charge of the Bill has observed that the Bill as it was introduced was intended to be a non-contentious Bill, merely giving effect to the intentions of the existing law, yet matters which are altogether outside the scope of a mere amending Act which only seeks to rectify clerical errors have found their way into the Bill. That being so, it strikes me, with all deference to the ruling of the chair, that we might perhaps travel outside the limits imposed upon us by the Hon'ble Mr. Finucane in his opening speech. With reference to precedents, I wish to point out that when the Bill to amend the Bengal Municipal Act was introduced, we were permitted to deal with sections of the Act which were referred to in the Bill as it was introduced, and sometimes even with sections which were not so referred to, and I think we ought to be permitted to follow the principle laid down by that precedent, and at any rate to deal with sections in the Public Demands Recovery Act which are included in this Bill."

The Hon'ble THE PRESIDENT said:—"I have no doubt whatever as to the Hon'ble Babu Surendranath Banerjee's particular amendment, because it would be re-opening a cardinal question which has been carefully discussed before. It is not an amendment upon any provision which has been introduced by the Select Committee. I am not, however, quite clear as to some of the amendments standing in the name of the Hon'ble Babu Guru Proshad Sen."

The Hon'ble BABU GURU PROSHAD SEN said:—"I am not particularly anxious to press my first amendment. I put it on the notice paper simply to show how the Select Committee in their report have gone beyond the terms of the reference. When this Bill was introduced into Council it was what the outside public called a "tinkering Bill," a measure which the Hon'ble Member in charge of the Bill characterised as a very small one—a non-contentious measure in which no question of principle was involved. But I submit that the clauses (*c*) and (*e*), which were proposed by section 6 of the Bill to be inserted in section 7 of the Act, do involve questions of principle. By clause (*e*) sums awarded as compensation are made recoverable under the provisions of the Public Demands Recovery Act. I have to remind the Council that though compensations are made recoverable under the Revenue Sale Laws, in the event of a sale being cancelled even when Act VII (B.C.) of 1868, introducing for the first time the Certificate Procedure, awards of compensation in sale cases under the Act were not made recoverable. Since 1868 about thirty years had elapsed, and during the whole of that period the want has not been felt of a summary power for the recovery of such compensation. It is, however, now for the

first time proposed to supplement the alleged defect in the law of 1868. This is certainly open to the remark that it is perfectly new to the principle of the Bill. As, however, I am not entitled, under your Honour's ruling, to move any of the other amendments of which I have given notice, and which I consider to be much more important, I think I may as well withdraw my amendment No. 1 to omit the new clauses."

The Hon'ble THE PRESIDENT said:—"This is, as the Hon'ble Babu Guru Proshad Sen says, a tinkering Bill, and I think it was open to the Select Committee to do any additional tinkering which may have appeared necessary to them in the further examination of the law. It was not open to them to introduce any substantive legislation; but it was open to them to supply any defect or omission that they may have discovered, and in this respect I think it is open to the Hon'ble Member, if he desires to press it, to move his first amendment, which is a perfectly legitimate one. If he desires to argue this amendment, I have not the least objection."

The Hon'ble MR. FINUCANE said:—"I understand the Hon'ble Member has no objection to these provisions on the merits, and that he is willing to withdraw his amendment No. 1 with regard to them."

The Hon'ble BABU GURU PROSHAD SEN asked if the President would permit him to move his amendment No. 9, which was also an addition and which stood thus:—

"*Section 6 of the Bill.*—If the above amendments numbered (*1*) to (*6*) be lost, that the following clause be added to the proposed new section 7 of the Act, namely:—

'(*j*) any arrears of rent or cess due to a registered proprietor with regard to lands in an estate which has been surveyed and settled under the Bengal Tenancy Act, and the records kept up and mutations registered.'"

The Hon'ble THE PRESIDENT said:—"The amendment No. 9 is not a tinkering amendment. It opens up a very large question of principle. An entirely new Bill would have to be introduced after leave obtained."

The Hon'ble SIR CHARLES PAUL said:—"Permit me to point out that the Public Demands Recovery Act is rather in alleviation of the subject. If that Act was not passed, Government demands could be levied in a much more summary way; therefore that Act is in derogation of the rights of the Crown. The principle of the Act has been extended to Wards' Estates. To extend these provisions to demands in zamindars' estates would need the introduction of a separate Bill."

The Hon'ble the President having declared the following amendments of the Hon'ble Babu Surendranath Banerjee to be out of order, they were not brought forward:—

(*1*). *Section 6.*—That clause (*h*) in section 6 of the Bill be omitted.

(*2*). That corresponding changes be made in all sections of the Bill which refer to the aforesaid clause.

The Hon'ble the President having also declared the following amendments of the Hon'ble Babu Guru Proshad Sen to be out of order, they were not proposed:—

(*1*). *Section 6 of the Bill.*—That the new clauses (*c*) and (*e*) which it is proposed to insert in section 7 of the Act be omitted.

(*2*). *Section 6 of the Bill.*—That clause (*h*) and sub-section (*2*) of the proposed new section 7 of the Act be omitted.

(*3*). *Section 6 of the Bill.*—That the proviso appearing after clause (*h*) of the proposed new section 7 of the Act be placed after clause (*g*) of that section.

(*4*). *Section 6 of the Bill.*—That the words "or any Local Authority" in clause (*i*) of the proposed new section 7 of the Act be omitted.

(*5*). *Section 7 of the Bill.*—That the words from "in the case specified in clause (*h*) of the said section" to "the said Local Authority shall be deemed to be the decree-holder" be omitted.

(*6*). *Section 8 (1) of the Bill.*—That the words from "or to a Local Authority" to "as the case may be" be omitted.

(*7*). If the above amendments be lost, that the words "and there shall be payable in respect thereof a court-fee of the same amount as is payable under the Court-fees Act for the time being in force in respect of a plaint for the recovery of a sum of money equal to that stated in such requisition," in section 9 (*2*) of the Act, be repealed.

(*8*). If the last foregoing amendment be carried, that the words "together with the cost of any court-fee paid in respect of such requisition under sub-section (*2*) of this section," in section 9 (*3*) of the Act, be repealed.

(*9*). *Section 6 of the Bill.*—If the above amendments numbered (*1*) to (*6*) be lost, that the following clause be added to the proposed new section 7 of the Act, namely:—

"(*j*) any arrears of rent or cess due to a registered proprietor with regard to lands in an estate which has been surveyed and settled under the Bengal Tenancy Act, and the records kept up and mutations registered."

(*10*). *Section 12 of the Bill.*—That the words "one-twentieth" or the words "five *per cent.*" be substituted for the words "one-tenth" in clause (*b*) of the proposed new section 21 of the Act [corresponding with clause (*b*) of the existing section 19 of the Act.]

(*11*). *Section 16 of the Bill.*—That the following portion of this section be omitted, namely:—

"the words 'Local Authority, Manager or Revenue Authority' shall be, and be deemed to have always been, substituted for the words 'other than a Certificate Officer, or from a manager appointed by the Court of Wards.'"

(*12*). *Section 17 of the Bill.*—That, instead of inserting the words "or as the case may be" in Form No. 2 in the Schedule to the Act, the words "or to A, B, a Ward of Court, or a minor, or a lunatic, by his next friend C. D." in that Form should be repealed.

The Hon'ble Mr. Finucane then moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

The Council adjourned to Saturday, the 20th March, 1897.

THE KHARIF IRRIGATION OPERATIONS FOR 1896-97.

No. 336*I*.

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

IRRIGATION.

Dated Calcutta, the 12th March 1897.

RESOLUTION.

READ—

Statements Nos. I, II, and III showing irrigation operations of canals in Bengal during the *kharif* season of 1896-97.

OBSERVATIONS.—The area irrigated during the *kharif* season of 1896-97 was 601,792 acres, against 491,017 acres in 1895-96, showing an increase of 22·56 per cent.

2. The increase took place in the areas irrigated by the Orissa, Midnapore and Sone Canals, the only decrease being in the areas irrigated by the Eden Canal. In Orissa, although the total average rainfall during the season was 4·69 inches more than last year, there was a very large increase of 75,265 acres in the area irrigated. This was mainly due to the introduction of the revised system of irrigation similar to that of the Sone Circle, under which raiyats were induced to enter into new long-term leases and to renew those which had lapsed. The increase in the Midnapore and Sone Canals was chiefly attributable to the insufficient rainfall during the season.

The falling off of 16,574 acres in the areas irrigated by the Eden Canal was partly due to the non-renewal of the expired long-term leases and partly to the limited water-supply.

3. The increase or decrease in the irrigation from each canal is given in the following statement:—

CANALS.	KHARIF SEASON.		More.	Less.
	1895-96.	1896-97.		
1	2	3	4	5
	Acres.	Acres.	Acres.	Acres.
Orissa ... Taldunda Canal	24,991	51,221	26,230	.....
Orissa ... Kendrapara Canal	60,638	72,158	11,520	.....
Orissa ... High Level Canal, Ranges I, II and III, and Jajpur Canal ...	25,922	63,437	37,515	.....
Midnapore Canal	65,251	67,690	2,439	.....
Eden ,, ...	34,336	17,762	.....	16,574
Sone ... Patna Canal	76,471	84,794	8,323	.....
Sone ... Arrah ,, ...	133,552	149,540	15,988	.....
Sone ... Buxar ,, ...	69,856	95,190	25,334	.....
Saran Canals*	.....	.....	.....	.....
Total ...	491,017	601,792	127,349	16,574

* There was no irrigation from the Saran Canals during the *kharif* season of these years.

4. On the Sone Canals the *kharif* crops irrigated are rice, sugarcane and hot-weather crops, on the Orissa Canals rice and sugarcane, and on the Midnapore and Eden Canals rice alone.

ORDER.—Ordered that a copy of this Resolution and of the statments Nos. I, II and III be published in the Supplement to the *Calcutta Gazette*, and submitted to the Government of India, Public Works Department, for information.

Ordered also that copies of this Resolution and of the statements be forwarded to the Commissioners of the Orissa, Burdwan and Patna Divisions; the Collectors of the Cuttack, Balasore, Midnapore, Burdwan, Hooghly, Gaya, Patna, Shahabad and Saran districts; the Superintending Engineers of the Orissa, South-Western and Sone Circles; and Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, *Col.*, R.E.,
Secretary to the Govt. of Bengal.

THE EMBANKMENT AND DRAINAGE REPORTS FOR THE YEAR 1895-96.

No. 344I.

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

Irrigation.

Dated Calcutta, the 15th March 1897.

RESOLUTION.

READ—

The Embankment and Drainage Reports for the year 1895-96.

The expenditure incurred during the year on embankments and drainage and other miscellaneous irrigation works in Bengal, which are not dealt with in the Canal Revenue Report, is shown below:—

	Rs.
I.—Embankment, class A, in Orissa	1,02,123
Ditto, do. B, Schedule D and other Government embankments ...	1,61,633
Ditto, do. C, maintained under contract ...	79,896
Ditto, do. D, maintained by annual apportionment of charges ...	12,943
II.—Works carried out by Civil Officers in Government or temporarily-settled estates ...	48,491
III.—Works undertaken under the provisions of the Drainage Act	30,012
IV.—Drainage works carried out at the cost of Government ..	18,014
V.— Ditto ditto under the Embankment Act	32,253
Total ...	4,85,365

2. *I.—Embankments maintained by the Irrigation Department.*—The public embankments in Bengal are divided into two classes:—

1st.—Embankments the property of Government which are maintained at the public expense.

2nd.—Embankments maintained by Government officers at the cost of the persons interested.

In the first class there are—

A.—The embankments in Orissa, which are maintained under Act XXXII of 1855.

B.—The embankments enumerated in Schedule D of Act VI (B.C.) of 1873, among which are included those of the Burdwan Raj estate taken over by Government in 1804, and some additional lengths which have at various times been added to the schedule under the provisions of section 43 of Act II (B.C.) of 1882, as also two small embankments in the Pabna and Bogra districts.

In the second class there are—

C.—The embankments of which the cost of maintenance is recovered from the persons interested by the payment of a fixed annual charge under a contract extending over a term of years not exceeding 30, as provided for in sections 63—68 of Act II (B.C.) of 1882.

D.—The embankments of which the cost of maintenance is recovered from the persons interested by an annual apportionment of the actual charges.

Embankments A in Orissa are also for departmental purposes further classed as follows:—

Class I.—Capital embankments (maintained as part of the Orissa Canal system).

Class II.—Embankments on large rivers to be permanently repaired.
„ III.— Ditto of local importance, such as marginal embankments outside canal embankments.
„ IV.—Embankments of doubtful utility.
„ V.— Ditto which have been abandoned and are not repaired.

The capital embankments, class I, are not treated of in this report.

3. *Lengths of embankments.*—The lengths of embankments in each class are shown below:—

Embankments.	Lengths.	
1	2	
	Miles.	Feet.
Embankments the property of Government maintained at the public expense—		
Class A.—In Orissa	*552	3,894
Class B.—Schedule D and other Government embankments	1,115	3,990
Embankments not the property of Government maintained at the cost of the persons interested—		
Class C.—Maintained under contract	473	1,812
Class D.—Maintained by annual apportionment of charges ...	77	4,094
Total for 1895-96 ..	2,219	3,230
Total for 1894-95 ...	2,209	978
Difference, increase ..	10	2,252

* In addition to these there are 163 miles of effective flood banks maintained in connection with the Orissa Canals.

In class A embankments there was no change.

In class B embankments there is an increase of 8 miles 400 feet. In the Burdwan district 8 miles at Chanchai on the left bank of the Damodar, hitherto omitted, were added during the year, and in the 24-Parganas 1,290 feet and 1,100 feet on the Charial khal were added, but 1,990 feet being subsequently found to be unnecessary were struck off, making a net increase of 400 feet only.

Class C embankments show an increase of 2 miles 3,470 feet. This increase in the Midnapore district was found by actual chain measurement made during the year of the existing embankments in the Cossye Division.

In class D embankments there is a decrease of 1,619 feet only. This decrease in the length of the Belwa embankment in the Purnea district was found by actual measurement made during the year.

4. *Floods.*—In the Orissa Circle the flood in the Mahanadi river was a fairly high one, but those in the Brahmini-Byturni and Salindee rivers were of moderate character. Many small breaches occurred, but no damage of any consequence was done to the canal works. In the South-Western Circle there were no high floods, and consequently no great damage was done to the embankments. In the Bhagirathi the highest reading at Berhampore was 4·86 feet below the highest flood level of 1890. At Laltakuri and Dadpur, the weakest places on the embankments, the river banks were protected by spurs, but erosion continued until the embankments were cut away up to crest level. No damage, however, was done, as ring bunds had been constructed behind the main embankment. In the Hooghly the floods were of an ordinary nature, while those in the Damodar were high, and their effect on the right bank within the spill area of the Bangacha and Lakra breaches proved beneficial, as the flood-water entering the breaches irrigated the whole area. The spurs stood well, and helped to silt up the breaches to a large extent. The Huldi river rose higher than usual. There were no breaches in any of the embankments in the Northern Circle, as the floods were of ordinary character. In the Sone Circle there were two high floods in the river Gandak, which did considerable damage to the various protective works along that river. No high floods

occurred in the Ganges, Bagmati, and Sukri rivers, but in the Bur Gandak river a fairly high flood occurred, and the river made a serious encroachment on the Daudpur Municipal embankment at Muzaffarpur. There were three breaches in the Saran, Champaran, and Tirhut embankments, but in consequence of the retired lines which had been constructed at the places breached, no floods occurred in the country protected by the embankments.

5 *Original works.*—There were no original works undertaken or executed in the Orissa, South-Western, and Northern Circles during the year. In the Sone Circle the only work undertaken was the construction of a sluice in the 51st mile of the Champaran embankment. It was completed at a cost of Rs. 1,775 and was used during the year for drainage. The funds were provided by the proprietor of the Turcowlia Indigo Concern.

6(*a*). *Ordinary repairs.*—The cost of ordinary repairs to the Government embankments in the Orissa Circle was Rs. 40,210, against Rs. 42,272 in the preceding year, showing a decrease of Rs. 2,062. The average of the nine years ending 1894-95 was Rs. 66,835. In the South-Western Circle the expenditure incurred under this head was Rs. 1,38,428, against Rs. 1,40,699 in the previous year, showing a decrease of Rs. 2,271. The Orissa embankments in the Balasore district were maintained in good order at a cost of Rs. 4,493, against Rs. 9,839 in the previous year. Of the total outlay of Rs. 1,38,428 on repairs, Rs. 78,459 was expended on embankments protecting the Burdwan Raj estate in the districts of Hooghly, Burdwan, Birbhum, and Midnapore, against Rs. 1,08,998 in the previous year. The decrease of Rs. 30,539 is mainly due to there having been no high floods during the year. All the embankments in the circle were maintained in an efficient state. In the Sone Circle, where there are no Government embankments, the expenditure was incurred on the maintenance of the embankments under contract. The amount expended during the year was Rs. 44,107, against Rs. 46,140 in the previous year. The expenditure on the Tirhut embankment and on the river protective works was much less than last year, but there was a considerable increase in the Champaran embankment due to the construction of a retired line at a cost of Rs. 9,696. In the Northern Circle Rs. 305 was expended on repairs to the Chandan embankment in Bhagalpur district, Rs. 268 on the Belwa bund in Purnea district, Rs. 284 on the Malda embankment in Malda district, and Rs. 230 on the Pabna embankment in Pabna district. There was no expenditure on the Chota Manika embankment in Bogra district, as no repairs were necessary.

(*b*) *Breaches and retired lines.*—In the Orissa Circle the expenditure incurred on repairs to the revetments of river banks and the river-improvement works, and for constructing spurs and retired lines and filling in of breaches was Rs. 57,420, against Rs. 50,948 in the previous year and Rs. 41,289, the average of the nine years ending 1894-95. More than three-fourths of the expenditure were on repairs to the revetments and river-improvement works. The revetment at Bogla, where the Katjoree river has been attacking for some years the bank close to the Machgong Canal, and that at Chowsatpara on the Brahmini river above the anicut at Janapore, were the most important ones, and their extensions were effected with good results at a cost of Rs. 16,858 and Rs. 12,964 respectively. The revetment at Nilkantpur on the right bank of the Brahmini river, about three miles above Pattamoondi, where the stream had encroached nearly up to the toe of the canal flood bank, was successful in arresting the progress of erosion. Its cost was Rs. 1,565 only. In the South-Western Circle there were no breaches in any of the embankments. The expenditure incurred in constructing retired lines was Rs. 23,133, against Rs. 27,110 in 1894-95, as detailed below:—

	1895-96.	1894-95.
	Rs.	Rs.
In Murshidabad district	10,952	3,985
„ 24-Parganas „	1,959	5,039
„ Midnapore „	2,192	8,459
„ Hooghly „	7,732	9,627
„ Burdwan „	298	...
	23,133	27,110

In the Sone Circle, in addition to the three retired lines which were constructed at the places breached in the Saran, Champaran, and Tirhut embankments, Rs. 17,497 was spent on river protective works on the Gundak River against Rs. 20,354 in the previous year. The protective works on the Turki, Bazitpur, and Monghyr embankments, and the protection of the Sekunderpur maidan in Muzaffarpur from the encroachment of the Bur Gandak river, cost in the aggregate Rs. 3,408.

7. *Financial.*—The cost of repairs to the Orissa embankments (class A) was Rs. 1,02,123, against Rs. 1,03,059 in 1894-95, the rate being Rs. 184 per mile against Rs. 86. The amount expended on class B embankments was Rs. 1,61,433, against Rs. 2,03,002, or at the average mile rate of Rs. 144, against Rs. 183 in the previous year. Although there was an addition of 8 miles 400 feet in the total length of this class of embankments, the decrease of Rs. 41,569 in the expenditure was due to there having been no high floods and no cyclone damages during the year.

As regards class C embankments maintained by Government under the contract system, the actual cost incurred was Rs. 79,896, against Rs. 97,891, showing a decrease of Rs. 17,995, the average rate per mile being Rs. 168, against Rs. 207 in the previous year. The expenditure exceeded the contract rate only in the case of the Champaran embankment, owing to the construction of a retired line at a heavy cost of Rs. 9,696 in the 81st mile, where 2,000 feet were washed away by floods.

The sums payable under contract for this class of embankments, compared with the maintenance charges, including book charges for establishment and tools and plant, are shown in the following table, together with the amount recovered during the year and the balance remaining to be recovered :—

Year.	Midnapore district.		Saran district.		Champaran district.		Muzaffarpur district.		Total.		Recoveries.	Balance to be recovered.	Surplus.	Deficit on the contract.

Total ...	7,30,474	8,25,000	4,74,752	3,58,500	4,24,779	1,56,000	2,43,586	1,24,980	18,73,591	14,64,480	13,96,653	77,827	...	...

It will be seen from the above figures that Government is a loser by Rs. 18,280 on the working of the year, and that the outstanding balance to be recovered from the persons interested amounts to Rs. 77,827.

The loss to Government in 1894-95 was Rs. 48,655, and the average annual loss for the nine years ending with 1894-95 was Rs. 29,473.

In the Midnapore district the amount payable under contract is ordinarily quite sufficient to keep the embankments in repair. There was excess expenditure in three years only since the introduction of the contract system in 1881-82. In 1882-83 the excess was Rs. 11,320, and in 1893-94 and 1894-95, owing to the extensive damages caused by the cyclone and floods of 1892-93, the excesses were Rs. 18,983 and Rs. 15,635 respectively.

As regards the Saran, Champaran, and Muzaffarpur embankments, the excess over the contract amounts is chiefly due to the heavy cost of constructing retired lines and to the necessity of preventing encroachments by the maintenance of spurs.

On embankments of class D (Appendix C), the actual outlay incurred during the year by the Civil Department, as stated by the Superintending Engineers concerned, was Rs. 15,457, while the recoveries and adjustments were Rs. 19,286, the balance unadjusted at the end of the year being Rs. 16,721. Compared with the figures supplied by the Board of Revenue (Appendix B), it

will be seen that the collections of the year were Rs. 32,527, or Rs. 13,241 in excess of that reported by the Superintending Engineers. No explanation of this discrepancy has been given by the Board of Revenue. The figures given in the Board's return (Appendix B) include only the amounts which have been accepted and apportioned by the Civil Department, and hence no comparison can be made between the "advances" and "outstanding balances" as reported by the Board and as given by the Superintending Engineers.

The figures supplied by the Board (Appendix B) are shown in a more concise form in the following statement. The recoverable amount or demand falling due within the year was Rs. 69,649, out of which Rs. 32,527 were collected, the recoveries thus falling short of the amount of the demand by Rs. 37,122:—

	Due during the year.		Falling due in subsequent date.		Total.	
	Column of Board's return.	Amount.	Column of Board's return.	Amount.	Column of Board's return.	Amount.
1	2	3	4	5	6	7
		Rs.		Rs.		Rs.

8. *Agricultural public works carried out in Government or temporarily-settled estates by Civil officers from the grant placed at the disposal of the Board of Revenue.*—The provision for Rs. 50,000 was omitted for the first time from the Irrigation Budget for 1895-96, and amalgamated with the allotment made out of the 12 per cent. deduction from collections of Government estates for sanitary and miscellaneous improvements in those estates, by order of the Lieutenant-Governor.

The amount expended during the year was Rs. 48,491. Its distribution by districts, as supplied by the Board of Revenue, is given in the subjoined statement:—

Division.	District.	Expenditure.
		Rs.
Burdwan ...	Bankura	541
Presidency ...	24-Parganas, Nadia, and Khulna ...	6,988
Rajshahi ...	Rajshahi, Jalpaiguri, and Bogra ...	1,597
Dacca ...	Mymensingh and Backergunge ...	3,156
Chittagong ...	Chittagong and Noakhali ...	11,470
Patna ...	Patna	2,450
	Gaya	9,802
	Shahabad	2,331
	Saran	200
Bhagalpur ...	Bhagalpur	270
Orissa ...	Cuttack	745
	Balasore	350
	Puri	2,656
Chota Nagpur ...	Palamau	2,978
	Hazaribagh	603
	Singhbhum	2,174
	Lohardaga	180
	Total ...	48,491

The nature of the expenditure is shown below :—

Construction and repairs of embankments	28,785
Excavation and repairs of tanks	1,924
Construction and repairs of wells for irrigation purposes ...	3,338
Excavation and repairs of water-courses, canals, khals and nalas	1,990
Construction and repairs of irrigation channels and pynes ...	4,021
Repairs to irrigation culverts	285
Construction and repairs of reservoirs and *ahars* ...	7,982
Construction and repairs of aqueducts	54
Repairs to village channels	109
Plantation of trees	3
Total ...	48,491

The principal works of construction and repairs to embankments and their cost were—(1) the Kutubdia and other embankments in the Chittagong district, on which Rs. 11,470 was expended, and (2) embankments in Port Canning estate and in Diamond Harbour subdivision over the Satpukur khal in the 24-Parganas district, and embankments in the Khulna and Bhagalpur districts, which cost Rs. 5,683, Rs. 1,005, and Rs. 268 respectively.

In the Nadia district Rs. 300 was expended on a drainage canal, and in the Rajshahi, Bogra, Jalpaiguri, Mymensingh, and Backergunge districts, the expenditure of Rs. 236, Rs. 745, Rs. 616, Rs. 235, and Rs. 2,921 respectively was incurred in constructing and repairing bunds, excavating tanks, khals, drains, and irrigation channels.

In the Cuttack, Balasore, and Puri districts the expenditure of Rs. 3,751 was mainly confined to the construction and repairs of bunds and tanks. The construction and repairs of wells, water-courses, irrigation pynes, and *ahars* and irrigation culverts at a total cost of Rs. 14,783 were carried out in the Patna, Gaya, Shahabad, and Saran districts. In the Hazaribagh, Lohardaga, Palamau, and Singhbhum districts the expenditure of Rs. 5,935 was confined to the construction and repairs of embankments and reservoirs.

9. *Works undertaken under the provisions of the Drainage Act, VI (B.C.) of 1880.*—The drainage works, (five in number) lie in the southern part of the Hooghly district in the South-Western Circle. Four of them, viz., the Dankuni, Howrah, Rajapur, and Burrajolla, have been completed, and the costs of their maintenance have been capitalized. The fifth (Ampta project), the cost of which was estimated at Rs. 9,50,359, has not yet been sanctioned by Government. It is in contemplation to abandon this costly scheme and to prepare a less costly one for improving the low lands lying on the drainage basin. The Superintending Engineer, South-Western Circle, writes :—

"There is no urgency about this scheme, as the low lands are higher than those in the Rajapur and other swamps, so it is only in seasons of exceptional rainfall that the crops are destroyed. The possibility of improving the drainage of this basin by simply remodelling a portion of the Purana Khal is under consideration, and a report will be shortly submitted."

The following is an account given by the Superintending Engineer of the expenditure incurred on the construction of the drainage schemes, inclusive of charges for establishment and tools and plant :—

		Rs.	
1. Dankuni Drainage Works	... ...	4,04,159	(completed).
2. Howrah ditto	... ...	2,72,062	(ditto).
3. Rajapur ditto 4. Burrajolla ditto	... ...	9,10,286	(ditto).

10. The lengths of the schemes, their channels, and the areas drained by them are the same as given in last year's report. The maintenance charges of the Dankuni and Howrah drainage schemes were capitalized at an annual cost of Rs. 4,390 and Rs. 2,000, respectively, in the years 1891-92 and 1893-94. The capitalization of the cost and maintenance charges of the Rajapur Drainage Works up to 31st March 1895 was sanctioned in Bengal Government letter No. 1313*I.*, dated 15th December 1896 at an annual cost of Rs. 5,000.

11. The Dankuni Drainage Works were efficiently maintained at a cost of Rs. 2,527, against Rs. 2,029 in the previous year. These charges include a portion of the Drainage Deputy Collector's salary, amounting to Rs. 1,200.

12. The Howrah Drainage Works were maintained in good order at a cost of Rs. 3,299, against Rs. 3,665 in the year 1894-95. These sums include a portion of the Drainage Deputy Collector's salary, amounting to Rs 2,400.

13. The Rajapur drainage scheme was efficiently maintained during the year at a cost of Rs. 4,259, against Rs. 3,561 in the previous year. The maintenance cost of the Burrojolla work was Rs. 1,422, against Rs. 716 in 1894-95. The sum of Rs. 30,030-0-9, being the charges incurred on the scheme during 1895-96 and already debited to the Civil Department, has, by order of the Government of Bengal (No. 140I.A., dated the 2nd February 1897), been written back from the Civil Department and adjusted finally against the head "Agricultural Works, Provincial," in the books of this Department.

14. *Efficiency of the Drainage Works.*—The drainage schemes have proved very successful, as they have not only reclaimed large tracts of lands lying in their basins, but have also efficiently drained them and the high lands surrounding. In seasons of drought and scanty rainfall they contribute to irrigate these lands by taking in water from the river Hooghly.

15. *Drainage Works carried out at the cost of Government.*—The construction of a sluice at the mouth of the Raimoni khal for draining a portion of the Howrah drainage basin at an estimated cost of Rs. 4,000, which was taken up in 1894-95, has nearly been completed and a sum of Rs. 682 was spent during the year. The extension of the Howrah drainage branch channel No. 1, which was taken up last year, has been completed during the year. The expenditure incurred on it was Rs. 195 only. For land compensation Rs. 251 was paid.

A revised estimate, amounting to Rs. 6,020, for improving the drainage of the Magra portion of the Surpai basin, lying along the Kedgeree road north of Contai, by a cut into the Amirabad khal, was sanctioned in Bengal Government letter No. 1432*I.*, dated the 28th December 1895. The work was completed during the year at a cost of Rs. 4,684. The new dock at Baliaghye in the 5th mile of the Balliaghye drain for the development of navigation of the canal, was under construction during the year.

An estimate amounting to Rs. 2,73,818 for improving the drainage of the Peechaboni and Surpai basins, situated on Range III of the Orissa Coast Canal, is under the consideration of Government.

During the year silt was cleared from the Baliaghye main drain, Surpai sluice, Bhograi supply channel, and Amirabad khas tahsil khal. A bund was put in November at the mouth of the Surpai drainage channel and cut in the rains at a cost of Rs. 1,022. For repairing the Bullee Bhil drainage works Rs. 5,374 was expended during the year, against Rs. 3,325 in the previous year.

16. *Drainage works carried out under the Embankment Act, II (B.C.) of 1882.*—On applications being submitted under section 18 of the Act, two sluices were constructed during the year, one of three vents at Tangrabichi, between the 74th and 75th mile-posts of Schedule D embankment No. 73, another of one vent at Alumpur, between the 15th and 16th mile-posts of Schedule D embankment No. 61, on the left bank of the Hooghly, at a cost of Rs. 22,291 and Rs. 6,966 respectively.

The water-course known as Boycari Boar from the Koyjoori regulator in the district of 24-Parganas, 2 miles and 940 feet in length, which was declared a public water-course and included in Schedule D, in Bengal Government Notification No. 178, of the 20th May 1895, was cleared of weeds, etc., during the year at a cost of Rs. 445.

The Churrial khal drainage scheme in the district of 24-Parganas was maintained during the year at Rs. 929, against Rs. 756 in the previous year. The total expenditure incurred on its maintenance up to 31st March 1896 amounts to Rs. 1,41,260.

Fourteen small sluices in Schedule D embankments in the district of 24-Parganas were efficiently maintained during the year at a cost of Rs. 438.

The Koomrool sluice in the 53rd mile of Damodar left embankment, together with its channel, was maintained at a cost of Rs. 816, against Rs. 256

in the previous year. Another sluice at Bacherhat in the 22nd mile thereof was repaired at Rs. 37 only.

In repairing the Dainan sluice khal Rs. 340 was expended during the year, against Rs. 1,581 in 1894-95.

Order.—Ordered that a copy of this Resolution and of its appendices (A to C) be published in the supplement to the *Calcutta Gazette*, and submitted to the Government of India, Public Works Department, for information.

Ordered, also, that copies of this Resolution and of its appendices (A to C) be forwarded to the Secretaries to the Government of Bengal in the Revenue and Financial Departments, Secretary to the Board of Revenue, Lower Provinces, Commissioners of the Patna, Bhagalpur, Rajshahi, Presidency, Burdwan, and Orissa Divisions, Superintending Engineers of the Orissa, South-Western, Sone, and Northern Circles, and Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, Col., R.E.,

Secretary to the Government of Bengal.

APPENDIX A.

List of public embankments in Bengal in charge of Government Officers, showing their lengths and the actual costs of repairs (without charges for establishment), during the year 1895-96.

STATISTICAL DEPARTMENT,
The 15th March 1897.

M. FINUCANE,
Secretary to the Government of Bengal.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 662 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 16th March 1897.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 7th March 1896 and 1897 is shown in the following statement:—

	1st to 7th March			
	1896.		1897.	
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
Imports.				
From Foreign Ports ...	1	1	8	11
„ Indian „ ...	51,096	69,547	218,230	2,97,035
Total ...	51,097	69,548	218,238	2,97,046
Exports.				
To Foreign Ports	120,514	1,64,033	127,262	1,73,217
„ Indian „	21,857	29,750	21,026	28,619
Total ...	142,371	1,93,783	148,288	2,01,836

Imports.—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period last year:—

	1st to 7th March			
	1896.		1897.	
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
Food-grains.				
Rice	35,657	48,533	197,302	2,68,550
Paddy	10,996	14,967	13,992	19,045
Wheat	... ..	.....	.....	.....
Gram and pulses	4,444	6,048	5,643	7,680
Other food-grains, such as jowar, barley, oats, &c.	.....	.....	1,301	1,771
Total ...	51,097	69,548	218,238	2,97,046

The importation of rice from Burma amounted to 188,209 cwts., against 102,395 cwts. in the preceding week. The total quantity received from Burma since the 1st November 1896 aggregates 1,501,753 cwts., or 75,088 tons. The imports from Chandbali were only 5,298 cwts. of rice and 802 cwts. of paddy, against 29,381 cwts. and 6,905 cwts. respectively in the corresponding period of last year. Taking rice and paddy together, the figures for Balasore remained practically unchanged.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the first week of March 1897 is compared with the figures for the corresponding period of 1896 :—

	1st to 7th March			
	1896.		1897.	
1	2	3	4	5
Food-grains.	Cwts.	Mds.	Cwts.	Mds.
Rice	123,820	1,68,533	135,001	1,83,751
Paddy	.....	.....	22	30
Wheat	753	1,025	172	234
Gram and pulses	16,901	23,004	10,926	14,871
Other food-grains, such as jowar, barley, oats, &c.	897	1,221	2,167	2,950
Total ...	142,371	1,93,783	148,288	2,01,836

Foreign Ports.

The chief features of the transactions of the week under report are that the exports of rice to foreign ports were almost double those of the previous week (120,039 cwts. against 64,955), and that the exportation of rice to foreign countries was greater by 10·58 per cent. than in the corresponding period of 1896. The principal fluctuations are an increase of 30,949 cwts. in the shipments to the United Kingdom and of 4,812 cwts. in those to Ceylon, while the consignments to Muscat and Persia showed a decline of 24,257 cwts. and 7,761 cwts. respectively. On the other hand, Mauritius and Reunion drew nothing during the week, against 23,021 cwts. and 3,476 cwts., respectively, in the corresponding period of last year, while the ports of Hamburg, Cape Colony, Delagoa Bay, Natal, West Indies, and Aden collectively received 41,754 cwts., against nothing in 1896. The decrease under gram and pulses was owing to no gram having been sent to Mauritius, against 4,437 cwts. in 1896.

Indian Ports.

Compared with the week ending 7th March 1896, the exports of rice to Indian ports remained unchanged, but Bombay imported largely at the cost of the Madras ports. The total trade under the other heads is not important.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 7th March 1896 and 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 659 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 16th March 1897.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 21st February 1897, as compared with the trade of the corresponding period of 1896 :—

	1897 ...	18,184	.....	18,184	24,750
Puri ...	1896 ...	6,232	.....	6,232	8,482
	1897 ...	.....	.....	.....	.....
Total ...	1896 ...	14,694	76,690	91,384	1,24,383
	1897 ...	29,496	15,950	45,446	61,857

Imports. The increase of 7,001 cwts. in the import trade of Chittagong, which amounted to 7,486 cwts., was mainly due to larger receipts of rice and paddy from Burma.

Exports. In consequence of the cessation of despatches to both Foreign and Indian ports, the export trade of Chittagong and Puri fell off by 24,767 cwts. and 6,232 cwts. respectively. Balasore also showed a decline of 33,086 cwts. chiefly on account of smaller shipments of rice, paddy, and gram and pulse to Calcutta; on the other hand, the exports to Mauritius aggregated 11,312 cwts. against *nil* in 1896. The improvement of 18,184 cwts. under Cuttack was entirely due to exports of rice to Mauritius, which drew nothing during the corresponding week of 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the week ending 21st February 1897, as compared with the trade of the corresponding period of 1896.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 658 Statistics.—The following statement shows the quantity of rice and other food-grains exported by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 6th March 1897, both days inclusive, to have been 20,55, 375 maunds. The destination of 19,02,554 maunds is specified. More than seven-tenths of this quantity (13,46,964 maunds) was carried to the North-Western Provinces and Oudh, less than one-seventn (2,71,413 maunds) to stations in Bengal, and the rest (2,84,177 maunds) to other provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 16th March 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah and Calcutta (Chitpur, Kidderpur Docks and Port Trust Railway) by the East Indian Railway from 1st January to 6th March 1897.

Station to which Consigned.	Total from 1st to 30th January 1897.	Total from 31st January to 27th February 1897.	Week ending 6th March 1897.

WEATHER AND CROP REPORT.

For the week ending the 15th March 1897.

Burdwan.—Rainfall at Sadar 0·16, Kalna nil, Katwa 0·45, Raniganj 0·65. Weather hot. Lands being ploughed. *Rabi* being harvested. Sugarcane being pressed. Sowing of *til* continues. Fodder and water sufficient at present. Common rice selling as follows:—

	Srs. c.	Srs. c.	
Sadar	11 0	to 12 0	per rupee.
Kalna		11 0	
Katwa	10 15	to 11 2	
Raniganj		10 0	

Birbhum.—Rainfall at Sadar ·13, Rampur Hat ·01, and over half inch in some parts of district. Weather much cooler. Price of common rice at Sadar 9¾ seers, and Rampur Hât 10½ seers per rupee.

Bankura.—Rainfall at Gangajalghati 0·15, Maliara 0·10. Weather cloudy at the beginning of the week and somewhat cool. Very slight rain in Kusthole on 9th with stormy weather. Pressing of sugarcane almost finished. Harvesting of *rabi* going on. Water insufficient in a few places. Rice selling at 11½ seers per rupee at Vishnupur and Bankura.

Midnapore.—No rain. Days hot, nights cool. Prospect of indigo not good. *Boro* suffering for want of rain. Plantation of sugarcane going on in Keshpur. Cattle-disease reported from Keshpur, Binpur, Dantun, Benapura, Ramnagar, and Chandrakona. Prices show a tendency to fall. Common rice selling as follows:—

	Srs.	
Sadar	11	per rupee.
Contai	12 to 15	
Tamluk	11¼	
Ghatal	11 to 12½	

Hooghly.—No rain. Want of rain felt throughout the district. *Boro* doing well in some places. Common rice sells from 9 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather hot. Prospect of *rabi* not good. Fodder and water sufficient. Common rice sells at 8½ to 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather hot with dry wind. Prospects of crops poor. Some preparation of land going on, but more rain is wanted for ploughing. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs. c.	
Sadar	9 to 11 0	per rupee.
Barasat	10 0	
Basirhat	10 8	
Diamond Harbour	10 10	

Nadia.—Rainfall at Sadar ·06, Kushtea ·09, Meherpur ·26, Chuadanga ·2. Harvesting of *rabi* crops nearly over; outturn poor. Ploughing retarded for want of rain. Isolated cases of cow-pox in thana Tehatta in the Meherpur subdivision. Water-supply generally deficient. Fodder insufficient in places. Common rice sells from 8 to 10 seers per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers on relief on Saturday, 13th March—

	Men.	Women.	Children.	Total.
Relief-workers	4,547	720	607	5,874
Dependants	23	57	1,386	1,466
Otherwise relieved	833	3,221	741	4,795
Test-workers	259	Nil	2	261
		Total	...	12,396

Murshidabad.—Rainfall at Sadar nil, Kandi nil, Jangipur 0·03. Weather seasonable. Harvesting of *rabi* crops still continues. State of indigo and mulberry tolerably good. Pressing of sugarcane continues. Fodder sufficient. Common rice sells as follows:—

	Srs.	
Sadar	10⅛	per rupee.
Kandi	11	
Jangipur	10¼	

Numbers on relief on Saturday, 13th March, Sadar subdivision—

	Men.	Women.	Children.	Total.
Test-workers	1,369	30	57	1,456

Jessore.—Rainfall at Jhenida ·03, Narail ·07. Nights and mornings cool, days hot. Harvesting of *rabi* crops nearly over. Rainfall in Narail did good to *boro* paddy, which is doing well, but more rain wanted for it and for sowing *til*. If there be no rain within a week or fortnight, *til* will not be sown on high lands, and that on low lands will suffer. Cultivation of lands for *aus* and jute going on. Fodder available. Want of good water felt in places. Common rice sells as follows:—

		Srs.	
Jessore	... ...	10 to 11	per rupee.
Jhenida	... ...	9½	
Magura	... ...	10 to 10½	
Narail	... ...	10 to 10½	
Bangaon	... ...	10 to 11	

Khulna.—No rain. Weather hot. Prospect of *boro* fair, but rain needed urgently. Common rice sells as follows:—

		Srs.	
Khulna	... ...	10 to 13	per rupee.
Bagerhat	... ...	12½	
Satkhira	... ...	9½	

Relief wages calculated at 10 seers per rupee. Fodder available. Water scarce. Numbers employed on eleven relief-works—

	Men.	Women.	Children.	Total.
Relief-workers	812	Nil	75	887
Otherwise relieved	425	1,716	886	3,027
Total ...				3,914

Rajshahi.—Rainfall at Sadar 0·04, Naogaon 0·02, Nator nil. Harvesting of *rabi* crops almost completed. Transplantation of *boro* paddy nearly finished. Sowing of jute and *bhadoi* going on. Lands being prepared for *aman*. Fodder available. Scarcity of water reported from some places. Common rice selling at 9 to 11¼ seers per rupee. Numbers on relief on Saturday, 13th March—

	Men.	Women.	Children.	Total.
Test-workers ...	627	Nil	16	643

Price of rice at relief-works, 9½ to 10 seers per rupee.

Dinajpur.—Average rainfall 0·17. Weather seasonable. Condition of standing crops fair. Lands are being prepared for *bhadoi*. Condition of cattle good. Fodder and water sufficient. Common rice selling from 9 to 10 seers per rupee.

Jalpaiguri.—No rain. Weather seasonable. Rain badly wanted for *betri* crop. Average outturn of tobacco reported to be 11 annas. Drinking-water drying up in places. Fodder-supply fair. Average price of common rice, 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar ·02. Weather very dry. Hills—Wheat and barley coming to perfection; *bhutta* and potatoes being sown. Terai—Ploughing for *dhan*, jute and sugarcane going on; tobacco being cut and mustard being threshed. Price of coarse rice:—

	Srs.	
Hills	8 to 9	per rupee.
Terai	9 to 11	

Bhutta, 13 to 16 seers per rupee.

Rangpur.—District average rainfall 0·21; Sadar 0·11. Sowing of *aus* going on. Lands mostly prepared for *aus* and jute. More rain wanted. Common rice selling at 9 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall ·17. Sowing of jute, *kaun* and *aus* rice in progress. Fodder and water sufficient. Price of common rice at head-quarters 10½ seers, and in the interior from 9 to 12 seers per rupee.

Pabna.—Rainfall at Sadar 0·05, Sirajganj nil. Weather cool at night and warm at day. No change in prospects of standing crops Common rice selling at 8 to 10 seers per rupee. Fodder sufficient. Number on test-workers in Sadar subdivision on Saturday, 13th March—men 158 and children 33.

Dacca.—Rainfall nil. Days hot, nights cool. Prospects of standing crops not very favourable, but the recent rain has done some good to *boro dhan* and other spring crops. Fodder available. No cattle-disease. Want of drinking-water in some parts of Munshiganj subdivision. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·24. Weather seasonable. *Aus* sowings are commencing. Cattle-disease reported. Average price of common rice 10 seers per rupee. Some scarcity of water in places.

Faridpur.—Rainfall at Sadar ·02, Goalundo ·80. Weather seasonable. Rain wanted. Price of common rice 9 to 11 seers per rupee. Fodder and water sufficient. No cattle-disease.

Backergunge.—No rain. Days hot, nights cool. Prospects of crops poor. Price of rice stationary.

Tippera.—Rainfall ·01 at Sadar and no where else. Weather bright with unseasonably cool nights. Prospects of *rabi* crops fair. Want of drinking-water reported from places in Chandpur subdivision. Rice sells at 10 to 12 seers per rupee.

Noakhali.—Rainfall ·02. Prospect of crops not good. No cattle-disease. Fodder and water not sufficient. Price of common rice 8 to 11 seers per rupee.

Chittagong.—No rain. Weather warm and unsettled. Rain urgently wanted. Prospects of standing crops poor. Water and fodder sufficient. Rice selling at 10 seers per rupee. Sporadic cattle-disease still reported.

Patna.—No rain. *Rabi* crops being harvested. Millets and sugarcane plants doing well. Tobacco and *rahar* being gathered. Fodder and water for cattle sufficient. Green fodder scarce in Bihar. Prices rising in Barh and Bihar, and also at Sadar. Price of common rice at Patna 10½ seers per rupee. Numbers on relief on 13th March—

Monghyr.—Rainfall at Sadar 0·11. Weather hot during the former, but cloudy and cooler towards the latter part of the week. Harvesting of *rabi* continues. Collection of opium nearly finished. Cattle-disease reported from Begusarai. Common rice sells as follows:—

	Srs. c.	
Monghyr	8½ to 10 4	per rupee.
Begusarai	8 14	
Jamui	8 to 9 8	

Bhagalpur.—Rain at Sadar 0·16. A heavy rainfall with hailstorm reported from the north-western portion of Banka; it has injuriously affected the *rabi* and *mahua* crops. The prospect of *rabi* in other parts of the district continues favourable. The price of common rice has risen from 10 seers 10 chitaks to 9 seers 6 chitaks in the Banka subdivision, and from 9 seers 12 chitaks to 9 seers 6 chitaks in the Sadar subdivision; at Supaul it remains stationary at 9 seers 8 chitaks, and at Madhipura it varies from 9 to 10 seers. The price of *kurthi* has risen from 14 to 13 seers in Supaul; it remains stationary at 15 seers in Madhipura, and 18 seers 14 chitaks in Sadar; it has slightly fallen from 12 seers 14 chitaks to 13 seers 2 chitaks in Banka. The price of *marua* in Supaul has risen from 14 seers to 13 seers. There has been a slight rise in the prices of other food-grains also. Water sufficient. Fodder is getting scanty in the south of Banka; in other parts of the district it is still sufficient. Cattle-disease reported from parts of Banka, Supaul, and Sadar. Numbers on relief on Saturday, 13th March—

Purnea.—Rainfall at Sadar 0·1,0 Kishanganj 0 03. Ploughing for next *bhadoi* paddy and jute going on. Standing *rabi* crops doing well. Manufacturing of molasses continues at Kishanganj. A few cases of cattle-disease reported from Araria. Fodder and water sufficient. Prices of common rice :—

		Srs.	
Sadar		9	per rupee.
Kishanganj		9½	
Araria		11	

Malda.—Rainfall ·10 at Gazole. Weather getting warm. Wheat and barley being harvested; expected outturn 12 annas. Common rice selling at 8½ seers at English Bazar. Fodder sufficient. Want of water felt in places.

Sonthal Parganas.—Slight rain and hail on 11th. *Rabi* harvest has begun; outturn good. *Mahua* flower begins to fall and promises well. Fodder and water-supply not sufficient. Price of common rice 8 (at Rajmahal) to 11 seers, and of maize 11 to 13 seers per rupee.

Cuttack.—Slight rain at Sadar. Weather hot. *Dalua* being reaped in places. Ploughing in progress. Rice more or less available. Cattle-disease prevalent in places. Fodder sufficient. Common rice sells as follows :—

		Srs.	c.	
Cuttack		12	8	per rupee.
Jajpur		14	7	
Kendrapara		14	7	
Banki		15	12	

Balasore.—No rain. Ploughing going on in parts. *Sarad* rice being threshed. *Dalua* crop in ear. Sugarcane being pressed. Price of rice varies from 12 to 16 seers per rupee in the interior. Rice sells at 12 and 14 seers per rupee at Balasore and Bhadrak respectively Fodder and water sufficient.

Puri.—No rain. State of *rabi* same as before. Ploughing of land for next rice crop going on in places. Fodder and food-supply fair. Price of common rice stationary.

Angul.—No rain. Weather seasonable. Fodder for cattle becoming scarce, and cattle-pox reported from western portion of Angul. Mr. Lloyd reports all well in the Khondmals, where coarse rice sells at 15 seers per rupee. In Angul coarse rice can be obtained at from 13 to 16 seers per rupee.

Hazaribagh.—No rain. Weather seasonable. *Rabi* crops being harvested. *Mahua* promises well. Mango is a complete failure. Rice sells from 8½ to 10½ seers per rupee. 2,400 on test-works, 600 on cotton work.

Lohardaga.—Rainfall 0·24. Ploughing continues. State of *tewa dhan* fair. Prospect of *mahua* continues favourable. Rice sells 8 seers at Ranchi and 8 to 12 seers in the interior. Cattle-disease reported from Bundoo, Boormu, Silli, Lohardaga, and Toto. Fodder and water sufficient. Grain in stock sufficient for the present.

Palamau.—Rainfall 0 37. Weather very abnormal—rain, hail, and storm; unusually cold and cloudy. *Rabi* indifferent. Rust to wheat and barley and worms to gram done much damage; 6 to 8 annas outturn only expected. *Mahua* giving cause for great anxiety—very backward and weather damaging. Prices of common rice much the same as last week. Cattle-disease reported from eastern thanas. 183¾ maunds of Rangoon rice imported during the week. Numbers on relief—

	Men.	Women.	Children.	Total.
Relief-workers	1,608	1,171	624	3,403
Otherwise relieved	309	489	163	961

Manbhum.—Rainfall at Sadar ·20, Gobindpur ·25. Weather cool. *Mahua* beginning to drop and promising very well. Rinderpest reported from thanas Chas, Barabazar, Raghunathpur and Purulia. Fodder and drinking-water sufficient at present. Price of common rice at Sadar 10 seers and Gobindpur 9 seers per rupee. Food-supply sufficient. Numbers on relief—

	Men.	Women.	Children.	Total.
Test-workers	1,179	772	143	2,094
Dependants ...	2	6	14	22
Otherwise relieved	766	1,627	1,108	3,501
Total ...				5,617

Decrease in numbers due to ripening of *mahua*.

Singhbhum.—No rain. Rice plentiful. Price of rice 10 to 12 seers per rupee.

General Summary.—There were slight showers of rain in many districts during the week. The rain was accompanied by hail and storm in places in Bhagalpur and Palamau, where some damage to the standing crops is reported. Ploughing is going on, and sowing of early rice and jute has begun in North Bengal. More rain is required generally. Spring rice is doing well. The harvesting of the *rabi* crops and the collection of opium are in progress. The opium has suffered from blight in Chapra and Hajipur. The prospects of the *mahua* crop in Chota Nagpur continue favourable except in Palamau, as previously reported. The pressing of sugarcane continues, and the plantation of cane has begun in some districts. The price of common rice shows slight rises in some districts and slight falls in others. In the distressed districts the prices of the staple grain on which the famine wage is based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 9¾ to 10 seers, Patna (common rice) 10½ seers, Shahabad (common rice at Bhabua) 8½ seers, Saran (Indian-corn) 10 seers 6 chitaks, Champaran (Indian-corn) 9½ seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) 9¾ seers, Bhagalpur (common rice) 9½ seers.

The numbers on relief on Saturday, 13th March, were—

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF FEBRUARY 1897.

THE weather during January was marked by absence of rainfall over almost the whole province, the showers, which were fairly numerous in places, being invariably light.

Conditions were much more unsettled during February up to the end of the third week, and especially about the middle of the month, when moist showery weather continued over the whole province for several days. The rain which fell during those days was not evenly distributed, the heaviest falls being received in Orissa and Chota Nagpur, while in East and North Bengal they were light and scattered.

Throughout the period of disturbed weather temperature remained high, almost without interruption and at times by as much as 10°. In consequence, average maximum and minimum temperatures are above the normal at all stations—the former by amounts varying from 5° in the West of Bihar to 2° in Orissa and the East of North Bengal, and the latter by amounts varying from 6° in Orissa to less than 1° in the extreme north of the province.

At the beginning of the month the pressure distribution was very uniform over the Bay and the south-western districts, but there was a moderate gradient towards the north. This was due to the approach of a shallow depression from the west. At 8 A.M. on the 1st it was over Chota Nagpur, where the fall of pressure was more than ·05 inch, and as it passed rapidly across the province, the sudden changes of wind were followed by thunder-storms, the most severe of which occurred in South-West Bengal. Light rain was reported from many Bihar stations on the 1st, and heavier falls occurred in Chota Nagpur, Orissa and South-West Bengal on the 2nd. The tendency shown by almost all of the shallow depressions during the month was to follow a somewhat southerly course, so that, instead of passing straight across the province, they reached the north of the Bay and filled up there; this was generally due to a rise of pressure in Bengal, which displaced the area of lowest pressure southwards. In the case of the depression which caused showery weather on the 1st and 2nd, the area of greatest defect moved from Chota Nagpur and Orissa on the 1st, to Orissa and the north-west of the Bay on the 2nd, and was diffused over the whole Bay area on the 3rd.

Though the changes which gave rise to the displacement noticed above were in almost all cases small, they appear to have had an important influence on the rainfall distribution over the eastern half of the province, the average fall in East and North Bengal being only a third of the normal.

Immediately after the disappearance of the first depression over the Bay, a rapid fall of pressure occurred on the 4th in the north of the province. It gave rise to a shallow depression in North Bengal and southerly winds, but the disturbance was very slight and occasioned a few light showers only, most of them in East Bengal. There was a rapid rise on the 5th, after which the distribution was practically normal over both the province and the Bay.

Settled weather prevailed for three days, that is till the 8th, when pressure again fell in the west of the province. The fall of pressure was very slow, but that it was accompanied by disturbed weather was shown by the rainfall in Chota Nagpur on the 8th and 9th, and the scattered showers in various other districts. As there was no rain anywhere on the 10th, the period of unusually disturbed weather which commenced on the 11th may be assumed to be distinct from the slight disturbance of the 8th and 9th.

The pressure distribution on the 11th was unusual in there being a shallow depression over the south of the Bay, while readings were in excess over the north of the province, and the gradient was steep. An arrangement of this nature should give rise to northerly winds over the whole area, but in the west of Bihar the air movement was from the south-west. This was accounted for by the changes of the following day, when pressure began to fall in the extreme west of Bihar, and a depression of small extent moved across Bihar and North Bengal on that and the subsequent days. General rain fell in Bihar on the 11th and 12th, and numerous showers occurred in North Bengal and Chota Nagpur on these days.

Again the depression moved southwards, and the disturbed weather became fairly general over the whole province; there was dense cloud almost everywhere, and occasional light showers on the 13th and 14th. The effects of this slight disturbance would soon have been over if they had not been maintained by a second depression which began to affect Orissa and Chota Nagpur on the 15th. The cloudy weather continued over almost the whole province, and heavy rain fell in Orissa and Chota Nagpur on the 15th and 16th, False Point, Kendrapara, Puri, Satpara, and Gangpur receiving more than 3 inches. The rainfall was almost general in Lower and Central Bengal, but it was in nearly all cases light.

The pressure changes caused by the second depression were only of moderate amount, the greatest being ·07 inch on the 16th, and defect was then everywhere less than ·1 inch; the rise began on the 17th and became general on the 18th, the depression having by that time moved eastward across the north of the Bay.

From the 18th till the end of the month settled weather prevailed, no rain occurring anywhere, except a few showers in Orissa on the 20th.

The various depressions which, during the first three weeks of February, affected the weather in rapid succession were, as stated above, always shallow, and the pressure changes were smaller than during the last week, when settled weather prevailed. The reason for this

difference appears to be connected with the wind circulation. The distribution of pressure was generally uniform with light northerly winds, and these winds were easily altered, as to direction, by the shallow depressions. Cloud and rainfall, more or less general, followed the shift of winds. During the last week of the month the hot weather pressure arrangement was beginning to appear; but winds were west or south-west, and the effect of a brisk or rapid fall of pressure in the north of the province was to strengthen the south-westerly winds and not to change their direction. Thus the fall of pressure on the 23rd, amounting to ·12 inch in Bihar and North Bengal, gave rise to light cloud, but no rainfall.

Pressure.—Though several depressions crossed the province or the north of the Bay during the first three weeks of the month, changes during that period were seldom more than moderate. They became more rapid towards the end of the month, when pressure was low in the northern districts as compared with the south of the Bay. Average pressure for the month is below the normal at all stations by about ·02 inch in North Bengal and ·04 to ·05 inch elsewhere.

Temperature has been above the normal with but little interruption, and at times by large amounts, the greatest excess being in the southern districts. The average excess in mean daily values is 4·1° in Orissa, 3·7° in East Bengal, about 3° in Chota Nagpur, South-West Bengal and Bihar, and 2·2° in North Bengal. The highest maximum reading in Orissa was 99·2°, South-West Bengal 98·3°, Chota Nagpur 95·6°, and in the other divisions 92° or 93°.

Rainfall.—Showers were fairly frequent during the first three weeks of the month in Orissa, South-West Bengal and Chota Nagpur. The falls, however, were very light, except about the middle of the month, in Orissa and Chota Nagpur, and on the 2nd in part of South-West Bengal. In Bihar general light rain fell from the 11th to the 13th, and on the same days it was almost general in North Bengal. During the last week there was practically no rain in any part of the province.

The heavy falls in Orissa and Chota Nagpur on the 16th and 17th, in some cases exceeding 4 inches, have led to a much higher average for the month in these Divisions than in the others. In Orissa it is 2·73 inches, more than three times the normal, and in Chota Nagpur 1·55, inches, about twice the normal. In Bihar the fall was practically normal, but in Bengal proper there was comparatively a large defect. The average fall in East Bengal was only one-third of an inch and in North Bengal one-fifth.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of February 1897:—

Meteorological Divisions.	Temperature.						Rainfall.

The total fall from 1st January to 13th March 1897 ...		1·63
The average fall of the corresponding period for 24 years, Surveyor-General's Office		2·28

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

○, overcast; ⌓, dew.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,
The 13th March 1897.

H. J. DYSON, *Surgeon-Captain*, F.R.C.S.,
Sanitary Commissioner for Bengal.

CONSOLIDATED PROVINCIAL STATEMENTS OF FOOD-GRAIN TRAFFIC OF THE LOWER PROVINCES.

No. 664Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT;
The 16th March 1897.

MEMORANDUM.

IN the *Calcutta Gazette* of the 14th February 1897, consolidated provincial statements were published in respect of the food-grain traffic of the Lower Provinces for the months of November 1895 and 1896, but they related only to the rail-borne trade. The statements now published, however, furnish complete statistics for the month of December 1896, in comparison with the figures for the corresponding month of 1895, showing the traffic in food-grains in all the routes by which this trade is registered in Bengal. The following divisions of the trade are registered on the routes shown against each:—

(1) Trade of Calcutta and Howrah—	
With all districts and provinces in India	By inland routes, *i.e.*, by rail, country boats, inland steamers and road, and by sea-going vessels, both foreign and coasting.
(2) Trade of the Dacca, Chittagong, and Orissa Divisions—	
With Calcutta	By all inland routes and coasting vessels.
With foreign ports	By sea.
And with other districts and provinces in India	By rail only.
(3) Trade of the Burdwan, Presidency, Rajshahi, Patna, Bhagalpur, and Chota Nagpur Divisions—	
With Calcutta	By all inland routes.
And with other districts and provinces in India	By rail only.

The table below shows the total quantity of food-grains carried to and from these provinces during the months of December 1895 and 1896:—

	Imports.		Exports.	
	1895.	1896.	1895.	1896.
	Mds.	Mds.	Mds.	Mds.
Rice	14,53,329	17,44,486	28,26,983	25,62,473
Paddy	2,19,531	4,33,155	2,70,917	4,60,408
Wheat	2,05,135	5,10,381	87,031	62,858
Gram and pulses	4,70,000	2,99,743	6,91,652	8,12,010
Other food-grains	2,12,859	2,29,211	3,84,761	6,15,762
Total ...	25,60,854	32,16,976	42,61,344	45,13,511

The aggregate quantity imported during the month was 6,56,122 maunds, or 25·62 per cent. in excess of the figures for the corresponding month of 1895, and the exports increased by 2,52,167 maunds, or 5·91 per cent. The staple of which the largest quantity was registered was coarse rice; of this nearly 17½ lakhs of maunds were imported against 14½ lakhs in 1895, and a little above 25½ lakhs against 28½ lakhs were exported from the Lower Provinces. The trade in paddy was very brisk, the increase being roughly 2 lakhs of maunds both in imports and exports as compared with 1895. The importation of wheat was two and-a-half times greater than in 1895; but in the export trade, which was small, there was a slight decline. In the case of gram and pulses, while the imports fell off by 1¾ lakhs of maunds, the exports rose by 1¼ lakhs. Under miscellaneous food-grains, the quantity imported was practically unchanged, but that exported showed an increase of 2⅓ lakhs of maunds.

The total trade of Calcutta and Howrah taken together, and of the districts in each division during the month of December 1896, is compared below with the totals of the corresponding month of the preceding year:—

Name of Division.		Rice.		Paddy.		Wheat.		Gram and pulses.		Other food-grains.		Total.	
		Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.

	1896 ..	3,84,751	10	1,824	25,558	10,112	4,22,255

The very large importation of wheat from the United States and of miscellaneous food-grains from the United Kingdom is worthy of notice; on the other hand, as was to be expected, a great falling off took place in the exports of rice and gram and pulses.

As regards the trade between Bengal and other Provinces in India, the following statement furnishes the necessary details :—

		Imports into the Lower Provinces from other ports of India.				Exports from the Lower Provinces to other ports of India.			
		Into Calcutta.	Into Bengal Proper.	Into Bihar.	Total.	From Calcutta.	From Bengal Proper.	From Bihar.	Total.

	1896 ...	5,935	513	2,395	8,843	29,187	2,522	3,74,111	4,05,820
Total ...	1895 ...	2,24,890	13,181	6,813	2,44,884	3,54,821	2,07,953	3,27,383	8,90,157
	1896 ...	1,63,998	11,919	7,281	1,83,198	4,02,204	3,02,440	8,82,537	15,37,181

The foregoing figures show that, while the imports fell off by 25·19 per cent., the exports rose considerably, that is, by 72·68 per cent. In the import trade, the chief point of interest is the large influx of Burma rice and the considerable decrease under wheat and gram and pulses, attributable mainly to shorter despatches from the North-Western Provinces and Oudh. Out of the total exports shown above, the quantity despatched to the United Provinces alone amounted to 12,82,332 maunds, as against 3,53,821 maunds in the corresponding month of the previous year, as will be seen from the figures given below :—

Articles.		Exports to the North-Western Provinces and Oudh.				Total.
		From Calcutta.	From Bengal Proper.	From Bihar.		
				Patna Division.	Bhagalpur Division.

	1896 ...	17,199	2,522	1,16,145	2,38,275	3,74,141
Total ...	1895 ...	36	53,199	1,31,689	1,68,947	3,53,821
	1896 ...	1,84,640	2,93,269	3,26,762	4,77,661	12,82,332

The quantity of rice shipped for Assam from Calcutta was 63,251 maunds against 13,832 maunds in 1895, and the consignments of gram and pulses and miscellaneous food-grains sent to the Punjab aggregated 7,238 maunds against nil and 5,681 maunds against nil respectively.

Following the arrangement adopted in the preceding month, the internal traffic of these Provinces will be dealt with separately under the several heads noted below :—

(1) Inter-district trade of Bengal Proper.
(2) Trade between Bengal Proper and Bihar.
(3) Inter-district trade of Bihar.

The following statement shows the total food-grain traffic under head (1)—

	1895. Mds.	1896. Mds.
Food-grains—		
Rice	12,78,387	13,34,266
Paddy	1,83,549	3,48,468
Wheat	20,432	19,771
Gram and pulses ...	2,26,513	1,82,915
Miscellaneous food-grains ...	18,854	10,542
Total ...	17,27,735	18,95,962

The total increase amounts to 1,68,227 maunds or 9·16 per cent. The principal importing and exporting districts with the quantities imported or exported to each are shown in the following comparative statement:—

RICE.

The quantity imported into Bengal was about half that registered in 1895. By far the largest falling off occurred in the despatches of gram and pulses and miscellaneous edible grains into Calcutta from the Bhagalpur Division; the supply from the Patna Division also was reduced by more than half that of the preceding year. The largest item in the export trade is rice, of which almost the entire supply was carried to the Patna Division. The Bhagalpur Division drew a very large supply of gram and pulses from Calcutta.

The inter-district trade, division by division, of the Bihar Province is illustrated in the following abstract:—

ARTICLES.	LOCAL TRADE OF THE BIHAR PROVINCE.				TOTAL.
	Exports from the Patna Division.		Exports from the Bhagalpur Division.		
	Inter-district or local trade of the Division.	To Bhagalpur Division.	Inter-district or local trade of the Division.	To Patna Division.

1896 ..	1,50,925	2,800	9,429	2,06,896	3,70,050

The local trade of the Patna Division diminished by 30,000 maunds, while its exports to the districts in the Bhagalpur Division were only half those of 1895. The Bhagalpur Division supplied the Patna Division very largely with paddy and miscellaneous food-grains. The trade within that Division was very slack.

Statement showing the quantities of food-grains imported into and exported from each district in the Lower Provinces carried by rail, inland steamer, country boat, road and sea, during the month of December 1896, as compared with the figures for the corresponding period of 1895.

DISTRESS IN THE PATNA AND OTHER DIVISIONS.

No. 796(Fam.).—The 19th March 1897.—The following papers are published for general information.

M. FINUCANE,

Secretary to the Govt. of Bengal.

No. 778Agri. (Fam.), dated Calcutta, the 18th March 1897.

From—M. FINUCANE, Esq., Secretary to the Government of Bengal, Revenue Department.

To—The Secretary to the Govt. of India, Revenue and Agricultural Dept.

IN continuation of this Government's letters noted on the margin, I am directed to submit the monthly report, required by section 29 of the Bengal Famine Code, for the period ending the 27th February 1897. Copies of the half-monthly reports of the Commissioner of the Patna Division, No. 491F.G., dated the 21st February, and No. 687F.G., dated the 8th March, 1897, and their enclosures, together with maps of the Patna Division and of the districts of Khulna, Nadia, Palamau and Manbhum, showing the affected tracts, are herewith enclosed.

(1) No. 455Agri. (Fam.), dated the 16th February 1897.
(2) ,, 609Agri. (Fam.), ,, 1st March ,,

2. The affected districts in the Patna Division continue to be Shahabad in South Bihar and the four districts of North Bihar. The Lieutenant-Governor, accompanied by the Revenue Secretary to this Government and the Commissioner of the Patna Division, Mr. J. A. Bourdillon, recently paid a visit to the districts of North Bihar, which are now the most severely affected districts in this Province. Leaving Calcutta on the 28th February, His Honour reached Bettiah on the evening of the 1st March, and thence drove, on the following morning, to Ramnagar (28 miles). After inspecting certain relief works there and on the way back to Bettiah, Sir Alexander Mackenzie left for Darbhanga, *viâ* Muzaffarpur, where he arrived on the morning of the 4th March. Two tanks, undertaken as relief works, one under the immediate supervision of the Collector and the other under the Public Works Department, were inspected, and in the afternoon of the same day a Conference was held with the local officers of North Bihar to discuss certain questions connected with the operations in progress. The party left Darbhanga on the 5th after paying a visit to the relief works carried on by the Darbhanga Raj at Kamtaul, 14½ miles from Darbhanga, and reached Calcutta on the following morning.

The general result of the inspections held at Ramnagar and Darbhanga was satisfactory, except in the case of a tank near Ramnagar, the site of which had been badly chosen. About 4,000 people were employed on this tank, but practically no task was being exacted, pits were not defined owing to the sandy nature of the soil, and every one was placed on the penal wage. In the other works inspected by the Lieutenant-Governor, His Honour found that the tasks prescribed in Mr. Glass's tables were being enforced, that these tasks can be performed without undue hardship, and that labourers who, were unable or, being able, were unwilling to do the full tasks assigned to them were put either on the minimum or penal wage. Some difficulty was, however, felt by the workers in understanding what the exact task expected from them was, owing to the fact that the tasks of diggers and carriers had not been set out separately in the tables. Further, it was found that the people did not readily

form themselves into gangs of 60 persons willing to work together, and that as the whole gang was being fined for the short work of portions of it, discontent arose among individual members of the gangs who, having done a full task, failed to receive a full wage, because of the shortcomings of others. These defects in the matter of exacting tasks and organising gangs necessitated a reconsideration of the details of the system in force, and the following extract from the proceedings of the Conference held at Darbhanga shows the steps that have been taken:—

"His Honour explained that the complications arising from setting out the gang tasks took up much of the time of the supervising officers, and expressed the opinion that the gang system did not permit of payments being made to, and fines for short work being imposed on, individuals or a sufficiently small squad of individuals. When the gang consists of 60 persons and a certain number of them do the full task, but others fail to do it, all alike are put on the penal wage. The system thus holds out a premium to idlers, for when all are punished alike for the short work of a portion of their number, it is obviously the interest of all to do as little as they can so long as they get the penal wage It was arranged that—

"(1) The tasks of diggers and the tasks and numbers of carriers should be set out separately in Mr Glass's tables, the full task prescribed for diggers being exacted from diggers, and the number of carriers required as their task to carry the earth excavated by the diggers, and their number regulated according to length of lift and lead. This merely involves a statement of the tasks set out in Mr. Glass's tables in a way that may be readily understood by the workers.

"(2) It was also agreed that the gangs need not consist of any particular number. The people may arrange themselves into squads of 12 to 16 each. A mate may be appointed over a number of squads aggregating about 60 persons, but for the purposes of payment of wages and assessment of fines, each squad or pit-gang, consisting of about 12 to 16 persons, who are willing to work together, should be a separate unit. Joint responsibility will thus be reduced to a moderate number of labourers who voluntarily combine to work together.

"(3) It was agreed that the carriers who perform their full task, that is to say, carry the amount of earth excavated by the diggers to whom they have been allotted with due regard to length of lift and lead, should receive the full wage laid down for persons of the class to which they belong (*i.e.*, the wage of A, B, C, D classes of section 62 of the Code, according as they fall under each of those classes). Women of the D class may be treated as dependents. Effect will be given to these conclusions by the issue from the Public Works Department of explanatory orders. A muster-roll should be kept on every work showing the names of all persons on the work; abstracts of the roll to be made weekly.

"(4) It was also agreed that it is to be clearly understood that Collectors and Subdivisional Officers should visit all relief works in their jurisdiction, and whenever they find anything that requires correction or alteration that they should there and then record in an order book to be kept on the works any instructions they think fit. Such orders should be promptly obeyed by the officer in charge of the work.

"If the Executive Engineer or other superior officer of the Public Works Department differs from the Collector, he should refer any matter in which he so differs to the Commissioner through the Superintending Engineer; but, pending receipt of the Commissioner's orders, the Collector's orders should be obeyed.

"(5) It was agreed that Charge Superintendents of Relief should also visit all relief works in their jurisdictions, and record such remarks in the order books as they may find necessary. Their remarks will be forwarded to the Assistant or Executive Engineer in charge of the work, who, in case he differs from the Superintendent of Relief, should take the orders of the Collector, and where he differs from the Collector, the orders of the Commissioner. Charge Superintendents of Relief are to be regarded as Subdivisional Officers within their jurisdictions under section 22 of the Code, save that they will not give orders direct to the "officers in charge."

Another question considered at the Conference was the introduction of the modified system of piece work suggested in the Government of India's Circular No. $\frac{16}{104-1}$ F., dated the 13th February 1897. It was pointed out that the system is practically one of petty contract, pure and simple. It was thought that this system could not be worked side by side with the task work system, and it was generally agreed that it is not advisable to introduce it in Bihar on ordinary relief works so long as the establishment available is strong enough to cope with the numbers of relief-workers and to insist on tasks being enforced. The question is under consideration whether the proposed system can be tried with advantage on the railway lines about to be started as relief works in the Patna Division, and on relief works generally in other Divisions of Bengal.

3. The following paragraphs deal with the important features of the relief operations in the Patna Division.

Rainfall and prospects of the crops.—Light showers of rain fell in all the districts of the Patna Division between the 10th and 12th February, and the

figures recorded, including the rainfall in the first week of February, are shown below in comparison with the corresponding figures of 1874 :—

		February 1874.	February 1897.
		Inches.	Inches.
Patna ...	Bankipore	... ·58	·46
	Barh	... 1·05	·66
	Bihar	... 1·93	·98
	Dinapore	... ·32	·54
Gaya ...	Average for the district	... 1·04	1·13
Shahabad ...	Sadar	... 1·00	·71

	Sasaram	... 1·04	1·33
	Bhabhua	... ·57	1·17
Saran ...	Sadar	... ·87	·39
	Siwan	... ·77	·38
	Gopalganj	... 1·75	·35
Champaran ...	Motihari	... 1·10	·15
	Bettiah	... 1·00	·08
	Barharwa	... ...	·21
Muzaffarpur	Muzaffarpur ...	... ·80	·50
	Hajipur	... ·63	·32
	Sitamarhi	... ·70	·28
	Shiuhar	... ...	1·42
Darbhanga ...	Darbhanga	... ·89	·31
	Samastipur	... ·56	·33
	Madhubani	... ·76	·22

During the second half of February there was no rain anywhere except in Bihar in the district of Patna ·05 inch, and in Aurangabad in Gaya ·49 inch. As the rainfall in February was gentle and steady, and was not accompanied by wind or hail, and was rapidly followed by sunshine and a west wind, the effect was most beneficial and improved the prospects of the *rabi* crops, which at the end of the month continued to be good everywhere. Reports of insect pests have been received from a few places, but the damage done is not reported to be great. The reports of the poppy crop are satisfactory on the whole, and a full average crop is expected all round.

Estimates of area and population affected—In Muzaffarpur and Darbhanga there was no change in the area or the population affected.

Shahabad.—In Shahabad a narrow strip of land between the Sone and the Rhotas Plateau, about 30 miles in length and 5 miles at its greatest width, is under observation. In this area the winter rice was a general failure in all villages, and the *rabi* varies, promising a good crop in some and very little in other places. A test work has been opened, and steps to distribute gratuitous relief have been taken, but the tract has not yet been added to the affected area in the district.

Saran.—An area of 16 square miles, with an approximate population of 10,000 persons in thana Parsa, has been added to the affected tracts in the Sadar Subdivision of Saran, so that the total area affected in this district has been raised to 1,442 square miles with a total population of 1,352,598 persons. In the tract newly affected the *bhadoi* crop was better than in the other tracts previously declared to be affected and enabled the people to hold out longer. It is reported that they might have continued to do without Government relief had not their *rabi* crop been seriously injured by frost.

Champaran.—The Collector of Champaran reports that certain small tracts in thanas Hardih, Bagaha, and Dhaka, aggregating 83 square miles, should be added to the area at present in need of relief, and he has also revised his previous figures of areas and population. The total area now reported to be affected in Champaran is 1,865 square miles with an estimated population of 1,110,000 persons, against 1,620 square miles with a population of 9,72,000 persons previously reported.

4. *Relief works.*—The transfer of large works to the management of the Public Works Department, which commenced towards the latter end of January,

was in progress during the month under report, the number of works open at the end of February in each district being—

	Under the Public Works Department.	Under Civil Officers.	Total.
Saran	2	34	36
Champaran	12	54	66
Muzaffarpur	3	45	48
Darbhanga	13	91	104
Total ...	30	224	254

To these must be added four works under the Civil Officers in the district of Shahabad. The total number of works open at the end of January was 191. In consequence of the want of a sufficient number of officers to take charge of relief works and other causes, the progress made in taking over large works by the Public Works Department was slow, and arrangements to supply the District Officers regularly with information as to the numbers employed, and other particulars relating to the works transferred were not complete. The Government of India has, therefore, been separately solicited to help this Government in recruiting a further staff of "officers in charge." The figures reported to Government as to the average daily numbers on relief works in the last week of February, which are shown below in comparison with the figures at the end of January, are not, therefore, quite accurate:—

	Daily average number of male units.	
	January.	February.
Saran	10,132	10,572
Champaran	76,010	74,166
Muzaffarpur	8,198	19,733
Darbhanga	92,220*	91,000*
Total ...	1,86,560	1,95,471

The average daily number of male units employed on the four relief works in the Bhabhua Subdivision of Shahabad in the last week of February was 845. The fall in the numbers in Champaran and Darbhanga is reported to be due to task-workers having been drawn off to the harvesting of the *rabi* crops, and to the temporary closing of works required for their transfer to the Public Works Department. The latest weekly returns again show a large increase in the number of relief workers in this district. The number in Muzaffarpur commenced increasing from the beginning of February, and is now more than double the number at the end of January, and a very much larger increase is expected in April.

The following table shows the average wages paid, tasks exacted and cost rate per 1,000 cubic feet of earthwork in the several districts during he second half of February, in comparison with the corre-ponding figures for January:—

District.	Average daily wage.				Work done per diem on task work.		Cost, rate per 1000 c. ft.	
	Second half of January		Second half of February.		Second half of January.	Second half of February.	Second half of January.	Second half of February.
	Task work.	Irrespective of task.	Task work.	Irrespective of task.				
1	2	3	4	5	6	7	8	9
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	c. ft.	c. ft.	Rs. A. P.	Rs. A. P.
Saran	0 1 2	0 1 2	0 1 5	0 1 6	27½	30½	2 13 4	2 4 0
Champaran	0 1 8	0 1 8	0 1 5½	0 1 9½	14½	23½	5 11 6½	3 15 5½
Muzaffarpur	0 1 4	0 1 9	0 1 4½	0 1 9½	72	66·77	1 1 11	1 4 8
Darbhanga	0 1 5	0 1 4	0 1 5	0 1 7	31	32·6	2 13 6	2 11 5
Shahabad	0 1 7	0 1 7	0 1 10	0 2 1	34	49	2 15 4	2 6 5

* Includes numbers on the relief works of the Darbhanga Raj.

These figures show satisfactory improvement in all the districts. It is to be remembered that the number of cubic feet per day shown in column 7 does not represent the quantity excavated by diggers, which would be very much larger, but the average number of cubic feet per unit *dug and carried*. Where, as in Champaran, the lead and lift in large and deep tanks are long, the average quantity of earth dug and carried per unit is necessarily smaller and the cost rate per 1,000 cubic feet greater than where, as in Muzaffarpur, the work consists chiefly in repairs and construction of roads. The rates of wage at the end of February were nearly the same everywhere, though rather high in Shahabad, and there was an increase in the average outturn of work, and a consequent decrease in the cost rate per thousand cubic feet, except in the case of Muzaffarpur. In this district the tasks previously demanded were in excess of those laid down in the tables of tasks drawn up by the Hon'ble Mr. Glass, Secretary to this Government in the Public Works Department, which has been circulated with that Department's Resolution No. 520M.P.—I., dated the 25th January 1897, and a copy of which is hereto annexed for ready reference, with copies of the supplementary instructions* since issued by the Public Works Department. The reduction in the outturn of work per male unit with the consequent increase in the cost rate per 1,000 cubic feet in Muzaffarpur is the result of the introduction of Mr. Glass's tables in this district as elsewhere. As explained in the note prefixed to the table, Mr. Glass's method of calculation is that he has taken the amount of work done by labourers under contractors on ordinary works, and has deducted from it an allowance of two-fifths on account of the special conditions governing the work of famine labourers, leaving three-fifths or 60 per cent. of the amount of work ordinarily done by professional coolies as the task laid down for relief-workers. Sir Alexander Mackenzie considers this to be a reasonable if not a severe test of distress. He found in one of the tanks inspected in Bihar that the full tasks were being done by no less than 95 per cent. of the pit-gangs, and this was in work supervised by Mr. Blackwood, a junior Civilian. It is, in His Honour's opinion, incredible that cultivators or others not ordinarily accustomed to work as professional labourers would come to and stay on relief works, and perform the task assigned in Mr. Glass's tables for the miserable pittance of $1\frac{1}{3}$ annas a day, which is little more than half the ordinary wage in ordinary times, when prices of food-grains are half what they now are, unless they were driven to do so by acute distress, and it is also incredible that professional labourers would remain on these works at these rates if they could obtain employment on more remunerative terms elsewhere.

* Public Works Department letter to the Commissioner of the Patna Division, No. 1661M.P.—I., dated the 16th March 1897, with enclosures.

His Honour thinks the performance of these tasks (which are heavier than those prescribed in the Famine Code) is conclusive evidence of widespread and severe distress in Bihar; but Sir Alexander Mackenzie has no means of judging whether the tasks thus laid down are adequate or excessive, in comparison with the tasks which are being exacted elsewhere, and it would be helpful to this Government if the Government of India could furnish it with information regarding the tasks demanded, and actually found capable of being enforced as tests of distress in other provinces.

5. *Private relief works.*—In Shahabad three tanks have been undertaken, one by the Courts of Wards and two by private individuals, but no figures for them have been supplied. In Saran, besides works under private individuals in the Siwan and Sadar subdivisions, the Hatwa Raj has ten works open in the Gopalganj subdivision, which employed during the week ending 25th February a daily average number of 2,938 male units on task work, and of 1,240 units on work irrespective of task. In Champaran there were two works undertaken by the Bettiah Raj and two by the Tettaria and Bala indigo factories, the average daily number employed on the four works being 11,801. The Darbhanga Raj is carrying on relief operations in the districts of Muzaffarpur and Darbhanga. In the former district the total number employed on the Raj works on the 27th February was 3,041, and in Darghanga the total number on seven works was 21,900. The Collector of Darbhanga reports that besides

the Raj works a very large number of tanks, employing about 30,000 labourers, are being excavated by private individuals in the north-east of the district.

6. *Poor-houses and village relief.*—Including the district of Patna, in which the only kind of relief which was being given was that distributed at a poor-house and to a small extent by gratuitous relief, the total number of Government poor-houses open in February was 16 and in Motihari one has been opened since the close of the month, while kitchen relief was given at four places in Saran and at several places in Champaran. Four private poor-houses are conducted by the Hatwa Raj and another by the zamindars of Manjha in the district of Saran. The Darbhanga Raj has a poor-house in the district of Muzaffarpur and some kitchens in the district of Darbhanga It is reported from Champaran that no arrangements for giving special employment to weavers, artisans, &c, have been found necessary. Cotton was given out to *pardanashin* women to be spun into thread in return for gratuitous relief, but no information as to the results has been furnished, except that one Charge Superintendent has found that, including the cleaning of cotton, a woman takes about 10 days to spin a seer of cotton into thread. In Darbhanga cotton was distributed in most circles, and in one of the charges it was being made into cloth. Another form of employment given in this district was basket-making. No detailed information has yet been furnished.

His Honour found, on inspecting the Bettiah poor-house during his recent tour, that of 760 inmates 304, or 40 per cent. of the total number, consisted of waifs and strays from the neighbouring district of Gorakpur, who had been picked up by the police or the relief officers aimlessly wandering in a more or less emaciated condition. I am to invite the attention of the Government of India to the remarks made in paragraph 40 of the Commissioner's report dated the 8th March, quoted in the margin.

"A considerable number of wanderers have found their way into this district (Champaran) across the Gandak from the North-Western Provinces, and on the 3rd March, when the Lieutenant-Governor visited the Bettiah poor house, out of 760 inmates 304 were from those provinces Considering that these invaders also supply the bulk of the vagrants picked up by the police, both here and along the Grand Trunk Road in the Shahabad district, it might be as well to enquire what arrangements are being made in the border districts of those provinces for the relief of their poor. The Collector will be asked to ascertain, if possible, what number of immigrants from the North-Western Provinces are to be found in the Trans-Gandak thana of Madhubani. He was at one time afraid that relief works would have to be opened in that area solely for the benefit of those people."

7. *Gratuitous relief.*—The following table shows the average daily doles of gratuitous relief for the second half of February in comparison with the corresponding figures for January :—

District.	Second half of—	
	January.	February.
	As. P.	As. P.
Saran	0 9	0 8
Champaran	1 0½	0 9½
Muzaffarpur	2 0	0 10
Darbhanga	2 8	0 10
Shahabad	1 5	0 10

The dole in Muzaffarpur and in Darbhanga has been reduced in accordance with the orders of Government, the doles at first reported having been excessive.

The numbers in receipt of gratuitous relief have increased considerably, the increase being most marked in Muzaffarpur and Champaran. In the former district the total number at the end of January was 318, while the corresponding figure for February is 11,219. This advance is attributed by the Collector to an increase of distress, and the Commissioner thinks that it is also due to the better development of circle organisation and a more careful inspection of the villages. In Champaran the number on

gratuitous relief rose from 6,019 at the end of January to 37,333 at the end of February. This is due to the completion of the circle organisation, to the relief works having been cleared of a large number of D class labourers who have been placed on gratuitous relief, and to the development of distress which, as already reported, must continue to increase in Bihar till the latter end of June. The percentages of the numbers relieved gratuitously in the most distressed districts of North Bihar to the total numbers relieved, as given in paragraph 72 of Mr. Bourdillon's letter of 8th March 1897, are as follows, the corresponding percentage for the whole division being 41·01:—

Saran	...	...	...	56·83
Champaran	...	...	...	27·19
Muzaffarpur	...	...	...	64·49
Darbhanga	...	...	...	37·81

The numbers shown in the present report as gratuitously relieved should, following the classification adopted in the North-Western Provinces and recently prescribed by the Government of India for Bengal, be taken to include all the three heads noted on the margin. The numbers in receipt of gratuitous relief were apparently high, but not higher than in the neighbouring provinces of the North-West and Oudh. The total number on gratuitous relief in the 19 distressed districts of the North-Western Provinces on the 27th February, as shown at page 272, Part I of the *North-Western Provinces Gazette* of March 6th, was 518,188; the total number relieved being 1,515,124, the percentage of the number on gratuitous relief is 34·2. The corresponding figures for the Patna Division (excluding the district of Gaya), as given in the weekly telegraphic reports for the 27th February, are—

Relieved as dependents.
Relieved in poor-houses.
Relieved under other provisions of the Code.

Relief works	...	...	...	...	243,492
Gratuitous relief	...	...	...	...	136,788
			Total	...	380,280

The percentage of the number on gratuitous relief to the total number relieved is therefore 35·9. But this percentage is not quite correct, for the figures of relief-workers in the district of Darbhanga do not include figures for certain works under the Public Works Department in the Madhubani subdivision. Were these figures complete, the percentage would probably be about the same as that in the North-Western Provinces and Oudh.

In Saran and Shahabad the numbers gratuitously relieved are large compared with the numbers on relief works, because the male working members of families in these districts have gone to seek employment in Eastern Bengal and elsewhere. In Saran, the Collector reports that several cases have been brought to light of people becoming emaciated almost to the point of starvation without applying for gratuitous relief or having recourse to relief works. "The disinclination," he adds, "to apply for gratuitous relief can be understood, and this is the chief difficulty which circle officers have to combat." Cases of this sort, in which laudable self-respect deters respectable people from voluntarily becoming State paupers, are precisely the cases which deserve the greatest sympathy, and which it is necessary for the circle officers and relief committees to search out in the villages.

The Darbhanga Raj was distributing gratuitous relief to 10,518 persons during the week ending 27th February.

8. *Physical condition of the people, &c.*—The public health continues to be exceptionally good, and no authenticated cases of starvation have come to notice.

The following table shows the death-rates for the months of November, December, January and February of the present and three preceding years:—

District.	Years.	Death-rate per thousand of population.			
		November.	December.	January.	February.
1	2	3	4	5	6

It will thus be seen that the year is a particularly healthy one in Bihar, and that the reported percentage of deaths is below rather than above the normal, and markedly below that of the preceding year.

The facts mentioned in paragraph 4 above show, in His Honour's opinion, that there can be no question that distress is acute and widespread in North Bihar. The table of mortuary statistics given above in this paragraph shows that the distress has been so far adequately met, and that the local officers have discharged fully and efficiently the duty imposed upon them of preventing increase of mortality from starvation. Hence it is that Sir Alexander Mackenzie recently expressed to the local officers his entire satisfaction with the results so far attained.

The condition of the cattle is reported to be good everywhere.

9. *Loans.*—Loans for village works, amounting to Rs. 3,500, were granted in the district of Saran during the period under report. Applications for advances were received in certain other districts, but the offer made by Government to give loans on advantageous terms does not appear to have so far proved attractive.

10. *Food-stocks, Importation of grain, and Prices.*—During the four weeks now under report, the total imports of food-grains are reported to have been 5,51,769 and the exports 1,84,456 maunds, against 7,71,186 and 3,75,650 maunds, respectively, in January. The imports exceeded the exports by 3,67,313 maunds, and no scarcity of grain has been reported from any

of the affected districts. Burma rice is stated by the Collector of Saran to be obtainable in all the large marts in the district, and the Collector of Champaran writes that it is now penetrating right into the interior. In the latter district the local grain-dealers are moving in the matter of importation, and have expressed their readiness to go on importing so long as they can do so at a profit. The Collector of Champaran writes that all officers report that there is no present apprehension of stocks getting depleted. The Secretary of the Bihar Indigo Planters' Association, on the other hand, has quite recently reported that coolies are coming to him with complaints that though they have money to purchase grain they are unable to obtain it. The price of rice is reported to have been steady during the month under report; that of Indian-corn, however, rose a little, as the stock of this grain was being exhausted. Though the *rabi* crop has been, and is being harvested, the tendency of prices at the present time generally in Bihar is still upwards. His Honour the Lieutenant-Governor, however, thinks that so long as the supply of rice from Burmah lasts, no fear need be entertained of its not finding its way to North Bihar.

The following paragraphs deal with the other Divisions in Bengal, which were last reported on in my letter No. 609Fam., dated the 1st March 1897:—

11. *Presidency Division.*—The most severely affected districts in the Presidency Division are at present Nadia and Khulna.

Nadia.

There was a small increase in the affected tracts, the condition of which has undergone a slight temporary improvement in consequence of the harvesting of the *rabi* crops. There was rain on the 16th, 17th and 18th February, which will enable the people to prepare lands for the next *aus* or autmun crop. There were 14 relief works open, 8 under the Public Works Department, and 6 under the Civil officers; of the latter 4 were tanks, and the rest roads. The total number of persons employed at the end of February was 6,873, while the corresponding figure for January was 8,229, employed on five works. This falling off is probably due to the temporary improvement already noticed. The cost per 1,000 cubic feet and the daily wage in this district were high, being for the second half of the month Rs. 3-3-3 and 2 annas 5 pies, respectively.

The total number on gratuitous relief is reported to be 703. In return for this form of relief women are required to twist jute into string. Thread has been distributed to a few families of weavers. Rice was being imported in considerable quantities into the affected tracts. Public health and condition of cattle continued good. During February the total amount of loans sanctioned under the Land Improvement Loans Act was over Rs. 45,000, but the amount actually paid was Rs. 3,650.

Khulna.

The area affected in the district of Khulna was 442 square miles as before. It is reported that the general condition of the affected area has deteriorated. Four relief works were open against three in January, and the number employed had risen from 147 in January to 583 at the end of February. The numbers on gratuitous relief also rose to 1,949 from 142 at the end of January. Widows and orphans, it is stated, show signs of emaciation, and two deaths, alleged to be due to starvation, have been reported. The correctness of these reports is, however, still under enquiry. Public health is fair, as also the condition of cattle. The total amount advanced under the Land Improvement Loans Act is reported to be Rs. 19,890.

Jessore.

Of the two tracts in Jessore, mentioned in my previous letter, there has been no improvement in thana Muhammadpur, but the condition of the tract in thana Bangaon has materially improved owing to recent rainfall. The prices of common rice showed a tendency to fall, and food-stocks were being supplemented by importation. A test work was opened but did not attract labourers. Some gratuitous relief was given, the total number in receipt of such relief at the end of the month being 712.

Murshidabad.

In Murshidabad distress is reported to have made its appearance in a tract covering about 80 square miles, with a population of 42,000, lying partly in the Sadar and partly in the Kandi subdivision. The total area likely to be affected in this district is reported to be 280 square miles, with a population of 160,000, including the 80 square miles above mentioned. Winter rice is the principal crop grown. There was a partial failure in 1895-96, the outturn of the *aman* and *aus* crops being eight and nine annas respectively. During the last season, the estimated outturn of the *aman* for the whole district was nine annas and that of *aus* eight annas The *rabi* crop in the area above mentioned has been very poor, and in places a complete failure. The export of grain from this to other districts and the North-Western Provinces has been unprecedented, and it is feared by the Collector that the stocks in hand will not be sufficient for the requirements of the district up to September. Test works have been opened, and the numbers employed on them are reported to be rising. As far as the information now before this Government goes, no gratuitous relief was being given.

24 Parganas.

The position in the 24-Parganas remained unchanged.

12. *Chota Nagpur Division.*—Of the districts in the Chota Nagpur Division there seems, so far, to be no need for any apprehension with regard to Lohardaga, while in Singhbhum the prospects continue to be altogether reassuring. With regard to the Division as a whole, the Commissioner writes that the rain which fell in February was fairly general, and has been of decided benefit to the *rabi* crops without at the same time doing any material harm to the *mahua*. Mr. Forbes writes that the latter now gives promise everywhere of at least a full average outturn, provided the weather continues favourable. At the date of the report the *mahua* trees were beginning to blossom, and rain would be injurious to the crop. There appears to be some increase in emigration. Public health is good. Cattle-disease is reported from Manbhum and Palamau, but not to any unusual extent.

Palamau.

Distress in Palamau is turning out to be less acute than was at first anticipated by the Commissioner. The worst portion of the district comprises the jurisdiction of Garhwa, Daltonganj, Balumath, Latehar and Patan thanas, with the outposts of Untari, Lesliganj, Panki, Chandwa, Ker and Manatu, the area being 2,563 square miles. The total population of this tract is 383,440 persons, of whom the Deputy Commissioner thinks that 10,000 may be set down as the number affected. Relief is being given by employment on relief works and by the distribution of gratuitous relief. In the beginning of February there were five works open, employing in all 745 persons. At the end of the month there were nine Government relief works, and the total number shown as employed on them on the 26th February is 4,287. All are paid for task work, the rate per 1,000 cubic feet being Rs. 2-3, and the average wage earned per male unit is about 2 annas. The Commissioner reports that, so far, there are no signs of any rush on the relief works. It is also reported that several well-to-do zamindars of the district have opened relief works, some of which appear to have been undertaken with advances granted under the modified rules under the Land Improvement Loans Act, the total amount thus advanced in Palamau as first instalments being Rs. 3,333. Exact figures are not known, but the Deputy Commissioner thinks the numbers employed on these works cannot fall far short of 2,000.

The number on gratuitous relief in the beginning of February was 333; by the end of the month it had risen to a daily average of 514. The average daily dole per male unit amounted to 1 anna 1 pie. Up to the end of the period under report only one trader had taken advantage of the bounty of 8 annas a maund offered by Government in aid of the importation of grain, and had imported 658 maunds of rice, and been paid Rs. 329. There was a slight revival of exports from Lohardaga, the returns showing that 1,648

bullocks came away with rice from Lohardaga and Chainpur marts during February. Prices, however, continued very high.

Manbhum.

The areas now affected in the district of Manbhum aggregate 885 square miles, with a population of 268,092 persons, lying in thanas Gobindpur, Tundi, Nirsha and Chas. Relief in this district was still at the test work stage. There were 11 test works, 7 within the affected tracts and 4 in other places. The first test works were opened in the Gobindpur subdivision on the 30th January, and on the 31st the total number employed was 180. At the end of February the number had risen to 3,492, and since then it has again increased considerably. The labourers are paid at piece-work rates varying from Re. 1-4 to Re. 1-9, and in two cases of tanks to Rs. 2-3 per 1,000 cubic feet. The daily wage earned per male unit varied from 1 anna 4 pies to 2 annas $\frac{1}{4}$ pie. The Deputy Commissioner, Mr. Luson, writes that the test works opened have not been attended by as many workers as he had expected, and he concludes that the reports which he had received about the destitution among the labouring classes were somewhat exaggerated. Small works such as *bunds* and tanks were being carried out by private individuals throughout the district, but no figures have been furnished as to the number employed on them.

Complete figures have not been furnished as to the numbers on gratuitous relief. The Deputy Commissioner estimates the total number in receipt of this form of relief on the 27th February at 5,000.

Considerable quantities of grain were being imported into the affected tracts, and food-stocks are reported to be sufficient for the present.

Hazaribagh.

There were isolated cases of distress, but no general call for assistance in the district of Hazaribagh during the period under report. The Deputy Commissioner was on tour throughout the south of the district, and found people able to get on without assistance except at a place called Gumeah, with an area of 10 square miles and a population of 6,000. Test works were open in many places, but were not attended by any considerable numbers. Eighty-five persons were in receipt of gratuitous relief. Cotton was distributed in the town of Hazaribagh and elsewhere to be spun, but no information has been furnished as to the results. The Deputy Commissioner expects to have about ten thousand persons employed on relief-works scattered over this district during the next three or four months.

13. *Bhagalpur Division.*—The two districts threatened with distress likely to require assistance from Government are Bhagalpur and the Sonthal Parganas. Particulars relating to both the districts were given in paragraph 11 of my letter No. 447 Agri., dated the 16th February 1897.

Bhagalpur.

Two relief works were open in thana Bongong in the Madhipura subdivision. The number on one of these on 27th February was 5,828, with 295 non-working children, and on the other 375. In the Supaul subdivision two works were open under Government, besides works undertaken by zamindars. The total number on the Government works in the Supaul subdivision on the 27th February was 1,593, with 34 non-working children. No gratuitous relief was given in either subdivision beyond allowances on account of non-working children.

Sonthal Parganas.

In the Sonthal Parganas distress has appeared in the north and north-west part of the Jamtara subdivision, comprising an area of about 350 square miles, with a population of 93,000. The estimated number likely to need relief is 10,000 on works and 1,200 on gratuitous relief. Measures have been taken to afford relief to the needy.

14. *Orissa Division.*—There is nothing of importance to mention with regard to Angul and Balasore, except that the rain which fell in the middle of February benefited the standing crops. Prices were stationary. The Collector of Cuttack reports that the condition of the people generally is better than he had hoped for at this season. He anticipates little trouble before May, and even then sees no reason to fear anything like widespread distress.

As regards the district of Puri, this Government is not yet in possession of complete information. The timely rain in February is reported to have saved the standing crops and given field employment to labourers. The general aspect of the tracts adjoining the Chilka lake is also said to have slightly improved. The Commissioner has been requested to proceed to the place and arrange for such measures of relief as may be necessary.

15. There is nothing of importance to report with regard to the Burdwan, Rajshahi, Dacca and Chittagong Divisions.

16. There has been some delay in the submission of this report owing to non-receipt in time of some of the Commissioners' reports.

Monthly Famine Statement A for the four weeks ending Saturday evening, the 27th February 1897.

* The figures in columns 2 to 6 are for the whole district, as no particular portion of it can be said to be affected.
† The figures in columns 3 to 5 include 73 miles of the proposed railway from Bairagnia to Bagaha, which would give employment to about 14,120 persons for three months.
‡ The figures in columns 8 and 9 do not include works under the Public Works Department.

No. 1661M.P.I.

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

Mis. Pub. Improvements.

FROM J. G. H. GLASS, ESQ., C.I.E.,

Chief Engineer of Bengal,

TO THE COMMISSIONER OF THE PATNA DIVISION; SUPERINTENDENTS OF FAMINE RELIEF WORKS, 1ST AND 2ND CIRCLES.

Dated Calcutta, the 16th March 1897.

SIR,

AT a conference held at Darbhanga on the 4th instant, of officers engaged on relief operations, the opinion was expressed that the method of exacting the task from the gang as described in paragraph 40 of Resolution No. 420M.P.I., dated 25th January last, was attended with many difficulties, and it was decided to abandon it and to adopt in lieu thereof the system of exacting the task from the diggers and carriers forming a pit gang as the unit. The accompanying note has been drawn up describing the task to be exacted from diggers and carriers under the varying conditions of lead, lift and soil in tank and road construction.

2. The proportion of carriers to diggers has been worked out in general accordance with the task tables for earthwork which formed an accompaniment to the Resolution already referred to, and the numbers laid down in the note should be generally adopted in carrying out work. It is not, however, intended that they should be strictly adhered to in all cases, as some latitude must necessarily be given to the officers who are in charge of the works. Circumstances may occur, such as the people on any particular work being in an exceptionally weakly state, a preponderance of women and children, &c., which in the opinion of the responsible officer may render it expedient to increase the number of carriers beyond that mentioned in the note In such cases the officer in charge of the work should exercise his own judgment in determining the proportion of carriers to diggers subject to the approval of his superior officer.

I have the honour to be,

SIR,

Your most obedient servant,

J. G. H. GLASS,

Chief Engineer.

No. 1662M.P.I.

COPY forwarded to the Commissioners of the Presidency, Burdwan, Orissa, Bhagalpur, Rajshahi, Dacca, Chittagong and Chota Nagpur Divisions, to all Superintending Engineers of Public Works Circles and Inspectors of Works and Examiner of Public Works Accounts, Bengal; also to the Judicial, Financial, and Revenue Departments of this Government, and to the Government of India, Revenue and Agricultural Department (Scarcity), for information.

J. G. H. GLASS,

Chief Engineer.

CALCUTTA,

The March 1897.

Note by the Chief Engineer of Bengal on the manner of laying out tanks for Famine Relief Works, and on the method of determining the proportion of carriers to diggers under the varying conditions of lead and lift in the construction of Tanks and Roads.

1. The dimensions of the tank should first be settled, and if it is to be filled from an adjacent nala, the position of the inlet and of the waste water channel should be determined. The length and breadth should be regulated on the understanding that the excavation of the tank is to be carried on in a series of pits measuring 20 feet square with footpaths 5 feet wide between for the passage of the people carrying away the spoil. In diagram No. 1 below, the arrangement of the pits of a typical tank is shown. On the long side there are 12 pits, each 20 feet square, and 11 footpaths, each 5 feet wide. The length of the tank, exclusive of the slopes, is therefore $(12 \times 20) + (11 \times 5) = 295$ feet. In the breadth there are 8 pits 20 feet square and 7 footpaths 5 feet wide. The breadth exclusive of the slopes is therefore $(8 \times 20) + (7 \times 5) = 195$. The depth to which the tank is to be excavated is taken at 12 feet and the side slopes are allowed for at 2 to 1. The width necessary for the slopes is therefore 24 feet. Adding this the top dimensions of the tank are, length $295 + 24 = 319$ feet, and breadth $195 + 24 = 219$ feet. A berm 25 feet from the edge of slope to the inner toe of the spoil bank slope is left, and all the earth excavated from the tank is to be thrown beyond this line. In the example the crest of the spoil bank is taken at 40 feet, the height 8½ feet, and the side slopes 2 to 1. These dimensions are only given as an example.

2. The task is in the first place to be exacted from the diggers; and as it varies according to the class of soil, it follows that, as the length and breadth of the pits are uniform, the depth to be excavated for the daily task will depend on the amount of that task. The task to be exacted is laid down in the note attached to Resolution No. 420M.P.I., dated 25th January 1897, as follows—

Soft soil	...	200 cubic feet per digger.
Medium soil	...	130 „ „ „
Hard „	...	85 „ „ „

For reasons which will be stated further on, it has been found desirable to slightly reduce the tasks for medium and hard soils. The tasks will now be—

Soft soil	...	200 cubic feet per digger.
Medium soil	...	125 „ „ „
Hard soil	...	83 „ „ „

3. As has been mentioned, the tank is divided up into pits, each measuring 20 feet square, the boundaries being formed by footpaths each 5 feet wide. In each pit there are four diggers. The method of determining the number of carriers for each pit of four diggers in soft soil is arrived at thus. Taking first the line of outer pits, that is, the pits all round the margin left for the slopes of the tank, it is seen that the lead to which the soil has to be carried is as follows:—

	Feet.
Centre of pit to part left for slopes ...	10
Slope space	24
Berm	25
To centre of spoil bank	36
Total ...	95

This may be taken as 100 feet lead. Referring to Table No. 1(A) of the Task Tables, it is seen from the example there worked out that six carriers are required per 1,000 cubic feet for a lead of 50 feet. For a further lead of 50 feet, that is, a lead of 100 feet, two more carriers are necessary. Each carrier will remove $\frac{1,000}{8}$ = 125 cubic feet, but working under famine conditions, carriers will only do $\frac{3}{5}$ths of that amount, or 75 cubic feet. The four diggers will excavate $200 \times 4 = 800$ cubic feet, and the number of carriers necessary to remove that quantity will be $\frac{800}{75}$ = nearly 11. The number may be fixed at 12. The task imposed on the carriers is that they should remove the earth excavated by the diggers. It is not possible to lay down definitely what the composition of the gang should be, as each case will have to be governed by the conditions which are found to obtain. As an example, this pit gang may be made up as follows:—

		Rs.	A.	P.
4	Diggers at anna 1-9 each ...	0	7	0
2	Men carriers at anna 1-9 each ...	0	3	6
4	Women carriers at anna 1-3 each ...	0	5	0
4	Children carriers, Class I, at 9 pies	0	3	0
2	„ „ Class II, at 6 pies	0	1	0
	Cost for 800 cubic feet ...	1	3	6
	Cost for 1,000 cubic feet ...	1	8	4

For the second line of pits the carriers will be increased by two to allow for the extra lead (25 feet). This is somewhat in excess of the results arrived at by calculating from the tables, but the difference is small.

For the third line of pits the lead is 145 feet, and allowing for this increase the carriers should be two more than in the second line of pits. In the same way the number of carriers in the fourth line of pits will be two more than in the third.

4. The foregoing complete the gang requirements for all the pits in the first layer of two feet in depth. The dividing footpaths should be cleared away when the pits have been excavated to 2 feet in depth, and the pits for the second layer of 2 feet, with their footpaths, marked out in exactly the same way as in the case of the top layer.

The number of carriers per pit of the second layer will exceed that of the corresponding pit in the layer above by two to allow for the extra lift from the pit and in the spoil bank. And in the same way in each succeeding layer the number of carriers per pit will be two more than in the corresponding pit of the layer above it. The diagram shows this quite clearly.

5. The task for a digger in medium soil was originally fixed at 130 cubic feet per day. It is desirable that the length and breadth of the pits should be uniform whatever the class of soil, and if the task of 130 feet was adhered to, the depth to which it would be necessary to excavate the pit would be about 1′ 3½″. This might lead to some confusion; and to avoid any possibility of that, it is thought desirable to reduce the task to 125 cubic feet per digger. The depth to which the pit will have to be excavated to secure that quantity is 15 inches. Based on the task-tables, the number of carriers per pit of four diggers, each performing a task of 125 cubic feet, is as follows. Under normal conditions, each carrier will remove 125 cubic feet per day for a distance of 100 feet, but on relief works only $\frac{3}{5}$ths of that quantity is expected, viz., 75 cubic feet. The quantity excavated by 4 diggers at 125 cubic feet each = 500 cubic feet, and the number of carriers required is therefore $\frac{500}{75} = 6\frac{2}{3}$, say, 7. For the first line of pits of the second layer there will, therefore, be seven carriers for each pit. For each successive line of pits the number of carriers has to be increased by two (2), as has been

shown in detail in the example worked out for soft soil. For each successive layer, however, only one more carrier will be allowed than in the corresponding pit of the layer above.

5. The task for hard soil was fixed at 85 cubic feet per digger. This represents a depth of $10\frac{1}{2}$ inches of the standard pit; and to avoid confusion, it is better to fix the depth at 10 inches. By doing so the task is reduced from 85 to 83 cubic feet. The number of carriers for the first line of pits is worked out and found to be 5, and for each successive line of pits two more carriers should be allowed as explained in previous examples. For every two layers (each of 10 inches) in depth only one additional carrier will be necessary.

6. The diagrams attached show clearly the number of carriers required in each line of pits in the several layers. They are not absolutely in accordance with the task-tables, but are sufficiently close for all practical purposes.

7. In the case of road construction the task should also be exacted from the diggers and the carriers. The task will be the same as that laid down in paragraph 2 of this note for tank excavation. On road work the lead will usually be under 50 feet and the lift (including height of bank) under 6 feet. For such conditions the number of carriers in the several soils may be taken as follows :—

Soft soil, 3 carriers per digger.
Medium soil, 2 ,, ,,
Hard soil, $1\frac{1}{4}$,, ,, (that is, 5 carriers for 4 diggers).

The borrow-pits should be marked out of uniform length and breadth if circumstances permit, so as to lessen the labour of measuring up the work and to facilitate check.

8. Referring to paragraph 32 of note attached to Resolution No. 420M.P.I., dated 25th January 1897, it is found that although the typical gang of 60 workers described therein is a suitable number to place under one mate, it is too large a unit to deal with in assessing fines for short work, and also that so many as 60 do not readily accept the same headman to distribute wages amongst them. The typical gang of 60 working under one mate may therefor be conveniently subdivided into separate pit gangs who are willing to work together, and the wages and fines of each pit gang should then be separately calculated and made over for disbursement to the headman nominated by the gang. Should it be found that one muharrir cannot conveniently deal with so many gangs as 10 aggregating from 500 to 600 persons (paragraph 33 of note to above quoted Resolution), the number of gangs in his charge may be reduced at the discretion of the officer in charge.

J. G. H. GLASS,
Chief Engineer.

The 15th March 1897.

No. 687F G., dated Bankipore, the 8th March 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to forward herewith my famine report, under sections 13 and 24 of the Famine Code, for the two weeks ending 20th and 27th February. The report is a few days late, as Mr. Macpherson, the Collector of Champaran, was not set free to write his report until after the Lieutenant-Governor's departure from Bihar.

PART I.—INTRODUCTION.

2. Since my last report was written, the Lieutenant-Governor, accompanied by yourself, has made a short tour through North Bihar, with the object of personally inspecting the conduct of relief operations. I understand that the result of His Honour's observations, and any orders which he may think necessary to pass, will be separately communicated. It remains for me to chronicle the bare facts of the tour.

3. Leaving Howrah on the night of the 28th February, the Lieutenant-Governor reached Mokameh at day-light on the 1st March. There I met you, and the party proceeded by train to Bettiah, which was reached late in the afternoon. Next day, Tuesday the 2nd, His Honour drove out to Ramnagar (28 miles) accompanied by the local officers, and in the afternoon visited the relief work at the Dokraha tank, while you and I also visited the Ramnagar-Harnatar road. On the 3rd March (Wednesday) the party returned to Bettiah *vid* Sathi (32 miles), visiting the Chanki and Kooria tanks *en route*. We then proceeded by train to Darbhanga, which was reached at daybreak on the 4th March, Thursday. The same morning His Honour visited the Chakka tank, while you and I also inspected that at Dhoi. In the afternoon the Lieutenant-Governor presided at a conference attended by the Hon'ble Mr. Glass, Chief Engineer, the Collectors of Champaran, Muzaffarpur and Darbhanga, the two Superintending Engineers for Relief Works, and other local officers, as well as by you and myself. On the morning of the 5th we were taken by special train to Kamtaul to inspect the Darbhanga Raj relief works near that place, and we finally left Darbhanga by the mail train for Mokameh at 12-50. After taking leave of the Lieutenant-Governor at Mokameh the same evening, I returned to my head-quarters at midnight.

PART II.—DISTRICT REPORTS.

4. *Patna.*—The report from this district continues excellent. The harvesting of the *rabi* is in full swing, and in spite of caterpillars and insects reported in some places, the Collector estimates a 12-anna crop, but it will probably be more.

5. Prices are still hard with a tendency to fall, and there is no distress.

6. The imports by rail and river amount to 45,466 maunds as against 48,470, and the exports to 45,490 maunds against 60,462, so that the balance against the district is 24 maunds only, a smaller figure than has ever been returned before: the cause is a great reduction in exports, the volume of imports remaining about the same. Three fourths of the imports (35,393 maunds) are rice, while gram and other pulses (21,795 maunds) account for nearly half the exports. As these have been exported mostly from Mokameh and Patna ghat, they doubtless represent the fresh *rabi* crops from the rich lands to the south of the railway.

7. No relief works are now open in this district, and the only kind of relief which is being given is that distributed at poor-houses and kitchens, and to a small extent by gratuitous relief. The former has my entire approval, for it meets the case of many sick and helpless persons, mostly strangers and pilgrims, who would otherwise starve; but the Collector will have to be strict about gratuitous relief in villages, since in the midst of such general agricultural prosperity as this district enjoys, it is out of the question for Government to take over the support of the whole indigent population. As noticed in previous reports, the money dole seems unnecessarily high; the Collector has been asked to explain the reason, but has not yet replied.

8. What Mr. Inglis says in his concluding paragraphs about charitable relief from the Famine Fund will be separately dealt with. It is true that in the Patna City itself, there is a very great deal of genteel poverty, but it is to be hoped that all the requirements of the City will be met from local subscriptions, and that the funds of the Central Committee will be set free for use in districts where they are more urgently required.

9. *Gaya.*—The prosperity of this district continues unabated. The *rabi* harvest is excellent, opium promises to be a full crop, prices are falling slightly with the arrival of the new *rabi* in the market, and there is no cause for anxiety anywhere.

10. Imports were 9,483 maunds in the period under review, against 5,504 in the preceding period, and exports were 1,082 maunds against 1,695. Nearly two-thirds of the imports were rice coming into Gaya itself, no doubt for despatch to Palamau. The Collector reports that 668 maunds have already been sent on to that district, but as the figures given in his forms 8 and 9 are only those for the fortnight ending 20th February, instead of the 27th, it is possible that a good deal of grain has found its way south since that date.

11. The number of people fed daily at the kitchens and poor-house on the Grand Trunk Road at Kusa and Aurangabad was 122 and 138. Figures for Madanpur have not been received.

12. At a meeting held at Gaya to raise funds in connection with the Bengal Branch of Indian Charitable Relief Fund, a sum of Rs. 10,000 was raised on the spot, and the Collector has submitted to me a copy of their proposals for the distribution of relief.

13. *Shahabad.*—There is no great change in this district, except an increase in the number of persons in the receipt of gratuitous relief. The prospects of the *rabi* are good, except in the west and south of the Bhabua subdivision, as has already been reported. The harvesting of this crop is already giving employment to labourers all over the district.

14. Prices are stationary or show a tendency to fall, from the new *rabi* crops having come into the market, especially gram and peas. The Collector does not quote the price of *rahar*, which must certainly be falling; wheat, which is the staple food in the west of the district, has risen a little at Buxar and Bhabua, but is cheaper at Sasaram.

15. The food-grain traffic is about the same as in the previous fortnight, the imports being 23,702 maunds against 24,895, and the exports 9,470 against 7,999. The balance in favour of the district is thus 14,232 maunds against 16,896. Almost the whole of the imports were rice, of which more than half went to Buxar: the Collector will be asked to ascertain the subsequent disposal of this grain, since Buxar has from the first been the great importing station of the district, especially for rice. Of the exports, nearly half were gram and pulses.

16. Four relief works are now open in the Bhabua subdivision, but the number employed on them is not yet very large. The following statement gives the usual comparison of the figures of the past with the previous fortnight:—

Week ending.	Number of works open.	Average daily number of male units on—				Average daily outturn per male unit.	Cost per 1,000 c. ft.
		Task-work.	Daily wage irrespective of task	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
						C. ft.	Rs. A. P.
6th February ...	2	646	378	6,975	.....	65·9	1 15 4
13th ,, ...	3	468	349			79·	2 2 10
20th ,, ...	4	628	209	9,425	10,262	50·5	2 3 9
27th ,, ...	4	767	78	10,452	11,297	51·4	2 5 7

17. Turning first to relief works, it will be seen that the average attendance for the past fortnight was 697 male units on task work and 143 on the daily wage, making a total of 840 in all, whereas the daily average of those gratuitously relieved was 9,938. It seems likely that more relief works are required to employ the able-bodied poor, and this will be looked into. The outturn per male unit is high, if the measurements are correct, and the cost per 1,000 cubic feet very low, viz., Rs. 2-3-9 and Rs. 2-5-7, respectively. One explanation is that the proportion of males was large, as Form No. 5 will show, and it is also possible that too high a task has been demanded.

18. The advance under the head of gratuitous relief is due to the development of the circle organization, and though the numbers are high as compared with the numbers on relief works, the total is only 3·8 per cent. of the population of the presently affected area. The numbers gratuitously relieved will certainly rise higher than they now are, but as more relief works

are opened, a more usual ratio will be attained. The average dole as shown by Form 7 is not excessive.

19. Poor-houses will be constructed at Bhabua and Arrah forthwith. Those along the Grand Trunk Road, the opening of which has already been reported, relieved a small number of persons daily, but the large numbers at Bhabua have been reduced, as the recipients have been drafted to their villages. The Collector's Form No. 6 shows that the daily total relieved at all these kitchens and poor-houses was 749 for the first, and 656 for the second, week of the period under report. The figures for the Dehri kitchen do not appear to be included in this form, nor do the figures in Form 6 agree with those quoted in paragraph 12 of the Collector's report.

20. The public health of the district remains good, but the Collector, in order to make his figures more complete should have quoted the average death rate for January in the Bhabua subdivision.

21. *Saran*.—On the whole the condition of this district remains much as before, but there are internal changes which will be noticed below.

22. The promise of the *rabi* continues excellent; in Siwan it is expected that it will be a bumper crop, but the Collector speaks with less confidence of the crop in the two other subdivisions. The crop in West Gopalganj is good, while in East Gopalganj it is not so satisfactory: the crops in the Sadar are unequal. I adhere to my former estimate of an average or 16-anna crop for the whole district; I wish I could say an average crop for each part of it, but those parts which contain little *rabi* land will continue to suffer in spite of good crops in other parts of the district.

23. Grain is plentiful everywhere, and while the traffic figures show that it is still coming in, the statistics of money-orders paid in the district prove that the money to buy it is still pouring in, the amount paid out by the Postal Department in February having been Rs 3,17,761 against Rs. 2,40,250 in the same month of 1896. The opium payments will still further augment the resources, or re establish the credit, of the raiyats. For all these reasons, prices remain steady or show a tendency to fall as new grain enters the market.

24. The balance of food-grains in favour of the district is slightly greater than at the end of the previous fortnight, the imports by all routes being 90,491 maunds against 92,675, and the exports 7,365 maunds against 10,193. The balance in favour of the district is thus 83,126 maunds instead of 82,482. As before, most of the imports, and indeed of the exports also, consist of rice.

25. Relief works are now going on in 36 places on behalf of Government and in 10 places on behalf of the Hutwa Raj. With the sanction of the Board, an advantageous arrangement has been made by which the Raj relief works, instead of being scattered all over the estate, are confined to one part of it and are thrown open to all comers, Government works, on the other hand, being opened in Raj villages in other parts of the subdivision. Two of 36 works are under Public Works Department Agency. The following table gives the usual statistics in this connection, omitting those for Public Works Department works, as they are evidently incomplete. They can be found in Form 7:—

Week ending.	Number of works open.	Average daily number of male units on—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
		A.—Under the Collector.					Rs. A. P.

* Besides these there are two major works under Public Works Department Agency with a daily average of 484 task-workers and 1,018 on daily wage irrespective of task.

26. Turning first to Government works it will be seen that including those on works under Public Works Department Agency, the daily numbers in receipt of relief of all kinds remained fairly constant during the fortnight. Task-workers fell off slightly, no doubt on account of the labour available in the harvest field. But while there has been a fall in the numbers in Siwan, there has been a rise in Gopalganj, the gross figures of attendance for each week having been as follows:—Sadar subdivision 15,492 and 15,188, Siwan, 33,395 and 21,468, Gopalganj 21,651 and 29,131. A reference to Form 7 will show that in both weeks the outturn on Civil Agency Works, and the cost per 1,000 cubic feet were constant, and very fair, viz., 31 and 38 cubic feet and Rs. 2-13-0 and Rs. 2-6-9 per 1,000 cubic feet; it should be remembered that a majority of the works in this district are tanks. During the fortnight the Public Works Department took over two works with such extraordinary results that it is impossible to accept them: the daily outturn for the last week is stated to be 102 cubic feet per male unit, and the cost 15 annas 3 pie per 1,000 cubic feet, while the daily average of those in receipt of daily wage irrespective of task is 1,048 as against 484 male units on task-work. A reference to Form 5, Public Works Department Agency works shows that almost all the men employed have been entered as A class, while all the remaining labourers have received the daily wage irrespective of task. I suspect that a task has been taken from the diggers only, as proposed in the first issue of resolution No. 420M.P.I. of the Public Works Department. An enquiry will be made and the errors corrected; the Collector has gone up to Gopalganj for the purpose.

27. Gratuitous relief is still largely given in this district, for reasons which have often been explained; the numbers in the Sadar and Gopalganj subdivisions are much larger than those in Siwan, which is doubtless due to the better crops in the latter. The total numbers show little variation.

28. The Hutwa Raj figures give good results, though the cost per 1,000 cubic feet is large, and their works have evidently been brought more into line by the officials of the Raj. A fair task is exacted and the numbers on task work and gratuitous relief are constant. An explanation of the increase in those on daily wage irrespective of task is suggested by the Collector.

29. The inmates of the poor-houses are on the decrease, because some have been drafted to their homes, while others have escaped to join in the profits of the *rabi* harvest. In the four Hutwa poor-houses, the average daily numbers have fallen from 507 to 454, and in the Government poor-houses from 163 to 149.

30. *Champaran.*—In this district the leading features of the past fortnight have been some decrease in the numbers on task-work and in the cost of work per 1,000 cubic feet, while the outturn was better and the numbers on gratuitous relief remain steady; so far as these results connote better administration, they are matters for congratulation.

31. Mr. Macpherson has revised his estimate of distressed area and population, as explained in paragraph 3 of his report, and has raised it from 1,020 square miles with a population of 972,000, to one of 1,865 square miles with 1,110,000 souls.

32. The prospects of the winter crops are excellent on the whole, though in parts they are backward. The public health is unusually good owing to the dryness of the season, and the mortality is a good deal below the average.

33. Prices are fairly stationary, more so at Bettiah than Motihari; at Ramnagar and Bagaha they had fallen a little according to the latest advices received. It will be remembered that in a separate letter No. 575F.G. of the 26th ultimo, I pointed out to Government that for some time past there has been a steady increase in the nett imports to Bettiah, which reached 2,083 maunds in the week ending 13th February; and it is satisfactory to note that in the two weeks now under report, the nett excess of imports over exports at that terminus has been 8,138 maunds. So long as this steadily increasing flow goes on, we need have no fears for the depletion of stocks, more especially as it is reported that the local mahajans have now mastered the details of import traffic.

34. For the district as a whole that traffic has been about the same, *i.e.*, 14,400 maunds against 14,351, but the exports have only totalled 786 maunds against 1,678; the balance in favour of the district is, therefore, 13,614 maunds against 12,673. As above stated most of this grain has gone to Bettiah.

35. As regards relief works, the process of taking over large works by the Public Works Department has been going on, but it has not been so rapid in

this district as it has been in Darbhanga, partly for want of establishment and partly from the inefficiency of the minor establishment available. Altogether 12 works are now under Public Works Department Agency, the average daily number of male units on task work for the week ending 27th February being 8,754 against 61,378 on Civil Agency Works. The number on the latter has been reduced, as works were completed and the labourers on them drafted on to the nearest major works. Twelve works were under the Executive Engineer and 54 under the Collector. I give below the usual comparative statement taken for the most part from Form 7:—

Week ending.	Number of works open.	Average daily number of male units on—				Daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task-work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
						C. ft.	Rs. A. P.
6th February ...	.....	62,820	2,057	7,215	72,392	18	4 9 10
13th „ ...	75	67,175	2 744	15,222	85,141	19	4 6 1
20th „ ...	... ..	79,653	4,058	29,395	113,106	22½	4 0 3
27th „ ...	66	70,132	4,034	29,575	103,741	24	3 14 8

36. Treating the figures as a whole without distinction of agency, it will be seen that while the numbers on task-work rose during the first week of the fortnight to a daily average of 79,653, they fell again during the second week to a daily average of 70,132. The Collector has not stated what the cause of this variation is, but it is probably the harvesting of the *rabi* crop and perhaps, as in Darbhanga, the temporary closing of works while the Public Works Department officials were taking them over. Moreover, as subdivisional totals are not given, and Form 5 gives no class totals, it is very difficult to localize the variation: the Collector's attention will be drawn to the matter.

37. As already remarked above, the outturn of work is steadily increasing, and when it is remembered (*vide* Mr. Macpherson's 21st paragraph) that out of 66 works as many as 51 were tanks, the general outturn of 24 cubic feet per male unit is quite satisfactory, as is the rate of Rs. 3-14-8 per 1,000 cubic feet attained in the last week under review.

38. The numbers on gratuitous relief have nearly doubled themselves within the fortnight, having gone from 15,222 per diem to 29,575. Three-fourths of these were relieved in their villages, which fact, taken with the increase in numbers, shows that the circle organization is now better developed, and that the police are relieved of this duty except in the case of waifs and strays and urgent cases.

39. Poor-houses have been started at Motihari, Bettiah and Ramnagar, and kitchens were opened at several places in the Hardih thana. The average attendance at the Motihari poor-house was 79 for the fortnight, while at the Bettiah Raj institution, which was rather a kitchen than a poor-house, 650 persons daily received food and shelter. This work has now been taken over by Government, and will be managed on Famine Code lines in future.

40. A considerable number of wanderers have found their way into this district across the Gandak from the North-Western Provinces, and on the 2nd March, when the Lieutenant-Governor visited the Bettiah poor-house, out of 760 inmates 304 were from those provinces. Considering that these invaders also supply the bulk of the vagrants picked up by the police both here and along the Grand Trunk Road in the Shahabad district, it might be as well to enquire what arrangements are being made in the border districts of those provinces for the relief of their poor. The Collector will be asked to ascertain if possible what number of immigrants from the North-West Provinces are to be found in the trans-Gandak thana of Madhubuni: he was at one time afraid that relief works would have to be opened in that area solely for the benefit of these people.

41. Private relief works carried out by the Bettiah Raj and the Tettaria Factory on the piece-work system, gave employment to 1,518 male units during the last week of February.

42. *Muzaffarpur.*—The features of Mr. Hare's present report are a great increase in the numbers on gratuitous relief, but only a slight advance on those employed on relief works, in spite of the fact that the number of works available for them has been increased by 50 per cent. during the fortnight.

43. The prospects of the *rabi* remain excellent, and the weather has been most favourable. The public health is exceptionally good, the mortality for January, which is now reported, being much below that of the same month in 1896.

44. There has been some falling off in the volume of food-grain traffic. The imports being 41,837 maunds against 52,939, and the exports 2 560 maunds against 5,308, the balance in favour of the district for the past fortnight is 39,277 maunds instead of 47,631. More than half both of the imports and exports, are rice, viz., 22.056 maunds and 1,380 maunds.

45. Prices are stationary on the whole, the rise in that of rice being met by a fall in that of the earlier *rabi* crops. In Sitamarhi there is a rise in every case except gram, but it is to be remembered that the crops in this northerly subdivision being backward, the effect of the *rabi* harvest is hardly felt there yet.

46. During the last week of the fortnight under review, the Public Works Department have opened three large works, each estimated to employ 6,000 labourers for 40, 60 and 65 days, respectively. So far they do not appear to have attracted labour, and the Collector says that the system of large gangs, with undivided responsibility, laid down in Public Works Department Resolution (revised) No. 420M.P.I. of the 25th January, is not acceptable to the people. He also points out that the *rabi* harvest is taking away some labour, and he draws the inference that the labourer class is not yet urgently pressed in his district. It is too soon, however, to form any conclusion as to the attractiveness of these works and the tasks enforced.

47. Turning to relief in the district as a whole, the following statement gives the usual comparative figures :—

Week ending	Number of works open.	Average daily number of male units on—				Daily outturn per male unit.	Cost per 100 cubic feet.
		Task-work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
						C. ft.	Rs. a. p
6th February...	29	16,982	474	12,376	29,832	82 13	1 1 2
13th „ ...	33	16,727	630	14,189	31,146	80·58	1 1 4
20th „ ...	46	16 918	1,315	20 714	38 977	69·39	1 3 11
27th „ ...	48	18,666	1,067	48,230	67,963	64·15	1 5 5

48. The number on task work has advanced very slowly in spite of the fact that on the 27th February there were 48 works open as against 33 on the 13th idem. As is known to Government, the tasks demanded hitherto by Mr. Hare are in excess of those laid down in Mr. Glass' tables, and although I am certain that in many cases they could be executed by the task-workers, yet they have undoubtedly deterred the people from seeking the works when lighter tasks were available in neighbouring districts. Now, however, that the Collector has been directed to introduce Mr. Glass' tables everywhere, it may be expected that the numbers on relief works will increase, and also that the existing great disproportion of adult males to others will be reduced: for the week ending 27th ultimo there were employed on task work 7o,191 adult males as against 61,081 of all others. The rate per 1,000 cubic feet was Re. 1-3-11 for the first week, but was raised in the second week to Re. 1-5-5 by the intervention of the Public Works Department with Mr. Glass' tasks. This had the effect also of reducing the average outturn per male unit from

69·39 cubic feet to 64·15, as the Public Works Department outturn was 39·15 against 66 obtained on Mr. Hare's works.

49. The numbers on daily wage irrespective of task are carefully controlled, save in the case of particular works, where there was doubtless some special cause at work.

50. The numbers on gratuitous relief have again largely increased. The present advance is said by the Collector to be due to an increase of distress; it is probably also due to the better development of circle organization, and a more careful inspection of the villages. The average dole is still high, viz., 11 pics, for the first week, but it has been reduced in the second. The gratuitous relief entered against the Public Works Department Agency works was administered to dependents; I have desired that as far as possible these should be relegated to their villages. The figures of relief given by the Darbhanga Raj in the Parihar Circle show an average of 2,175 per diem on the works against 758 in the preceding fortnight. As before a large proportion were men, which is a necessary consequence of the Raj system of work.

51. The daily average of persons relieved in the five Government poor-houses was 409, and in the Raj poor-house at Parihar 228. Of the Government poor-houses Sitamarhi had the largest number of inmates, viz., a daily average of 140.

52. *Darbhanga.*—The Collector's report shows that the machinery of relief in this district is working smoothly, and there has been no deterioration or confusion. The only point in which improvement is desirable is in the supply of statistics from works under Public Works Department agency, for in the absence of them the district figures are necessarily incomplete.

53. The *rabi* prospects are better than before, and Mr. Carlyle is inclined to raise his estimate; it is unnecessary to do so, however, until the harvest is nearer completion. Harvest operations have begun, and they seem to have checked all increase in the number of relief workers.

54. Prices are fairly stationary with a tendency to fall in the case of the earlier *rabi* crops, such as gram and rahar. The public health remains phenomenally good.

55. Imports have again exceeded exports in the period under review, the figures being 36,965 maunds and 10,139 maunds, while during the previous fortnight they were 50,591 and 20,229; the balance in favour of the district is now 26,826 as against 30,362 when I last wrote. Rice and paddy account for more than half the imports, and "Other food-grains" (15,188 maunds) for almost all the balance: more than half the exports are "Other food-grains."

56. As regards relief works it is to be noted that 13 of these with about 13,000 workers have been taken over in this district by the Public Works Department, but it is unfortunate that the arrangements for supplying the Collector with punctual statistical information from them have failed hitherto. While I was at Darbhanga plans were matured and orders issued by Mr. Glass, which will, it is hoped, prevent a repetition of these failures.

Week ending	Number of works open.	Average daily number of male units on—				Daily outturn per male unit.	Cost per 1,000 c. ft.
		Task work.	Daily wage, irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8

* Besides 13 works under the Public Works Department with about 13,000 workers.

57. Taking the figures as they stand, however, and understanding clearly that they do not include any figures from works under the Public Works

Department, it appears that while the outturn of work per male unit has been maintained and the cost kept down, there has been a large falling off in the numbers of task-workers, which is partly due to considerable numbers having gone off to works under Public Works Department agency, as well as to several works having been temporarily closed for the purpose of taking over. Some also have been drawn away to the harvest field, and large numbers have gone off temporarily to private works as reported by the Collector in the marginal note to his 18th paragraph. Looking a little closer into the figures, it is interesting to observe the numbers on relief works in the different subdivisions; the figures are given in the margin.

Average daily number on task works in each subdivision in the week ending		
	20th February.	27th February.
Sadar	57,236	32,797
Samastipur ...	5,535	5,509
Madhubani ...	65,545	28,128
Total ...	128,316	66,434

58. The cost per 1,000 cubic feet has been Rs. 2-11-7 and Rs. 2-11-3 as against Rs. 3-1-11 and Rs. 2-12-10 in the previous fortnight. Considering that a large proportion of the works undertaken are tanks, these results are remarkably good. Mr. Carlyle has given a copy of form 5 showing figures for tanks alone, from which it appears that a daily average of 72,619 task-workers in the first week and 40,253 in the last were employed on tanks, being 56·59 per cent. of the whole in the first case, and 60·59 per cent. in the second.

59. The numbers on daily wage irrespective of task are inconsiderable.

60. The figures for gratuitous relief are heavy again, and owing to the temporary decrease in the number of relief workers, the proportion was higher than ever during the last week of the period under review. The true ratios will not be apparent till complete figures are received from all relief works; but in the meantime it is satisfactory to learn from the Collector's report that a personal examination of the Circle Officers' lists has satisfied him that they are carefully and well prepared.

61. The operations of the Darbhanga Raj during the last four weeks are set forth in a separate set of tables. They show that for the week ending the 27th February the Raj had a daily average of 21,900 persons on relief works and 10,578 in receipt of gratuitous relief. Mr. Bell, the Manager, asured me at Darbhanga that he had checked many lists and had satisfied himself of their correctness.

62. Poor-houses are open at four places, and others will soon be opened elsewhere.

PART III.—Conclusion.

63. The features of famine relief administration during the past fortnight are the continued prosperity of the *rabi* and the general commencement of harvest operations, a consequent falling off in the numbers on relief works, an increase in those on gratuitous relief, better control over the relief-workers, and a final decision on the system on which relief works are to be conducted. In a word, a continuance of satisfactory natural conditions, and an improvement in administration.

64. Crop prospects continue good everywhere. Insect-pests are reported from a few places, but the damage is not alleged to be great. No rain has fallen, which is a cause for congratulation except for indigo. The reports of the poppy crop are satisfactory on the whole, though there are complaints of west winds in South Bihar, and some blight is reported in North Bihar. The collection of the drug is in full swing everywhere, and a full average crop is expected all round.

65. Prices are stationary with a tendency to fall in respect of those *rabi* crops which have been already cut, such as peas, gram and some of the pulses. The price of rice is steady, but that of Indian-corn is rising a little as the stock is being exhausted.

66. The result of the food-grain traffic is shown in the following statement:—

District.	Imports.		Exports.		Excess—I. or E.	
	For 13th February.	For 27th February.	Fortnight ending 13th February.	Fortnight ending 27th February.	Fortnight ending 13th February.	Fortnight ending 27th February.

* The figures of imports and exports for Gaya are for the fortnight ending 20th February 1897.

The Patna and Saran figures include river-borne traffic also, and the figures for the Saran district for the previous fortnight have been corrected accordingly.

67. It will be noticed that in Patna the exports and imports nearly balance each other, and that in every other district imports are in excess, very largely so in Saran as usual: in Muzaffarpur and Darbhanga there is some falling off in the balance of imports over exports. The volume of both exports and imports is smaller this fortnight than in the previous one, the totals being 3,96,989 maunds and 3,39,236 respectively. Only three of the District Officers have given details to show where the imports have come from, so that it is impossible to compare the figures for rice from Howrah, except in regard to Patna, Gaya, and Darbhanga. Patna has imported 13,201 maunds against 9,291, Gaya 752 maunds, and Darbhanga 384 against nil in each case. The figures will be obtained from other districts.

68. I give again in the margin figures to show the proportion of the population in the distressed tracts of each district who were in receipt of relief of all kinds on the last day of the fortnight under report. The Muzaffarpur figures include 2,500 on account of Darbhanga Raj relief in Parhar, the same figures having been deducted from the total of the Darbhanga district. The totals have been taken from those published in the *Calcutta Gazette*.

District.	Estimated population of affected area.	Numbers in receipt on relief on 27th February.	Percentage receiving relief on—	
			27th February.	13th February.
1	2	3	4	5
Shahabad	371,824	5,965	1·6	·80
Saran	1,352,598	38,491	2·86	2·51
Champaran	1,110,000	170,251	15·33	15·19
Muzaffarpur	1,660,000	30,875	1·85	1·6
Darbhanga	2,270,000	169,511	7·46	8·81
	6,764,422	415,293	6·13	6·21

69. Next I give below an abstract statement comparing the principal items of relief administration district by district for the past and the previous fortnight: the figures represent the mean of the two weeks in each case:—

District.	Fortnight ending 13th February 1897.								Fortnight ending 27th February 1897.							
	Task work.				Daily wages, irrespective of task.		Gratuitous relief.		Task work.				Daily wages, irrespective of task.		Gratuitous relief.	
	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost per 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each.	Number of adult units in receipt of gratuitous relief.	Average dole.	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost per 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each.	Number of adult units in receipt of gratuitous relief.	Average dole.

Total ...	176,243	.....	.....	.....	5,960	.....	112,061	.....	179,411	.....	.....	.....	10,883	.....	137,469	.....

70. Turning first to task work, it will be seen that there has been an advance of 3,168 male units on the whole. For reasons already stated there has been a decrease in Darbhanga and Saran and an increase in other districts. There has been an increase in the average outturn of work everywhere, except in Muzaffarpur, where the introduction of Mr. Glass's scale of tasks on the Public Works Department agency works has caused the average outturn to fall from 81·3 cubic feet to 66·77 cubic feet. For Champaran the figures in columns 3 and 5 have been corrected in accordance with the revised figures given by the Collector in his present report. The cost per 1,000 cubic feet has fallen everywhere, except in Shahabad and Muzaffarpur. The average wage earned per male unit is now nearly the same everywhere, though rather high in Shahabad.

71. The numbers on daily wage irrespective of task have gone up in Saran for reasons already explained in paragraph 26 above: the proportion is also high for the same reason. The wage paid is now everywhere higher than that earned by the male unit of task-worker: it is presumed that the explanation is that nearly all the persons so paid are members of special gangs and so forth, the weakly persons and others who received this wage at first being now relieved as dependents, or entered as D class coolies, or placed on the charitable relief lists.

72. There is a considerable advance in the numbers on gratuitous relief, viz., from 112,661 adult units to 137,459. The increase is most marked in Champaran and Muzaffarpur, in both which districts an expansion was needed. The percentage of those relieved in this manner to the total relieved in all ways is now as follows in each district, taking the figures in the above statement as the basis of the calculation:—Shahabad 92·19, Saran 56·83, Champaran 27·19, Muzaffarpur 64·49, Darbhanga 37·81, whole Division 41·91 The average dole has risen in Shahabad, Muzaffarpur, and Darbhanga. The attention of District Officers has already been drawn to the variations in the dole, but their replies have not all been received.

73. The appended statement gives as usual the expenditure to date, as ascertained from the district reports, but I fear that complete accuracy cannot be claimed for these figures. When the accounts have been overhauled and a sufficient account staff organized, the fortnightly statements will be more complete, but these must always be only approximate, as they deal only with expenditure which has been recorded at head-quarters. Taking the figures as they stand, it appears that the total expenditure up to the 27th February was Rs. 10,17,353, of which Rs. 3,17,650 were expended in the fortnight under review, as compared with Rs. 2,63,870 in the previous fortnight. Of the total expenditure to date, Rs. 8,36,427, or 82·21 per cent., have been spent on relief works, and Rs. 1,67,360, or 16 45 per cent., on gratuitous relief. Allowing about 2 lakhs a week for the remainder of the present month, the expenditure at the end of the financial year on relief works and gratuitous relief (unless some quite unexpected event occurs) will probably be about 19 lakhs. If to this be added the cost of establishment, say a lakh and a half at 8 per cent., contributions, bounties and relief to people employed otherwise than on relief works, say 4 lakhs, the expenditure may aggregate 24½ lakhs, which is well within the estimate sanctioned by Government; while if the disbursements under the latter heads are not large, the gross expenditure may approximate to the 22¾ lakhs estimated by me on the 19th January, though the details will vary greatly from those in my forecast.

74. During the fortnight under review, the Public Works Department continued to take over old and to open new works in all four districts of North Bihar, and it is believed that at the end of the period the number of works in each district under Public Works Department agency was as follow:—Saran 2, Champaran 12, Muzaffarpur 3, and Darbhanga 13—Total 30. Under Civil Agency the number of works open is as follows:—Shahabad 4, Saran 34, Champaran 54, Muzaffarpur 45, and Darbhanga 91—Total 228. It is clear that a great deal remains to be done before the transfer is completed.

75. Probably the most important event of the fortnight was the Lieutenant-Governor's decision, pronounced at the Darbhanga Conference, to conduct all works, whether under Public Works Department or Civil Agency, on the same lines; the system being that by which the pit is the unit with its

small party of from 15 to 20 workers, several pits being grouped into a gang for purposes of supervision. I believe that the Lieutenant-Governor was satisfied, from personal observation, that this system, which has the support of almost every officer concerned, has secured the best results so far, and is likely to prove superior to all others. When large works, such as the branch lines of railway in Champaran and Darbhanga and the canals in Champaran, have to be opened, it will be a question whether a modified piece-work system will not be the most suitable form of administration.

76. The usual statements and maps are appended.

APPENDIX A.

No. 240 F., dated Bankipore, the 2nd March 1897.

From—T. INGLIS, Esq., C.S., Collector of Patna,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit the following report, under section 24 of the Bengal Famine Code, for the two weeks ending on Saturday the 20th and the 27th February 1897.

2. SECTION 24 (1)—No change.

3. SECTION 24 (2) (*a*).—*General state of the affected tracts*.—There has been no change. The *rabi* harvest is in full swing and the agricultural population fully employed. Distress is increasing in the towns and is being dealt with by the Charitable Sub-Committees and Charge Superintendents. Beggars continue to come into Patna and are being located in the poor-house just opened.

4. SECTION 24 (2) (*b*).—*Crop prospects*.—On the whole the rain in the first half of February did more good than harm. It failed, however, to drive away what most officers called the *insect* pest, by which, I understand, they mean the ravages of caterpillars. These have attacked *masur*, *kirao*, linseed and gram. In places considerable damage has been done, especially in the tal lands; but they appear every year. The harvest is being rapidly gathered, and should be completed soon after the close of this month. Making allowance for the short area sown and the damage done by rain, blight and caterpillars, a 12-anna crop will certainly be reaped, and I feel inclined to put it at 14 annas, considering the thickness of the crops generally.

5. SECTION 24 (2) (*c*).—*Food-stocks*.—Sufficient. It is said that cultivators are holding out for better prices, but it is more likely that they are thinking of their house requirements, and are replacing the stocks which they sold out in October last.

6. SECTION 24 (2) (*d*).—*Importation and exportation of food-grains*.—The figures for the period under report which have been received from all reporting centres, and which are, I believe, complete, show the following results:—

				Mds.
Imports	...	...	...	45,466
Exports	...	...	...	45,490
Net export	...	...	...	24

There is nothing new to mention under this head, except the comparatively large export of rice.

7. SECTION 24 (2) (*e*).—*Rainfall*.—0·05 in Bihar only.

8. SECTION 24 (2) (*f*).—*Public health*.—Continues good. There have been a few cases of small-pox reported from the Barh subdivision and in the Silao police-station.

9. SECTION 24 (2) (*g*).—*Emigration or immigration of famished people*.—A few cases are reported from Patna city only. Large numbers of pilgrims to and from Baidyanath continue to pass through. They appear to me to be in good condition. The rest-houses referred to in my last report are under construction.

10. SECTION 24 (2) (*h*).—*Condition of cattle*.—Continues fair. There is an outbreak of rinderpest recorded in the Patna city. I am telegraphing for the services of an expert. The outbreak is reported by the Veterinary Assistant maintained by the Patna Municipality and District Board.

11. SECTION 24 (2) (*i*).—*Prices*.—The price of rice has slightly risen in Barh and Bihar; barley has risen in Bihar, due to the short supply in the market. The crop in the ground is excellent. The other cereals show a slight improvement. The new *rabi* is slowly coming into the market, but cultivators are not selling readily. The Burmah rice is not received favourably and is said to be too glutinous. It is not boiled before being husked. American maize has also not found favour as on being fried it is said not to burst. The import of both kinds to Patna station is said to have been discontinued.

12. SECTION 24 (3).—*Number of relief works open, &c.*—Nil.

13. SECTION 24 (4).—*Number of poor-houses open, &c.*—The Patna poor-house was opened yesterday (1st March), when 13 inmates were housed. Notices of its being opened have been sent throughout the district. The Subdivisional Officers of Barh and Bihar are still considering whether a poor-house is necessary for their subdivisions.

14. SECTION 24 (5).—*Organisation for employment of artizans, &c*.—Nil.

15. SECTION 24 (6).—*Organization for the distribution of grain doles, &c.*—No change has been made. Travellers are assisted by the police; beggars and helpless poor, where village charity is failing, by the Charge Superintendents, and the cases of respectable poor, by the Charitable Sub-Committees. The two city and sadar subdivision Sub-Committees have commenced work, but they and the other Sub-Committees are engaged in collecting information and testing reports already received. No report has been received from the Dinapore Sub-Committee. Under the Famine Code the dole is given in grain where possible, *i. e.*, in towns; otherwise in money. In Bihar the money dole is 1 anna 3 pies per male, 1 anna per female, and 6 pies per child. In no case does it exceed Rs. 3 a month.

16. SECTION 24 (7).—*Relief in kitchens*.—Nil.

17. SECTION 24 (8).—*Loans, &c.*—Loans were advanced to four persons during the fortnight, and a loan was sanctioned for one person.

18. SECTION 24 (9).—The financial statement contains the necessary information under this head. The usual table showing the grant made by the District Board and the expenditure under the different heads is shown.

19. SECTION 24 (10) AND (11).— No remarks

20. SECTION 27 (*iii*).—*Water-supply of the country.*—Is reported to be sufficient.

21. STATISTICS OF ADMISSIONS TO THE BANKIPORE JAIL.—Statistics have not been received. They will be submitted with my next report.

22. GENERAL.—The general position remains unchanged. The Charge Superintendents are gradually finding out the necessitous poor of the respectable classes. Most of the cases reported turn out on enquiry to be undeserving, but in the towns many such cases exist. In an answer to a circular received from the Central Committee, we have provided for relief under heads (1), (2) and (3) of the objects on which the famine fund is to be spent. The main charge comes under head 3, *i.e.*, the relief of respectable people in bad circumstances, and we anticipate having to relieve 1,450 cases for seven months. The total expenditure is estimated at Rs. 33,450, as follows:—

		Rs.
Under head (1) 2,000 relieved at Re. 1 per head	...	2,000
„ (2) 50 orphans at Rs. 2 for ten months	...	1,000
„ (3) 1,450 persons at Rs. 3 per seven months	...	30,450
Total	...	33,450

We anticipate that a grant of Rs. 20,000 will be necessary from the fund. I hope, however, that the district will awake to a sense of its duties and will recognise the necessity of dealing with its own poor and set free the funds which have been subscribed elsewhere for expenditure in the less favoured and worse striken districts. I know the Sub-Committees have now many cases before them, and trust that the next return will show that they have afforded a substantial measure of relief to those in need of it. The accounts of sums spent on gratuitous relief under the Code have been received to-day only too late to be corrected, and I am unable to state the amount of the dole given, as payments are made for a month in advance in outlying villages; and these advances are made at different times. I hope to get the figures correct for my next report.

* These figures do not include any railway.
† Advance made during the previous financial year—Nil.

FINANCIAL STATEMENT.

				Rs.	A.	P.
Receipt from District Board during the period of report for poor-house				2,800	0	0
Balance of previous statement				1,343	0	9
		Total	...	4,143	0	9
		Rs.	A. P.			
Expenditure on—						
(1) Gratuitous relief		50	7 0			
(2) Poor-house (cost of utensils and rent of land, &c.)		277	10 0			
	Total ...	328	1 0			
Balance			...	3,814	15	9

The expenditure according to Form Nos. 6 and 7 is Rs. 48-13. The difference, Rs. 1-10, has apparently been met from the Police grants, of which the subdivisional returns take no account in their financial statement.

T. INGLIS,
Collector.

No. 2266G., dated Gaya, the 2nd March 1897.

From—H. SAVAGE, Esq., C.S., Collector of Gaya,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit Famine Report for the fortnight ending 27th February. The figures relate to the period under report, with the exception of Statements 8 and 9, which are for the two weeks ending 20th February, as informetion for the last week of February has not yet been received.

2. *Section 24 (1)*.—No area is affected by famine.

3. *Section 24 (2)* :—*Crop prospects*.—The prospects of rabi continue excellent. Harvesting of early rabi crops is in progress. The gathering of opium continues. There are some complaints of a scanty flow of drug on account of cloudy and damp weather, followed by strong west winds, but on the whole the outturn will be as large or larger than last year.

4. *Prices of food-grains*.—The subjoined table (Appendix A) shows the prices of the principal food-grains for each Subdivision. Prices are easier now that new rabi crops are coming into the market.

5. *Importation and exportation of food-grains*.—The annexed Statements 8 and 9 show the figures of import and export trade of the District. The classification given in the Government letter No. 859-62, dated 2nd December last, has been adopted. The total imports by rail during the fortnight amount to 9,483 maunds, and exports 1,082 maunds, leaving a net excess of imports of 8,401 maunds. Six hundred and sixty-eight maunds of the rice imported to Gaya have been exported to Daltonganj. The principal articles of imports are rice, gram, and pulses.

6. *Rainfall*.—There has been no rainfall, except ·49 inch, in the Aurangabad Subdivision on the 16th February. The rain has done much good to the late-sown barley and to pasture lands. It has also allowed of early ploughing for the bhadoi.

7. *Public health*.—Public health continues good. The death-rate *per mille* for the month of January last was 1·4, as compared with 2·1 for the corresponding period of 1896, and 1·8 for December last.

8. No emigration or immigration of famished people has been observed. The travellers I met with along the Grand Trunk Road looked fairly well fed.

9. Condition of cattle is good.

10. *Section 24 (3) Relief works*.—Nil.

11. *Section 24 (4)*.—The average daily number of people fed at the cook-house at Kusa by the Mohant of Bud Gaya, was 122, and the total quantity of edibles consumed was, rice 52 maunds, pulses 14 maunds, salt 1¼ maunds and vegetables 3½ maunds.

12. The Relief Committee at Aurangabad fed 138 travellers a day on an average, at a cost of Rs. 79, during the fortnight under review.

13. No statistics with regard to the cook-shed, recently opened at Madanpore on the Grand Trunk Road, have been received.

14. Certain Marwaries of the town of Gaya have collected by subscription a small fund, out of which they spend Rs. 5 per day, Rs. 3 on distribution of cooked rice and Rs. 2 of uncooked grains to the poor and needy.

15. *Section 24 (5 to 7)*.—Nil.

16. *Section 24 (8)*.—In three cases only a loan of Rs. 1,300, under the Land Improvement Loans Act was made during the fortnight under report, and in 14 cases Rs. 390 were advanced under the Agriculturists' Loans Act. The total amount advanced up to date during the current year being Rs. 81,800 under the former, and Rs. 9,038 under the latter Act. The amount advanced under both the Acts in the last year (1895-96) was Rs. 50,000, and Rs. 2,500 respectively.

17. *Section 24 (9)*.—Financial Statements *blank*.

18. I am glad to report that at a meeting held at the Halliday Hall on the 20th February 1897, for raising funds for charitable relief, a sum of Rs. 10,000 was subscribed on the spot. In consultation with the Committee which we appointed at the meeting, it was decided to establish a local Committee for each police-station and outpost, to raise and administer funds for charitable relief in the mufassal. Appendix B will show what these local Committees are expected to do.

APPENDIX A.

Comparative Statement showing the prices of food-grains for the fortnight ending 27th February 1897.

APPENDIX B.

Proposals for charitable relief in the mufassal.

I.—There will be a Committee for each thana and out-post.

II.—This Committee will consist of one or more local zamindars (one of whom will be Chairman) and all collecting members of the chaukidari panchayats in the Elaka.

III.—Each Committee will appoint its own Chairman, Secretary and Treasurer.

IV.—The Committee will be requested—

(*a*) to collect local subscriptions for the fund,

(*b*) to prepare as speedily as possible, after a house-to-house enquiry, a list showing—

(1) all persons in their Elaka who are unable to work, and have no one to maintain them,

(2) all women who, by the custom of the country, do not appear in public, and who are in need of charitable relief.

V.—To persons entered in the above lists the the local Committees will be authorised to pay monthly—

	Rs.
To each man	2
,, woman	2

To some respectable inhabitant of the village who will undertake to feed and care for each child—

	Rs.	A.
Between the age of 7 and 14	1	8
Under the age of 7	1	0

NOTE—If the father or mother of the child be in receipt of relief, the relief for the child may be paid to such father or mother.

VI.—In the case of *pardanashin* women, the Committee may advance 4 seers of cotton at a time, and on receipt of an equalivalent in thread may, at the end of each month, pay the woman an addtional sum of one rupee.

Not more than 4 seers cotton should be supplied, and not more than one rupee extra should be allowed in any one month.

The Committee will purchase the cotton in the local market, and will dispose of the thread locally, and credit the proceeds to the fund.

VII.—A copy of the list prepared by each Committee should be forwarded to the Central Committee as soon as it is prepared, and all alterations should be duly notified.

VIII.—Each local Committee should, on 1st and 15th of each month, forward to the Central Committee (through the Subdivisional Officer), if the Committee be in a sub-Division, a statement in the following form:—

Thana or out-post.	Amount collected by the Committee.	Amount received from the Central Committee.	Amount realised by sale of thread.	Total.	Number on list.	Amount expended—			Amount now on hand.	Amount now asked for from Central Committee (giving full reasons for the requisition).
						Particulars.	During fort-night.	Up to end of fort-night.		
1	2	3	4	5	6	7			8	9
							Rs.	Rs.		
					Men	(a) on charitable relief.				
					Women	(b) for spinning done.				
					Children 7 to 14.	(c) purchase of cotton.				
					Do. under 7					

IX.—It will be the duty of the treasurer of each Committee to keep an account of the sums received and expended.

X.—All payments to be made through the collecting members of the chaukidari panchayats, whose receipts the treasurer will take for all sums issued.

H. SAVAGE,
Collector.

No. 15F., dated Camp Barahpur, the 2nd March 1897.

From—J. WINDSOR, Esq., Collector of Shahabad,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my Report under sections 13 and 24 of the Famine Code for the second half of February 1897. The figures dealt with relate to the weeks ending 20th and 27th February 1897.

2. *Section 24 (1) Affected area.*—The area affected is the same as that given in the last fortnightly report. In that report Mr. Marindin, referred to the condition of the country south of Akberpur and to the narrow strip of land between the river Sone and the plateau. I have not yet received a sufficiently detailed report from the Subdivisional Officer of Sasaram to be able to say whether these tracts should be added to the famine area The Subdivisional Officer of Sasaram reports that some distress exists among the people of this part, and he has deputed the Local Board Sub-Overseer to start a test-work in the Local Board Road south of Akberpur, and has also sent a sum of Rs. 50 to the head-constable there for gratuitous relief.

3. The arrangement of Circles, as previously reported, remains unaltered. The Charge Superintendent, Mr. Percy Smith, has joined since submission of the last report, and has been placed in charge of Ramgarh Charge, and Babu Harihar Charun Lal has been left in the Chand Chainpur Charge; and Mr. Marindin has, in his No 3455 of the 27th ultimo requested that you will apply to the Inspector-General of Police to lend his services as Charge Superintendent. The present Subdivisional Officer, Mr. Stephenson, who joined on the 17th ultimo, has visited the north-eastern portion of the Subdivision and the Ramgarh Charge, and states that this Charge is not at present in any danger of immediate distress, but private charity is drying up rapidly, and the labouring and beggar classes will want looking after in the near future. This is a large Charge consisting of five Circles, looked after at present by three Circle Inspectors only. Two of these are Sub-Inspectors of Schools, but I am of opinion that it will be advisable to continue their deputation, as they have a knowledge of the country. I have directed Mr. Stephenson to fill up the other two Circles, and have sent officers for this purpose. Mr. Stephenson will shortly visit Adhoura, and will report whether he considers the Charge there should be opened.

4. *Section 24 (2).*—The general condition of the people is much the same as reported last fortnight. Cases of small pox have occurred throughout the Bhabua Subdivision, especially in the Chinari out-post.

5. The *rabi* cutting has commenced, and this provides work for a certain number of people. The crop will be a poor one to the west and south of the Durgaoti river, in the Bhabua Subdivision, but north of the river, between Mohania and Zamania, the crop has been a good one. The amount of *rabi* sown this year is less than usual. The Subdivisional Officer of Bhabua has directed Circle Officers to submit careful statements of the final *rabi* crop, and I hope to give further information under this head in my next report.

6. *Importation and exportation.*—The figures of imports and exports called for from the Traffic Superintendent are appended to this report. The total imports amount to 23,702 maunds and the total exports to 9,470 maunds, leaving a balance in favour of the district of 14,232 maunds.

7. *Prices of food-grains.*—Prices have been almost stationary, except in the case of gram and peas, in which there has been a marked fall, on account of the new grain having been brought from the interior into the market. The state of cattle generally has been good. I cannot give any further information about emigration of famished people. I am asking the Subdivisional Officer of Bhabua to deal with this specially in his next report.

8. *Section 24 (3) Relief Works*—There are four relief works open (1) Hata Durgaoti Road (2)Bhabuah-Hata Road, (3) Bhabua-Sabar Road, (4) Mullipore Jehanabad. During the fortnight under report, the total number of male units employed on the relief works during the second week was 4,608 and in the first week 3,765, while those on daily wages, irrespective of task, were 475 in the second and 1260 in the first. This decrease is due to the distribution of relief by Circle Officers in the villages. The number on the last day of the period was, men 492, women 437, and children 236, or 1,165 in all.

9. The excavation of Sabar Tank, Court of Wards' Estate, and two other tanks near Patesar, has been taken in hand by private agency as relief works. Figures for these works have not, however, been supplied. Babu Makund Saha, of Mohania, is, at his own expense, deepening the Municipal tank at Bhabua.

10. *Section 24. (4) Poor houses.*—The poor-houses at Bhabua and Sasaram and the kitchens at Jahanabad, Mohania, and Durgaoti and at Dehri continued to distribute cooked food both to travellers and also to needy persons of neighbouring villages, who were subsequently sent to their villages to be relieved by the Circle Officers. The total numbers of persons relieved during the fortnight are given in Form No. 6, except as regards Dehri, from which no Returns have been received. A regular poor-house is about to be built at Bhabua on the plans of the District Engineer. Arrangements have been made to open a poor-house at Arrah. The number of persons who appeared for relief at the thana was too great for the police to deal with. Cooked food will be distributed at the opium godown until a poor-house has been erected, for which I have given sanction in anticipation of your approval.

11. *Section 24 (5).*- Local Committees have been formed at Sasaram and Bhabua, in connection with the Arrah District Charitable Committee, to conduct operations within those Subdivisions. I hope be able to give some account of the action taken by the Charitable Committee next fortnight.

12. *Section 24 (6).*—The police have continued to relieve stray cases of distress, by distributing grain at the police-stations. From Form No 6 it would appear that the average number of persons receiving gratuitous relief during the fortnight was 24,931, against 8,299 in the preceding fortnight. This increase of over 250 per cent. is very extraordinary. I can hardly bring myself to accept it as correct. I am asking Mr. Stephenson to look into the Returns submitted by Circle Officers, and to instruct Charge Superintendent to do the same, and also to check the lists kept by Circle Officers.

13. *Section 24 (8) Loans.*—In the Bhabua Subdivision, 465 petitions have been received during the fortnight under review. Of these, 45 applications are for loans under the Land Improvement Act, mostly for tanks and ahras, and 420 under the Agriculturists' Loans Act. These petitions are under enquiry.

14. Want of water is complained of in the Bhabua Subdivision.

15. *Section 27 (1).*—The total number of deaths reported during the month of January for the whole districtwas 4,054, giving a death-rate of 20 96 per *mille* for the month, and the figures for the Bhabua subdivision are 1,139 deaths, and the death-rate 3·30 per *mille* for the month.

16. The prescribed Statements and map are appended.

Comparative Statement showing the prices of the staple food-grains for the fortnight ending 27th February 1897.

J. Windsor,

Collector.

No. 595F.—G., dated Chapra, the 4th March 1897.

From—A. EARLE, Esq., Officiating Collector of Saran,
To—The Commissioner of the Patna Division.

IN continuation of my letter No. 326F.—G., dated the 17th ultimo, I have the honour to submit herewith my famine report for the two weeks ending the 27th ultimo.

2. SECTION 24 (1).—*Area affected during the period under report, and approximate estimate of the portion of the population affected.*—There is an area of 16 square miles with an approximate population of 16,000 persons to be added to the Sadar tracts in which relief works are open. The tract in question is to the north-west of the Hardia Chaur in the Pursah thana. A better *bhadoi* had enabled the people of this quarter to hold out, and they might have continued to do so longer had not the *rabi* crop there been seriously injured by frost. The figures as they now stand are shown in the margin. A revised map is annexed.

	Square miles.	Population.
Gopalganj thana	358	275,023
Minus non-affected tracts ...	162	86,016
	196	189,007
Mirganj thana ...	435	359,607
Minus non-affected tracts ...	114	87,654
	321	271,953
Siwan subdivision	829	800,738
Minus non-affected tracts ...	207	200,184
	622	600,554
Sadar tracts	303	291,084
	1,442	1,352,598

3. SECTION 24 (1).—*Number of relief circles and of officers in charge.*—A statement appended shows the names of Charge Superintendents and of Circle Officers. Th number of Charge Superintendents remains the same. That of Circle Officers has increased from 43 to 54, more officers having been appointed in the Gopalganj and Sadar subdivisions.

4. SECTION 24 (2).—*General state of the affected tracts during the half-month under report.*—The Siwan Subdivisional Officer still continues to return an uniformly satisfactory report. The *rabi* crop will probably cut out at more than 16 annas. This means suspension of distress for at least two months; if not, as we hope, for good. The Gopalganj subdivision continues to give cause for grave anxiety, but the scene of distress is shifting from the west to the east of the subdivision. In the Meerganj thana, where distress has hitherto been most acute, but where the *rabi* crop is good, there will be a decided alleviation when the cutting of that crop begins, and it will probably last for two months. The same may also be the case with the west of the Gopalganj thana. On the other hand in the east of the said thana, where the *rabi* and opium are poor, acute distress is supervening, and must last continuously till the close of the famine operations. This tract is now receving my closest attention, and I hope to proceed there on tour shortly. In the Sadar subdivision the alleviation of distress alluded to in previous reports as being due to the cutting of early *rabi* crops continues, but on the other hand the rice tracts are beginning to cause more and more anxiety, and will continue to do so till the close of the operations. Moreover, the *rabi* crop in this subdivision cannot be relied upon to the same extent as it can be in the case of the Siwan subdivision.

5. SECTION 24 (2).—*Crop prospects*—(*a*) In Siwan the *rabi* crop may probably be safely reckoned at 16 annas.

(*b*) In the Gopalganj subdivision it varies considerably, being bad in the east and good in the west. I have not received an exact estimate from the Subdivisional Officer, but I think it would be safe to estimate a 10-to 12-anna crop all round.

(*c*) In the Sadar subdivision I fear that the estimate of a 10-to 12-anna crop, as given by me in my last report, is too sanguine. Perhaps it would be safer to estimate only 10 annas.

(*d*) The poppy crop has, I regret to say, suffered considerably from blight; but, even allowing for heavy loss on this account, the crop will, if nothing further goes wrong with it, be a good one. Blight does not appear to have much injured the other *rabi* crops.

(*e*) My forecast as to the effect of the *rabi* crop on famine operations in this district is almost the same as that given in my last report.

6. SECTION 24 (2).—*Food-stocks.*—There seems to be no lack of grain anywhere, and private trade is everywhere active. Burma rice is obtainable in all large marts in the district, but the people say that they do not like it as much as the rice that they are accustomed to. This is probably due to their habitual dislike of anything new.

7. SECTION 24 (2).—*Importation and exportation of food-grains*—

(*a*) *Railway statistics.*—The import statistics show an advance from 80,961 to 82,194 maunds, while exports have decreased from 8,971 to 6,006 maunds. Imports were chiefly from Howrah, Bhaptiahi in Bhagalpur, and Forbesganj in Purnea. Exports were chiefly to Bhatpur in Gorackpur and Nawabganj in Gonda.

(*b*) *Revilganj statistics.*—Imports increased slightly, viz., from 8,643 to 8,799 maunds. These were chiefly from Bhagalpur. Exports declined from 1,708 to 1,359 maunds. These were chiefly to Azimgarh.

(c) *Sattarghat statistics.*—Imports increased from 2,716 to 3,412 maunds. These were chiefly from Nepaul, Muzaffarpur and Champaran. There were no exports.

(d) Mr. Chapman also reports that he has heard of large imports into the tracts along the Gandak in the Sadar subdivision from Muzaffarpur and Champaran.

8. SECTION 24 (2).—*Prices.*—There is a general tendency for prices to be easier, and this is, though I cannot account for it, most marked in the Gopalganj subdivision. The drop is general in respect of gram, makai and arhar. The price-list confirms the general impression that there is no lack of grain in the country.

9. SECTION 24 (2).—*Rainfall*—Nil.

10. SECTION 24 (2).—*Public health*—(a) Public health continues excellent.

(b) Form 10 shows that the monthly death-rate nowhere approaches 40 per mille.

(c) One death from starvation in village Mangalpur, in the east of the Gopalganj thana, was reported during the previous fortnight by Babu Girindro Nath Dutt, Superintendent of the Hathwa Raj. In mentioning this subject in my last report, I stated that several such cases had been reported by him, but I find that I was mistaken in so thinking owing to the imperfection of the language used by him. The single case so reported has been exhaustively enquired into by Mr Knyvett, District Superintendent of Police, and Mr. Twidell, the Subdivisional Officer. It is clear that the man in point did not so die, because he had undertaken shortly before his death a long walk of 10 miles on some not very important private business. It is manifest that the case was incorrectly reported in order to draw attention to the state of the village which is in acute distress. Relief on an extensive scale is now being undertaken in the neighbourhood, and would have been undertaken at an earlier date, had the extent of the distress been disclosed by the local officers.

11. SECTION 24 (2).—*Emigration or immigration of famished people*—Nil.

12. SECTION 24 (2)—*Condition of cattle*—Good.

13. SECTION 24 (3).—*Relief works.*—(a) There were 34 relief works open in the week ending the 27th ultimo, viz., 12 in the Sadar subdivisional charge, 11 in the Siwan subdivisional charge, 5 in the Gopalganj thana charge, and 6 in the east Meerganj charge. These were all Civil Agency works. Besides these, there were two Public Works Department works, connected with the clearance of silt from the Gandaki and Gongri Canals, both in the Gopalganj thana charge. I need not repeat the remarks which I made in my last report as to the unsatisfactory points about relief works in this district, but as time goes on, I become more and more convinced of the truth of what I have stated.

(b) 8,156 individuals, or a daily average of 1,141 male units, were paid by daily wages irrespective of task during the week ending the 27th ultimo. I do not consider the number excessive.

(c) 65,787 individuals, or a daily average of 7,599 male units, were paid for task work during the week ending the 27th ultimo.

(d) The corresponding figures for Public Works Department works were 9,385 individuals, or a daily average of 1,047 male units (wages paid irrespective of task), and 2,935, or a daily average of 484 male units (wages paid for task work). The Subdivisional Officer writes in reference to these figures:—"As regards the figures of these works, infinite difficulty is experienced in getting any at all, and those supplied are wroughly made up. I only submit them in Form 19. It is useless to make them out in other forms. The number employed 'irrespective of task' is absurd." Needless to say, I fully endorse these remarks. I fear that Mr. Green's staff is not up to the mark, and I will invite his attention to the fact. I have already asked the Subdivisional Officer to endeavour to procure correct figures.

(e) In the Sadar and East Meerganj charge there are still large numbers of D class people. The classification is evidently incorrect, and I am inviting the attention of the officers concerned to the fact. It is impossible to believe that so many weakly people are on the works.

(f) The average rate of wage per male unit for task work was on the average of the two weeks Re. 0-1-5 on Civil Agency works, and Re. 0-1-6 on Public Works Department works. The cost per 1,000 cubic feet was on the average of the two weeks Rs. 2-9-10 on Civil Agency works. The cost per 1,000 cubic feet, viz. Re. 0-15-3, as reported by the Public Works Department, is impossible, or else shows what I fear may be the case that only strong people are allowed on the works.

(g) The work done per male unit was on the average of the two weeks 34½ cubic feet, the figure for the last week being 38. The figure reported by the Public Works Department (108) is incredible, or else shows what I have suggested above may be the case.

(h) In Siwan it appears from a remark made by the Subdivisional Officer that persons who are paid under section 70 of the Code, viz.—Sunday wages, are still shown as workers paid by task instead of as workers paid irrespective of task in Forms 5, 7 and 19; hence the outturn per male unit, and the cost per

1,000 cubic feet, as per Famine Statement E, is higher in this subdivision than in any other. I will invite the attention of the Subdivisional Officer to the subject.

(*i*) The statement required by Government Circular No. 34 (Fam.), dated 11th February 1897, is herewith submitted. As I have stated at the bottom of the form, I will endeavour to have a more perspicuous return prepared in future.

(*j*) *Private relief works—Gopalganj subdivision, Hathwa Raj.*—Ten works were open during the week ending the 25th February, employing 24,497, or a daily average of 2,938 male units on task work, and of 1,240 such units on work done irrespective of task. The number of persons employed on work, irrespective of task, has almost doubled in the last week. I will enquire of the Manager how this has occurred. It is probably owing to large numbers being employed on baling out water from tanks after the water-level had been reached; but, inasmuch as Government has directed that task should be set for such work, this explanation is not satisfactory. The wages paid were Re. 0-1-9½ per male unit for task work and Re. 0-1-7 for work done irrespective of task. The average cost per 1,000 cubic feet was Rs. 3-4-11. The work done per male unit was 34 cubic feet.

Siwan subdivision.—The Subdivisional Officer reports that two private tanks are being excavated as relief works, but no statistics are furnished.

Sadar subdivision.—Mr. Chapman states that he has received no report as to whether Rai Tara Prosad Mukerjea Bahadur and Chainpur zamindar are continuing their private relief works.

14. SECTION 24 (4).—*Poor-houses.*—(*a*) There were two Government poor-houses, viz, at Siwan and Chapra, respectively. The daily average number relieved was 55 and 94, respectively. The average cost per adult unit was Re. 0-1 1 and Re. 0-1-2, respectively.

(*b*) The numbers have largely declined in the four Huthwa poor-houses, the daily average having been reduced from 507, as reported for the week ending the 13th February, to 454 in the week ending the 27th February. This is doubtless due to the cutting of the *rabi* crop, but I will make enquiries of the Manager. When last inspecting the Gopalgunj poor-house, I directed detailed enquiries into the case of inmates and gave orders that all villagers with fixed residences should be given gratuitous relief at their homes, the poor-house being chiefly for homeless people and professional beggars. The average cost per adult unit was 11 pies.

(*c*) No statistics have been received from the Manjha poor-house.

15. SECTION 24 (5).—The returns are meagre, but I am not distressed on that account. I shall be satisfied if I can succeed in making circle officers find out all deserving cases.

16. SECTION 24 (6).—(*a*) The daily average number of men, women and children in receipt of gratuitous relief during the week ending the 27th February was 3,050, 9,879 and 3,010, respectively, or a total of 15,939. The number of adult units was 101,038, the cost of each such unit being 8 pies.

(*b*) I am convinced that the number in receipt of this form of relief should be larger in certain parts of the district, and that the circle officers have hitherto failed to visit the villages sufficiently. Several cases have been brought to light of people becoming emaciated to almost the point of starvation without applying for gratuitous relief or having recourse to a relief work. The reasons why so many people are unable to go on relief works in this district have been frequently given, viz., that large numbers of men are absent in East Bengal, and that in numerous cases there is only one man left to look after the family and the crops. The disinclination to apply for gratuitous relief can be understood, and this is the chief difficulty which the circle officers have to combat.

17. SECTION 24 (7).—Nil.

18. SECTION 24 (8).—*Advances*—(*a*) A sum of Rs. 3,500 has been advanced during the two weeks under report under the Land Improvement Act (new rules). Local officers have been duly instructed to be careful about the security which they propose should be accepted up to date. I have retained in my own hands the actual passing of all applications and shall continue to do so until I find that local officers fully appreciate the necessity of careful scrutiny of property proposed to be pledged.

(*b*) I hope to see a large sum disbursed under the Agriculturists' Loans Act before long in the distressed area in East Gopalganj.

19. SECTION 24 (9).—The prescribed statement is appended.

20. SECTION 24 (10) AND (11).—*Nil.*

21. *Town Relief.*—(*a*) This is now being taken over by me as Collector, and in so doing, I am making use of the existing local committees. Sub-Committees of the Saran Branch of the Indian Famine Charitable Relief Fund Committee are working side by side with the Government organization in the towns.

(*b*) In Chapra, Sewan and Revilganj 930, 154 and 117 persons, respectively, are in receipt of relief.

22. (1) *Your Famine Circular No. 1 of 1897, paragraph 5.*—The Railway authorities have failed to furnish the requisite information.

(2) *Your Famine Circular No. 3 of 1897.*—The jail statistics furnished by the Civil Surgeon are herewith submitted.

23. *Meetings.*—(*a*) Sub-Committees of the Saran Branch of the Indian Famine Charitable Relief Fund Committee are, as indicated in paragraph 21 (*a*) above, already working in the towns of Chapra, Siwan and Revilganj.

(*b*) Thana Committees are being appointed for the mufassal, and lists of those proposed for the Sadar subdivision are almost ready for being placed before the Committee.

24. SECTION 27 (*iii*) *of the Code.*—(*a*) During the week ending the 27th February 25 tanks were being excavated, and the gross number of individuals employed thereon was 58,787.

(*b*) As indicated in paragraph 18 above, a sum of Rs. 3,500 has been advanced during the two weeks under report for the excavation of tanks and wells under the new rules of the Land Improvement Act.

25. The usual money-order statement is submitted.

26. *Your letter No. 290F.—G., dated the 7th February 1897.*—The total number on (1) relief works and (2) in receipt of gratuitous relief on the last day of the period under report was 16,328 and 15,939,* respectively.

* Strictly speaking this is not correct, as gratuitous reliefs are only returned for the average of the week, and not for the last day only.

* Detailed figures not shown in subdivisional returns. Steps will be taken to obtain this in future.

Column 11.—The figures shown in this column are less than those reported in my report for the period ending the 30th January 1897. This is due to the fact that in the Siwan subdivisional return for February 1897, a sum of Rs. 320 has been transferred from this column to column 10. The Subdivisional Officer has been called on to explain this.

FORM No. 11.

District Saran.

[See Section 27 (ii) of the Code.]

Monthly Famine Statement B for the four weeks ending Saturday evening, the 27th February 1897.

District.	Maximum number for whom employment on relief works is estimated to be required in case of serious famine.	Number for whom relief was provided in last programme of relief works.		Number for whom relief can be provided by works remaining on programmes on date of report.		Expenditure since 1st April 1896.			Advances since 1st April 1896, up to end of month under—		Revenue suspended
		On large works.	On small works.	On large works.	On small works.	Date up to which account is made up.	On relief works.	On gratuitous relief.	Land Improvement Loans Act.	Agriculturists' Loans Act.	
1*	2*	3*	4*	5*	6*	7	8	9	10	11	12
Saran ...	108,100, less 20 per cent. who will be on gratuitous relief = 75,600.	42,891	7,677	42,744	3,829	27th Feb. 1897.	Rs. A. P. 27,352 11 9	Rs. A. P. 17,431 5 2	Rs. A. P. 6,395 0 0	Rs. A. P. 31,643 0 0	Nil.

* Refers to affected area only.
N.B.—Figures in columns 3 and 5 do not include railways.

District Saran.

[See Section 24 (9), Famine Code.]

Financial Statement for the fortnight ending the 27th February 1897.

A.—Receipts.			B.—Expenditure.							C.—Balances of funds in hand under each head.			
Grants from District Board.	Grant from Provincial Government and date of sanction.	Private subscription.	(a) On relief works, clause (3), section 24.		(b) On relief in poor-houses, clause (4).	(c) On the relief of artisans, &c., clause (5).	(d) On relief by grain or money doles, clause (6).	(e) On relief in kitchens, clause (7).	(f) On any other kind of miscellaneous charitable relief.	Grants from District Board.	Grants from private revenue.	Private subscriptions.	Remarks.
			Sums paid on daily wages.	Sums paid for task work.									
1	2	3	4	5	6	7	8	9	10	11	12	13	14
(Balance of last month brought forward.) Rs. A. P. 21,197 0 0	Rs. 1,00,000	...	Rs. A. P. 1,450 5 11	Rs. A. P. 8,603 3 3	Rs. A. P. 61 10 7*	.....	Rs. A. P. 8,897 8 0	.....	.....	Rs. A. P. 2,135 2 9	Rs. 1,00,000	.....	Expenditure on establishment and miscellaneous contingencies not included in this statement. The balances are, therefore, not true balances. Orders are solicited.

* Chapra poor-house figures not furnished.

Statement showing rates of wages paid on relief works (including test works) and tasks exacted.

Sub-division.	Man.		Woman.		Big child.		Small child.		Adult units.		Grain on which wage is calculated under section 104 of the Famine Code.	Retail price of the grain in column 12 (number of seers per rupee).	Rate per 1,000 cubic feet of earthwork.	Remarks.
	Wage.	Task.	Wage.	Task.	Wage.	Task.	Wage.	Task.	Average wage.	Average task.				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	A. P.		A. P.		A. P.		A. P.		A. P.				Rs. A. P.	
Sadar ... Maximum ...	2 0	200	1 0	Not	1 0	Not	0 6	Not	..		Maka ...	10 seers 6 chittaks.	2 10 7	The form cannot be filled up, because in tanks, under the new system, gangs are set tasks, and not individuals. The maximum wage also varies from 2 annas to 1 anna, so that it is practically impossible to obtain an average wage.
Sadar ... Minimum ...	1 0	120	1 0	set	0 6	Set	0 3	Set						
Siwan ... Maximum ...	1 6	45	1 3	35	0 6	...	0 3		...	1 3	27 Marua ...	12 seers ...	3 0 9	For the tanks the task set is 216 cubic feet per kudali, and carriers are given indiscriminately according to lead and lift, i.e., one carrier for every 50 feet lead, and one for every 3 feet lift.
Siwan ... Minimum ...	0 9	...	0 9	...	0 6	...	0 3							
		Digging		Digging.										
Gopalganj Maximum ...	0 7	103	0 6	86	0 4	...	0 2	...	1 8	Digging and carrying, 43	Maka ..	10 seers 9 chittaks.	2 5 0	The task of carriers depends on their number and the lead and lift; no task apart from diggers is now set. This statement is approximate.
Gopalganj Minimum ...	0 5	...	0 5	...	...	...	...	...						

I submit the return for what it is worth. The figures are as they are submitted by the Subdivisional Officers. At different works different systems are in force. The Public Works Department system of individual tasks was just getting into working order when fresh orders came directing a return to gang tasks. I hope that future returns may be more perspicuous.

District Saran.

Bepin Behari Bose,
Manager, Raj Hatwa.

No. 582F., dated Motihari, the 7th February 1897.

From—D. J. MACPHERSON, Esq., Collector of Champaran,

To—The Commissioner of the Patna Division.

I HAVE the honour to submit my report, under section 24 of the Famine Code, for the second fortnight of February 1897. The figures dealt with relate to the weeks ending on Saturdays, the 20th and 27th of the month.

2. The delay in submission is, as you are aware, due to the visit of His Honour the Lieutenant-Governor to this district and my having accompanied him on to Darbhanga to attend a conference of officers on some famine relief questions. I was thus engaged from the 1st instant till yesterday morning (the 6th).

3. *Section 24 (1) (a).—Area affected.*—In my last two reports I gave the area estimated to be in distress as 1,620 square miles with a population of 972,000. There has been no material alteration in the state of things then prevailing, except that certain small tracts of country in Hardih, Bagaha and Dhaka thanas, aggregating 83 square miles, have now to be included in the area at present in need of relief I find, however, that all the estimates previously put forward of the area and population of the tracts in distress require to be increased, as the scale of the map (8 miles-1 inch) on which I worked them out was too small for accuracy. I have now re-calculated them, and beg to subjoin the result. A map of the affected areas is enclosed :—

THANA.	Area of thana.	Population of thana.	Area consisting of hill and jungle and the secure tract peopled by Tharus.	Bed of the river Gandak and the adjoining diara lands.	Other areas free from distress.	Area slightly affected.	Area at present in distress.	Estimated population of area slightly affected.	Estimated population of area at present in distress.
1	2	3	4	5	6	7	8	9	10
	Sq. miles.		Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.		
Bagaha	710	216,054	151	96	...	215	248	111,000	95,000
Hardih	766	209,724	240	...	50	104	372	70,000	124,000
Bettiah	537	334,087	.....	36	33	160	308	100,000	192,000
Gobindganj	272	179,040	.....	38	.....	.....	234	.....	171,000
Motihari	288	190,207	.....	.....	33	145	110	96,000	73,000
Kesaria	269	181,673	.....	26	21	39	184	27,000	125,000
Madhuban ..	129	109,542	.....	.....	...	9	120	9,000	100,000
Dhaka	336	269,719	.....	.....	15	56	266	45,000	213,000
Adapur	224	167,419	.....	.....	200	.....	24	.....	18,000
Total ...	3,531	1,859,465	391	195	352	728	1,865	458,000	1,110,000

4. The area thus estimated to be in present need of relief is 1,865 square miles with a population of 1,110,000. It should be borne in mind, however, that except as regards 83 square miles these figures no not represent any real extension of distress. These figures fall short by 19 per cent. in respect of area and 15 per cent. in respect of population of those estimated in my preliminary report of the 10th November as likely to be in distress by now; but the prospects of the *rabi* harvest are much better than was then anticipated, and a sufficient deduction was not then made for the area that may be said to carry no population. It will be seen from form 10 annexed that the number of persons in receipt of relief on the 27th February was 148,238 (namely, 110,905 on relief works and 37,333 in receipt of gratuitous relief). This amounts to 13·3 per cent. of the population estimated to be in actual distress at present If the slightly affected area be included, the percentage is reduced to 9·4. These figures should, I submit, be taken in supersession of those given in paragraph 59 of your report No. 491F.G., dated the 21st February. It is not likely that there will be any great increase in the figures before the end of April. On the contrary, a falling off is shortly expected with the harvesting of the spring crops.

5. *Section 24(1) (b).—Relief Circles.*—There has been no change in the relief charges during the fortnight. Maulvi Abdul Salek, Officiating Deputy Collector, who had been deputed by me to assist the Joint-Magistrate in Motihari thana, has been posted to judicial

work at Bettiah in place of Babu Akhay Kumar Chatterji, and Babu Bhawani Parshad, Sub-Deputy Collector, has taken his place in Motihari thana

6. There are altogether 78 circles, but 49 of these are simply the *dehats* of indigo-planters who look after them. Two of them, namely, the towns of Motihari and Bettiah, are looked after by Sub-Deputy Collectors, and three by the Sub-Registrars of Dhaka, Kessaria Bagaha, who should get some allowance for this. The remaining 24 are manned by paid officers on Rs. 50 with horse allowance of Rs. 25 each.

7. *Section 24(2) (a).—General state of the affected tracts. Crop prospects and rainfall.*—There has been no rain during the fortnight or since its close. Crop prospects are unchanged. Harvesting of the *rabi* crops, especially peas, has begun in places, and some people have in consequence left works. The sowing of indigo began during the second week of the fortnight.

8. *Section 24(2) (b).—Food-stocks and traffic in food-grains.*—Forms 8 and 9 annexed to this report show that during the fortnight ending on the 27th February 14,400 maunds of food-grain were imported by rail into the district, and 786 maunds exported, giving an average per week of 7,200 and 393 maunds respectively, against 7,175 and 839 maunds during the preceding fortnight. The imports thus show little change, but the exports have diminished. The imports were principally rice and paddy from Howrah. The exports were chiefly wheat to Saran.

9. I annex an abstract statement showing imports and exports of food-grain during the current year from 1st October to the end of February. It shows 62,355 maunds imported and 53,990 exported, leaving a balance of only 8,365 maunds in favour of imports. Importation has, however, been going on steadily, though in moderate quantities, of late, and the smallness of the balance referred to is due to heavy exportation earlier in the season. The corresponding figures for 1895-96 have not been compiled in time for this report.

10. I have not yet been informed of the result of the inquiry into the charge for freight at the rate of 8 annas instead of 6 annas per maund on the grain imported by Mr. Hill of Turkoulia, but I understand that the lower rate applies only to grain imported from Howrah, and not to that imported from Burdwan and nearer places. Unless there is a deficiency of food-grain in Central Bengal, I think it would be advisable for the railway to lower the rate also from there. It seems an anomaly that the charge should be the heavier for the shorter distance. A good deal of grain has been imported from Burdwan.

11. The mohajans seem to be moving in the matter of importation, and express their readiness to go on importing so long as rates admit of it. Burma rice is now penetrating right into the interior. The supply of maize must soon get exhausted, as this grain does not keep long. This may account for the exports of it that have come from Nepal. A good deal of grain, especially rice, still continues to be smuggled in from there. All officers report that there is no present apprehension of stocks getting depleted, now that the mahajans are moving.

12. *Section 24 (2) (c).—Prices.*—I annex a statement showing how the prices of the principal food-grains at Motihari and Bettiah have stood at the beginning, middle and end of the fortnight under report, and the average price of late years at this season is also given in it. At Bettiah there is very little alteration in prices, as was the case in the preceding fortnight also; but there has been some rise at Motihari, common rice having risen there from 9 seers 3 chitaks to 9 seers, and maize from 10 seers 11 chittaks to 10 seers 1 chitak per rupee. At Bettiah the price of rice has throughout been 9½ seers and of maize 10 seers.

Prices of *rahar*, wheat and gram have risen generally. The average price of rice at Motihari and Bettiah is now Rs. 4-5-2 per maund, against a normal price, for the last five years, of Rs. 2-7-5, or an increase of 75½ per cent That of maize is Rs. 4 per maund against Re. 1-11, or no less than 147 per cent. above the normal. The prices at Ramnagar and Bagaha for the week ending 27th February have not been reported, but those of the preceding week show a fall of from half a seer to a seer per rupee, as compared with the period dealt with in my last report. Nevertheless the price of common rice at Bagaha was still one seer dearer than at Bettiah, and at Ramnagar half a seer.

13. *Section 24 (2) (d).—Emigration and immigration of famished people.*—A number of people, mostly bearing a famished appearance, continue to come into the Bettiah subdivisions from the Gorakhpur district. About 40 per cent. of those relieved at the large Raj kitchen at Bettiah are from the North-Western Provinces. It is reported from the east of the district that some people are beginning to come in from Nepal in search of relief.

14. In connection with the subject of emigration of the people, I beg to enclose a statement showing the number and amount of money-orders paid in the district of Champaran month by month from November 1895 to January 1897. In November 1896 the number was larger by 52, but the amount smaller by Rs. 1,168 than in November 1895. In December 1896 the number of money-orders increased by 312 and their amount by Rs. 2,108 as compared with the corresponding period of the preceding year; while in January 1887 there was a very large increase as compared with January 1896; the number of money-orders have risen by 379, and the amount by no less than Rs. 15,611. In that month the average amount of each money-order paid in the district was Rs. 22. There is little doubt that the increase represents remittances for the support of their families by those who have emigrated elsewhere.

15. *Section 24 (2) (e).—Condition of cattle.*—The cattle continue in much the same condition as in ordinary years at this season, but scarcity of water for them is beginning to be felt in the south of the district where there are not many tanks.

16. *Section 24 (2) (f).—Pubic health.*—The following statement shows the mortality, thana by thana, for the month of January 1897 :—

Thana.	Mortality in January 1897.		Average mortality in January for preceding five years.	
	Number of deaths.	Death-rate per mille for the month.	Number of deaths.	Death-rate per mille for the month.
1	2	3	4	5
Bagaha	467	2 16	775	3 59
Hardi	598	2·85	867	4·13
Bettiah	807	2·78	933	3·00
Gobindganj	463	2 58	402	2·25
Motihari	482	2·70	490	2 79
Kessaria	345	1·88	444	2·42
Madhuban	258	2 35	279	2·55
Dhaka	411	1·52	497	1·84
Adapur	270	1·61	363	2·17
Total ...	4,101	2 37	5,050	2·72

The mortality was lower than the average of the last five years. This is largely due to a decrease in deaths from fevers; but there is also a decrease under all other heads except small-pox, 31 cases of which were reported against an average of about three only at this season. There were no cases of cholera. In thana Gobindganj there was an increase in mortality both from fevers and from all unspecified causes. Under the latter head there was an increase also in Bettiah and Madhuban thanas. In paragraph 12 of my report No. 246F., dated 4th February, I cited facts tending to show that the large mortality recorded under unspecified causes in thanas Gobindganj, Bettiah and Kessaria is due to the system of classification, and not to any real preponderance of such deaths over the rest of the district. As a matter of fact the number of deaths so classified in Gobindganj is only 14 more than in last year, and in Bettiah 32 more. In no part of the district did the January mortality approach anything like an annual rate of 40 per mille. One old woman was reported in February as having died from starvation, it being alleged at the same time that she had refused relief. The Charge Superintendent made a special inquiry, and found that it was probably merely a case of death from old age, as her son bore no signs of want of food, and there was no reason why anyone should die from this cause, relief being fully organized in the neighbourhood. I do not enter the death, therefore, as due to starvation.

17. The following statement shows the result of observations on prisoners admitted into the Motihari Jail during the fortnight, as compared with the corresponding period for 1896 :—

Health on admission.	Convicts.				Under-trial prisoners.			
	1897.		1896.		1897.		1896.	
	Number.	Percentage.	Number.	Percentage.	Number.	Percentage.	Number.	Percentage.
1	2	3	4	5	6	7	8	9
Good	3	42·8	17	89·5	12	32·4	16	69 5
Indifferent	4	57·2	2	10·5	21	56 8	7	30 5
Bad	.....	... ...	.	...	4	10 8	.....	. ...
Total	7	100·0	19	100·0	37	100·0	23	100·0
Above standard weight	5	71·4	12	63·2	9	24·3	8	34 8
Of ditto	.....	.....	4	21·0	2	5 4	1	4·4
Below ditto	2	28·6	3	15 8	26	70 3	14	60·8
Total as above	7	100·0	19	100·0	37	100·0	23	100·0

The percentage of those admitted in bad health was nine as compared with none last year, and of those under standard weight 63·6 as compared with 40·5. This shows an

improvement as compared with the preceding fortnight, when the percentages were 21·6 and 70·3 respectively.

18. On the whole, I have noticed some deterioration in general health, due apparently to the frequency with which the penal wage had to be enforced for failure to perform tasks. In one part of the district also, where this was most marked, the number admitted to one large work was limited much beyond the necessities of the case.

19. *Section 24 (2) (9).—Crime.*—The number of burglaries, thefts and the like reported during the second fortnight of February was 149, as compared with only 104 in the corresponding period of 1896, and 31 of the cases were thefts of food-grain, as compared with only 16.

20. Some officers have reported that there have been several cases of incendiarism, but the return I receive from the police showing these has not come to hand.

21. *Section 24 (3) (a).—Government relief works.*—Statements D (form 5) and E (form 7) enclosed give particulars of relief works open during the weeks ending on the 20th and 27th February. As requested in your Famine circular No. 10 of 1897, figures are given separately for civil agency and for Public Works Department works, totals including both being also given.

22. I take the opportunity also of submitting revised statements D and E for the preceding fortnight, as your letter No. 536F.G., dated the 24th February, and the figures given in your report No. 491F.G., dated 21st idem, to the address of Government, indicate that there were some discrepancies between the copies of these statements submitted to you and the copies preserved in this office, due to the great hurry in which the former were prepared. At the same time some mistakes have been found even in the latter, which are now corrected.

23. Adopting the form of statement given in paragraph 34 of your last half-monthly report to Government with a supplementary column of the cost per 1,000 cubic feet of work done, I give below the figures for the two weeks now under report, as well as the revised figures for those ending the 6th and 13th February:—

Week ending.	Number of works open at close of fortnight.	Daily outturn per male unit.	Cost per 1,000 cubic feet.	AVERAGE DAILY NUMBER OF MALE UNITS ON—			
				Task work.	Daily wages irrespective of task.	Gratuitous relief including dependants.	Total.
1	2	3	4	5	6	7	8
			Rs. A. P.				
23rd January	.....	14	5 14 8	74,977	1,216	4,504	80,697
30th ,, ...	61	15	4 14 9	74,264	1,746	4,730	80,740
6th February	.....	18	4 9 10	62,820	2,057	7,515	72,392
13th ,, ...	75	19	4 6 1	67,175	2,744	15,222	85,141
20th ,, ...	.....	22½	4 0 3	79,053	4,058	29,395	113,106
27th ,, ...	66	24	3 14 8	70,132	4,034	29,575	103,741

24. The number of works opened was reduced from 75 to 66, owing to the completion of some works and closing of one or two others on the labourers being drafted to major works in the vicinity. Of the works open, 51 were tanks, 11 roads, 2 pynes, and 2 embankments, and of these 12 were major works under the Public Works Department, namely, 4 tanks, 6 roads (one of them in two sections), and 1 embankment.

25. The statement given above shows a steady improvement in the outturn of work per male unit and the cost per 1,000 cubic feet. On civil agency works, with no less than 47 out of 54 of them, tanks with long leads and high lifts, the average outturn per male unit for the fortnight was 24 cubic feet and the cost per 1,000 cubic feet Rs. 3-15. On major works, with 4 out of 12 of them, tanks, the outturn was 19½ cubic feet and the cost Rs. 4-5-2. In accordance with your instructions, the persons paid for Sundays have now as far as possible been excluded in calculating the outturn per male unit, but Sunday payments are included in the cost per 1,000 cubic feet. The number employed on daily wages, irrespective of task, was 5·1 per cent. of the whole number of workers.

26. The scale of wages has remained the same as that given in paragraph 17 of my report No. 246F., dated the 4th February, and represents the grain equivalent of the ration at 9½ seers per rupee under section 104 of the Code.

27. *Section 24 (3) (b).—Relief works designed to assist the water-supply of the country.*—Of the 66 works open at the close of February, no less than 51 were tanks and 2 pynes, all designed to improve the water supply for irrigation and for cattle.

28. *Section 24 (3) (c).—Private Relief Works.*—I annex a statement showing relief work carried on by private agency, namely, the Bettiah Raj and Tetaria Factory. It shows a daily average of 1,519 male units employed during the last week of February. In the Tetaria Factory the works were tanks carried on by piece-work at a rate of Rs. 3-5-4 per 1,000 cubic feet. In the Bettiah Raj one work was a tank also carried on by piece-work at a cost of about Rs. 2-5 per 1,000 cubic feet. The other work was the construction of the poor-house at Bettiah by famine labour, and the cost of making the mud walls for it was very high.

29. *Section 24 (4).—Poor-houses.*—The following statement shows the numbers relieved at the Motihari poor-house during the two weeks covered by this report, and the cost incurred:—

Week ending.	Daily average.				Cost.	Daily cost per adult unit.
	Men.	Women.	Children.	Total.		
1	2	3	4	5	6	7
20th February	27	22	24	73	Rs. A. P. 35 12 7	A. P. 1 4
27th "	36	26	23	85	41 11 3	1 6

The cost per head is high, as special diet had to be given to those who were ill.

30. A poor-house has been open at Ramnagar throughout the fortnight, but returns for it have not been received.

31. The Bettiah Raj have continued to carry on a poor-house, or rather a large kitchen with voluntary shelter, at Bettiah, pending the completion of the Government poor-house. The latter has since been occupied. During the week ending 27th February a daily average of 650 persons were fed at a cost of about 10 pies per head. Details have not, however, been supplied.

32. *Section 24 (5).—Employment given at houses.*—It has not been found necessary to give special employment to weavers, artisans, &c. Cotton has been given out to *parwanashin* women to be spun into thread in return for gratuitous relief, but only one Charge Superintendent notices the subject in his report, and he gives no details of the numbers who are so employed. Including the cleaning of the cotton, he finds that a woman takes about 10 days to spin a seer of cotton into thread.

33. *Section 24 (6).—Gratuitous relief given in the shape of grain and money doles.*—Three statements in form 6 are annexed showing the gratuitous relief administered during each of the two weeks covered by this report, and during the fortnight as a whole. The number of persons relieved was 37,149 in the first week and 37,416 in the second, as against 19,146 at the close of the preceding fortnight. Of these, 28,629 and 28,269 were relieved under chapter V of the Code. The increase in the number receiving gratuitous relief is due to the completion of the system of village relief and the acuteness of the distress now felt. The number of adult units relieved was 29,395 and 29,575 in each of the two weeks dealt with, and the average dole for such 8 pies and 10½ pies respectively. Much progress has been made during the fortnight in removing from the list of dependants, and putting on village relief, all except the children of relief workers. The general system in force was described in my last report.

34. *Section 24 (7).—Kitchens.*—There were several kitchens open in the Hardi charge, but no detailed returns have been received of them. It appears from the gratuitous relief statement that 291 persons were receiving gratuitous relief at these during the last week of February. The institution carried on by the Bettiah Raj, described in paragraph 31 above, is rather a kitchen than a poor-house.

35. *Section 24 (8).—Loans.*—No loans were actually given out during the period under review, but a number of cases were under inquiry, and orders were passed under the Agriculturists' Loans Act in accordance with your circular No. 9, dated the 16th February, for the grant of Rs. 4,871-8 as loans to cultivating tenants who required assistance to enable them to till their lands and conserve and purchase seed for them.

36. *Section 24 (9).—Finance.*—I annex a statement showing the expenditure incurred during the period under report, and also a revised statement for the preceding fortnight, in view of the discrepancies pointed out in your letter No. 536F.G., dated the 24th February. The latter involves no change in the figure showing total expenditure. The expenditure during the fortnight under report amounted to Rs. 1,24,171-15-4, of which Rs. 1,02,653-4-6 was on relief works and Rs. 19,961-2-11 on gratuitous relief. The grants so far made have been exhausted.

37. Monthly statements A and B (forms 10 and 11) and the statement showing task work exacted are annexed.

Statement showing the prices of food-grains at Motihari and Bettiah for the fortnight ending 27th February 1897, the last day of the preceding fortnight, and the normal price of each.

Description of grains.	At Motihari.				At Bettiah.

FORM 11.

[See section 27(ii) of the Code.]

Monthly Famine Statement B for the four weeks ending Saturday evening, the 27th February 1897.

District.	Maximum number for whom employment on relief work is estimated to be required in case of serious famine.	Number for whom relief was provided in last programme of relief works. On large works.	On small works.	Number for whom relief can be provided by works remaining on programme on date of report. On large works.	On small works.	Expenditure since 1st April 1896. Date up to which account is made up.	On relief works.	On gratuitous relief.	Advances since 1st April 1896 up to end of month under report. Land Improvement Loans Act.	Agriculturist Loans Act.	Revenue suspended.
1	2	3	4	5	6	7	8	9	10	11	12
Champaran	210,000 for three months.	205,500 for three months.	87,700 for three months.	About 205 000 for three months.	About 83,000 for three months.	27th February 1897	Rs. A P. 3,52,393 2 6	Rs. A P 36,583 2 5	Rs A. P. 500 0 0	Rs. A. P. 28,442 12 0	Rs. Nil.

Columns 2 to 6.—These columns, both in this statement and in that for January, have been filled up strictly according to what is understood to be the instructions in Government Circular No. 173Famine, dated 28th January 1897. The figures in every case are reduced to terms of 90 days for purpose of comparison. The maximum number on relief works *at any one time* is not now expected to exceed 200,000.

The figures in columns 2 to 6 include 73 miles of the proposed railway from Bairagnia to Bagaha, which would give employment to about 14 120 persons for three months. But there are some 27 miles more, which do not appear to be entered on the programme, including the extension from Bettiah to Shikarpur, which would give employment to about 7,060 persons more for three months.

Columns 5 and 6.—The works so far undertaken have been mostly outside the programme. hence the large proportion still unexhausted.

Financial statement for the fortnight ending 27th February 1897.

A. Receipts from commencement o operations.	Amount.	B. Expenditure from public funds during the half-month under report.	Amount.	C. Balance of funds.	Amount.

DISTRICT CHAMPARAN.

Statement showing rates of wages paid on relief works, including test works and tasks exacted, for the fortnight ending 27th February 1897.

DISTRICT.	RATES OF DAILY WAGES AND TASKS.										Grain on which wage is calculated under section 104 of the Famine Code.	Retail price of the grain in column 12 (number of seers for a rupee).	Rate per 1,000 cubic feet of earth-work.	REMARKS.
	Man.		Woman.		Big child.		Small child.		Adult male unit.					
	Wage.	Task.	Wage.	Task.	Wage.	Task.	Wage.	Task.	Average wage.	Average task.				
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
	A. P.		A. P.		A. P.		A. P.		A. P.				Rs. A. P.	
Champaran—														
Maximum ...	2 0	An able-bodied B class man has to excavate 100 cubic feet in hard clay soil, 150 cubic feet in medium and 200 cubic feet in soft soil or sand. Average, say, 160 cubic feet.	1 3	.....	1 0	.....	0 6	.....	1 5½	23½ cubic feet dug and carried.	Maize and common rice.	10 seers ...	3 15 6	It is impossible to give particulars of the lead and lift, as there are 66 works in all. No less than 51 of these are tanks with long leads and lifts, and the average lead may be taken at 150 feet and lift at about 13 feet, and the cost of this on the wages adopted would be about Rs. 5-4 per 1,000 cubic feet. The average composition of the gang cannot be stated, as the number of gangs is not shown in the returns.
Minimum ...	1 6		1 3	.....	1 0	.....	0 6	.....				9½ ,, ...		

Columns 5, 7, and 9.—The task of these, and also of male carriers where not enough carriers without employing such, is to carry the quantity shown in column 8, the proportion of carriers to diggers being regulated as far as possible by the lead and lift.

DISTRICT CHAMPARAN.

D. J. Macpherson,

Collector.

No. 2061R., dated Muzaffarpur, the 3rd March 1897.

From—L. HARE, Esq., C.S., Collector of Muzaffarpur,

To—The Commissioner of the Patna Division.

I HAVE the honour to submit my half-monthly famine report for the second half of February 1897. The figures in the returns are for the week ending 20th and 27th February respectively.

2. *Section 24 (1) (a).—Area affected.*—No change.

3. *Section 24 (1) (b).—Circles.*—I am finding it very difficult to get suitable Circle Officers to fill up vacancies. I hope to be able to settle definitely with you and His Honour the Lieutenant-Governor to-morrow at Darbhanga, on the necessary measures to be taken to increase the charge and the circle staff.

4. *Section 24 (2) (a).—General state.*—Distress is increasing. The number on gratuitous relief has had to be largely increased.

The number relieved on the 13th February was 2,549, while on 27th February it was 10,913.

More works have had to be opened under civil agency to cover new areas, but the total number on these works has fallen off.

Three large works under the Public Works Department have been opened, but have not drawn much labour. On these the smaller tasks of the Public Works Department scale have been introduced, but on two of the works, the new rules as to forming large gangs jointly responsible for their task have led to men leaving the work. We must take it, I think, that this class are not yet urgently pressed, and it must be remembered too that *rabi* harvesting has begun.

5. *Section 24 (2) (b).—Crop prospects.*—In the Sadar and Hajipur *rabi* is very good. In Sitamarhi it is coming on well, but is backward. Tobacco is particularly good in Hajipur.

6. *Section 24 (2) (c).—Prices.*—At Muzaffarpur the price of rice and *rahar* has risen by half-a-seer, and that of *makai* and gram has fallen by a similar amount, while wheat and barley have been stationary.

In Hajipur there was a rise of half-a-seer in the case of rice and a fall of ½ and ¼ a seer in the case of gram and *rahar*, wheat and *makai* being stationary. In Sitamarhi there has been a rise in every case except gram which was stationary.

7. *Section 24 (2) (d).—Food stocks.*—Food stocks continue to hold out, and I have no complaints that grain cannot be purchased. The ready money payments for the grain distributed as doles will I hope lead to increased activity among the dealers.

8. *Section 24 (2) (e).—Imports, &c.*—The required statements are appended. They show 41,837 maunds imported and 2,560 maunds exported, giving a net import of 38,277 maunds, which shows a falling off. Importations have been principally from Howrah and down country.

I cannot still give comparative statement, as the figures for last year have not been received from the Railway Departments.

9. *Section 24 (2) (f).—Rainfall.*—There has been no rain in the period under report.

10. *Section 24 (2) (g).—Public Health.*—Public health continues exceptionally good. The required statements are appended.

11. *Section 24 (2) h.—Emigration.*—There has been no emigration or immigration of famished people.

12. *Section 24 (2) (i).—Cattle.*—The condition of the cattle continues good.

13. *Section 24 (3) (a).—Relief works.*—Notwithstanding the opening of three large works strictly under the conditions of Government Resolution No. 420M.P.I., Public Works Department, dated 25th January 1897, the total number of labourers on relief works has fallen off.

14. *Section 24 (3) (a).—Number of relief works open, &c.*—The following works were open at the close of the fortnight:—

UNDER CIVIL AGENCY.

Sadar Subdivision.

Sadar thana	...	17	
Katra „ ...	...	9	
		—	26

Sitamarhi Subdivision.

Sitamarhi thana	...	7	
Belsund „	...	4	
Shiuhar „	...	1	
Pupri „	...	3	
		—	15

Hajipur Subdivision.

Mahwa thana	...	2	
Lalganj „	...	2	
		—	4
	Total ...		45

15. The total number of workers on civil agency works for the district on the last day of the fortnight was 18,189, of whom 17,341 were paid by task work and 848 by daily wages.

The total numb r of workers on Public Works Department agency works on the same day was 2,129, of whom 1,991 were paid by task work and 138 by daily wages.

The gross number of workers on both kinds of works taken together on the last day of the fortnight thus amounted to Rs. 19,332 paid by task work, 986 by daily wages or Rs. 20,318 in all.

16. The total expenditure during the fortnight on civil agency work amounted to Rs. 17,796-15-4 on task work, and Rs. 1,560-15-9 on daily wages, or Rs. 19,357-15-1 in all, whilst the expenditure on the Public Works Department agency works was Rs. 593-9-6 on task work, Rs. 43 on daily wages or Rs. 636-9-6 in all.

17. Statements in Form 5 [section 26 (i)] and 7 [section 26 (iii)] for civil agency works and the Public Works Department agency works are given in the manner laid down in the Commissioner's Circular No. 10

The statement of maximum and minimum wages called for in Government circular No. 1F., dated 6th January 1897, is annexed.

18. *Section 24 (3) (b).—Private relief works.*—I append a statement of the numbers on the private relief works of the Maharaja of Darbhanga from 13th February to 27th February, inclusive. Compared with the previous fortnight, the number has largely increased.

19. *Section 24 (4) (a).—Poor houses.*—There has been no change in the number of poor-houses. The statement required is appended. The numbers are not large.

20. *Section 24 (4) (b).—Private poor-house.*—Figures for the private poor-house at Parihar under the Maharaja of Darbhanga are shown in a separate statement annexed.

21. *Section 24 (5).*—No special arrangements have been made for the relief of artisans.

22. *Section 24 (6).—Gratuitous relief.*—Grain doles are being distributed by the Circle Officers.

The number of recipients has largely increased having risen from 14,189 on 13th February to 48,272 on 27th February.

23. *Section 24 (7).—Kitchens.*—No public kitchens have been started. But in some cases relief has been given temporarily and as a test in the form of cooked food.

24. *Section 24 (8).—Loans.*—Rupees 920 were granted as loans for land improvements in the fortnight and Rs. 1,073 on agricultural loans.

25. *Section 24 (9).—Financial statement.*—I submit a financial statement so far as I have been able to complete it.

Prices of food-grains in the district of Muzaffarpur.

L. Hare,
Collector.

Muzaffarpur,
The March 1897.

No. G., dated Darbhanga, the 2nd March 1897.

From—R. W. CARLYLE, Esq., Collector of Darbhanga,

To—The Commissioner of the Patna Division.

I HAVE the honour to submit herewith my eighth half-monthly report for the weeks ending 20th and 27th February.

2. *Section 24 (1).*—(*a*) The area affected is 2,921 square miles. So far distress is most acute in Darbhanga, Beneputti, Madhubani, and Khajauli thanas, with an area of 1,319 square miles, but there are relief works, and gratuitous relief is being distributed in Phulparas, Bahra, Rosra, and Warisnagar. There is also some distress in a portion of the Samastipore thana (296 square miles) not included in the above.

3. (*b*) There is very little change in the proportion of the population affected. The numbers on work fluctuate considerably, and there has been no steady increase as I expected in the number on relief works. There have unavoidably been various slight changes in system, and each time there is a change the number of workers falls off greatly for a few days, as labourers follow the mates, and other local men, such as *hazri navis*, like sheep. Of course every new check on work done is opposed by the mates, &c, as it diminishes their chance of illicit gain. I regret my figures are very incomplete, as I have not got most of the Public Works daily returns from Beneputti. All arrangements have now been made, which will secure my getting returns from Public Works in time in future. It was unavoidable that there should be some confusion in the process of taking over charge, and the form of post-card has had to be slightly altered to enable the Public Works Department subordinates to prepare weekly abstracts, giving me the information required for Form D. The figures I have received give a total of 8,244 on relief works on Saturday, the 27th.

4. (*c*) There are 65 relief circles, with 65 officers in charge.

5. *Section 24 (2).*—(*a*) There has been very little change as compared with the previous half-month. The harvesting of the *rabi* has commenced, and though it has not greatly reduced the numbers, it has prevented any increase. There has also been a good deal of work done in preparing the early rice land.

6. (*b*) The rainfall of the previous half-month, though it nowhere much exceeded four-tenths, and was generally about two-tenths, had a wonderful effect in improving the barley and wheat crops, &c., while at the same time it was too light to do any harm to the *rahar* or *mustard*. The result is that my estimates for the *rabi* in last report were probably too low; and allowing for the reduced area under cultivation in some parts of the district, I would now estimate the *rabi* at about 6 annas in Madhubani, 12 annas in Darbhanga, and from 16 to 20 annas in Samastipore subdivision.

7. (*c*) I have nothing to add to previous reports, except that there appears to be little doubt my estimate of the food-stocks, as equal to three months' supply before the *bhadoi* was cut was not excessive.

8. (*d*) I send along with this report statistics of the export and import of food-grains by rail. The imports (36,965 maunds, excluding all traffic within the district) exceeded the exports by maunds 26,826-5.

9. (*e*) Public health continued good. The death-rate for January was only 1·6 per cent., as compared with an average of 2·3 in January of the five previous years. The death-rate in the various thanas appears to have no connection with the amount of scarcity prevailing in them. The admission into jail, though showing some deterioration among the lowest classes in January 1897, as compared with 1896 (28·6 per cent. adult in bad or indifferent health against 20 in 1896), but compare favourably with previous months.

10. (*f*) There has been no emigration or immigration of starving people.

11. (*g*) The condition of cattle is fair.

12. *Section 24 (3)*—(*a*) I give in the appendix figures showing the number of relief-workers, &c. I regret that these figures are incomplete, as I have not got the Public Works returns.

13. (*b*) The number on Saturday last 27th February 1897) was 35,436 men, 35,680 women, 11,255 children. This does not, however, include a large number of P. W. works in the Madhubani subdivision, from which the daily post-cards have not been received.

14. (*c*) I give figures supplied me by the courtesy of the Manager of the Darbhanga Raj, showing the number on relief works or gratuitously relieved for the weeks ending 6th, 13th, 20th, and 27th February 1897 There were 21,990 on relief works on the 27th February, while 10,518 persons were receiving gratuitous relief that week. These numbers are not included in my statement.

15. *Section 24(4)* —(*a*) Poor-houses are open at Darbhanga, Warisnagar, Madhubani, and Khajauli. They will soon be open at the head-quarters of all Charge Superintendents. Though they have very few inmates, they are required, as the fact of their existence has an excellent effect in enabling officers to deal with malingerers. The scale of food is that prescribed by the Famine Code.

16. *Section 24 5).*— *a*) The Circle Officers have now been instructed in all charges to endeavour as far as possible to get work from those relieved. Cotton is being distributed in most circles for spinning, and Mr. Blackwood is having the cotton spun made into cloth. In some cases also baskets are being made. I find that in some cases there are very few spindles, so I have authorized the Circle Officers, when I found this to be the case, to have spindles made. I cannot yet give figures showing the number employed.

17. *Section 24 (6).*—(*a*) Grain doles are generally distributed by the Circle Officers at fixed places once a week. In some cases it is distributed more than once a week, but I am going to stop this, as I find it leads to great confusion in the returns. In other cases money doles are given generally once a week. I am inclined to think money doles are on the whole best. It is easier to distribute money than grain, and it is less liable to abuse.

18. (*b*) Fifty-six thousand one hundred and twenty-nine persons were receiving gratuitous relief on the 27th February. The number will permit of some reduction when more works are opened in Bahra, Madhubani, and Phulparas thanas.

19. (*c*) I spent ten days lately in examining, in as many villages as possible, how gratuitous relief is distributed in Bahra. I did not find any case in which I could strike those receiving gratuitous relief off the list, till works are opened within a reasonable distance of their homes. I gave orders that as soon as works are opened within three miles, all able to work should be struck off the list (of course there may have been some cases in which relations could have helped.)

20. *Section 24 (7).*—There are no public kitchens. The Raj has opened some, regarding which I will try to get information for my next report.

21. *Section (24) (8).*—No loans have yet been given. In some cases enquiries are nearly complete.

22. I submit the usual statements along with a map.

23. I annex two tables, showing the number of persons employed on tank works.

P.S.—Since writing the above, I have visited the north-east of the district, and find that a very large number of small tanks are being excavated by private parties (exclusive of the Raj) at their own expense. From reports I have received from various parts of the district, I believe over 20,000 labourers and possibly over 30,000 are at present working on these tanks. I am issuing orders to all Circle Officers to report at once the number of tanks now being dug in their circles.

R. W. C.

R. W. CARLYLE,
Collector.

No. 116G.—S.R., dated Calcutta, the 10th March 1897.

From—E. V. WESTMACOTT, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Revenue Department.

UNDER sections 13 and 24 of the Famine Code, I have the honour to submit herewith my report for the half-month ending 28th February 1897, together with the skeleton maps showing the areas already affected and likely to be affected by scarcity in the districts of Nadia, Jessore, and Khulna, and the statements prescribed by the Code.

The report from the district of Nadia was not received by me till the 6th March, a close holiday, which accounts for the delay in the submission of my report.

2. *24-Parganas.*—The position of this district remains unchanged since the date of my last report. There is no reason to believe that there is any need for relief in any part of the district.

3. *Nadia.—Section 24 (1) of the Code.*—There has been no change in the area or in the estimate of the portion of the population affected. The number of relief circles has increased from four to five owing to the constitution of a new circle at Nakashipara, and a new circle officer has been appointed.

4. *Section 24 (2) of the Code.*—Owing to the harvesting of the *rabi* crops, there has been a slight temporary improvement in the condition of the affected tracts. The prospects of the crops are said to have somewhat improved on account of the rain which fell on the 16th, 17th, and 18th February. We shall watch carefully how the preparation of the land for the next *aus* crop proceeds, as upon it the attitude of the mahajans will depend. I believe that if they have reason to expect a good *aus* harvest, they will be ready to issue loans to the cultivators, as usual, and I hope that they will not be deterred by any anticipation that Government will by granting loan take the business out of their hands. It is noticed that rice is still being imported into the affected areas in considerable quantities from the *Rarh*. Public health and condition of cattle continue good.

5. *Section 24 (3) of the Code.*—There are at present 14 relief works open in the affected tracts, namely, 8 under the Public Works Department and 6 under civil officers. The average number of male units per diem on task work increased from 8,707·6 in the previous fortnight to 9,657·8 in the fortnight under report, and the number paid by daily wages from 35·3 to 289·9. The cost per thousand cubic feet for the week ending 27th February 1897 has decreased from Rs. 4-14-9 to Rs. 3-3-3. It is reported that no relief work has been opened under private agency, but the loans taken by private individuals under the Land Improvement Loans Act for tank work will employ a number of labourers.

6. *Section 24 (4) and (7) of the Code.*—No poor-houses or kitchens have yet been opened, nor is there at present any indication that they will be necessary.

7. *Section 24 (5) of the Code.*—As previously reported, thread is being distributed to a few families of weavers: women are required to twist three and-a-half seers of jute into string in return for doles of grain granted to them under section 44 of the Code. I notice that Mr. Garrett has given up the idea of issuing paddy to women for husking in their homes, as he has been unable to devise any satisfactory means of distributing the paddy and collecting the rice. The number of persons receiving gratuitous relief has increased from 3,851 to 5,669, and the cost from Rs. 1,327-10-3 to Rs. 2,352-8-0.

8. *Section 24 (6) of the Code.*—In the matter of organization for the distribution of grain doles or money doles, there is nothing new to remark.

9. *Section 24 (8) of the Code.*—The total amount actually advanced by the Collector under the Land Improvement Loans Act during the period under report was Rs. 2,700 among 15 applicants, but he sanctioned Rs. 30,411 as loans to 84 applicants. No advances under the Agriculturists' Loans Act were actually made during the period, although it appears that the Collector has granted Rs. 550 for the purpose among 27 applicants.

10. *Section 24 (9) of the Code.*—In the financial statement the receipts are shown at Rs. 25,951-10-10½, while the expenditure during the half-month was Rs. 9,255-12-3, leaving a balance of Rs. 16,695-14-7½. In this statement the expenditure on gratuitous relief is shown at Rs. 2,377-10-9, while in column 11 of famine statement E it is shown at Rs. 2,278-0-5, and in Form No. 6 at Rs. 2,352-8-0. The Collector has been directed to explain the discrepancies.

11. *Section 24 (10) of the Code.*—The Collector reports that the information required under this head as to the economic condition of the affected tracts has already been given in his previous reports. In connection with his present report I have pointed out to the Collector that of the nine thanas mentioned in paragraph 1 of his letter No. 2619G., dated the 3rd February 1897, such information has been furnished only for thanas Kaliganj, Nakashipara, Tehatta, Daulatpur, and Karimpur, and that the particulars regarding the other thanas should be given in his next report.

12. *Sections 26 and 27 of the Code.*—Columns 3 and 5 of the monthly famine statement A should show figures in thousands, and not the actual figures as returned. This has been pointed out to the Collector, and the necessary corrections made in this office.

13. I annex a copy of Mr. Garrett's report, No. 2943G., dated the 5th March 1897, and do not think it necessary to repeat what it contains.

14. With regard to paragraph 4 of his letter, I agree with Mr. Garrett in thinking that a strict adherence to the rules and orders of Government (Public Works Department), contained in No. 420M.—P.I., dated the 25th January 1897, is not necessary under the present circumstances. With regard to the difficulty which the Collector represents as arising from his being appointed as disbursing officer for the works under the Public Works Department, I have already reported to Government. It would be well if the District Engineer, who has been placed in charge of famine relief works under the Public Works Department, were made the disbursing officer, but it has been held that he cannot be, as he is not a Government servant. The difficulty is not so great when the Collector is at his head-quarters, but when he is on tour it is the source of great delay in keeping officers supplied with cash.

15. Regarding the question of the examination of the district accounts a reference has been already made to Government, but no orders have yet been received.

16. Mr. Garrett has been working most energetically, and I think that everything is now arranged to meet any increase in distress. The strength of the district staff is, however, strained to the utmost, and much necessary work is being postponed.

17. *Murshidabad.*—A report under section 10 of the Famine Code regarding the scarcity prevailing in portions of the district has been submitted to Government with my No. 113G.—S.R., dated the 4th March 1897, and I believe that it is unnecessary for me to repeat the information here. My next half-monthly report will include statements for this district.

18. *Jessore—Section 14 (1) of the Code.*—There has been no improvement in the general condition of the affected tract in thana Muhammadpur, in which there has been scarcely any rain, but the condition of the tract in thana Bongaon, for which anxiety was felt, has materially improved owing to the recent rainfall. The prices of common rice show a tendency to fall. Food-stocks are being supplemented by importation from the 24-Parganas, the Sunderbans, and the Eastern districts. Importation of Burma rice into Calcutta has stopped export from the district. Public health and the condition of cattle continue fair, with a few cases of cholera and cattle-pox here and there.

19. *Section 14 (2) and (3) of the Code.*—A test work, the excavation of a tank opened in the affected tract, attracted no labourers, although the rate of wages offered was two annas per diem. Rs. 315-8-9 were spent on gratuitous relief under sections 12 and 42 of the Famine Code among 712 persons. The rate at which relief was given has not been stated. The Collector's attention has been drawn to the orders of Government on the subject conveyed in No. 608, dated the 1st March 1897. It appears that no system of paddy husking has yet been properly organized in the district. It has been pointed out to the Collector that if the system is organized, the rate of remuneration given in the District of Rajshahi should be enforced. I do not see indications of any urgent need

of relief at present. The amounts which are being remitted to their homes by money orders by labourers who have gone in search of work must materially prevent distress.

20. *Section 14 (4) of the Code.*—In Magura 19 new applications covering Rs. 7,700 were received by the Collector under the Land Improvement Loans Act during the period under report. In Bongaon the number of such applications was three only. The amount covered by them is not stated. No new application for loans under the Agriculturists' Loans Act was received during the period either in Magura or Bongaon. Local mahajans are said to have commenced to grant loans, which is satisfactory. I believe that they will do so as usual if the prospects of the *aus* harvest appear satisfactory. The Collector has submitted only one copy of the skeleton map with his report. He has been directed to send another copy. I annex a copy of Mr. Hamilton's report, No. 3275G., dated the 2nd March 1897.

21. *Khulna.*—I annex a copy of Mr. Vincent's report, No. $\frac{147}{2035}$ G., dated the 2nd March 1897.

Section 24 (1) of the Code.—The area and the approximate estimate of the portion of the population affected by scarcity, as well as the number of relief circles and officers in charge, remain unchanged. The area affected is expected to increase during the next month. A circle officer has been appointed in the place of the man who resigned.

22. *Section 24 (2) of the Code.*—It is reported that the general condition of the affected area has deteriorated. The numbers on gratuitous relief have increased from 311 to 1,949. Widows and orphans show signs of emaciation. High caste people who do not own land are said to be suffering, and doubtless feel the pressure of high prices, but the failure of crops cannot have affected their incomes, which I believe are generally derived from relatives who are employed as clerks. Two deaths from starvation are reported. The Collector has been directed to report without delay the result of the enquiries which are being made into these cases. With regard to the one case of a girl noticed in Government No. 200Agri. (Fam.), dated the 27th January 1897, the Collector has since reported that the girl died from the effects of eating crabs, an indigestible kind of food which she had eaten on account of insufficient rice. There has been slight rain during the period. No attempt is being made by private landholders to repair the *kheris* and *bunds*, and the gantidars under them, who are really equally responsible, are doing little. The Collector reports that they would do more, if he had more money for granting loans under the Land Improvement Loans Act, but I do not understand this, and have asked for a statement showing what has been already granted in loans. I think that there is some mistake about it, and shall certainly take care that money is not stinted for the very necessary work of repairing embankments. In the estimate of expenditure on relief works approved by Government, Rs. 50,000 have been allotted for this district for each of the years 1896-97 and 1897-98 on account of advances for village works under the modified rules of the Land Improvement Loans Act. The Board of Revenue have sanctioned Rs. 10,000 for the present out of this allotment, and the orders have been communicated to the Collector with this office No. 102G.—S.R. of the 2nd March 1897. The stock of grain in the district is reported to be sufficient. The price varies, being higher in places to which grain cannot be imported in boats than in those to which there is access by water. There is said to be more export from the district than import. Public health is fair. Some cases of cholera are reported from Kaliganj. People are emigrating from the affected areas to the eastern part of the district. The condition of cattle is fair, but poorer cultivators are reported to have sold them in large numbers to *beparies* from Calcutta.

23. *Section 24 (3) of the Code.*—Four relief works are now open under the Collector, the number of workers on the last day of the half-month being 583. The task exacted is that reported by Mr. Bell in his last fortnightly report. It has already been pointed out, as directed by Government, Public Works Department, to the Collector that Mr. Glass' tables must be adopted, and that no alteration need be made in them. The changes made in the classification of labourers from A, B, C, and D to B and D only may be allowed with reference to the rules of the Public Works Department, but it seems useless to make any

change in the classification of children. The Collector says that children under seven years of age are exempted from work, thus swelling the names on the list of gratuitous relief, although their parents want their help as carriers. The Collector's attention has been drawn to section 62, clause 5 of the Code, from which he will see that small children of eight years of age and under may be allowed to help in the work by carrying clods of earth on their head, and may be counted in the muster roll and receive a small wage. A holiday is given not on Sunday, but on a hât day, for the sake of convenience. This is against the provisions of section 70 of the Code, and the Collector's attention has been drawn to it. No relief works under private agency have yet been opened. The present number of relief works are said to be inadequate, and arrangements are being made to open four more works immediately. The Collector has been directed to report whether the cutting of the Asasuni khal is being carried on as a relief work to the extent of Rs. 1,000, as sanctioned by Government.

24. *Section 24 (4) and (7) of the Code.*—No poor-houses or kitchens have been opened yet. The Collector expects to open two poor-houses during the current month as a test for those who apply for gratuitous relief.

25. *Section 24 (5) of the Code.*—Besides paddy husking and jute twisting, some experiments in weaving were made, and the result seems to be promising for the future. As to paddy husking, the Collector's attention has been drawn to the orders of Government, contained in paragraph 5 of letter No. 608, dated the 1st March 1897, and he has been directed to report whether the rate of remuneration in force in Rajshahi, viz. $2\frac{2}{3}$ seers of rice per maund of paddy, besides bran and husk, will not be sufficient.

26. *Section 24 (b) of the Code.*—Grain doles are distributed once a week at one centre for each circle. This having been found insufficient, an additional centre has been selected in each circle. The number of adult units on the list of gratuitous relief is 1,653, including 211, who husk paddy or twist jute. As the work which these 211 persons do is not gratuitous, their names should, I think, be removed from the list and shown separately as workers under Chapter X, "Other measures."

27. *Section 24 (8) of the Code.*—Six applications covering Rs. 1,900 have been sanctioned during the fortnight under the Land Improvement Loans Act, out of Rs. 37,200 allotted to the district for the purpose. The total amount advanced under the said Act in the affected area is Rs. 19,890. No advances were made during the period under the Agriculturists' Loans Act.

28. *Section 24 (9) and (10) and (11) of the Code* —Detailed information is given. No remarks appear necessary.

29. *Section 26 (i to v) of the Code.*—From the statement of gratuitous relief, Form 6, it appears that money doles are given in almost all circles, which I think objectionable, especially when grain contractors have been appointed for each circle. The Collector's attention has been drawn to section 43(A) of the Code, which points out that grain doles are more advisable than money, and that money doles should only be given under very exceptional circumstances.

30. *Section 27 (i and ii) of the Code.*—In monthly famine statement A, one death is noted as being due to starvation, while the report notes two. The cause of death in one case is said to be doubtful. The Collector has been directed to report accurately as to these deaths. In statements A and B, the numbers of relief works and the expenditure shown therein do not include works under the Public Works Department. The Collector's attention has been drawn with a view to the omission being supplied in the statements to be submitted with the next report.

31. The Collector has been directed to explain how Rs. 14,021-14 $1\frac{1}{2}$ have been shown in the financial statement No. VIII as grant from Government on account of expenditure on famine relief, while no grant from provincial revenues appears to have been yet sanctioned.

No. 2943G., dated Krishnagar, the 5th March 1897.

From—J. H. E. GARRETT, Esq., Offg. Collector of Nadia,
To—The Commissioner of the Presidency Division.

I HAVE the honour to submit herewith my report under section 24 of the Famine Code for the latter half of February. The figures given in the statements attached to this report refer to the weeks ending on the 20th and 27th February.

2. About a month ago I issued detailed instructions for the preparation of the statements: had these instructions been carried out carefully the statements should have reached me in camp on the morning of the 2nd instant, and my report could have been submitted to you on the 3rd. Owing, however, to many mistakes having been made by various officers in the district, I only received a few of the statements on the afternoon of the 3rd instant. I found that even these were incorrect. So I was compelled to return to Krishnagar on the morning of the 4th to attend personally to them. On checking the revised returns this morning I found further numerous mistakes which took some time to rectify. In consequence of this I was not able to commence my report (which is of course based upon the statements) until this afternoon. I much regret the delay which has occurred, but I considered it better that there should be two or three days' delay than that I should submit on the due date a report based upon incorrectly prepared statements. I am issuing further instructions in the hope of avoiding delay in the future.

3. During the period under report I visited all the relief works and inspected the work of both Superintendents and all the circle officers, except the circle officer of Nakashipara, who joined his post after I had left that part of the district. The system of gratuitous relief is now in full swing, doles of grain being granted both to those who are incapable of work and to women who either have no male relatives to support them or whose male relatives are relief workers: the women are required to twist 3½ seers of jute into strings in return for the doles of grain granted to them. I am unable as yet to report the financial results, as my enquiries as to the most profitable method of disposing of the string are not completed. I have been compelled to give up the idea of issuing paddy to women for husking in their houses, as I have been unable to devise any satisfactory means of distributing the paddy and collecting the rice, a fair task for a week for one woman being 3½ maunds of paddy. Gratuitous relief is afforded entirely by doles of clean rice, which are distributed once a week by the circle officers. I have appointed contractors in each circle for the supply of grain and have arranged to pay them at the market rate, they bearing the cost of the carriage of the grain to the centres from which it is distributed: the contractors are required to produce at the fixed centres a quantity of grain somewhat in excess of the probable requirements: the circle officers then distribute to the recipients, and the contractors take away the balance, receiving payment for the amount actually distributed. Under this system it is not necessary for circle officers to keep any stock, and they are thus relieved of the difficulty of storing and accounting for grain. I may add here that the contractors employed are local grain-merchants.

4. In connection with the relief works, I beg to bring to your notice that there are several points in the Government orders on the subject, a strict adherence to which I do not consider necessary or advisable for this district under present circumstances. In the first place, the relief workers on every work return to their homes at night, and there are consequently no camps. One result of this is that it is very difficult to keep the gangs constant, especially as the workers are not all very regular in attendance. Under the circumstances, I am of opinion that the size of the gangs should be reduced, and that they should not, as a rule, contain more than 30 or at the outside 40 persons. The people themselves work much more willingly in smaller gangs, and very little extra work is entailed on the staff. For the same reason (viz., that there are no camps) I have not considered it necessary to take any steps towards the construction of hospitals or making arrangements for the disposal of corpses: any relief worker who is taken ill either remains at his home or else is taken there from the works by his friends and relatives. The arrangements prescribed for payment of wages are being carried out, and I have ordered that payment be made daily on the works. I beg, however, to point out that so long as I remain the disbursing officer for the works under the Public Works Department, it will be extremely difficult to ensure that officers in charge of works shall not run out of funds, while at the same time preventing the cash balances in their hands from becoming excessive.

5. The accounts of the expenditure made up to date have not yet been satisfactorily adjusted. The matter is receiving my careful attention, but I fear that I shall be compelled to ask for the temporary services of a skilled accountant from the office of the Accountant-General, Bengal, to assist my office in carrying out the orders on the subject. In this connection I would suggest that it is desirable to appoint an auditor of famine accounts, who shall go about from district to district in the same manner as is now being done by the Deputy Collector, who is examining into the tauzi accounts.

6. I now proceed to report on the points mentioned in section 24 of the Code:—

(1) There has been no change in the area affected since the submission of my last report. Recently, however, I received a somewhat alarming account of the state of affairs near Jibannagar from a gentleman who had been touring in the neighbourhood. I am inclined to think that the account is exaggerated, but I have sent out the Joint-Magistrate to make careful enquiries, pending the result of which I still retain that portion of the district as unaffected. I think that something ought to be done to help chaukidars whose pay is less

than Rs. 4 per month, as it is impossible for them to live on their pay with the price of rice what it is. I beg, therefore, for instructions as to the course which I should adopt in this matter. Since my last report the circle officer of Nakashipara has taken over charge of his post. There are now five circles, viz.. Barnia, Kaliganj, and Nakashipara under the Superintendent of Mirah, and Karimpur and Daulatpur under the Superintendent of Sikarpur. I may note here that owing to the constitution of the new circle at Nakashipara, I have found it necessary to revise the southern boundary of the Barnia circle ; I shall also remove the head-quarters of the Superintendent from Mirah, to Bikrampur, as the former place is no longer sufficiently central for him.

(2) There has been a slight amelioration in the condition of the affected tract during the period under report; this is due entirely to the harvesting of the *rabi* crop, which has on the one hand given work to labourers, and on the other brought in a small extra supply of food grains. The improvement is thus only temporary, and it must be followed by steady deterioration which will last at any rate until the prospects of the *aus* crop are assured. Grain, linseed, wheat, and arhar are being harvested; gram has certainly not yielded more than a three-anna crop even on the limited area on which it germinated; linseed is perhaps a little better; wheat is very poor; arhar fairly good. The prolonging of the land for the *aus* crop has commenced everywhere, but it has been much retarded in the heavier soils by lack of moisture. There was a little rain on the 16th, 17th, and 18th in the eastern and southern portions of the district. Late gram benefited by it to some extent; the prospects of the mulberry crop in Kaliganj thana were however very much improved. I have nothing special to report under the head of food-stocks which have not been much affected during the period under report. Rice and paddy are still being imported in considerable quantities from the Rarh, in which there must have been a very large surplus stock. The public health still continues fair, and strange to say, the death-rate in January in the affected tracts was very much lower than that in the non-affected tracts, which again is itself below the normal.

There was an outbreak of cholera in Nabadwip as the result of the last *méla* there, but fortunately it has not extended as much as I feared. I have received no reports as to the emigration or immigration of famished people. The Executive Engineer of Rajbari, Eastern Bengal State Railway, has furnished me with some figures, from which it appears that 3,311 men of this district from the marginally noted thanas are at present employed by him on earthwork in Faridpur. I have asked him to inform me what wages they are earning, and how long the work is likely to last: the four first-mentioned thanas are in the affected area, and the last five in the non-affected area. I think that the fact that so few men have gone from Kumarkhali thana, which is only a few miles from the work, may be taken as an indication of the comparative prosperity of its inhabitants. The condition of the cattle continues good, but the rapid drying up of the grass owing to the practically continous drought is a matter for some anxiety in those tracts where there is not an ample supply of paddy straw.

Naopara	...	1,407
Daulatpur	...	414
Ganguí	...	704
Karimpur	...	130
Kumarkhali	...	34
Kushtia	...	402
Chuadanga	...	32
Kotwali	...	31
Alamdanga	...	177
Total	...	3,311

(3) There are at present 14 relief works open in the affected tracts. They are asfollows:—

			Centres.
Public Works Department.	Mirah to Meherpur road	...	2
	Tehatta to Kutwa road	...	3
	Bhairamara to Karimpur road	...	3
Civil Agency ...	Daulatpur tank	...	1
	Meherpur to Gopalpur road	...	1
	Krishnagar to Meherpur road	...	1
	Gachha tank	...	1
	Mirah tank	...	1
	Gobindapur tank	...	1
	Total	...	14

The statements attached hereto will give all the requisite information as to the members attending, etc. I have ente ed the corresponding figures for the previous fortnight in italics for the purpose of easy comparison. Explanatory notes have also been recorded on the statements So it does not appear necessary to record any further remarks on the subject in the body of this report. No relief works have been opened under private agency.

(4) No poor-houses have yet been opened, nor is there yet any indication that they will be necessary.

(5) There has been no increase in the distress among artizans, as reported last week. The Superintendent at Mirah is advancing thread to a few families of weavers. I have already remarked on the organization for employing women in their own homes. Details will be found in the attached statements.

(6) I have nothing to add to previous remarks on this subject: so far as I can tell, this work is being carried out in as thorough and satisfactory a manner as possible, and with the least possible difficulties to the recipients of the relief.

(7) No kitchen have been established, and so far as I can tell at present we shall be able to do without them.

(8) Necessary figures under this head are given in the appended statements. We are being overwhelmed with applications for loans under the Agriculturists' Loans Act, and I see no prospect of our being able to enquire into them all within the time during which an advance of money will be of any use. I am doing my best to get the applicants from one village to submit a joint application for the total amount of the sums required by each, but I find it very difficult to get them to do so In previous reports I have described fully the system on which the advances are given.

(9) The necessary figures will be found in the appended statement.

(10) The information required under this head has already been furnished.

(11) I have nothing special to record under this head.

7. In accordance with the instructions given in section 27 (i), I beg to report that the numbers of deaths in the non-affected and affected areas during the month of January were 1,947 and 1,073 respectively; these figures give death-rates per mille per annum of 27·8 and 16 9 respectively; these rates are both low. No deaths from starvation were reported, nor do I believe that any occurred.

8. In accordance with section 27 (iii), I beg to report that the re-excavation of the Daulatpur tank is being carried out as a civil agency work. I have also started the re-excavation of the Government tank at Gachha (thana Nakashipara) as a test work, and I shall shortly undertake the re-excavation of the other Government tanks in the jurisdiction of the Superintendent of Mirah. I further propose to commence as soon as possible the excavation of the khal to connect the Mathabhanga and the Bhairab near Sikarpur, as this will be of immense benefit to the inhabitants of a large area in the Meherpur sub-division. The appended statement will show the amount of loans advanced under the Land Improvement Act: the whole of this sum is to be expended on the excavation or re-excavation of tanks or the sinking of wells.

9 I beg to attach herewith the statements and map prescribed by sections 26 and 27 of the Code.

FORM No. 10.

[See section 27 (i) of the Code.]

Monthly Famine Statement A for the four weeks ending Saturday evening, the 6th, 13th, 20th, and 27th February 1897.

FORM No 11.

[See section 27 (ii) of the Code.]

Monthly Famine Statement B for the first to fourth week ending Saturday evening, the 27th February 1897.

District.	Maximum number for whom employment on relief works is estimated to be required in case of serious famine.	Number for whom relief was provided in last programme of relief works		Number for whom relief can be provided by works remaining on programme on date of report.		Expenditure since November 1896.			Advances since 1st April 1896 up to end of month under—		Revenue suspended.
		On large works.	On small works	On large works.	On small	Date up to which account is made up.	On relief works.	On gratuitous relief.	Land Improvement Loans Act.	Agriculturists' Loans Act.	
1	2	3	4	5	6	7	8	9	10	11	12
Nadia ..	22,861·02	9,604·52	11,445·00	9,604 52	11,445·00	27th February 1897.	Rs A. P. 31,397 8 6	Rs. A. P. 5,786 3 6	In affected area Rs 2,400. In non-affected area Rs. 4,259.	Paid nothing	Nil.

N B.—None of the works entered in the last programme have yet been taken in hand. The present relief works are on roads and tanks which are not in the last programme. The four large works opened under the Public Works Department are capable of giving employment to 18,378 persons for 90 days more and the other additional works may together give sufficient employment to 1,315 persons for three months more. The works already entered in the last programme added to these additional works are considered quite sufficient for meeting the requirements of people of the distressed areas. The opening of the mouth of the rivers Bhyrab and Nabaganga, for which projects have lately been sanctioned by Government, are in the last programme.

Statement showing rates of wages paid on relief works (including test work) and tasks exacted.

Name of work.	Rates of daily wages and tasks.										Grain on which wages calculated under section 104 of the Famine Code.	Retail price of the grain in column 13 (number of seers for a rupee).	Rates per 1,000 cubic feet of earthwork.	Remarks.

4. Krishnagar to Meherpur, Civil Agency.	0 2 0	65	0 1 6	45	0 1 0	32·5	0 0 6	15	0 1 9·7	55·9	Ditto	9½ seers per rupee.	2 0 4	Ditto.
5. Daulatpur tank ...	0 2 3	40	0 1 6	26	0 1 3	20	0 0 9	12	0 2 8·2	32·9	Ditto	8½ seers per rupee.	5 1 6·4	Average lead 200 feet and average lift 20 feet.
6. Tank in thana Kaliganj.	0 2 0	60	0 1 6	45	0 1 0	30	0 0 6	15	0 2 4·3	51·2	Ditto	9½ seers per rupee.	2 14 1·2	Leads vary between 100 and 150 feet, and lift 15 feet. Soil good.

N.B.—On two of the Public Works Department roads, which are in Kalantor, more than two thousand of the workers are children, women, and D class men who do only nominal work, such as breaking clods and beating the road surface. The average rate of earthwork on these roads is therefore very high. Most of the able-bodied coolies have migrated to places where heavy earthwork is being done on the railway and private tanks, leaving behind their children and women and D class men who only come for employment on relief works. They are employed although they cannot do full task, as otherwise they need gratuitous relief. On Daulatpur tank the rate of wage of male unit and that of earthwork are high owing to payment during fortnight of arrear pay of establishment, and the rate of wage in case of tank works in Kaliganj thana has exceeded the maximum rate of wage owing to preparatory contingent expenses incurred in those works.

* Not paid pending check of list by Circle officer.

No. 3275G., dated Jessore, the 2nd March 1897.

From—F. S. HAMILTON, Esq., Collector of Jessore,
To—The Commissioner of the Presidency Division.

IN continuation of this office No 3098G., dated 18th February 1897, I have the honour to submit the following second half-monthly report for the half-month ending the 28th of February, under section 13 of the Famine Code.

1. (*a*) *General condition during the half-month of the tracts for which anxiety is felt.*—There has been no improvement in the general condition of the affected tract in thana Muhammadpur during the half-month under report. The means of subsistence of the people in this tract are gradually becoming more and more limited. The mahajans are still holding back and are advancing loans very sparingly. There were ·23 and ·11 inch of rainfall on the 16th and 18th respectively in Magura; but there was practically no rain in the affected tract. Only a few drops of rain fell in thana Muhammadpur, and hence there has been not only no improvement in the general condition, but there has been, I fear, some deterioration, as the resources of the people are gradually being exhausted.

I am, however, at the same time glad to be able to report that the condition of the tract in Bangaon thana, regarding which anxiety used to be felt, has materially improved. The rains last month have done much good. The manufacture of *goor* continues, and will do so during the whole of the next fortnight. The *rabi* crops have been harvested, but their outturn has been small. The late rains, however, have put heart into the people, and the ploughing for jute and *aus* crops is going on. The Subdivisional Officer reports that the mahajans are now advancing loans for the purchase of seeds, cattle, and ploughs. I am, however, afraid that this is an exaggerated view of the real state of things. While I am prepared to accept that the mahajans are advancing seed grains, and money for the purchase of the same, the improvement in the prospects has not been so great as would induce the mahajans to advance such large amounts as would be required for the purchase of ploughs and cattle.

(*b*) *Prospects of crops*—In Magura subdivision the *rabi* crops grown have nearly all been cut. Their average outturn has been about 6 annas, but, taking the Magura subdivision as a whole, the outturn would be only a fractional part of an anna. Only in Magura thana and in the southern part of Muhammadpur thana was some *rabi* cultivated. The people had entertained much hopes about the mango crop, but the prospects do not look very promising. The season of *khajur* juice is nearly over, and it will hold on till the middle of March at the most. The ploughing for *aus* and *aman* has begun.

In Bangaon the prospects have improved in so far as the ploughing for *aus* and jute crops has been facilitated by the rainfall, 1·5 inches last month.

(*c*) *Prices*—The prices of common rise show a tendency to fall. It is now being sold at 9½ to 11½ seers per rupee, as against 9 to 10 seers per rupee of the previous report.

(*d*) *Food-stock*—Food-stocks are being steadily supplemented by importations from the Sunderbans and the eastern districts. The importations of Burma rice into Calcutta have also stopped exports to an appreciable extent. The consequence is that the hâts and bazars are now well stocked and prices have gone down.

(*e*) *Importation and exportation of grains.*—The subjoined statement shows the quantities of food-grains and pulses imported into this district from outside districts, and exported from this district to outside districts during the half-month under report:—

	Imports.	Exports.
By railway and steamer ...	2,591	4,765
By country boats	12,660	2,009
	15,251	6,774

From the above statement, it would appear that importations are steadily going on in excess of exportation, and that about 8,500 maunds of food-grains and pulses were imported in excess from other districts. There is therefore no fear of depletion of food-stock so long this state of things continues.

(*f*) *Rainfall.*—The subjoined statement shows the rainfall recorded in the several subdivisions on the 16th, 17th, and the 18th February 1897. 0·34 inches represents all the rain that fell in Magura during the whole month of February. Of these, however, the affected tract in Muhammadpur received very little, as only a few drops of rain fell there. This has done no practical good to the affected tract. They have, however, done some good to the *china* crops at places where they have been grown. The state of Bangaon, however, is altogether difficult. Besides 0·25 inches, Bangaon received 1·32 inches of rain during the month of February. The total rainfall in February in Bangaon comes to 1·57. The tract on the west of Bangaon thana, regarding which anxiety was felt, received much of this rain, and consequently there has been a material improvement in the prospects. Mahajans have also been emboldened to advance loans for seed-grains.

	Sadar.	Bangaon.	Jhenida.	Magura.	Narail.
16th ...	0·38	0 22	0·33	0·23	0·35
17th ...	0 02	0 03	...	...	0 01
18th ...		...	...	0·11	
	0·40	0 25	0·33	0·34	0·36

(*g*) *Public health.*—Public health continues to be generally fair, with a few sporadic cases of cholera here and there. Scarcity of water is, however, being felt at some places Money is, however, being paid for sinking wells wherever scarcity of water is keenly felt.

(*h*) *Emigration and immigration* of famished people is not reported. The Subdivisional Officer of Magura reports that "emigration of able-bodied cultivators and labourers continues from the subdivisions in search of employment elsewhere. Large batches of labourers also are passing daily through the subdivision from the Nadia district in search of employment. Some of them are employed in this subdivision to dig tanks by private individuals, who pay full rates of earthwork." The labourers who have gone abroad in search of employment continue to send small remittances home by money-orders. The Postmaster General has been requested to furnish us with complete statistics. The Subdivisional Officer of Magura made enquiries about money-orders received from some post offices in his subdivision, and he gives the annexed comparative statement as results of his enquiry:—

Month.	Number.	Amount.	Number.	Amount.
		Rs.		Rs.
January	476	6,275	624	7,244
February	418	6,763	613	7,841
Total ...	894	13,038	1,237	15,585

The above statement shows that about 350 more money-orders for an increased amount of about Rs. 2,500 were received in the four post offices to which the Subdivisional Officer's enquiries were confined during the months of January and February 1897.

In Bangaon also emigration and immigration of famished people is unknown. Some Beharis are reported to be employed on the railway.

(*l*) *Condition of Cattle.*—The condition of cattle continues to be fairly good with a few sporadic cases of cattle-pox here and there.

(*2*) *Number and nature of public works open in or near the tract.*—(*a*) *Under the District Board.*—A test work was opened on the 25th February last in the shape of excavation of a tank in thana Muhammadpur. Due publicity of the intended opening of the work had been given beforehand, but, as I anticipated, it has up to date proved a failure. From Magura Subdivisional Officer's report, dated the 26th, it appears that no one came to the work on that date. I have, however, given him orders to "stop at the work for three or four days more, and if no one appears at the work, to close it and resume his other duties." The expenses on the relief works has been as follows:—

	Rs.	A.	P.
Earthwork	0	6	0

The above report shows that there is not yet such pronounced distress in that tract as to drive the people to relief works, and I expect the work started will have to be shortly closed for the present.

A statement prescribed by Circular No. 1, of 6th January 1897, is enclosed herewith:—

Statement showing the rates of wages paid on relief works (including test-works) and tanks exacted.

District	Rates of daily wages and task.										Grain on which wages calculated under section 104 of the Famine Code.	Retail price of the grain in column 12 (number of seers per rupee).	Rate per 1,000 cubic feet of earthwork.	Remarks.

Sofhi Bhushon Bose,

For Collector.

No other work was open, either under the Municipal Committees or Public Works Department.

No test work seems necessary at Bangaon for the present.

(3) *Any cases of relief under section 12.*—The subjoined statement shows the number of men, women, and children gratuitously relieved under sections, 12 and 42 of the Famine Code, and the total amount expended on such relief during the two weeks ending 27th February 1897:—

Form No. 6.

	Men.	Women.	Children.	Total.	Amount. Rs.	A.	P.
Sadar ...	50	83	43	176	70	3	6
Bangaon ...	17	40	12	69	16	6	0
Narail ..	14	40	58	112	83	2	3
Magura ...	55	189	111	355	145	13	0
Total ...	136	352	224	712	315	8	9

The system of paddy-husking was ordered to be introduced in Bangaon for able-bodied persons in need of gratuitous relief under section 45, Famine Code. This has evidently served as an effective check to keep away able-bodied persons from receiving gratuitous relief for doing nothing. No detailed report has been received from Bangaon on this subject, and I suppose that the system has not as yet been properly organized, as orders were issued only lately.

On this subject the Subdivisional Officer of Magura reports:—"From my enquiries in the interior, I have come to know that paddy-husking is in great demand throughout the subdivision, but we cannot meet the demands sufficiently unless we open centres at every important village, but this cannot be till we entrust some philanthropical men to do the work for us under the supervision of circle officers. The Sub-Registrars cannot be expected to do much in that matter.

(4) *Number of applications under the Land Improvement and Agriculturists' Loans Acts.*—During the half-month under report, 19 new applications were received in subdivision Magura for a total sum of Rs. 7,700 under the Land Improvement Loans Act. The total number of these applications up to date is 81 for nearly Rs. 41,000. Enquiries are in progress in respect of them, and in two of them enquiries have been finished. These two last are now under consideration whether the securities offered are sufficient. In Bangaon three applications were received during the period under report. They are under enquiry.

In Magura no new applications under the Agriculturists' Loans Act were taken during the period under review. Out of the total number of applications already reported, 69 applications have been sorted, which appear to have been made by non-cultivating classes. The Subdivisional Officer of Magura reports that he has himself made enquiries into several of them, and completed the enquiries in two only. These last two are still under consideration as to whether the securities offered are sufficient. The Sub-Deputy Collector, Babu Hemanta Kumar Moitra, has lately joined, and a large number of applications have been made over to him for enquiry.

In Bangaon also no new applications were received under the Agriculturists' Loans Act. The Subdivisional Officer of Bangaon reports that he received up to the 26th February 1897 17 applications for a total amount of Rs. 233 only. They are being enquired into. The Subdivisional Officer, however, reports that after the recent rainfall he does not consider that large loans will be required in his subdivision, and considers that Rs. 2,000 allotted by me to his subdivision, out of the Rs. 8,000 allotted to this district, will be more than enough

(5) A skeleton map is annexed herewith. The part coloured brown shows the affected tract. As matters have since improved in Bangaon, and at present little anxiety is felt with respect to that subdivision, I have expunged the light blue portion in the western part of thana Bangaon shown in the map submitted with my previous report

---

No. $\frac{147}{2935}$ G., dated Camp Kaliganj, Khulna, the 27th February 1897.

From—W. H. H. VINCENT, Esq., Officiating Collector of Khulna,
To—The Commissioner of the Presidency Division.

I HAVE the honour to submit herewith my half-monthly famine report for the month of February 1897. Mr. Bell having gone on transfer to Patna, I proceeded to Kaliganj myself, both to make arrangements for opening new relief works and for more complete organization of gratuitous relief distribution.

Area affected.—The area affected continues to be the same as before, *i.e.*, 442 square miles with 2,62,000 population estimated. There are two charges as before at present under one Charge Superintendent. There are eight circle officers, some of whom are quite new to

the work as yet. One of the circle officers, Babu Anup Chandra Chandra, has already, as reported to Commissioner a fortnight ago, submitted his resignation, but no orders have been received about his successor. The area affected will increase during the next month, I apprehend. This was also expected by Mr. Bell.

General state of affected area.—There has been a decided change for the worse in this month, and the numbers on gratuitous relief have increased greatly. I have personally examined many of the applicants, and though there are many who are turned away as not being proper objects for relief, yet there are some who are really entitled to receive help and who would die if they did not receive it. Widows and orphans are particularly bad, many showing signs of emaciation. The number of beggars has increased enormously, particularly in thana Kaliganj and Assasuni. These people, most of them old women and the balance diseased and crippled men and boys, are suffering considerably, as the number of alms given has decreased. All the circle officers also report that the distress is becoming more acute, and officers in charge of works report that the men who come to the works are not of such good physique or so strong as previously. This was exactly what was expected. It was known that distress would deepen as the spring advanced, and it has. Women are the chief sufferers, as there is no demand for paddy-husking, which is their chief employment. That work is nearly over, as is also all harvest work. Fishermen and those who own date trees, and those who have enough money to pay for licenses to cut wood in the Sunderbans, are fairly well off. Up to now landless Brahmans, Kaisths and high castes suffer a good deal Those men will not come on relief works. Two deaths from starvation are reported—one in Kaliganj and one in Magura. In the first case the body was sent in for *post mortem*, and it appears probable the death was due to want of food. The other case is a doubtful one. Both are being enquired into. The classes on relief works are chiefly cultivating Muhammadans, some Namasudras and low caste Hindus such as Muchi, &c.

3. (*a*) *Crop prospects.*—There was some rain during the fortnight, which has been beneficial for jute and *aus* cultivation, but, as has been reported previously, the tract affected is one which is dependent almost entirely on *aman* crops. One fact, which promises very badly for the *aman* crops in the coming year, is that in many places no attempts are being made to repair the *bheries* and bunds. This is particularly apparent down the banks of the river Kabadak, which constitute the most distressed area; for the salt water of the Kabadak is responsible undoubtedly in great measure for the distress that has occurred. If the bunds are not now made speedily, it will be impossible to make these at all, and large areas of land will suffer. The reasons why these bunds are not made are twofold: Firstly, in many cases landlords are absentees and know little and care less for the condition of the lands; secondly, the greater part of the land is let to gantidars whose rent is fixed. These tenure-holders are supposed to repair *bheries* with the raiyats; and the zamindars consider—and with some reason—that they are not bound to repair *bheries* in lands let in ganti. The raiyats will not repair *bheries*, as they are just earning enough to keep themselves going. The gantidars are small men, improvident in many cases and have no money. Advances have been made under the Land Improvement Loans Act to many of them, but many have not applied, and of those who have applied, many have to be refused on account of insufficient security and also for want of money, as we have expended all the money we have under this head. I have sent in an application for a further grant, and do hope this may be allotted without delay. If the orders were communicated to me by wire, it would be of great benefit, as the season for making *bheries* is nearly at an end.

(*b*). *Food-stocks.*—There is a sufficiency of grain in the district. The crops in the eastern portion of the district were good or fair, and they supply the affected area with grain. Rice is selling about Rs. 3-8 to Rs. 4 per maund in the affected area. The price is higher in places where the grain cannot be imported in boats.

Importation of food-grains.—I have already said that all the grain traffic here is done in country boats and does not go by rail. The railway figures are of little value. Rice is, I know, leaving the district by country boat. There are no imports practically.

Vide statement annexed.

Rainfall.—There has been some rain, about ·1 inch, in parts of the affected area. It has been of value for lands where *aus* and jute are cultivated.

Public health.—Fair on the whole. There is some cholera in Kaliganj, but not as much in the affected area as there is in other parts of the subdivision.

Emigration and immigration.—There has been no immigration. There is a constant flow of emigration from the affected area to the eastern side of the district. This will result in the ruin of many gantidars, who have advanced money to raiyats last year, and whose tenants have run away.

Condition of cattle.—Cattle are still in fair condition, but the poorer cultivators have sold very large numbers to Calcutta *beparees* who have taken them off.

Number of relief works.—There are now four relief works open in the affected tract. The works are—(1) road Kaliganj to Ishwaripur; (2) extension of same to Ishwaripur; (3) tank at Durgapur in thana Assasuni, and (4) road at Khesra in thana Magura. The first of these works attracted the greatest number of labourers. There were on Wednesday last, which is the last day of week for reporting, 310 men and 54 children working on this road. In the Durgapur tank there were 56 men and 5 children. The figures for the other two works are not in at the time of writing. They will be found inserted in the Statement I appended. I have lately visited three of the four works, however, and know what tasks are

exacted. The task exacted is that reported by Mr. Bell in his last fortnightly report, *i.e.*, for medium soil 50 feet lead, B class :—

M.	W.	B. C.	S. C.
78	60	40	15

and these tasks will be continued. Separate tables are now being prepared for soft soil and for greater lift and lead, as the tank work necessitates this. In one work—Khesra—men were classed as A labourers. After making a local enquiry I have had them classed B. This is in accordance with the new rules of Government, in which the classification is reduced to B and D. The rates of wages continue the same as before. Two annas per man maximum, annas 1-6 minimum, B. C. ten and 9 pies, S. C. six pies maximum and minimum. These are calculated according to the price of grain, estimated to be ten seers per rupee. No women came to our relief works, and it is therefore absolutely useless prescribing tasks for them. The following are the points on which we have rules differing slightly from the Code :—

(1) Children 7 to 10 are worked They are in the habit of doing so, and the tasks given them are small and they are well able to do them. They are most useful as carriers, and if their parents be deprived of their help, less work will be done. In the new rules forwarded with Government No. 420M.I.P., dated 25th January 1897, there are, I think, four classes of children. In practice, on a relief work, it is impossible to classify so much. Here we have three classes—under seven exempted and sent for gratuitous relief; 7 to 12 S. C.; 12 to 15 B. C. I may add that no complaints are made of this, and if our classification is altered so as to exempt children under seven, our gratuitous relief test, which is now large and unwieldy, will be very largely increased.

(2) We have not as yet found it necessary to give a wage to labourers the first time they come on the works. If we did so, we should have numbers coming, taking the wage and disappearing. I am now considering if it is necessary to arrange for providing food for those labourers who come from a distance.

(3) We do not give a holiday on Sunday, but on separate days according to the *hâts*. This is for obvious reasons advantageous. There is no point in a Sunday holiday more than a holiday any other day for non-Christians; secondly, grain and produce are always to be bought cheaper at *hâts* than in shops; thirdly, hât days are our gratuitous relief distribution days, and workers are enabled to carry home jute and dhan for their wives and female members of their families admitted on our list on condition of doing some work. We have no information of relief works opened under private agency, but it is known that some zamindars are doing what they can. One large zamindar had taken a loan to open a work, and another zamindar proposes to do the same. The Hon'ble Chandra Madhab Ghosh, High Court Judge, is said to be giving work to his raiyats; but as a rule absentee landlords do not take trouble about their raiyats. I hope they may suffer in consequence, and I think they will in part, owing to desertion of raiyats. The present number of relief works is inadequate. Arrangements are being made to open at least four more immediately. The Assasuni khal, now being done by the Public Works Department, employs many men who will be without work in another ten days at latest.

(4) There are no poor-houses open. I anticipate it will be advisable to open two by the 10th of March, or certainly at the end of the month I should use it in great measure as a test for those who wish to get gratuitous relief and to house beggaring. The number of beggars is very large, and they get little or nothing from people round. There are no private poor-houses.

(5) Paddy-husking is done by women on receipt of gratuitous relief, and will be treated under that head. It is extremely difficult to find any work but jute-twisting and paddy-husking for women. The only two possible forms of other employment are weaving and mat-making.

We have made experiments in weaving, giving out 20 seers of cotton to eleven men and two women of the Jugi caste. They returned within 10 days material valued at Rs. 25 (or Rs. 26). The cost of the cotton was Rs. 21, the wages paid were Rs. 4-11, so that the loss was not large. No buyers for the clothes at a fair price can, however, be found at present. The scheme is viewed with mistrust by the richer weavers, who think that Government wish to take their trade from them The real facts have been explained to them. We hope to have more extensive working in this in future. No experiments have been made in mat-making as yet.

Paddy-husking.—The same amount of paddy as was reported last time is given, *i.e.*, 1½ maunds, from which we get 39 seers 11 chitaks of rice. Jute we give out five seers and get back four seers 12 chitaks of string. These are weekly tasks.

(6) *Organization of distribution of grain doles.*—The arrangements at present are that doles are distributed once a week at one centre for each circle. This is found not sufficient. The recipients of the doles are, many of them, very old women, widows, and others deserted by their wage-earning relatives, and in many cases possessing none. The circles are large and the head-quarters have to be fixed in places where there are hâts and conveniences, and are not always central; consequently many have to come from great distances. They are weak and unable to move about much, and suffer a great deal. Two centres have therefore now been chosen for each circle. On fixed days of the week, being hât days, those entitled to receive gratuitous relief attend at these centres and get their doles. Many are only allowed

a dole on the condition that they spin jute or husk paddy, and they receive their amount of jute or paddy at the same time, and also bring back the rice or string. It is noticeable that though all will husk paddy very few are willing to spin jute, and only consent to do it under pressure.

The numbers on gratuitous relief are 1,076·5. The great increase was to be expected, as none of the women in the district can do earthwork. If they would, our difficulties would be much less. This is, I believe, recognized by Government.

Those who husk paddy or spin jute cannot, moreover, really be said to be receiving gratuitous relief at all, as they work. The number who do this work is 211. In addition to these arrangements, Indian Famine Charitable Relief Fund circles are being formed in each circle to assist the Circle Officer in relieving the destitute, especially those the Circle Officer cannot reach, who are many. This is urgently necessary too, as circle officers are now so busy with distribution work that they have little time for enquiry into loans and visits to villages. All panchayats and chaukidars are constantly sending in and bringing in applicants for gratuitous relief. It is for these persons particularly that poor-houses are necessary as a test to see whether they are really in want, and also to enable circle officers to make full enquiries into these cases. Many of them are, however, from their appearance, clearly in want of food.

(7) *Relief in kitchens.*—Nil, and I do not propose any.

(8) We have advanced in all Rs. 19,890 in the affected area under Land Improvement Loans Act This money has been advanced under the new rules, and mostly to zamindars and gantidars. The question of security is most important in the case of the latter : it is impracticable and causes too much delay to attempt to get the consent of the landlords to the creation of the encumbrance ; yet we know that this year there will be numerous rent suits against these men, and that they will be sold up and their tenures bought in free of encumbrances. To avoid the loss consequent on this, the consent of zamindar has, when possible, been taken. Joint personal security has also been taken in many cases, and every effort will be made to protect the interest of Government as mortgagee ; but the difficulties are great. The details of persons and amounts advanced this fortnight will be found in the table appended.

There is no cultivation going on now for which agriculturists loans can well be given. Applications are now being enquired into, but the granting of these loans will chiefly be confined to the sowing and cultivating season. It is impossible for Government to take the place of the mahajans of the subdivision, nor is there any reason for it. Those who can offer security can always get loans from local bankers, and those who cannot, cannot get loans from Government without security. The amount advanced this fortnight has been noted in the statement sent herewith.

In his No. 72G.—S.R., dated the 20th February 1897, the Commissioner noted the following defects in our last report for January :—

(1) The number of daily labourers and the rates at which they were paid was not entered, nor were they distinguished according to the departments which are in charge of work.

In reply, I beg to report that no works under Famine Code are being done by Public Works Department here. All the works are in charge of the Collector, who has overseers working under him. This applies equally to January and February. The number of workers paid by daily wage for January 1897 was 71·5. The number for February 1897 is 439.

(2) A sum of Rs. 275 only was advanced under the Land Improvement Act, and the system under which the loans were granted was not stated. The Commissioner also wants an explanation why so small a sum was advanced. The reply to the first portion of the question is as follows:—Applications are received by Charge Superintendent and sent to Circle Officer for inquiry. On receipt of the report orders are passed and the Forms B drawn up in duplicate. The applicant is told to attend at Satkhira on a particular date, and his form which is to be cashed is sent to Treasury Officer for enfacement. It is forwarded by him to Satkhira and paid by Sub-Treasury Officer there to applicant. Loans are made payable in two instalments, the last being paid when half the work is done. Loans are granted in the affected area under the new rules, *i.e.*, no interest is charged, and it is agreed that if the work be performed to the satisfaction of the Collector and in accordance with the condition laid down in the order of Government, one-third of principal will be remitted. The manner in which security has been taken has been dealt with in the body of the report. The sums advanced were small, because we had such a small staff, who had at the same time to prepare their village gratuitous relief register. Up to date Rs. 19,890 have been advanced, which is all that has been allotted to the subdivision, and is indeed practically all allotted to the district. I have sent an urgent application for more money, and until those applications are granted few more advances can be made.

(4) Financial statement shows Rs. 1,000 received from district fund and Rs. 400 from subscriptions. Of these amounts, Rs. 1,000 has been considered an advance from District Board, and has been recouped in full to that body. Rupees 400 will similarly be refunded to the Nadia Famine Charitable Relief Fund, being treated as an advance. The explanation of discrepancy pointed out is as follows. The Rs. 375 expended for the purchase of jute and paddy was taken from the Rs. 400 raised by private subscription. The balance under that head was therefore correct.

The items marked A in the statement were paid, not out of the Subdivisional Officer's fund at all, but by District Engineer from an advance he held for payment of relief workers before Mr. Bell had arranged for work.

Out of this Rs. 1,000, only Rs. 196-9-9, *i.e.*, Rs. 120-2-3 on gratuitous relief and Rs. 76-7-6 on account of contingencies, was paid; but Rs. 135-11-4½ has been spent previously to the period under report. If these figures are checked it will be found they are correct, and indeed the explanation is given in full in the financial statement of Mr. Bell.

(5) The Commissioner complains that no information has been given on the condition of other parts of the district. I have been myself over part of Paikgacha, Fakirhat, Mollahat, Bagerhat, and the Sadar in the last month. One Deputy Collector has been over the whole of Paikgacha, a Sub-Deputy Collector has been over Dumria, the Subdivisional Officer of Satkhira has been in Satkhira and Kalaroa, and the Subdivisional Officer of Bagerhat has been over portion of his subdivision. Generally, I may say there is no distress in the Bagerhat subdivision at all. People are suffering on account of high prices, but the crops have been fair and the landlords are collecting their rents. Prices are slightly lower than in the Sadar. In Morellganj there was fear of distress, but I do not think there is any cause for alarm at present. Mollahat will be free from danger if there is a reasonable *boro* crop. In the Sadar the poorer classes, and especially those who have no lands and the poor but respectable people, will suffer to a certain extent. The crops have, however, been fair, and there are sufficient people fairly prosperous to help those in want. I do not think any relief operations will be necessary at all. In Satkhira portions of the thana will have to be included later on in the affected area. Thana Kalaroa is safe, and there are also some winter crops. In Dumria there is also no cause of alarm at present, nor in the portions of Paikgacha and Magura not included in our area.

Water-supply.—Water is very scarce, not only in the affected area, but also throughout the district. The programme of relief works which have been compiled includes 31 tanks, new and old, which will be taken up as fast as possible. The lands in these cases will be either made over to District Board by deed of gift or leased, or, where necessary, acquired. We have at present started one tank in a village called Khazra Durgapur. These tanks will be of no use this year, however, and there is no doubt that there is at present a great scarcity of water which will become greater in a short time.

The defects in our statements for January have been noted, and will be rectified in this month. Government Circular No. 173 Fam., dated the 25th January 1897, was not received here till after the despatch of our last monthly report, and so our returns were not in accordance with it.

FORM 7.

(a) The allotment was made in the beginning of February, and abstract bills were cashed during the fortnight. Detailed bills will be submitted for adjustment of account in a day or two.

(b) Rupees 19,810 have been sanctioned up to date; balance is not yet drawn.

STATEMENT VIII.

Financial Statement required by Section 24(a), Famine Code, for the half-month ending the 24th February 1897.

For week.	A.—Receipt form— (a) District Board grant.	(b) Government grant.	(c) Private subscriptions.	B.—Expenditures from public fund on— (a) Relief works (clause 3) for— Daily wage.	Task work.	(b) Relief on poor-houses (clause 4).	(c) Relief of artizans, etc., (clause 5).	(d) Relief by grain and money doles (clause 6).	(e) Relief in kitchens (clause 7).	(f) Reserve grain.	Balance of fund in hand from— (a) Other miscellaneous charges.	(b) District Board grant.	(c) Government grant.	Private subscriptions.	Remarks.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
	Rs.	Rs. A. P.	Rs.	Rs. A. P.	Rs. A. P.			Rs. A. P.		Rs. A. P.	Rs. A. P.		Rs. A. P.	Rs.	
Balance in hand, week ending 17th February 1897 .	...	14,024 14 4½	25	.....	.....	...	...	.....	...	...	...	..	.....	...	
Week ending 17th February 1897 ...	..	.....	...	16 14 0	147 3 9	...	...	299 11 0	...	.....	.....				
Week ending 24th February 1897 ..	...	... ..	...	18 10 6	260 11 0	...	...	550 8 5	...	1,132 3 2	28 11 0	...	1,528 5 11½ (c)	25	
Total ...	...	14,024 14 4½	25	35 8 6	407 14 9	...	...	850 3 5 (a)	...	1,132 3 2 (b)	28 11 0				

Grand total = 2,454 8 10.

(a) Out of Rs. 850-3-5 distributed in money and grain doles, Rs. 214-1-11 represents the price of rice from paddy-husking from paddy purchased from private subscription fund, and the balance, Rs 636 1-6, represents the grain and money doles from Government money.

(b) The total price of paddy and jute purchased and paid for during the period under report was Rs. 1,344 2-2. From this amount a deduction has been made of Rs 211-1-5, being the price of rice from paddy-husking from paddy purchased with Government money and distributed in grain doles, and the balance, Rs. 1,132-3-2, has been shown under the head.

(c) The total expenditure during the fortnight was Rs. 2,454-8-10. Out of this, Rs. 214-1-11 represents the price of rice from paddy-husking from paddy purchased from private subscription fund, and the balance, Rs. 2,240-6 11, was paid from the Government. To this amount should be added Rs 256-1-6, being the expenditure on gratuitous relief in three circles up to the 27th January 1897, which was not included in the previous financial statement, thus making a total of Rs. 2,496-8-5, and leaving balance of Rs. 11,528-5-11½, which has been shown under this head. The pay of the officers engaged is not included in this.

W. H. H. VINCENT,
Offg. Collector.

No. 113G.—S.R., dated Calcutta, the 4th March 1897.

From—E. V. Westmacott, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Revenue Department.

Under section 9 of the Bengal Famine Code, I have the honour to submit herewith a copy of a letter No. 2102G., dated the 1st March 1897, and of its enclosures, from the Collector of Murshidabad, being his report regarding the scarcity prevailing in portions of his district. The report contains full information on all points, except clause (*d*) "the condition of grain stocks," in the district. I am awaiting a separate report on this subject. I may add, however, as regards the district generally, that from recent enquiries which I have made in the district, I believe that in the greater part of it raiyats who hold land have retained enough in hand to feed themselves and their families until they gather another harvest, and that dealers have probably enough grain in hand, principally from the good harvest reaped in the *Rarh* country, to supply the demand until the middle of April, after which persons, whom I believe to be well qualified to judge, have told me that they believe that grain must be imported from Calcutta.

No. 2102G., dated Camp Dadpur, the 1st March 1897.

From—E. V. Levinge, Esq., Collector of Murshidabad,
To—The Commissioner of the Presidency Division.

I have the honour to submit the following report under section 10 of the Famine Code regarding the scarcity prevailing in portions of this district. As matters at present stand, the only part of the district where distress has actually appeared and relief operations are necessary, is a tract covering about 80 square miles in the Burua thana of the Sadar subdivision, and in the Rangamati and Saktipur outposts of the Gokarna and Bharatpur thanas of the Kandi subdivision. The tract likely to be affected comprises also portions of the Daulatabad Hariharpara, Noada, Gowas, Jalangi and Bhagwangola thanas in the Sadar subdivision, and the total area of this tract, including the 80 square miles above referred to, may be estimated at 280 square miles with a population of 160,000 as shown in list A here to annexed.

2. The river Bhagirathi divides the district into two parts, that on the west being known as the *Rarh*, and that on the east being known as the *Bagri*. Rice is the staple food of the district, and is grown on more than three-fourths of the whole area under cultivation. The principal crop is the *aman*, or the winter rice, which is grown in the *Rarh* and also in low lands in the *Bagri* tract, especially in the south-eastern portion of the district known as the *Kallontar; aus dhan* is grown in the *Bagri*, being sown in April or May, and reaped by the end of August or the beginning of September, after which the lands are prepared for the winter or *rabi* crops. Good rain in September and October is required for the winter rice and for the cultivation of the *rabi*. The *Rarh* is the chief source of the food-supply of the district, and in ordinary years the rice grown in this tract would be more than sufficient to meet the requirements of the population. About one-fourth of the cultivated area of the district is under mulberry, jute, indigo, oil-seeds, &c.

3. (*a*) The grounds of my belief that scarcity will prevail are as follows:—

(i) There was a partial failure of the rice crop in 1895-96, the outturn of the *aman* and *aus* crops being 8 and 9 annas respectively. Owing to the early cessation of the rains in September last, the outturn of the *aman* crop may be estimated at 9 annas only for the whole district. The *aus* crop has been estimated at only 8 annas, and the *rabi* in the affected area was a very poor crop, and in many places, especially in the Burua thana, it was a complete failure. The outturn of wheat, which, however, is not largely grown for the whole district, may be set down at 3 annas, and of other *rabi* crops at 6 annas.

(ii) The export of grain from *Rarh* to other districts, Calcutta and the North-Western Provinces, has been unprecedented, and there is reason to apprehend that the stocks in hand will not be sufficient to meet the requirements of the district up to September next. The price of common rice has averaged 10 seers per rupee since December last as compared with 16 seers in the preceding year, and it is probable that there will be a still further rise. Those who have land and a surplus crop, have been able to profit by the high prices; but for the smaller cultivators whose crops have failed, and the landless classes, the high prices must entail a certain amount of distress.

(iii) The number of beggars who are coming into Berhampore and other places where wealthy persons dispense charity is largely increasing. In ordinary years these beggars are supported in their villages, but this year this source of charity has dried up.

(iv) Already 1,035 joint applications for loans under the Agriculturists' Loans Act aggregating Rs 1,76,187 have been received. In the last few years not a single application was received. People represent that they are unable to obtain loans from the mahajans as in ordinary years.

(v) Similarly, 193 applications under the Land Improvement Loans Act aggregating Rs. 73,380 have been received. These are nearly all for the excavation of tanks. I am daily receiving large numbers of petitions from villages in the Sadar subdivision, asking for the re-excavation of tanks partly to relieve the existing want of water and partly to supply the villagers with work.

(vi) At the time of the cutting of the winter rice, a large number of labourers went to the eastern districts, but returned without having obtained employment. Very recently about 400 labourers from a few villages in the south-east corner of the Burua thana went to the Hooghly district for work attracted by the high rates said to prevail there.

(*b*) *The area and population likely to be affected.*—I have already referred to this in paragraph 1. In the 80 square miles in the Burua, Rangamati and Saktipur jurisdictions where immediate relief is required, the population may be roughly estimated at Rs. 42,000.

(*c*) *Character of communications in the affected area.*—There are good roads throughout the affected area, and the bulk of the traffic is carried on carts and pack-bullocks. The river Bhagirathi and the Bhyrub, which passes through the eastern portion of the district, are lower than they have ever been known to be before at this period of the year, and both are fordable in many places. There is little traffic on them now. The only railway in the district is the short branch line from Nalhati on the East Indian Railway to Azimganj.

(*d*) *The condition of the grain stocks.*—Such figures as I have collected are absolutely unreliable, and I can place no confidence on them. I am attempting to obtain more accurate statistics, but the information is still incomplete, and I do not delay this report on this account. All substantial cultivators have, I believe, a sufficient stock in hand for their own requirements. I have already reported on this point in my letter No. 1899G., dated the 3rd February 1897, and I still adhere to the opinion therein expressed that grain will have to be imported before many months are over, in order to supply the local *hâts* and to satisfy the requirements of the population up to the time that the next *bhadoi* crop is reaped. I think, however, that local trade will be able to meet the deficit, and that no interference on the part of the Government will be required.

(*e*) *Sources from which supplies of food may be obtained.*—In ordinary years the supplies of food-grains from the affected area are obtained from the *Rarh* and from the neighbouring districts of Rajshahi, Malda, Dinajpur and Rangpur. No imports from these districts can be expected this year, and the only source of supply to make good any deficit that may occur will be Calcutta. The poorer people depend on the local *hâts* which get their supplies from the *Rarh*, and for the present at least I have not heard that the supply is insufficient.

(*f*) *Proposed measure of relief*—

(i) Gratuitous relief under Chapter IV, section 31 and following sections of the Famine Code.

(ii) Gratuitous relief under section 45 of the Famine Code, especially paddy-husking, spinning thread from raw cotton, and preparing string from jute.

(iii) Loans under the Agriculturists' Loans Act.

(iv) Loans under the Land Improvement Loans Act for the excavation of tanks. This form of relief I look upon as most suitable, provided I can get substantial men of position to take loans as it will not only give work to a large number of persons in the neighbourhood of their villages, but will help to remove the serious want of water, which is at present being experienced over a large portion of the affected area.

(v) Relief works as defined in section 52 of the Famine Code, viz., the construction and repair of roads and embankments and the re-excavation of tanks.

(*g*) *Estimate of the expenditure likely to be incurred and the local sources from which it can be met*—

(i) Assuming that 10 per mille of the population will require to be gratuitously relieved under section 31 of the Code, the number of persons to be thus relieved for the seven months up to September next in the affected area will be 1,600. Taking Rs. 2 per mensem as the average cost per head for relieving these persons, the total expenditure will amount to Rs. 22,400. About half of this amount may be required for gratuitous relief under section 45. As distress is not likely to be felt over the whole of the affected area for the full period of seven months, I would take Rs. 30,000 in round numbers as the amount which will be required to be expended in gratuitous relief. Of this amount, Rs. 25,000 have been promised at the public meeting held in Berhampore on the 30th of January, and the greater portion of this has already been collected. It is probable that the remaining Rs. 5,000 will also be raised by private subscriptions within the district, and that it will not be necessary to apply for an additional grant for this purpose.

(ii) I estimate that at least a lakh of rupees will be required for loans under the Agriculturists' Loans Act, and half a lakh for loans under the Land Improvement Loans Act. The amounts already allotted to this district are Rs. 7,000 and Rs. 4,000 only respectively.

(iii) The District Board have sanctioned Rs. 35,000 for relief works from April to September 1897, and about Rs. 15,000 is available for the current year. It is not easy to estimate at this stage what the total amount required for the expenditure on relief works will be, but the amount will suffice for some time to come. A lakh of rupees is to be expended by the Public Works Department on the Bhagwangola retired line of embankment, and this work can be turned into a relief work at any time that may be required.

4. As I have already stated, the only part of the district where relief operations are at once required, comprises an area of 80 square miles, in portions of the Burua thana in the Sadar subdivision and of the Gokarna thana and Bharatpur thanas of the Kandi subdivision. In Gokarna and Bharatpur the affected area is a strip from 3 to 5 miles wide along the west bank of the Bhagirathi river. In this area *aus dhan* and *rabi* are grown, and mulberry is also extensively cultivated. Both the *aus* and *rabi* partially failed, and the mulberry has suffered from want of rain, so that the prospects of the March bund are very gloomy. In Burua the affected area comprises the tract along the east bank of the Bhagirathi and the south-east portion of the thana. Here, too, the *aus dhan*, *rabi* and mulberry have been more or less failures. There is a large number of silk filatures on both sides of the river, and the majority of these have just closed, and will not open again for some months. These filatures must have been giving employment to over 4,000 persons. The majority of the applications for loans have come from the Burua thana, and I have a Deputy Collector and a kanungo solely employed in enquiring into these applications. Two test-works were recently opened in the Burua thana, and one near Chandpora in the Rangamati outpost of the Gokarna thana. The number of persons employed on the two former yesterday was 641 and on the latter 89. The numbers are gradually increasing daily, and are likely to still further increase, and I have to-day started a new test-work near Saktipur, in the Bharatpur thana. The works are under the charge of District Board overseers under the supervision of the District Engineer. I may mention that in the beginning of January last, relief works were opened in the Nadia district, only three miles from our affected area, and have been open ever since. No gratuitous relief has yet been given, but with the consent of the Central Committee of the Murshidabad Famine Fund, I have made over Rs. 100 to Mr. Keogh, of Sujapur Factory, and same amount to Mr. Malcolm, of Ramnagar Factory, as also Rs. 25 to each officer in charge of the Burua thana and the Saktipur and Rangamati outposts for the purpose of gratuitous relief in case it may be required.

5. I have just received your No. 92G.—S.R., deputing two officers with powers of a kanungo to this district for relief operations. I propose to divide the area immediately affected into two circles, one comprising the portions of the Gokarna and Bharatpur thanas, on the west bank of the Bhagirathi, and the other the portions of the Burua thana, on the east of the Bhagirathi. A kanungo will be placed in charge of one circle, and the Sub-Deputy Collector in charge of the other. The Assistant Magistrate, Mr. Panton, will be in charge generally of relief operations in the district. Besides these, I have two other kanungos who, with a Deputy Collector, will be employed in enquiring into loan applications received from other parts of the Sadar subdivision. This staff is sufficient for present purposes.

ENCLOSURE A.

Statement showing the tracts where severe distress of famine is apprehended in the district of Murshidabad.

N. B.—The maximum wage of 6 pice a day for a full task of 66 cubic feet of earth work is being strictly enforced. No gratuitous relief has been given as yet.

E. V. LEVINGE,
Collector.

No. 710T.—M.R., dated Camp Hazaribagh, the 6th March 1897.

From—A. FORBES, Esq., C.S.I., Offg. Commissioner of the Chota Nagpur Division,
To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of this office No. 575T.—M.R., dated the 23rd ultimo, I have the honour to submit the following report under sections 13 and 25 of the Bengal Famine Code for the weeks ending the 20th and 27th ultimo.

PALAMAU.

2. I forward the Deputy Commissioner's report with marginal notes by myself, together with the statements prescribed by sections 26 and 27 of the Code and Circular order No. 385Agri. (Fam.), dated 11th February 1897, besides certain statements called for by myself, showing the action taken in making advances under the Land Improvement and Agriculturists' Loans Acts and for improvements in Government estates. The imports of Burma rice under the bounty system lately sanctioned by Government are also shown in a separate statement. Duplicate copies of the map required by section 27 are also appended.

3. The present report is so far satisfactory that it does not show anything like so rapid an increase in the numbers on the relief works as the Deputy Commissioner at first anticipated. I observe that Statement D annexed to the Deputy Commissioner's report shows, apparently, the total daily numbers on the works for the two weeks ending the 20th and 27th ultimo, instead of only the average daily numbers; and the figures shown have consequently to be divided by 6. This done, it will be seen that the daily average number (taking men, women and children) on the works during the first of the two weeks under review was 2,352 and during the second week 3,145. This comparatively slow increase is no doubt partly due to works of improvement, which are being carried out in Government, as well as in private estates, and also partly to the fact that the Deputy Commissioner has not yet been able, for want of establishment, to open all the works he proposes; but even allowing for this, it must be admitted that, so far, no signs of any "rush" are visible. As regards an increase in establishment for the purpose of starting new works, I am addressing you separately in my No. 694T.—M.R. of to-day's date.

4. I am glad also to find that there has not been any rapid increase in the numbers on gratuitous relief, the total number for the first of the two weeks under review being only 450 and for the second week 514. The statement (Famine Form 6), submitted by the Deputy Commissioner, does not distinguish between persons relieved under Chapter V of the Code and children and other "dependents" coming under section 84, as prescribed by column 1 of the form printed at page 60, Famine Code; but I infer from the fact that no "dependents" are shown in columns 26 to 29 of Statement D, and, with reference to the remarks on this subject in paragraph 25 of the Deputy Commissioner's report, that such "dependents" are included in the above figures. If so, the results are certainly reassuring, for the procedure adopted by Mr. Renney for the preparation of village lists (see paragraph 25 of his report) appears to me to meet all requirements.

5. An interesting feature in the report is the result, so far, of the offer of 8 annas per maund bounty on imports of Burma rice. As yet only one trader (of Gaya) has taken advantage of this concession, and has been paid Rs. 329 bounty on 658 maunds. That this has had little or no effect in lowering prices seems due to the fact that competition has not yet set in, no one else having tried the experiment, with the result that the one trader in question appears to be following the lead of the Daltonganj dealers in keeping up prices. It is to be hoped that this game will soon be interrupted. There has been a slight revival of exports from Lohardaga during the past month, the returns showing that 1,648 bullocks came away with rice from the Lohardaga and Chainpur marts during February, against 794 that had to leave

empty. Prices, however, throughout the Palamau district continue very high, as will be seen from the following figures for the last three weeks:—

	Week ending 31st January.	Week ending 13th February.	Week ending 27th February.
1	2	3	4
Number of *hâts* at which rice was selling at under 8 seers per rupee.	7	15	14
Number of *hâts* at which rice was selling at 8 seers and under 9 seers.	36	22	42
Number of *hâts* at which rice was selling at 9 seers and under 10 seers.	28	57	27
Number of *hâts* at which rice was selling at 10 seers and over.	5	.....	.....
Total number of *hâts* from which returns were received.	76	91	83

MANBHUM.

6. The Deputy Commissioner's report and statements required by sections 26 and 27 of the Code, and by Circular No. 385Agri. (Fam.), dated 11th February 1897, are appended, together with duplicate copies of the map required by section 27 of the Famine Code, from which it will be seen that the seriously affected tracts are still reported to lie in the Gobindpur, Tundi and Nirsha thanas, and the less affected in thana Chas. The maps do not show the thana boundaries, and I am uncertain whether the above tracts include the whole of the thana jurisdictions named or not. I am asking the Deputy Commissioner to supply this omission in his next maps. In all eleven test works have been opened, viz., seven within the affected tracts and four in other places, at piece-work rates varying from Re. 1-4 to Re. 1-9, and in two cases (Pokheria tanks) to Rs. 2 3 per thousand cubic feet. According to the last returns (25th ultimo and later dates, see copy of annexed statement marked K), 3,454 persons (3,309 male units) were employed on nine of these works (returns from the other two not having been received). The numbers have gone up considerably during the last 10 days, excepting at the two last mentioned works where the piece-work wage was highest. The explanation of this apparent anomaly is that these two works were, as noticed in my last report, at first much mismanaged and measurements not strictly made. Since then Mr. Luson has corrected this mistake.

7. For gratuitous relief centres have been opened, under Chapter V of the Code, at Pokheria in the Tundi thana and at the subdivisional head-quarters, Gobindpur. Form 6 shows that there were 453 recipients during the week ending the 20th, and 1,023 during the week ending the 27th ultimo, at the Pokheria centre alone, returns from the Gobindpur centre not having been received. There were also 1,343 "dependents" at the two Pokheria relief works in receipt of gratuitous relief during the first of the above weeks, and 1,182 during the second week. The reduction is owing to the checking of abuses in this respect by Mr. Luson. In all, the Deputy Commissioner estimates, there were some 5,000 persons on the gratuitous relief lists on the date of his report, not counting casual relief given through the police under sections 12 and 166 at a cost of Rs. 68 and Rs. 330 during the two weeks respectively. It appears to me that action under Chapter V of the Code will soon have to be considerably extended, and I am asking the Deputy Commissioner to take necessary measures.

8. In paragraph 12 of my No. 474T.—M.R., dated 12th ultimo, I asked that the Public Works Department might be instructed to send the Deputy Commissioner four subordinates as noted in the margin without delay. I trust that the necessary orders have issued. I have appointed, at Mr. Luson's request, three kanungos

2 Overseers.	2 Sub-overseers.

on Rs. 40 per mensem each to supervise the preparation of village (gratuitous relief) lists, and two clerks on Rs. 15 each (to assist at Gobindpur and Pokheria in the distribution of gratuitous relief), and request the sanction of Government to these appointments.

9. I observe that in column 9 of Form E, the Deputy Commissioner has only shown "dependents" on gratuitous relief under section 84 of the Code, and has not included persons receiving gratuitous relief under Chapter V. I beg to be informed if this is correct. I also notice that Mr. Lu'on has omitted to give in the body of his report the particulars regarding death-rate required by section 27 (i) of the Code. His attention will be invited to this matter. The death rates shown in columns 15 and 16 of Form 10 are very low, and I am asking the Deputy Commissioner to verify them.

Hazaribagh.

10. The Deputy Commissioner's report is annexed. It contains but little new matter. But I am satisfied that the time is approaching for arrangements to be made for the opening of some relief works, and especially for the extension of gratuitous relief, and I am about to confer with Mr. Herald, who has just returned from tour, on the subject.

Lohardaga.

11. I regret to state that the Deputy Commissioner's report has again not arrived in time. I can only say that his report for the first half of February (received after submission of my last report) was of a satisfactory character. Speaking generally, there were then no signs of distress in any part of the district, while the price of rice showed a slight down tendency, averaging $9\frac{2}{3}$ pucka seers per rupee as compared with an average of $9\frac{1}{3}$ seers at the end of January. I should add that the reason of the delay in the submission by Mr. Streatfeild of his report is apparently due to his being in camp to the south of the district at a considerable distance from his head-quarters.

Singhbhum.

12. Mr. Bompas continues to speak with assurance of the satisfactory prospects of his district. Rice is still plentiful, though prices appear to have risen slightly (average now is 10 to 12 seers per rupee) owing to the continuance of exports (4,838 maunds during first fortnight of February, and 4,855 maunds during second fortnight), chiefly to North Bihar and Hazaribagh. The Deputy Commissioner remarks that about one-half of these exports come from Mayerbhanj, the rest being taken from his own district.

General.

13. The general inference to be drawn from the reports for the past fortnight is that while the position in Manbhum is somewhat intensifying, the distress in Palamau is turning out to be less acute than was at first apprehended. In Hazaribagh no marked distress has as yet shown itself, but signs of its gradual approach are beginning to appear. In Lohardaga there seems, so far, no need for any apprehension, while in Singhbhum matters continue to be altogether reassuring.

14. The rain during the last two fortnights was fairly general, and has been of decided benefit to the *rabi* without, at the same time, doing any material harm to the *mahua*. I am glad to say that the latter now gives promise everywhere of at least a full average outturn, provided the weather continues favourable.

15. The reports from the different Tributary States go to show that the prevailing scarcity is making itself felt there also, though not, so far as I can judge, very acutely; and, considering the very sparse population and the recourse the inhabitants have to forest edible products, I do not think that we need entertain any serious apprehension regarding them. From returns received from Sirguja and Jashpur I learn that rice is selling there at about 14 pucka seers, and *makai* at 15 and 18 seers per rupee, which compare favourably with the prices in the adjoining British districts. The Chief of the small

State of Korea complains, however, that many of his raiyats are leaving their homes for British territory, especially for Assam; that he has done all he can for them and is now at the end of his resources. I am asking the Deputy Commissioner of Palamau if he can give work to any of these people on the relief works at Ranka and Utari. The Maharaja of Sirguja also reports that large numbers of destitute persons have been and still are coming into his State from the Baghelkhand Agency, and he suggests that this should be prevented. I sometime ago informed the Political Agent of Bhaghelkand of this complaint, and requested that he would let it be widely known that the scarcity extended to these parts also, and that it was useless for people to come here for assistance. I have told the Maharaja, however, that I expect he should arrange that these destitute people be properly relieved before being turned back, and I have no doubt that he will do so. The Raja of Jashpur has sent me a list of two roads and two tanks on which he is starting work at an estimated cost of Rs. 2,050, besides repairing certain houses and temples at a cost of Rs. 3,500 as relief measures. I am informing the other Political Chiefs of this, and asking them to follow his good example.

STATEMENT K.

Test works in the Manbhum District. Reports received by Deputy Commissioner on 2nd March 1897.

H. LUSON,
Deputy Commissioner, Manbhum.

No. 1595R., dated Purulia, the 2nd March 1897.

From—H. LUSON, ESQ., I.C.S., Deputy Commissioner of Manbhum,
To—The Commissioner of the Chota Nagpur Division.

I HAVE the honour to submit my half-monthly report under section 24 of the Bengal Famine Code for the period 16th—28th February 1897.

2. (1) *Area affected.*—The same as reported in my half-monthly report No. 1555F., dated the 19th ultimo, for the period 1st to 15th February 1897. No regular relief circles have yet been formed; but the Revd. A. Campbell is in charge of the administration of gratuitous relief within a radius of about 5 miles from Pukheria on the borders of the Tundi and Nirsha thanas, and the Sub-Registrar of Gobindpur is in charge of the distribution of gratuitous relief in the Gobindpur thana. Gratuitous relief is being given in the Tundi thana by the tahsildar of the Tundi Encumbered Estate, and by the Sub-Inspector of Police. In the other affected thanas, Nirsha and Chas, gratuitous relief is also being distributed by the officers in charge of the thanas. At all police-stations and outposts the officers in charge have small sums for the relief of urgent cases.

3. (2) *General state of the affected tracts.*—The reports received under sections 1 and 161 of the Code show that distress was felt chiefly amongst the helpless and beggars who usually depend upon charity, and that these are being suitably relieved. There is a general complaint of want of labour,* but the timely rain which fell just before the beginning of the period under report softened the soil and afforded employment to many labourers for a short

* Work? A. F.

time. In the affected tracts, except the Chas thana where there is some *rabi* there are scarcely any crops on the ground. In these tracts, however, there are many *mahua* trees, the crop on which is already in blossom, and promises to be an abundant one. As to food-stocks, these are doubtless sufficient for the present. Considerable quantities of food-grains are being imported every week into the affected thanas from the stations on the Jheria extension of the East Indian Railway and from Barakar. The rainfall during the period has been nil. Rain just now would injure the *mahua* crop; that which fell a fortnight ago benefited it. The public health throughout the areas in question is generally reported to be good. In some parts of the affected areas people are emigrating in somewhat larger numbers to Assam; but this is not an unmixed blessing, as I have come across a number of the families of such emigrants on the registers of gratuitous relief, the workers having abandoned their dependents. The reports show that a considerable number of people from up-country are wandering through this district in search of work and food. I have come across some beggars of this class in very poor condition. Cattle-disease prevails in thana Chas of the affected thanas and in several other thanas of the district which are not included in the affected areas. The disease, which the people call cow-pox, is a form of rinderpest, and seems unconnected with the scarcity. The same form of disease prevailed three years ago.

4 (*3*) *Relief Works.*—There are nine test-works open under the District Road Committee besides two, for which I have not received the returns, under the Tundi Encumbered Estate and the Negarkeari Ward's Estates respectively. The two works at Pokheria on which 2,000 persons were employed last week have been conducted practically as relief works. They are, however, being continued as test works. Altogether there were nearly 3,500 persons employed on works on Saturday, the 27th ultimo. Practically all these persons are paid not daily wages, but according to the amount of work done. Four of the works above mentioned are in tracts adjoining the affected tracts, and the remaining seven are within those tracts. From Statement E it will be seen that excluding the small work at Katras where the workers did an insufficient outturn of work, the wage earned by each male unit per diem varied from 1 anna 4 pies to 2 annas and ¼ pie, the average being a little over 1 anna 6 pies or 6 pice. The price of rice is between 9 and 10 seers a rupee, being nearer 9 than 10, so that the wage earned per male unit has been sufficient to procure a trifle under the full ration* (*vide* sections 98 and 103 of the Code). I have given attention to the question of the rates, and have fixed them in consultation with the District Engineer.

*i.e. Three-fourths seer rice, 2 chitaks pulse, ½ chitak salt, ½ chitak ghi or oil, ½ chitak condiments and vegetables.

The various test-works have not attracted so many workers as I expected. After the rain on the 14th, there was a very considerable falling off in the attendance on the works at Pukheria for some days. From these facts I conclude that the reports about the destitution among the labouring classes were somewhat exaggerated.

The test-work first opened after those at Pukheria, which were mismanaged at the commencement, was that in the Jhalda thana, the Khatgaon *bund*; it has ceased to draw workers at Re. 1-9 per 1,000 cubic feet.

5. Small works such as *bunds* and tanks are being carried out by private individuals here and there throughout the district, as the recent rain has made the soil suitable to be worked, and before the *mahua* harvest labour is always cheapest in the district. Early in the half-month I addressed a letter to each of the persons of property and substance in the district, suggesting that they would be doing much good to their poorer neighbours if they would take such works in hand now. I had gathered that some persons of this class were holding their lands in the expectation that Government might do something on a very extensive scale.

6. (*4*)—*Poor-houses.*—Nil. Not required yet.

7. (*5*)—*Organisation for the employment of artisans, women, &c., at their homes.*—Nil. I scarcely think any such organisation is required at present. Nearly all the people in distress are those dependent upon charity and those dependent upon unskilled labourers. The artisans have not yet come to the end of their tether. The persons who feel distress as much as any one in some places are the chaukidars who in this district are generally miserably and irregularly paid; the villagers have almost entirely stopped paying them now in the affected thanas. During the famine of 1874 the chaukidars received doles regularly, and it may be a matter of consideration later on whether such a method will have to be adopted this year.

8. (*6*)—*Organisation of grain doles and money doles.*—Doles are almost invariably made in grain. The organisation for their distribution is described in paragraph 2 above. This district is singularly unfortunate in not possessing a sprinkling of people of the upper and better middle classes among the population. The zamindars are generally either under the Encumbered Estates Act, or qualifying to come under it, and scarcely anywhere throughout the affected thanas are there persons to whom I should care to entrust the distribution of gratuitous relief in the first instance. The police is not a good agency for this purpose, but it is in many places the only agency available to begin with. I have, however, got together a number of names for a sub-committee in the Gobindpur subdivision, and I hope before long to put the administration of gratuitous relief into the hands of still smaller committees formed by two or three of these persons.

9. (*7*) *Relief in kitchens*—Nil.

10. (*8*) *Number of persons to whom loans under the Land Improvement Act or under the Agriculturists' Loans Act have been made.*—In my last report I mentioned that I was husbanding the amounts I had available for these purposes to see where they could be best

applied. I have now made allotments to different parganas, and I have appointed kanungos to make the necessary investigations, which can be summary and at the same time effective, if properly done. A number of such investigations has been already made by the Sub-Deputy Collector, and money will shortly be in the hands of the persons who have applied for it.

11. (*9*) *Financial Statement for the fortnight.*—

				Rs.	A.	P.
A.—Receipts from the District Road Cess Fund			...	2,900	0	0
B.— xpenditure—						
(*a*) Works	...	...	...	1,607	7	10
(*b*) Relief by doles	...	...	...	1,224	12	3½

12. (*10*) *General.*—I have myself visited the centre of the district, the east of the district, and again Pokheria and the Tundi and Nirsha thanas during the fortnight. At the different centres of the distribution of gratuitous relief, I have with medical assistance, whenever available, examined the recipients. The labouring classes I think show very little, if any, signs of emaciation ; amongst those who take gratuitous doles only a small portion appear to me to be really much reduced for want of food, though there are doubtless some who are much reduced. At some centres a number of able-bodied persons had found their way on to the registers under Chapter V of the Code. As soon as I discovered this, I issued instructions that no distributing officer should give any gratuitous relief to an able-bodied person not defined in section 42 of the Code, unless he certified in his own hand that he had ascertained after proper enquiry that such person would otherwise die of starvation. I think a considerable amount of gratuitous relief in this district is necessary, but it was being overdone in some places.

13. I annex the statements prescribed by sections 25 and 26 of the Code, as well as a map in triplicate. The statements contain all the information at my disposal to-day. In the map I have coloured the thanas of Tundi, Nirsha and Gobindpur brown (seriously affected), but have kept thana Chas blue (slightly affected).

FORM No. 5.

[See section 26 (1) of the Code.]

FAMINE STATEMENT D.

DISTRICT MANBHUM.

DISTRICT MANBHUM.

Statement of Gratuitous Relief for the week ending 20th February 1897.

NAME OF CIRCLE AND HEADS OF GRATUITOUS RELIEF.	NUMBER OF PERSONS RECEIVING GRATUITOUS RELIEF.				Money expended.
	Men.	Women.	Children.	Total.	
1	2	3	4	5	6
Pokhuria—					Rs. A. P.
(1) Under Chapter V ...	70	161	222	453	139 15 10½
(2) Cash equivalent of grain allowance to non-working children and dependants on test works.	2	21	1,320	1,543	245 6 6
(3) Relief of starving wanderers and casual relief.	Not available.	...	...	...	68 6 6
	For week ending 27th February 1897.				
Pokhuria—					
(1) Under Chapter V ...	149	334	540	1,023	248 13 10½
(2) Cash equivalent of grain allowance to non-working children and dependants on test works.	5	22	1,155	1,182	192 8 0
(3) Relief of starving wanderers and casual relief.	Not available.	...	...	...	329 9 6½

N. B.—Detailed figures for other circles for week ending 20th not yet received from different circles. No figures yet received from other circles for week ending 27th instant.

The figures in column 6 represent the cash equivalent of grain (rice), calculated at 9 seers to the rupee. The doles given out were ½ seer an adult and ¼ seer a child, irrespective of age. The dole to children irrespective of age was contrary to sections 84 and 99 of the Code, under which small children should have received only ½ seer a day. I have asked the distributing officer, the Revd. A. Campbell, to pay for the excess doles he has been giving out. A large portion of the relief under head (3) for the week ending the 27th instant was in my opinion unnecessary, but it was given under directions of the Subdivisional Officer. Gratuitous relief in the Pokhuria Circle has been on a much too extravagant scale, and after visiting the place I have taken means to reduce it within reasonable limits. The figures for the current and succeeding weeks will, I have no doubt, show very considerable decreases.

FORM No. 7.

[See section 26 (iii) of the Code.]

FAMINE STATEMENT E.

DISTRICT MANBHUM.

Abstract statement of Relief Works and Gratuitous Relief for the half-month ending 27th February 1897.

WEEK.	A, B, C AND D WORKERS PAID BY TASK WORK.				WORKERS PAID BY DAILY WAGES IRRESPECTIVE OF TASK.		Total amount disbursed on task work and daily labour.	GRATUITOUS RELIEF.		
	Average number of male units per diem.	Work done per diem by each male unit.	Wage earned by each male unit per diem.	Cost per 1,000 cubic feet.	Average number of male units per diem.	Wage earned by each male unit per diem.		Number of adult units in receipt of gratuitous relief.	Average dole.	Amount expended.
1	2	3	4	5	6	7	8	9	10	11
		C. ft.	Rs. A. P.	Rs. A. P.		Rs. A. P.	Rs. A. P.			Rs. A. P.
For week ending 20th February 1897.										
Pokhuria east and west tanks ...	1,102	42½	0 1 0½ (Add 7 pies, value of rice; total daily wage = As. 1-7½).	1 9 0	...	...	.....	678	Nearly one seer.	345 6 6
For week ending 27th February 1897.										
Pokhuria east and west tanks ...	1,497	28½	0 1 0 Almost exactly. (Add 4 pies, value of rice; then total daily wage = As. 1-4).	2 3 0	...	..	.....	610	Ditto ...	192 8 0
Gourangdi road work	154	82	0 1 8½	Average 1 4 10	...	...	.....	...	.....	.....
Chas road work ...	119	97	0 2 0½							
Cholama road work	331	75	0 1 6½							
Chinpina road work	298	78	0 1 7½							
Nirsha road work	118	87	0 1 4½							
Katras road work	55	82	0 1 1							
Khatgaon bund ...	20	74	0 1 6½							

N. B.—It will be noticed that the numbers of dependants on the workers on the Pokhuria works largely exceeds the 10 per cent. mentioned in section 84 of the Code. The Subdivisional Officer had taken a number of workers and placed them among dependants, and had allowed too many children to be admitted as dependants. Hence I kept the rate per 1,000 cubic feet at Rs. 1-9. The amount of work done is small, but this is due to the very hard soil chiefly; the decrease in the outturn for the week ending 27th February is due mainly to the increase of lift and lead.

Where gangs have been formed, column 3 should show the task set for the whole gang, columns 5, 7 and 9 being left blank, and a footnote should be inserted showing the members in gang under each class.

H. Luson,

Deputy Commissioner, Manbhum.

No. 1950R., dated Daltonganj, the 2nd March 1897.

From—R. H. Renny, Esq., Deputy Commissioner of Palamau,
To—The Commissioner of the Chota Nagpur Division.

I have the honour to submit herewith my fortnightly report under section 13 of the Famine Code, for the fortnight ending 28th February 1897.

Half-monthly report for the period 16th to end of the month of February 1897.

District Palamau.

My first half-monthly report for February was under section 13 of the Famine Code.

Preliminary.

As we have now passed out of the stage of "test" works and are carrying on "relief" works, I have, with the previous sanction of the Commissioner of the Division, elected to treat all operations as "relief" and not "test relief" operations.

The permission granted to the Deputy Commissioner to style the works now being carried on as "relief works" instead of "test works" is accompanied with the provisoes that (1) no change is to be made in existing rates without my sanction, and (2) that rule 67 (1) of the Famine Code is for the present suspended. In other words, all the work is to be done on the *piece-work* system until further orders. For the rates allowed, reference is invited to paragraph 5 of my last report (No. 575T.M. R., dated 23rd-24th ultimo).

A. Forbes.—6-3-97.

2. During the half-month under report, I have visited the jurisdictions of thanas Daltonganj and Patan with outposts Lesliganj, Panki and Manatu, and have carefully inspected the relief works at Shahpur, Lesliganj, Panki and Nawajaipur and the working of the committees for administration of gratuitous relief at Lesliganj, Panki, Manatu and Patan.

3. Mr. Sunder, Superintendent of famine relief operations, entered on his famine duties on the 14th instant, and was posted by me to the western circle, comprising the jurisdictions of thanas Garhwa, Hussenabad and Ranka with their respective outposts of Untari, Bhownathpur and Bhandaria; but at the special request of the Commissioner of the Division I have transferred him to the eastern circle, comprising the jurisdiction of thanas Lateyahar, Balumath and Mahuadand with their respective outposts of Ker, Chandwa and Garoo. I have under the same request placed outposts of Lesliganj and Panki under Mr. Sunder. I am afraid, however, that the jurisdiction is far too large, and that Panki and Lesliganj will have to be withdrawn and placed under the officer in charge of the central circle, when such officer arrives. To the western circle Maulvi Mahomed Yasufali, Deputy Magistrate and Deputy Collector, newly posted to this district for famine works, has been posted as Superintendent. He joined here on the 24th ultimo.

4. The whole area of the district is more or less affected, for in 63 markets out of 90 in the district rice is selling at below nine seers, in 17 at nine seers, and in 10 at below ten seers per rupee. The worst affected tracts are the jurisdictions of thanas Gurhwa, Daltonganj, Balumath, Lateyahar and Patan with outposts Untari, Lesliganj, Panki, Chandwa, Ker and Manatu, the area being 2,563 square miles and the population 383,440 souls; of the population the portion affected may be set down at about 10,000 souls.

(1) Area affected during the period under report, and approximate estimate of the population affected; number of relief circles and officers in charge

5. There are nine relief circles with nine circle officers in charge. The circles are far apart, hence an officer to each circle.

(2) General state of affected tracts during the half-month under report: crop prospects, food-stocks, importation or exportation of food-grains, rainfall, public health, emigration or immigration of famished people, condition of cattle.

6. No change to report since last report. The number on relief works is going up daily, whilst he price of rice and of food grains generally has risen. There is still food in the country, and the late rain has replenished the supply of edible jungle products. In the parts visited by me I found the *rabi* crop a poor one, the *mohua* crop very backward owing to the prevailing abnormal cold weather, and no mango prospects anywhere. The *mohua* trees are in heavy leaf, whereas they should be bare of leaf or almost so.

7. Mr. Sunder happily reports in favourable terms of the parts visited by him. He says the *rabi* crop is excellent and a 16-anna yield is looked forward to, and that the *mohua* is dropping its leaves and beginning to blossom. Mr. Fullerton, District Superintendent of Police, writing of the *rabi* crops from Chattarpur thana, says that they are not good, but that the *mohua* promises to be a bumper one.

8. The food-stock, judging from the high prices prevailing and the fact that the stocks exposed for sale at every market were bought up or nearly so is, I should judge, very low.

9. During the half-month under report a Gaya merchant, by name Ghansham Das, sent for sale to Daltonganj about 600 maunds of country rice. One of his agents here offered it for sale at 16 seers kutcha (9 seers pucka) per rupee immediately on arrival, and 80 maunds were disposed of there and then. By next morning, however, another agent appeared and raised the price to 14 seers kutcha (7 seers 14 chitaks pucka). The prevailing market rate for the description of rice offered for sale on this sale ceased. The price has since been lowered to 15 kutcha seers (8 seers 7 chitaks), but without attracting many purchasers.

10. On the 25th ultimo 342 maunds and on the 26th idem 316 maunds—total 658 maunds—of Burma rice have been imported into Daltonganj under the bounty system by the said Ghansham Das. At first it was offered for sale at 15 seers kutcha (8 seers 7 chitaks pucka) per rupee, and the sales were slack in consequence; last evening, however, I received a telegram from Ghansham Das, asking me to inform his agent that the Burma rice was to be sold at 16 seers kutcha (9 seers pucka) per rupee. I am informed that up to date 214 maunds of this Burma rice has been disposed of.

11. Immediately I received official intimation that the Government of India had sanctioned the payment of a "bounty" of 8 annas a maund to anyone importing Burma rice into Palamau, I sent post-card notices to every market, police-station and outpost, informing the general public of the fact, and intimating that such Burma rice was actually on its way to Daltonganj and would soon be available for purchase here. I attribute the slow sales to the high price demanded, for I am afraid that after all Palamau has gone through during the past long period of high prices and scarcity, very few of her people can afford to pay for rice at 9 seers per rupee. Considering the handsome "bounty" being paid by Government, I consider it would pay importers over and over again to lower the price to 17 seers kutcha (9 seers 9 chitaks pucka) per rupee. At this rate, bounty included, the profit would be 1 seer 10 chitaks per maund.

Mr. Ronny reports later (by telegram) that this rice came from Nasriganj in Shahabad.
A. FORBES—6-3-96.

12. Mr. Sunder reports that he saw 484 pack-bullocks taking paddy to Singrawlee in the Mirzapur district, North-Western Provinces. This was from Untari. He also reports exports to Bhabhua in the Shahabad (Arrah) district.

13. I fancy what Mr. Sunder saw was exportation of paddy from the golahs of the Bhaiya Saheb of Untari. It has been no secret that this zamindar was in possession of a large stock of paddy, and not improbably, finding that the prospects of the *rabi* are good in his large estate, he is parting with his surplus stock of paddy whilst prices are high. Both that part of Mirzapore district bordering on Palamau and Bhabhua in Shahabad (Arrah) are said by common report to be very famine-stricken indeed.

From the concluding remarks in this paragraph Mr. Ronny apparently means to say that this rice came from the Sirguja state. In a later telegram he informs me that he finds on inquiry that it was smuggled from Sirguja in ghee "coopas."
A. FORBES.—6-3-96.

14. I have to report that about 61 bullock-loads of rice, weighing about 122 "pucka" maunds, are said to have found their way into the Gurhwa market on last Thursday, the 25th ultimo. I have written to enquire how this came about. It will be grand news indeed for Palamau if Sirguja has opened her doors to export again. The reasons I attribute to Untari may also have influenced Sirguja. I hope such is the case.

15. During the half-month under report there was no rain. The first week was generally cloudy, but the last week has been bright. The weather is, however, abnormally cold for this season of the year, especially in the eastern parts, where there was frost two nights ago; this cool weather has retarded the *mohua* blossoming.

16. The public health is good; a few cases of small-pox and chicken-pox have been reported. Mr. Sunder reports that he found 84 men, women and children, who had come from Singrawlee in Mirzapur, North-Western Provinces, and Bhabhua in Shahabad (Arrah), on the relief works at Untari; he adds that they were weak from want of sufficient food.

17. There is the usual flow and ebb of labourers from the east part of the district to the tea-gardens in the Western Duars.

18. The condition of the cattle up to date is good; the late rain has both improved and increased the fodder and water-supply. Some cases of cattle-disease were reported in the early part of the half-month from Balumath.

(3) Number of relief works open in or near the affected tracts, &c.

19. The number of relief works open in the affected tracts is nine. All are paid for task work, and the rate of wages for them is only one rate current here, *i.e.* Rs. 2-3 per 1,000 cubic feet of earthwork. The payments are made partly in rice and partly in cash.

20. Figures as to numbers employed, &c., are given in Appendix D annexed.

The time has come, I consider, when the Public Works Department should be called into requisition and some of the works being carried on here placed under the supervision of that Department—*vide* paragraph 2, Agricultural circular No. 44, dated 13th February 1897.

These works are far and away beyond the capacity of any officer of the Engineering Department Palamau can boast of. The District Engineer is merely of the upper subordinate class of the district public work, and overseers and sub-overseers selected by Government and sent to me as such are, I am afraid, all unpractised or otherwise unfitted for the work on which they have been deputed. I am addressing the Commissioner officially on this subject.

21. Besides the Government, relief works have been opened by several well-to-do zamindars of the district. I have not exact figures before me, but the number so relieved cannot be far short of 2,000 Several zamindars and well-to-do land-owners and others have quite lately received advances under the Land Improvement Loans Act, under the terms offered in Government Notification No. 69 of 5th January 1897. The first instalments advanced amount to Rs. 3,333-5-4. The work for making these advances is progressing now that I have more officers' services placed at my disposal.

22. The zamindars doing work otherwise than under advances are paying at the rate of Re. 1-6 per 1,000 cubic feet; the labourers also receive a meal during the day. These works are more popular than our works, because there is no strict supervision and time is not taken into account: the labourer commences work when he likes, leaves off work when he likes, and works when he likes.

23. Besides the above there are a large number of persons doing works of improvement in Government estates for which funds have been placed at my disposal by the Board of Revenue. Taking all in all, I fancy the number of persons being relieved in the Palamau district is not far short of 8,000 souls.

24 A Charitable Relief Committee for the administration of private relief has been formed here during the half-month under report, and has commenced work.

25. No poor-houses have been opened. As reported in a former report, all poor are being relieved at their homes. Dependants of relief workers are being similarly relieved. This is the procedure followed here. A local committee of respectable persons has been formed at each thana and outpost head-quarters, and to those at thana Rs. 50 and to those at outposts Rs. 30 have been given as permanent advances. Each committee has made a house-to-house enquiry, and at the villages where they have found persons entitled to gratuitous relief they have appointed a panchayat of three or more respectable residents of the village, and to this panch they have advanced out of the permanent advance a sum sufficient for the support of all persons selected for gratuitous relief for 20 days. The panch pay each recipient daily. At the end of a fortnight the local committee make enquiries to ascertain that all is going right, thus by local enquiry by one or more members, and they recoup the expenditure incurred during the past fortnight to the village panch. Circle officers have been directed to refer all dependants on workers in their charge to the local committees for administering gratuitous relief, with a ticket stating who they are, and superintendents and circle officers have been instructed to take advantage of every opportunity of satisfying themselves that all is going right both in regard to local committees and village panchayats. All payments are made in money; a man receives 5 pice, a woman 4 pice, a big child 3 pice, and a small child 2 pice per diem under section 103 (first) of the Famine Code. The one pice extra has been allowed, as the price of rice has fallen permanently below 10 seers per rupee. Food-grain and not cash is distributed at Daltonganj head-quarters. No private poor-houses.

(4) Number of poor houses ope and the scale of food distributed

I am not sure whether this was the intention of the Code, but I think that Mr. Renny's system is a convenient one as tending to keep non-working dependants entirely separate from the workers and away from the works.

A. FORBES—6-3-97.

26. Nothing done under this head. No necessity has yet arisen.

(5) Organisation for employment of artizans.

27. See paragraph 25 against (4). Nothing further done.

(6) Organization for the distributions of grain doles or money doles.

28. None. No necessity.

(7) Relief kitchens.

Number of persons to whom loans were granted during the fortnight.	Amount applied for.	Amount sanctioned.	Amount as paid in first instalment.
1	2	3	4
6	Rs. 10,000	Rs. 10,000	Rs. A. P. 3,333 5 4

(8) Number of persons to whom loans under the Land Improvement Act have been made.

I have allowed loans, under certain conditions to provide against fraud, for the purchase of plough cattle; and I have refused to allow advances for seed until the time for sowing approaches. What I have disallowed are loans to cultivators generally, to enable them to avoid having to go to the relief-works.

A. F.—6-3-97.

29. No loans under the Agriculturists' Loans Act have been granted, as the Commissioner is opposed to this.

30. All loans granted up to date under the Land Improvement Loans Act have been granted on security of landed property. The applications for such loans are tested on the spot by officers of Government who make all necessary inspections and enquiries and then report to me. In my office the security is tested before the loan is sanctioned; about 113

of the amount asked for and recommended is advanced as a first instalment to each applicant. The total amount lent under this head up to date is Rs. 3,333-5-4, as reported above. The work of granting such loans has been much retarded for want of officers to examine and report on the applications. Now that some officers have arrived the work is being pushed forward.

(9) 31. Statements called for are annexed.

(10) 32. Please refer to former reports, especially my report No. 1521R., dated 5th December 1896.

(11) 33. No change anywhere yet, either for better or worse, to require notice here.

R. H. RENNY,

Deputy Commissioner, Palamau.

FORM No. 5.

[See section 26 (i) of the Code.]

(2) On daily wages	32	2	6
Total ...	6,436	5	0
(*b*) (1) On gratuitous relief by grain and money doles	915	6	1
(2) Miscellaneous expenditure	0	10	0
Total ...	916	0	1
(*c*) Advance to land-holders for relief works ...	3,333	5	4
(*d*) Bounty for Burmah rice	329	0	0
Total of *a*, *b*, *c*, *d* ...	11,015	10	5

Besides this, 100 maunds of reserve grain has been purchased by Government for Rs. 460-3-10 only.

R. H. RENNY,

Deputy Commissioner of Palamau.

No. 1689R., dated the 4th March 1897.

Fortnightly Famine Report of the District of Hazaribagh under sections 13 and 24 for the fortnight ending 28th February 1897.

FIGURES RELATE TO WEEKS ENDING 20TH AND 27TH FEBRUARY 1897.

1. *General condition.*—The fortnight has brought to light a further number of isolated cases of distress, but so far there is no general call for assistance in the district. I have been on tour throughout the south of the district, and found people able to get on without assistance at all places I visited, except at Gumeah, which contains a population of 6,000 in an area of about 10 square miles. Owing to the dense population there is not there the same assistance from jungle products, and the place being 19 miles from a main road, other sources of income outside the village areas are not available. There were 300 to 400 persons who seemed to need some assistance. Earthwork has been started.* Cotton-making and a kitchen have also been arranged for. In all other parts the 35 road-cess works have failed to attract more than the ordinary number of labourers, and cannot therefore be considered as relief works.

* Some particulars about this work should have been given.
A. FORBES—6-3-97.

2. *Prospects of crops.*—The late rains have much improved the prospects of *rabi* crops *Mahua* promises to be a full crop should there be no rain.

3. *Prices.*—Statements showing names of *hâts* and the selling price (per rupee) of rice, marua, makai, and mahua for the last two weeks of January and of February are submitted herewith.

The statement is in too great detail, and is not, therefore submitted. A statement in the form used by the Deputy Commissioner of Palamau will in future be called for.
A. FORBES—6-3-97.

4. *Importation by rail.*—Statements 8 and 9 are submitted herewith.

5. *Statistics of traffic on the Grand Trunk Road (Dunwa).*—A statement of statistics of import and of export traffic down the Grand Trunk Road for the period from 20th January 1897 to 18th February 1897 is annexed.

6. *Rainfall.*—At Sadar, 1·02. At Giridih, 3·2.

7. *Public health.*—Very good.

8. *Emigration.*—Two thousand two hundred and twenty persons emigrated from this district during the month of February 1897, against 688 persons in February 1896. This

is emigration through depôts and irrespective of free emigration to the Duars, of which no figures are kept.

9. *Number and nature of public works opened in the district.*—A comparative statement showing the particulars required is submitted herewith.

10. *Test-works.*—The works shown in the above statement against Road Cess are to be treated as test-works.

11. *Relief under section 12 additional.*—During the fortnight under report Rs. 110 were sent to the thana and outpost officers for giving gratuitous relief, as directed in section 12 of the Famine Code. The total amount paid for this purpose amounts to Rs. 340. About half has been spent.

12. *Loans.*—Four applications for loan of Rs. 950 were received during the fortnight under report. These are loans under special terms for construction of earth-works. They are being enquired into. The offers of loans free of interest, though widely circulated, have failed so far to attract applicants to any considerable extent.

13. *Condition of cattle.*—Very little disease reported.

14. *Rates of wages.*—The rate given on ordinary works is Re. 1-9 per 1,000 cubic feet for municipal estates and road cess, or 2*a.* 6*p.* per *loggi* (of 10 × 10 ft.). Public Works Department rates remain unchanged.

15. *Organisation for employment of artizans, women, &c.*—Lists of *bhadralok* and other persons unable to work at earth-work, referred to in the previous report, are being received. The system of making thread from cotton, introduced into the town of Hazaribagh, has received large extension during the fortnight. It is being introduced at Giridih and at Gumeah, where there are persons of good caste in want. It will be further extended to muffassal during the present fortnight.

16. *Relief in kitchen.*—Particulars are given in statement 6 annexed.

Statements in forms 7, 10, and 11 are annexed.

J. L. HERALD,

Deputy Commissioner, Hazaribagh.

	Total ...	.. ...	.....	.....	.....	.....	287

IMPORT.

Traffic on Grand Trunk Road.

Statistics taken between 20th January and 18th February 1897 (30 days).

		No.
1.	Travellers in search of employment	4,059
	Daily average (mostly without sufficient funds) ...	135
2.	Pilgrims	224
	Daily average (nearly all in distress) ...	7·5
3.	Ordinary travellers (excluding villagers)	288
	Daily average	9·6
4.	Merchants, cartmen, bullock drivers	604
	Daily average (these went back to similar extent, see exports)	20
5.	Number of pack-bullocks	306
	Daily average (rather fewer than average daily leaving district)	10·2
6.	Number of carts	382
	Daily average (rather fewer than average daily leaving district)	12·7

7. Importations of food-supplies during above period:—

	Mds.		Mds.
(1) Rice	504	= daily	16·8
(2) Dhan	64	= „	2·1
(3) Rahar	227	= „	7·6
(4) Potatoes	33	= „	1·1
(5) Wheat	149	= „	5·
(6) Khesary	173	= „	5·8
(7) Gram	441	= „	14·7
(8) Makai	100	= „	3·3
(9) Oats and barley	83	= „	2·8
(10) Other grains	120	= „	4·0
(11) Gur	531	= „	17·7

Daily average = 81·9 of all foods.

EXPORT TRAFFIC.

1.	Number of passengers (exoluding villagers of neighbourhood)	640
	Daly average (balances number of merchants entering district)	21·3
2.	Number of pack-bullocks	378
	Daily average	12·6
3.	Number of carts	470
	Daily average	15·7

4. Exports:—

	Mds.		Mds.
(1) Mahua	2,822	= daily	94
(2) Timber	3,250	= „	108
(3) Lac	2,170	= „	72
(4) Marua	36	= „	1·2
(5) Sabé grass	230	= „	7·6

(The export of mahua is much greater than in ordinary years.)

The figures show that the importation of food from Gaya district, 82 maunds daily, is more than counterbalanced by the exportation of 94 maunds daily of old mahua.

There is a fair trade in the export of timber and lac (including shellac) from the district. No food-grains, except a small quantity of marua, were exported.

The exportation of mahua is due to an increased demand outside the district, and to large stocks left over on account of decrease in outturn of country spirits. The excessive quantities drawn from this district probably show that people in Bihar are using this cheap food to a larger extent this year.

Statement showing the number, nature, &c., of Public Works open in the District of Hazaribagh for the 2nd half-month February 1897.

J. L. HERALD,
Deputy Commissioner, Hazaribagh

No. 740(Fam.), dated Calcutta, the 13th March 1897.

From—M. FINUCANE, Esq., Secretary to the Government of Bengal,
To—The Commissioner of the Bhagalpur Division.

I AM directed to acknowledge the receipt of your communications noted on the margin, relating to distress in the districts of Bhagalpur and Sonthal Parganas, and in reply to convey the following observations and orders of the Lieutenant-Governor.

(1) Letter No. 318Fct., dated the 4th March 1897 with enclosures.
(2) Letter No. 313F., dated the 6th March 1897, with enclosures.
(3) Letter No. 307F., dated the 5th March 1897, with map.
(4) Memorandum No. 309F., dated the 5th March 1897, with enclosure.

2. *Bhagalpur.*—The Lieutenant-Governor agrees generally with the views expressed by you. His Honour notices that the Subdivisional Officer of Supaul has not been able to submit his report in due time. It is hoped that the instructions which you propose to issue will ensure greater punctuality in future.

As regards the establishment required for the Madhipura subdivision, I am to invite your attention to Government order No. 629Agri. (Fam.), in which sanction was accorded to the temporary employment of a kanungo on Rs. 50 a month. I am now to convey the Lieutenant-Governor's sanction to the entertainment of the additional establishment noted on the margin, and to the appointment of Mr. H. D. Christian to be Superintendent of Charge for thana Bongong, on a salary of Rs. 200, with a horse allowance of Rs. 100 per mensem.

(1) One temporary kanungo for pargana Kabkhand on Rs. 50 a month.
(2) One temporary kanungo for pargana Uttarkhand on Rs. 50 a month.
(3) One extra clerk for the subdivisional office on Rs. 30 a month.

3. *Sonthal Parganas.*—The Lieutenant-Governor agrees generally with your views as to the utilisation of the existing staff of Deputy and Sub-Deputy Collectors in this district. The report of the Deputy Commissioner, No. 5213R., dated the 3rd March 1897, submitted to Government with your letter No. 313F, dated the 6th idem, leaves no room for doubt that there is distress in parts of the Jamtara subdivision, and the tract will be classed among the affected tracts of the Province. The Charge Superintendent required for this tract should, as you have directed, be provided by employing on this duty one of the Deputy or Sub-Deputy Collectors of the existing district staff, and the employment of such ministerial and subordinate staff as may be found necessary, may be sanctioned by you.

To meet expenditure on famine relief in the Jamtara subdivision during the current financial year, the Deputy Commissioner has applied for a Government grant of Rs. 5,000 to supplement what is available from the District Road Fund. The Lieutenant-Governor sanctions the grant applied for, the money being provided by transferring Rs. 5,000 to head (*a*), Relief works and gratuitous relief, from the sum of Rs. 10,000 provided for the Sonthal Parganas for 1896-97 under head (*b*), Advances for village works, in the estimatse communicated to you with Government Circular No. 45Fam., dated the 16th February 1897. Care must be taken that all works are carried on strictly on the principles as to task laid down in the Code and the Government circulars.

No. 318Fct., dated Camp Rajmahal, the 4th March 1897.

From—W. B. OLDHAM, Esq., Commissioner of the Bhagalpur Division and Sonthal Parganas,

To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my half-monthly report No. 309Fct., dated Sirsi in Malda, the 22nd February 1897, I have the honour to forward in original the report under section 24 of the Famine Code for the period from 16th to 28th February for the Bhagalpur district and the second half-monthly report for February 1897 under section 13 for the Sonthal Parganas, both of which reached me after my arrival at Rajmahal to-day. There is no change in the condition or prospects of any of the other three districts of the Division. In them the Collectors and District Boards are still postponing expenditure and keeping back work while watching how matters turn out and waiting to see what the demands may be. Their ordinary expenditure and works of the kind which would afford relief (whether it is wanted or not) need no longer be kept back, as the season has so far advanced, but if the dearness of food has cheapened the supply of labour, efforts ought to be made to carry out work at the lowest rate which the circumstances make possible, without going so low as the standards prescribed for test works and famine relief works. These remarks of course do not apply to tracts declared to be effected.

1. Collector of Bhagalpur's No. 2681G., dated 3rd March 1897, and map.
2 Deputy Commissioner of Sonthal Parganas' No. 5146R., dated 1st March 1897.

2. *Bhagalpur.*—Though Mr. McIntosh's report is incomplete, it is very satisfactory. I know of no good reason for the statements for the Supaul subdivision not having been sent, as the Subdivisional Officer has lately been given a competent colleague to relieve him of his sub-treasury and much routine duty, and a great deal of his judicial work. It will be impressed on him that he must attend to the strict orders which regulate the case instead of diverging to irregular methods of his own, however philanthropic, which seem to interfere with his carrying out those orders punctually. Next week I will examine with Mr. McIntosh the tract which he thinks to be threatened in the south of his district. Meanwhile I support his proposals for establishment, and have sent a separate application for sanction to the temporary kanungo whom I have already given him, but who is included in the proposals now submitted. In my last report I prepared Government for the nomination of Mr. H. D. Christian as charge Superintendent. He is member of the well known Monghyr family of his name and is an indigo-planter in the Bongong thana. My predecessor, Mr. Quinn, took advantage of his status and abilities to get him appointed to be Manager of the Lagma Ward's Estate, without interference with his private business, and the arrangement has proved to be very satisfactory. Mr. Christian is also a most serviceable Honorary Magistrate, and altogether it is fortunate that he is at our disposal for the duties for which he is nominated. The statements for Bhagalpur will follow as soon as they are received.

3. *The Sonthal Parganas.*—Mr. Carstairs is still far more oppressed by the anxieties and uncertainties of the position than by any actual needs, and I have only to notice at present what he says in his 20th and 21st paragraphs on the the subject of his staff, and wish to make what I write on the subject as distinct as possible. I have satisfied myself that while the Deputy Commissioner has had too much to do, and has been unable to get through his work punctually and to clear his arrears, his numerous subordinates, with the single exception of Mr. E M'L. Smith, the Subdivisional Officer of Pakour, have not been and are not as fully employed as the other officers of their class elsewhere in the division. A plain instance is the fact, only recently discovered by me, that in January last the Subdivisional Officer of Rajmahal was absent from his subdivision, though with Mr. Carstairs, for 25 consecutive days. No other district could, in ordinary times, afford such a length of absence by one of its Subdivisional Officers, and that under notice occurred just at the time when the Deputy Commissioner was complaining of the drafts from his staff. Mr. Carstairs, who has been now for nearly 11 years in the Sonthal Parganas, does not realize how these subordinate officers have to work elsewhere, and I have insisted that if the Sonthal Parganas subordinates are not to do as much as they used to, they must at least be as fully employed as their colleagues in other districts

are. I have satisfied myself here at Rajmahal to-day that at least the Sub-Deputy Collector can be spared for greater exigencies elsewhere. Now that the premature alarm raised in Godda has subsided, I am fully aware that there is not sufficient work there for the three officers stationed there at present. The Sub-Deputy Collector at Deoghur, who is enjoying an extension of service, is said to have broken down, and I have called for a report on the subject in order that he may retire at once; but apart from this personal accident, the officer is in reserve. The Subdivisional Officer of Deoghur has a very capable and responsible indigneous agency at his call, in the resident Ghatwal talukdars, who are or can be linked to him by the Regular Police, and who should be specially used, as they have been used, and have proved useful, in past emergencies of different kinds. Moreover, the Manager of the Wards' estates in that subdivision is a most trustworthy and competent agent, who served with me throughout both the Bihar and Madras famines, and can command subordinate agents. Finally, there is the Forest Officer at Dumka, whose duties are never heavy, and in a year like the present are reduced to a minimum. In the last Bengal Administration Report, I remember that he was mentioned as virtually filling the place of Superintendent of the Damin-i-koh, and Mr. Carstairs has still to make proposals for employing him in the present exigency in this virtual capacity, and, so far, setting other officers free. What chiefly oppresses the Deputy Commissioner and seems to prevent his organizing and resorting to the resources at his disposal is the weight of his judicial work. Some of this must be dealt with more slowly, and Mr. Carstairs cannot hope in a time like this to keep up to the standard of disposals which he has attained and on which he can justly pride himself, as it is a great contrast to the delays which marked the administration of civil justice in the Sonthal Parganas till ten years ago. With the consent of Government I myself am to go to Dumka and will in my capacity of High Court for the Sonthal Parganas try the Sessions cases which Mr. Carstairs estimated would take up sixteen days of his time. Meanwhile, as stated in my last report, I can still spare one Deputy Collector and two Sub-Deputy Collectors for the Sonthal Parganas when the actual demands for them there are as great as those which now employ them elsewhere. I have informed Mr. Carstairs that he can post his own Sub-Deputy Collectors, of whom he still has seven, wherever, he finds that their services are most needed.

No. 2681G., dated Bhagalpur, the 3rd March 1897.

From—H. J. McIntosh, Esq., C.S., Collector of Bhagalpur,

To—The Commissioner of the Bhagalpur Division.

In continuation of my letter No. 2507G., dated the 17th ultimo, I have the honour to submit the following report under section 24 of the Bengal Famine Code. The figures of this report relate to the week ending 28th February 1897.

2. Regarding South Bhagalpur, I have nothing to add to what I said in my last fortnightly report. No test work has been opened in South Bhagalpur.

3. In North Bhagalpur, I was on tour from the 17th to the 26th of the month. The present report is based on what I saw there and on the statements in Form No. 19, which have been submitted to me by the District Engineer. The Subdivisional Officer of Madhipura has submitted a report under section 24, but again, I regret to say, no report has been received from the Subdivisional Officer of Supaul, although a special reminder was sent to him to be punctual with his report.

4. In Madhipura, the area affected is the same as in my last report, viz., thana Bongong, pargana Kabkhand, where the rice crop failed is badly affected, whereas pargana Uttarkhand of this thana is only very slightly affected at present.

5. As in my last report, two relief works were open in thana Bongong during the period under review—one in pargana Kabkhand and one in pargana Uttarkhand. There has been a very marked increase in the number of persons seeking employment on the work in pargana Kabkhand. The maximum number of workers on any one day was 7,293 with 306 non-working children on the 25th February, while the actual number on the 27th February (the last working day of the period) was 5,828 with 295 non-working children.

6. The relief work in pargana Kabkhand is a road running east to west through the centre of the affected tract, so situated as to be within reasonable reach of the greater part of the pargana. So far it has afforded sufficient employment for those who sought it. It is true that the falling off in numbers between the 25th and 27th of the month is ascribed to the fact that the work has proceeded eastwards to a considerable distance, and that consequently the inhabitants of a number of villages to the west ceased to attend the work, but I do not attribute much importance to this. I found by personal inquiry while inspecting the work that so long as work was progressing in, or close to, a large village, many

people turned out from that village to earn a few days' wages. They would not, however, take the trouble to walk half-a-mile or so when the work moved on. In their case, they were willing to take work if provided at their very door, but they were not in such urgent need of employment as to exert themselves to obtain it.

7. In order to ensure sufficient employment for all who really require it, I have now directed that the road in question be worked in two sections, and I have instructed the District Engineer to commence operations on three tanks at selected central sites. By this arrangement every village in the pargana will be within reasonable reach of a relief work.

8. I made a very careful inspection of all the people on the work, and saw not the slightest sign of physical deterioration. All looked exceedingly well. The fact is that what is wanted in this locality is work. The people are not reduced, but they have exhausted their slender stock. They want employment, and as they cannot obtain it in the ordinary way, they are willing to take it at Famine Code wages.

9. No gratuitous relief (beyond the payment of allowances for non-working children) has yet been given, nor has any been required. The sources of private charity are not dried up, and the beggar classes are not yet reduced to extremities. The Subdivisional Officer has, however, taken steps to administer gratuitous relief whenever necessary. He has divided the affected tract into five circles and made organized inquiries in every village in that tract. The agency employed is a Sub-Deputy Collector, a temporary kanungo, a khas mahal patwari, two circle officers of the Banaili-Srinagar estates, and three zamindars who are Honorary Magistrates of the Bongong Bench. With this agency the Subdivisional Officer is in a position to give gratuitous relief whenever required. The only fear is that he will do too much and give relief where not really wanted, but this I have warned him against.

10. In pargana Uttarkhand, or the eastern half of thana Bongong, the only work open is still being conducted as a test work The number of persons attending the test work on the 27th February was 375. In this locality there is some *rabi*, and until that is cut it is not likely that distress will develop.

11. To sum up my remarks about the Madhipura subdivision, I may say that the area affected continues to be the same, that it is only in pargana Kabhand or the western half of thana Bongong that active operations are necessary, and that these operations are confined to the provision of labour for those who can find no employment. No gratiutous relief is yet required, but the Subdivisional Officer is fully prepared to give it when necessary. A sum of money has been placed at the disposal of the Subdivisional Officer for distribution as advances under the modified rules under the Land Improvement Act, but he has not been able to place this money advantageously. In my letter No. 2452G., dated 16th February 1897, I have asked your sanction to utilize part of the grant for distribution as ordinary loans under the Agriculturists' Loans Act.

I have addressed the Board of Revenue about this.
W. B. O.—4-3-97.

12. I now beg to submit definite proposals for establishment in the Madhipura subdivision. Excluding the Sub-Deputy Collector, who is in charge of the Sub-Treasury and the office during the absence of the Subdivisional Officer from head-quarters, the only extra establishment which I have allowed the Subdivisional Officer is one temporary kanungo and a young apprentice, whom I have appointed in anticipation of sanction on Rs. 30 a month. I also, at the close of the month as a temporary measure, when the numbers on the works increased to over 7,000, sent up the Sadar Sub-Deputy Collector to assist the Subdivisional Officer. I now recommend the following establishment:—

(1) A Charge Superintendent for the whole of the Bongong thana. For this post, I recommend the appointment of Mr. H. D. Christian, Manager of the Lugma Ward's Estate, on Rs. 200 a month with Rs. 100 horse allowance. Mr. Christian, whose head-quarters are at Bongong, is a man of great energy with a most intimate knowledge of the whole thana, and I am sure no better officer could be found for the work.

(2) Two temporary Kanungos, each to be placed in charge of one circle in pargana Kabkhand. This will give them an area of about 45 square miles each. Pay Rs. 50 each. You have already sent me one, and I have another suitable candidate whom I can appoint at once.

In anticipation of the sanction of Government.
W. B. O.—4-3-97.

(3) One temporary kanungo for pargana Uttarkhand on Rs. 50 a month. For this appointment I would recommend the apprentice whom I have already sent up. He is active and can ride, and is qualified for the post.

(4) One extra clerk for the subdivisonal office on Rs. 30 to deal with the now greatly increased correspondence and returns which it is beyond the power of the existing staff to deal with efficiently.

In addition to the above, the District Board will provide the necesssary staff of overseers and sub-overseers for the actual conduct of the works. The circle officers I propose will perform the duties assigned to them by the Code, and be in charge each of one tank, while the work on the other roads and tanks will be conducted by the District Engineer and his staff.

13. In Supaul there is no marked development. The area affected remains the same. Two works continue to be open here. On the work to the south of Supaul, the numbers

have gone down to 276 on the 27th February. The decrease is due to the fact that two private relief works were opened by zamindars in the neighbourhood and of course proved more attractive than a work conducted strictly according to the Famine Code. On the work to the north west of Supaul, the numbers have increased steadily although not rapidly. On the 27th February there were 1,317 labourers and 34 non-working children. Arrangements have been made to open more works when necessary Meanwhile in this locality the lands are being ploughed and dug in all directions, and the rabi crop will shortly be out Until these operations are over, there should be no increase on the works, nor should any be invited.

14. Up till the present time there has been no organized system of gratuitous relief at Supaul, nor has any been required. The Subdivisional Officer has, however, with the aid of private subscriptions, improvised an irregular system of gratuitous relief. There is no objection to private individuals giving charity to any extent they choose, but in the existing circumstances it would have been wiser if the Subdivisional Officer had held aloof from active co-operation in the scheme. My instructions to him are to be prepared to start gratuitous relief according to the Code when necessary, and to base his operations upon a carefully prepared Register 13. But so far there has been no urgent necessity for gratuitous relief

15. As in the Madhipura subdivision, the Subdivisional Officer of Supaul has not been able to suitably place advances under the modified rules under the Lands Improvement Act. I have asked that these advances may be given under the Agriculturists Loans Act.

16. The Subdivisional Officer has a Sub-Deputy Collector and a Kanungo. No proposals for further establishment are made at present. The District Board Officers are in charge of the conduct of the two works now open.

17. The prescribed statements which should accompany this report will be submitted as soon as the report of the Subdivisional Officer of Supaul is received. Meanwhile I beg to forward a map showing the areas at present considered to be affected.

No. 5146R., dated Dumka, the 1st March 1897.

From—R. Carstairs, Esq., Deputy Commissioner, Sonthal Parganas,
To—The Commissioner of the Bhagalpur Division and Sonthal Parganas.

I have the honour to submit my fortnightly report on the state of my district.

2. The last report submitted by me was from Godda (my No 4549R. of the 5th February last), and I also sent an emergent report for Jamtara (my No. 118Rct. of 16th February last). At that time I added that fears were entertained for Deoghar and parts of Dumka.

3. I have since received a report under section 10 for Deoghar. I shall note what I have to say regarding each subdivision separately.

4. For Godda I have received revised forecast of the crop outturn based on the improved propects of the rabi crop. Mr. Piffard now estimates the produce of the season's crops, exclusive of old stock and mahua at 18,00,000 maunds, or about enough to feed the population for nearly 11 months. This, as contrasted with the outturn estimated in my No. 4549R. of 5th February last (12,84,000 maunds), is a very great improvement, and I agree with Mr. Piffard that most of the subdivision, with the help of private employment, will be able to do without formal famine relief. The weak spot is still Poraia and Belbathan. A test was opened at Ghangrabandh in this area, but no one came to work, and I think the great pressure for relief, if it comes at all, will not come till after the mahua crop has been consumed.

5. I have received no formal report from Jamtara or Deoghar. I hear from Jamtara that test works were opened and frequented. There has been no great rush to these, and one test work at Jamtara, where nearly 200 people had gone for work, was closed because they would not work on the terms. This work was opened on the 5th and people began coming from the 6th. The numbers increased up to 81 on the 14th and there were 200 later on. It has now been closed.

6. Another test work in Jamtara, at Majladih, near Karmatar, opened on the 5th, drew 21 the first day, 41 on the 10th, and had fallen to 36 on the 14th

7. One reason why our test works ceased to attract was no doubt the private employment which has been given somewhat freely. I expect to see the Subdivisional Officer to-morrow, and shall try to get more exact information in future than I have so far obtained. It seems that the pressure in Jamtara, though nearer than in Godda, has not yet become great. I shall, however, have clearer information soon.

8. *Deoghar.*—The Subdivisional Officer of Deoghar has sent in a famine report under section 10 of the Code. He has not yet opened test works, and I await their result before saying anything further. The report is what my own estimate of stocks led me to except, and I feel anxious about this subdivision. I hope to see Mr. Heard on the 5th and discuss matters personally with him.

9. The prices of food-grains are almost stationary, but, if anything, easier. The fact that no great distress is showing itself, though prices are so high, seems to show that the raiyats are very largely holding up their stocks. I have not paid very great attention to the movement of stocks, as I do not see much benefit that we locally can derive from the study of this subject. We have railways on both sides of the district and roads easy to traverse up to the rainy season, and so far have had no season to doubt the ability of trade to supply effective demand. No signs of general distress have yet appeared, though there are scattered

cases, especially the wives and families of men who have gone off to the tea-gardens or elsewhere to look for work.

10. There has been no rain, and public health has been on the whole good.

11. The areas I have so far reported as affected are—

	Area.	Population.
	Sq. miles.	
Godda ...	... 331	102,800
Jamtara ...	... 350	93,000
Total	... 681	195,800

12. Deoghar must shortly be reported, but not yet. I am looking forward to the early opening of the Deoghar-Bowsi Railway as an excellent relief to the north of Deoghar, north-west of Dumka, and south-west of Godda, in all of which there has been failure of crop.

13. The amount of loans sanctioned so far is—

	Rs.
Jamtara	... 2,850
Deoghar	... 2,350

I hear from Godda that there are many applications which are being sifted. Many applications in addition are expected.

14. The amount available for agricultural and estate improvements in the Government estate for the remainder of 1896-97 was about Rs. 10,000, and works are being done out of this in all the parts where failure has been greatest.

15. The amount of balance in the district road account is now Rs. 5,372.

We have been spending money out of this fund in opening test works, and laying in stocks of tools, baskets, &c. The cost of these will probably take up most of our available balance.

16. The principal relief works likely to be opened are an irrigation work at Hahajore in Godda, another at Pabia in Jamtara, and road works in Kundahit, where the Raja of Hetampore has expressed a wish to do something.

17. Charitable relief meetings have been held and the district meeting will be held on the 8th March. The subscriptions promised up to date amount to something like Rs. 15,000.

18. Many small private works are being opened.

19. As regards funds, you have asked me by wire if I have any modifications to propose of the Government allotment made in its circular No. 45(Fam.) of the 16th February last, sent with your No. 241F. of the 18th February. I believe my own estimates were not excessive, but I cannot at present make out any very strong objection to the allotment as it stands.

20. As regards staff, I have read your No. 270F. of the 25th February, forwarding my last report to Government. You say that I have, as reserves, in the district the Second Deputy Collector at Rajmahal, the Second Deputy Collector at Godda, and the Sub-Deputy Collector at Deoghur, who are not yet fully employed.

21. I am unable to argue the question now, and it would be wrong of me to do so, but I would point out that the strength of staff in these three subdivisions is only what was fixed by Government as necessary in ordinary times, and in Godda and Rajmahal we shall for sometime to come have a great deal of extra work in inspecting and looking after our raiyats, and getting in our rents, even if we escape the threatened distress. Deoghar is already threatened with famine, and cannot be weakened. In my opinion the Subdivisional Officer of Jamtara needs help, and probably the best way would be to post Maulvi Ekram Hossain, now on special duty in Pakaur, to Dumka, and send Mr. Robertson, Sub-Deputy Collector, temporarily to Jamtara.

22. I have written this in haste, as I have pressure of work, and leave for Jamtara to-morrow. The information on most heads is vague, but I hope soon to have more accurate information to send. The general feeling I have is that the pressure will not come heavy till April, and by that time the edge of it will have been taken off by the mahua crop. I am collecting statistics about mahua, which I hope to give when ready.

No. 313F., dated Bhagalpur, the 6th March 1897.

From—W. B. OLDHAM, ESQ., C.I.E., Commissioner of the Bhagalpur Division and Sonthal Parganas,

To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my No. 318F.Ct., dated Rajmahal, 4th March 1897, I have the honour to submit an intermediate report for the Jamtara subdivision, submitted by the Deputy Commissioner, Sonthal Parganas, with his No. 5213R., dated 4th March 1897, and to ask for the grant of the Rs. 5,000 referred to in its 15th paragraph. I also send a copy of my order No. 312F., dated 6th March 1897, on the report.

No. 312F., dated Bhagalpur, the 6th March 1897.

Order by—W. B. OLDHAM, ESQ., C.I.E., Commissioner of the Bhagalpur Division and Sonthal Parganas.

WITH reference to the Deputy Commissioner of the Sonthal Parganas' No. 5213R., dated 3rd March 1897, submitting an intermediate report for the Jamtara subdivision in connection with the famine.

Order.

Your No. 5213R., dated 3rd March 1897.

The report is being forwarded in original to Government with an application for the grant of the Rs. 5,000 asked for in its 15th paragraph. As Charge Superintendent you should for the present employ either one of your other six Sub-Deputy Collectors (besides the Sub-Deputy Collector now at Jamtara) or the second Deputy Collector at Godda, who is not fully employed. The case should for the future be dealt with in half-monthly reports under section 24 of the Famine Code. Your attention is again drawn to Chapter VII about relief wages and to the necessity for appending complete statements. The establishments entertained under the general sanction conveyed by Government order No. 366Agri., dated 9th February 1897, are to be reported separately as routine cases.

No. 5213R., dated Dumka, the 3rd March 1897.

From—R. CARSTAIRS, ESQ., C.S., Deputy Commissioner of the Sonthal Parganas,

To—The Commissioner of the Bhagalpur Division and Sonthal Parganas.

I HAVE the honour to submit the result of a conference held by me with Mr. Stark, Subdivisional Officer of Jamtara, at Angutia yesterday.

The object of this conference was to ascertain the exact state of things in the Jamtara subdivision—

(1) As to prospects of distress.
(2) As to preparation to meet it.

I take these points in order.

2. *Prospects of distress.*—Mr. Stark handed me his No. 669R., of the 1st instant, which did not reach me in time to incorporate with my fortnightly report. Appended to it was a Statement D in Form 5 for the three weeks ending 26th February 1897.

It shows the attendance, work done and payments made at the three test works, Pindari, Jamtara and Morro.

The statement, which was prepared by the kanungo, a new man, does not show any classes of workers, or distinguish between grown-up persons and children. It shows simply men and women—total for the week.

3. The particulars, work by work, are as follows:—

	Pindari.	Jamtara.	Morro.
How long open	3 weeks	3 weeks	2 weeks.
How many attended	664	1,707	1,174
Total work done in cubic feet ...	30,253	78,850	41,775
	Rs. A. P.	Rs. A. P.	Rs. A. P.
Total paid (uniform rate Re. 1-4 per 1,000 cubic feet) ...	36 10 0	98 5 0	54 11 0
Average task done	53 c.ft.	46 c.ft.	35 c.ft.
Average earnings	1 anna	11 pies	9 pies

The works were—

Pindari.—Road embankment, average height 2½ feet and width 20 feet at top.

Jamtara.—Road embankment, 2 feet high and 20 feet wide at the top; soil harder.

Morro.—Widening an embankment to carry a road, average height 12 feet and width 22 feet at top. Soil softer, but lead longer and lift higher than at Jamtara.

4. The method of payment is to pay for a completed *chouka* of 100 cubic feet at the rate of Re. 1-4 per 1,000 cubic feet, or 2 annas per 100 cubic feet. The payment is generally made in the evening, but if a *chouka* is completed the next morning, payment is made then. The attendance of workers was generally given from 9 to 5. The persons in charge were:—

(1) *Pindari.*—Ghatwal's muharrir, supervised by the kanungo, with the help of Mr. Hills, an ex-platelayer of the East Indian Railway now living near there.
(2) *Jamtara.*—Kunja Das, circle sadar, supervised by the Subdivisional Officer and the sub-overseer.
(3) *Morro.*—Bhagwan Das, a temporary muharrir, employed by the Narainpur Ward's Estate munshi; Paru Majhi, headman of Murgadi, making the payments.

The returns are not full, but it appears that a full task for very moderate payment made is exacted, and has not discouraged the workers from coming.

The task for which Re. 1-4 is paid includes cutting and carrying, but not trimming and levelling the earth.

The average earnings are not sufficient to feed the workers fully at present prices.

5. Besides these test works, other works have been opened at Dhasonia, about 8 miles south of Angutia, on which 100 persons are said to be working, and at Pabia, where 500 persons are said to be attending.

An attempt was made to introduce the gang system at Jamtara, but resulted in all the workers, about 200 in number, leaving. They are said to have got private employment.

With this exception, there has been an increasing attendance at every test work opened.

Pabia is the place in greatest distress. The Subdivisional Officer held back his test work there, because a loan had been taken by one Sibu Dube of Rs. 400 to dig a tank. The money, however, has not been used by him for that purpose. A loan taken by Paru Majhi of Domohani, near Dhasonia, of Rs. 400 to dig a tank, has been duly expended for that purpose, and enabled the test work at Dhasonia to be held back till now.

A good deal of private employment has been given.

6. My conclusion is that distress has begun to press on the people, and that we must declare famine in the Jamtara subdivision throughout the area already reported as in need (see paragraph 5 of my No. 118R.Ct. of the 16th ultimo).

This is only in accordance with what I expected, and the distress will be all the greater, because two staple employments, namely, coal-mining and stone-breaking, have this year been practically closed, there being no demand for either coal or stone.

Unless relief is given now, people will eat their seed-grain, and will starve.

7. *Preparations to meet distress.*—Government, in its No. 366Agri.—(Fam.) of the 9th ultimo, sanctioned my proposals for organization, and these I will state here for easy reference. The leading points are—

(1) Division of the subdivision into charges.
(2) Division of charges into circles.
(3) Appointment of a Charge Superintendent for each charge, and of a circle committee for each circle.
(4) The appointment for the Superintendent of a clerk on Rs. 25.
One or more sub-overseers on Rs. 50.
An orderly Rs. 6.
(5) The payment in each circle where relief goes on of Rs. 10 a month to cover all expenses.
(6) The appointment of a subdivisional famine clerk and one for the district office on Rs. 25 and Rs. 30, respectively. This is the provision for machinery.

8. Being aware of the urgent necessity for preparation, I anticipated the sanction of Government, and directed officers to depute their kanungos, as proposed in section 8 of my report, to organize the charges and circles. Unfortunately this arrangement in Jamtara was thrown out by the transfer of the kanungo to Darbhanga. He was not replaced till after an interval, and his successor is a lad without experience. The work of organization is thus not yet completed for Jamtara, and Mr. Stark has had to content himself with making arrangements where and when there was immediate need.

9. I have instructed him, with a view to lessening the work, so far to modify the instructions as to take advantage of the division of his subdivision into 24 police circles, of an average area of about 30 square miles, and to make his circles coincide with these. The circle committee will comprise the Ghatwal or his representative where there is one, or the sardar, respectable residents and representative headmen. Mr. Stark thought of dividing each circle into two, but that involves a good deal of boundary work.

10. The affected area is to be reckoned as one charge. The work is to be mapped out circle by circle showing for each circle—

(1) Population.
(2) Number likely to need relief.
(3) Time for which it will be needed.
(4) Relief works according to programme, and number they will maintain. (In case they are insufficient, further works must be selected).
(5) Relief expected from private employment out of private funds or public loans.

11. It is evident that, owing to the increasing applications for relief and to the delay in preparation caused by the kanungo's transfer, a Charge Superintendent is urgently needed at Jamtara. In my No. 5146R. of the 1st instant, I have already submitted a proposal for the appointment of Mr. Robertson, who may be replaced at head-quarters by Maulvi Ekram Hossain on his special work being closed. Should this not be approved, some other arrangement should be made. If it is approved, I will send Mr. Robertson without waiting for Maulvi Ekram Hossain to join.

12. The supplementary establishment should be appointed at once. The clerks should be in addition to the present staff. The sub-overseer may for the present be the Road Fund sub-overseer now posted at Jamtara.

13. Mr. Stark will have the work done in the manner prescribed in Mr. Glass's pamphlet. A later circular has been received, and is being considered.

14. As regards funds, I find that, as will be seen from the accompanying statement, the balance available from the Road Fund is only Rs 4,847, if we reduce the balance considerably. I was reckoning on the grant of Rs. 6,000 for this year's needs which I estimated we should require.

In Government's No. 447Agri.—(Fam.) of the 16th ultimo, received with your No. 241F. of the 18th idem, and received by me on the 25th idem, my estimate has been revised by the omission of that sum.

In a telegram received on the 25th from the Commissioner, I was asked if I considered any changes necessary in the Government estimate, and replied (No. 5089R. of 27th ultimo) that I saw no reason to alter my original estimate, but should deal with the matter in my fortnightly report.

On the 1st I wrote that, without having received the Jamtara report. The money was originally wanted for Godda, and it was by no means certain that we should need anything beyond what we had till the end of March. I was therefore unwilling to ask for a revision of the orders of Government.

15. I am, however, satisfied that a grant of Rs. 5,000 in addition to the amount to our credit in the Road Fund will probably be wanted for Jamtara within March, not to speak of the possible needs of Deoghar and Godda, in both of which famine threatens. The case of Jamtara is more urgent than that of Godda and Deoghar, as its test works have been attended for some three weeks in some cases and fill wherever opened, while neither Godda nor Deoghar has as yet had a test work.

16. I do not take credit for the Estate Improvement and Agricultural Improvement Funds, the whole of which are needed for the Government Estates. As for the working balance of the Road Fund, amounting to Rs. 6,225, I shall have to draw on this latter, if necessary.

17. I request now that famine may be declared for this district in respect of the affected area of the Jamtara subdivision, and that sanction may at once be given to the appointment of a Charge Superintendent and the necessary ministerial and subordinate staff.

18. I have discussed with Mr. Stark many practical points of detail, which need not find a place here. He has been working very hard to keep things going, but is feeling the strain and needs help. I have told him for the present to stop all civil case work and avoidable work of all kinds, merely taking in plaints and petitions to save limitation. He can resume the work when he gets his Charge Superintendent. The Superintendent is needed both for laying out and supervising relief works, for looking after gratuitous relief, and for inspecting works being done out of public loans, of which we expect a good many will be undertaken.

Statement of Balances of District Road Account.

A. H. CUMING,
for Deputy Commissioner.

No. 466R., dated Cuttack, the 10th March 1897.

From—H. G. Cooke, Esq., Commissioner of the Orissa Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I have the honour to submit the monthly report on the condition of this Division with respect to scarcity.

2. *Angul.*—All information received continues to be of a reassuring character. The rain that fell in the middle of the month gave increased occupation to day labourers and benefited standing crops: prices stationary.

3. *Balasore*—Reports no change except for the better. Standing crops having benefited by the rain which has fallen, prices remain stationary—12 seers for the rupee at Balasore and 13 seers at Bhadrak.

4. The Settlement Department has submitted the reports of eight Assistant Settlement Officers engaged in as many camps in the interior of the Balasore district and a statement showing the price of coarse rice in their respective parganas, which I give below:—

Name of Officer.	Pargana.	Outturn of paddy in annas.	Price of common rice.	Remarks.
1	2	3	4	5
Babu Kunja Behary Goswami	Soso	4—8	13 per rupee (80 tolas).	
,, Srigopal Bhattacharjee	Risalkhand	8	12½ ,, (80 ,,).	
,, Jageswar Biswas	Balikhand	8	13 ,, (80 ,,).	
,, Debendra Nath Bose	Aukura	8	12½ ,, (80 ,,).	
,, Abhoy Prasad Das	Dhamnagar	6—9	10—11 ,, (105 ,,).	
,, Hari Krishna Mahanty	Panent		12—14 ,, (80 ,,).	
,, Jagabandhu Ghose	Bayang ...	12	14 ,, (80 ,,).	
,, Isan Chandra Das	Banchas ...	8	15 ,, (80 ,,).	
,, Romesh Chandra Das	Randia-Argara	6—9	10—13 ,, (80 ,,).	

5. With one exception, all the Assistant Settlement Officers' reports are most encouraging, and show an entire absence of distress. The Assistant Settlement Officer of the Bayang Circle complains that fodder is to be had with much difficulty. "Many men have already left home for employment elsewhere. Apparently there is no general cry about famine. No beggars or famished people have I come across yet; but that the future is gloomy is almost certain." The last remark seems speculative—at least it is not supported by facts, the reverse being rather the case. As for many men leaving home for employment, as much may be said of Orissa generally in the most favourable years. It is a matter of notoriety that thousands of Uriyas go to Calcuta every year for employment.

6. *Cuttack.*—The Cuttack report, copy of which I enclose, which was received late yesterday, explains the delay that has attended the submission of the divisional report. The report is, I think, reassuring. The officer referred to as the Assistant Settlement Officer of Dalijora is in fact the Assistant Settlement Officer of Jaipur, whose letter was written from Dalijora. His report is noticed below.

7. *Kendrapara.*—The area between the Kendrapara and Taldanda Canals includes some or all of the Balubisi Settlement Circle, and the Assistant Settlement Officer does not report unfavourably of what he sees there.

8. *Jajpur*—The Kalamatia, Alas and Ahyas Circles are all in this subdivision, and the Assistant Settlement Officers of these circles reported unfavourably, and the first two tracts are marked brown in the Collector's map. The Assistant Settlement Officer of Ahyas refers to the extensive dalua cultivation due to irrigation.

9. The Kujang-Kanika Wards' Estates and the Banki Government Estate are not under settlement, but are happily exceptionally well provided with means of famine relief.

10. The steps taken by the Collector appear adequate to meet the case at present.

11. I support Mr. Growse's request that his staff should be strengthened in the manner proposed by an additional Sub-Deputy Collector being allotted to each of the three subdivisions. The difficulty about the removal of Maulvi

Tajmal Ali and his replacement by a Sub-Deputy ignorant of Uriya and English has already been removed by Government.

12. Twelve Assistant Settlement Officers' reports are before me. Of these officers, three on the last occasion reported unfavourably viz., those of Kalamatia, Jaipur and Ahyas. The first two report no change, but the Jaipur officer has since, on the 2nd March, reported that immediate relief measures are called for in his circle, and the Collector is taking action to ascertain what is necessary. The Kalamatia officer reported on the 17th January that on the 17th February "the condition of the people who would give rise to anxious solicitude." The condition remained unchanged on 2nd February.

The Ahyas officer, who mentioned in his last report that people had given up work on the railway, dissatisfied with their earnings, now reports extensive dalua cultivation by means of canal water. In one village almost half the cultivated land is thus planted with dalua rice.

In another part of the circle, apparently near Balarampur, he describes "the condition of the people as bad. Most of the families being poor are supporting themselves by selling their little ornaments and brass and bell-metal utensils, and some have gone to Calcutta" for employment. Prices are stationary.

13. Of the remaining nine, eight report no change since their last reports, which were not unfavourable. One, the Circle Officer of Olas, says rice sells at 13 seers to the rupee, Cuttack measure, or nearly 15 standard seers, which does not seem high rates as compared with other places. He also mentions a lack of drinking water. These reports will be sent on to the District Officer who is probably fully informed. His report has been delayed owing to Mr. Growse having been ill.

14. I give the table of prices-current in each Settlement Circle of Cutack:—

Name of Officer.	Pargana.	Outturn of paddy in annas.	Price of common rice.	Remarks.
1	2	3	4	5
Babu S. C Bose	Utikan	8	12 seers per rupee (105 tolas).	
,, H C. Roy	Balubisi	.....	12½ ,, ,, (80 ,,).	
,, P. N. Mukerjee	Homan	3—4	11 ,, ,, (105 ,,).	
,, J N Mitter	Asuntewar	No change reported.		
,, K C Sircar	Jhankud	8—12	10 seers per rupee.	
,, S. C. Dutt	Ahyas ...	2 (portion as in previous report).	12 ,, ,, (80 tolas).	
,, J M Dass	Jajpur ...	10	12 ,, ,, (105 ,,).	
M" M Choinuddin	Jajpur ...	7—8		
Babu Murari Misra ...	Kalamatia ..	12	12 ,, ,, (105 ,,).	
,, G C Das Gupta ..	Olas ...	.....	13 ,, ,, (105 ,,).	
,, D P Rai	Sargara	12	11 ,, ,, (105 ,,).	
,, Harashwya Lal	Dalegram	6—8	9 ,, ,, (105 ,,).	

15. *Puri.*—Considering that this is the worst district in the Division, the information received appears meagre.

The first four reports, dated 30th January 1897, 3rd February 1897, 6th February 1897, and 13th February 1897, simply state that rain has not fallen: if it did fall, it would do good, and that there is a great scarcity of grain in the Chilka tracts, and efforts are being made to bring grain there and that prices remain stationary. The report of 3rd February was submitted direct to Government and is fuller than the others.

16. The report of the 20th February mentions heavy rain in Puri, 4·25, light rain, ·062, in Khurda, the rain being badly distributed, and more of it is said to be required.

The report of the 18th, which was sent to Government, shows a falling off of labourers on the railway works, and an increase from 1,050 to 8,885 on District Board and famine works.

The report of the 27th gives further information as to the rainfall which is said to have benefited standing crops and given employment to labourers.

The maximum rainfall was at Satpara on the Chilka Lake, where it reached 5·12, Banpur 3·70, and Pipli 30.

17. I have received a separate report, dated 2nd March, stating that a road was commenced in the Parikud-Malood area on 22nd January as a relief

work, and that 500,000 cubic feet of earthwork had been done up to 2nd March. There is nothing to show whether the work provided was sufficient to supply with occupation all who required relief, or even how many labourers were engaged on the work: all but two miles of the road was, on the date of the report, completed; but nothing is said as to what other works are contemplated when this one is finished. I learnt verbally, on my visit to the Chilka Lake last month, that the restoration of protective embankments to keep out salt water would supply work of a very useful kind in this neighbourhood, and it may be assumed that these will be taken in hand when the road is finished.

I also learnt that Mr. Beale was preparing plans for a protective embankment in Chhabiskud, but I have heard nothing further as to this, which I referred to in my No. 329R., dated 19th February 1897.

It was under contemplation to make a similar embankment at Satpara, as a relief work, out of funds provided chiefly by the Khurda Estate Improvement allotment.

18. As to the other affected areas, I have no information, and I presume that no scarcity at present exists anywhere except around the Chilka. I have not yet received the particulars required for the report under section 9, Chapter II of the Famine Code.

19. The Settlement Officers' reports are brought up only to the 1st February, except that of Mr. H. McPherson, which is dated 13th February. I give the statement of prices-current as received with these reports:—

Name of Officer.	Pargana.	Outturn of paddy in annas.	Price of common rice.	Remarks.
1	2	3	4	5
Babu Akhoy Kumar Sen	Lembai	3	10—10 per rupee (105 tolas).	
,, Prasanna Kumar Banerjee ..	Kotdesh	8	10 ,, (105 ,,).	
,, Ram Kunai Pal	Purhodai	2	10—15 ,, (105 ,,).	
,, Jatindra Mohan Singha	Domarkhand	4	9 ,, (105 ,,).	
,, Syama Charan Sen	Atais		8 ,, (105 ,,).	
,, Jagadish Chandra Lahiri	Kodhar		9 ,, (105 ,,).	
,, Amrita Lall Gupta	Chhabiskud ...	2—16	12 ,, (105 ,,)	
,, Ajay Chunder Das	Rahang ..	10	8 ,, (105 ,,).	
,, Balmukundu Kanungo	Kotdesh ...	8	10 ,, (105 ,,).	
,, Buderson Das ...	Ditto ...	8	10 ,, (105 ,,).	

20. Mr. McPherson's report I give *in extenso*, as it contains reliable information with reference to a large area. The Assistant Settlement Officer of Delang reports prices rising; *rabi* crops withering for want of rain (this was before the rain of mid-February fell); the people find employment on railway works; "the condition of the people is by degrees becoming worse, *but at present their condition is not so bad as to cause anxiety.*"

The Assistant Settlement Officer of the Antrodh Circle reports inadequate grain-supply, but that labour is forthcoming on railway works and otherwise, though he thinks that relief works will be necessary.

The Assistant Settlement Officer, Purba Dohai, reports no relief necessary. The Assistant Settlement Officer, Atais, reports that there is scarcity prevailing in his neighbourhood, and that the inhabitants of the western part of Atais and Matgutpatra are in the greatest distress. He thinks that *relief works will urgently be needed* in the course of another month.

The Kotdesh Assistant Settlement Officer reports no change beyond an improvement in the condition of standing crops.

The Assistant Settlement Officer, Kodhar, reports standing crops not doing well; prices rising; inadequate supply of grain in the market; the people seeking work on the railway, and living by selling their household utensils. He recommends the erection of protective embankments.

The Assistant Settlement Officer, Chhabiskud, reports reassuringly as to that area, though a portion of it is so bad that relief works on a large scale are proposed by the Collector. In the Rahang Circle prices are reported as high as 6 seers to the rupee, and no adequate supply at that price. He recommends the opening of test works in the worst villages, *e.g.*, Dhankera and Andarsing.

The second Assistant Settlement Officer of Kotdesh Circle reports no change.

The third Assistant Settlement Officer, Kotdesh, thinks "no relief operations will be necessary, if the mahajans and zamindars are a little generous towards the poor."

The Settlement Office reports from Khurda are separately submitted. I append price-current lists, from which it appears that the highest price attained is about 13 standard seers per rupee:—

Name of officer.	Pargana.	Outturn of paddy in annas.	Price of common rice	Remarks.
1	2	3	4	5
Babu Nadia Chand Dutt ...	Romeswar	8 10	14 seers per rupee (105 tolas).	
,, Jagannath Dutt .	ditto ,,	8—10	11—12 ,, ,, (105 ,,)	
,, Kalimohun Sen ...	Banpur .	8—10	8½—10 ,, ,, (105 ,,)	

Of the three reports, two are favourable, and one, which refers to Banpur, a mountainous tract, is not favourable. "Several thousands of people will require employment here soon. A test relief work should be started without delay for the sake of the stricken villages." He recommends the re-excavation of old tanks and roads from Sonakhala to Aitapur and to the Mals.

The above report will be sent to the Collector. Sometimes the Assistant Settlement Officers take an unnecessarily desponding view of the situation. I have before me a case in which raiyats were declared to be in want of immediate relief in the Cuttack district. An inquiry was held by Mr. Desgratoulet, District Engineer, who reported that no foundation existed for the statement. The most alarming of the above reports are those from parganas Atais, Rahang, Banpur and Kodhar.

Rahang has been dealt with by the Collector together with Chhabiskud. The state of Banpur was mentioned when I visited the Chilka last month. Much of the population consists of forest tribes that can manage very well without rice. Prices are not by any means high, being 8½ to 10 Cuttack seers per rupee, equal to 11·15 to 13 standard seers.

Pargana Kodhar is included in the area marked brown in the Collector's map, together with Astrang and Marichpur, and pargana Atais identical with pargana Athaisie, which is similarly situated to the group of parganas just referred to. Though the Collector's map does not show that any scarcity whatever was apprehended there when the map was prepared, the same remark applies to Banpur, which is uncoloured in the map. The Settlement Office reports will be sent to the Collector of Puri, whose attention has, I know, been attracted to Banpur, and he should now direct it to parganas Khodar, Athaisie, and killa Marichpur, if he is not already camping in that direction, which I think highly probable.

I should have liked to be in a position to report what progress has been made in opening grain stores at Satpara, Malood and in Chhabiskud; but nothing has been reported on this point. I have already, as previously reported, given detailed instruction on most points here noticed, as well as others, to the Collector of Puri. A copy of this section of the present report will be sent to the Collector, and it is to be hoped that his next report will be more full.

21. Since writing the above, I have received a report, dated 6th March, from the Collector of Puri, stating that standing crops have been saved by timely rain, which has given field labour to labourers. Also that the general aspect of the tract adjoining the Chilka Lake has slightly improved.

No. 697G., dated Cuttack, the 8th March 1897.

From—E. F. Growse, Esq., Collector of Cuttack,
To—The Commissioner of the Orissa Division.

In continuation of my No. 224G., dated the 24th January, I have the honour to submit the following report on the condition, during the month of February, of those parts of the Cuttack district for which anxiety is felt.

2. *The Sadar subdivision.*—Speaking generally, the condition of the affected tracts remains unaltered, but has improved in so far that there was rain, which enabled the raiyats to make first ploughings of the land for the "biali" and later rice-crops. It also did much good to the "dalua" and "grey mung" and "china" and "bringals" and other

vegetable, crops, which, though cultivated in comparatively small quantities, all tend to increase the food-supply of the people. Prices have remained practically stationary during the month, but there seems to be a tendency towards larger supplies of grain coming into the market since the rain. Public health is generally good. The rainfall at Cuttack was ·64 only; but this was the smallest fall registered at any of the reporting stations. There is no emigration or immigration of famished people, but considerable movement of labour towards the railway from the estern portions of the Sadar subdivision. The condition of cattle is normal. As I am writing this, I have received a report from the Assistant Settlement Officer of the Dalijora Circle, in which he gives rather an alarming account of the condition of the Kukunda-Jajpur pargana to the north of the Pattamundai Canal and bordering on the Jajpur subdivision. This has been long known to be a tract in which distress must occur owing to practical loss of crops for four years and total loss last year. I am preparing to start a test work in the shape of a tank at once, and also to appoint a circle officer and organise gratuitous relief, should it prove necessary, as seems probable.

3. *In Banki*, where the number of poor is large, and where I anticipated some trouble by the end of March, no sign of distress has yet appeared, and the late rain (1·06 was registered at Banki) has saved the "dalua" which was beginning to wither, and, as elsewhere, allowed the raiyats to plough the land for the "biali" and "sarad" rice crops, and also done good to the "grey mung" and other small food-crops. Rice appears to be coming in freely from Khurda, and to be freely exported also to Cuttack, and the local price has fallen from 14 seers 13 chitaks to 15 seers 12 chitaks (standard weight).

4. *Kendrapara subdivision.*—The affected tracts remain the same as previously reported. The worst parganas are Balubisi, Suknai, Pania, all lying between the Kendrapara and Taldanda Canals, and Neulbisi and Athpaula, which lie between the Kendrapara and Gobri Extension Canals.

As elsewhere, there are some villages in these and other parganas whose condition is worse than others.

Speaking generally, the villages furthest removed from the river banks and situated in the centre of the basins have suffered most. The Subdivisional Officer at my direction made a careful tour through several villages in parganas Balubisi and Suknai and Asureswar; but although he found signs of great poverty among many of the lower classes, especially those who have none to maintain them, and although they were living chiefly on "kutthi" meal, and get very little rice, still he found no cases of starvation and no person who had been compelled to pass a day without food. This, however, is one of the tracts in which, I think, it will soon be necessary to organise some form of gratuitous relief.

The price of rice has ranged during the month in the affected tracts from 13 seers 2 chitaks to 15 seers 12 chitaks per rupee, but at the end of the month it seems that rice was rather more easily obtainable than before, although the price seems to have remained almost the same.

Food-stocks.—As previously reported, a large deficiency is feared, and the Subdivisional Officer says he found some "amars" of zamindars and mahajans practically empty. He believes, however, that the well-to-do raiyats and mahajans have still enough for their own consumption. The tendency for rice to become more easily obtainable after the late rain is, moreover, noticeable, and seems to show that there may be more rice in the country than we thought.

Exportation and Importation.—Exports have, the Subdivisional Officer believes, decreased, and this is borne out by the statistics of export from Chandbally. There are no imports, except that those in the affected tracts fetch rice from their more fortunate neighbours in the protected areas, and petty dealers are also doing some inter-village business of this kind, it is said. The Subdivisional Officer apprehends much tightness of the market during the cultivating season, and advocates importation of rice from outside. This cannot be done at the present prices. There should be no difficulty in getting Burma rice from Calcutta or Rangoon *viâ* Chandbally, if necessary, even in the monsoon.

Rainfall.—This subdivision has had the heaviest rainfall of all. There were moderate showers in some parts in the early part of the month which did good to the standing crops and allowed the soil to receive its first ploughing for the rice crops. On the 17th February 4·11 inches were registered at Kendrapara, and the Subdivisional Officer reports that the rain was general. There is no doubt that besides the good done to the standing crops it has done much to restore confidence and allay anxiety.

Condition of cattle is generally good.

Public Works.—The Jambu Canal repairs are the largest work in progress in this subdivision, and have attracted some adult males only from the affected tract. Some 50 more are said to have gone to work on the Bhera embankment.

5. *Jajpur subdivision.*—The Subdivisional Officer says that conditions are generally the same, but the late rain has made matters rather more hopeful. The most interesting fact in connection with this subdivision is the extension of the cultivation of "dalua" rice in Ahyas and Kalumatia and some of the other flooded parganas, due to canal and river water being let down by the Irrigation authorities through old channels and jores to the "pats" in which "dalua" can be grown. The estimated outturn for the "dalua" in the Jajpur subdivision is a 16-anna crop for 9,000 acres.

The price of rice is practically stationary—at about 14·7 standard seers the rupee. The mango crop here, as elsewhere, will unfortunately be the worst for many a year.

6. *The Kanika Estate.*—The Manager reports that the raiyats have grown "dalua" and "mung" and "birhi" and "kutthi" and in some places even wheat, and hopes that the outturn from these crops will go to make up 2 annas of the deficiency of the rice crop. It is a very noticeable fact, too, that out of a total demand of Rs. 60,330 for the 8-anna kist in January no less a sum than Rs 51,882 was collected, and this without much difficulty. It is true that the assessment is a light one, but it shows that the raiyats must be better off than was expected. Anxiety, too, has been allayed on the ground of failure of stocks by the estate purchasing rice to store against the evil days expected after May, and for sale and distribution otherwise to the raiyats. A sum of Rs. 15,000 is being spent in this way with my approval, and I have applied for sanction of the higher authorities.

The rainfall in the estate was 3·13 inches.

Prices remain almost stationary—at 12 to 13 seers standard weight.

Owing probably to the neighbourhood of Chandbally prices are generally higher here than elsewhere in the Kendrapara subdivision. Owing to the rainfall and to the rush away from the works to start ploughing, the average daily number of males on the ordinary estate work fell from 709 on the 14th February to 286 on the 27th February.

7. *Kujang Estate.*—Here, as elsewhere, the rain has been of much benefit. The condition of the people is generally good. Prices are stationary—at 10 Cuttack = 13·2 standard seers higher than elsewhere except Kanika. It is believed that stocks are deficient, and the Manager and Sub-Manager are buying rice and paddy as a reserve against the evil days to come with my complete approval. Sanction has been asked for. It is estimated that some 500 or 600 persons of the estate are working on the Jambu Canal repairs, and some 410 persons, almost entirely men, on ordinary works undertaken by the estate.

8. *General summary.*—The condition of the people generally is better than I had hoped for at this season, and, except in isolated tracts, I anticipate little trouble before May, and even then see no reason to fear anything like a widespread calamity. The general feeling seems to be that it is during the rains that most distress will occur. No relief operations have yet been undertaken, but a test relief work and tentative organization of gratuitous relief will be started as early as possible in pargana Kuhunda-Jaipur, of which the area is about 27 square miles. This tract has lost the greater part of its rice crop for four years, and suffered a total loss last year. The *rabi* crop is insufficient to feed the population. The test-work and organization of gratuitous relief will all be done at the expense of the District Board. I have also supplied, from the funds of the District Board, a sum of Rs. 25 to each of the offices of nine thanas and outposts (as provided in section 12 of the Famine Code) for the relief of destitute wanderers. I have also ordered the preparation by kanungos, under the supervision of the Subdivisional Officers and the Sub-Deputy Collector of Banki and the managers of estates, and of a Deputy Collector at the Sadar, of "village lists" of persons who come within the category of section 42 of the Famine Code. These should, if carefully prepared, be of much use hereafter should it be necessary to organize gratuitous relief in any quarters. A rough scheme of circles is also under preparation.

In pargana Balubise, on the borders of the Sadar and Kendrapara subdivisions, I have ordered a tank to be taken up as an ordinary work, and hope to get a local contractor, who will employ local labour. I have ordered two other tanks to be started as ordinary works in parganas Kate and Bardialla in the Sadar subdivision for the purpose of giving local relief. It is a noticeable fact that the railway could employ double the labour which it now gets on its embankment between Ba-ang and the Katjuri river, and although the number of local coolies who are now employed on the work may be larger than would be attracted to it in ordinary years, I am surprised that it is not still larger. I append a statement showing the daily average number of local coolies employed throughout the district, as far as is known, during February, and also a statement showing the estimated outturn of the *dalua* rice crop and both *rabi* crops. It is most satisfactory to note that this is reported to be a 14-anna crop for the whole district, and I think we may say that it will be nearer 16 annas. An area of 4,000 acres over the normal has been cultivated in Jajpurs for reason given above. I do no understand why each year in Kendrapara and Banki the cultivated area is reported to be so much less than the normal, but it is useless to alter the figures till we get figures from the Settlement Officer.

9. I would earnestly submit that the time has now come to strengthen the hands of the Subdivisional Officers and myself. I have already asked for a lakh of rupees to be advanced under the Agriculturists Loans Act, and I want hands to make the distribution. It certainly cannot be entrusted to the local kanungos, although they may assist; and the Subdivisional Officers cannot be expected to undertake this troublesome and tedious work, which requires great care and much time, in addition to their ordinary duties. Moreover, although I do not anticipate much serious distress, I am practically convinced that gratuitous relief must be organized in May, and possibly earlier, and the supervision of the kanungos' village lists is very necessary, and cannot be well done by the overworked Subdivisional Officer.

What I want is a smart and active Sub-Deputy Collector to be posted by the 1st April at the head-quarters of each subdivision, when application for tuccavi advances will probably pour in, and another at the Sadar. The only Sub-Deputy Collector I have is one of the old school, who is now in Orissa, and knows no Uriya and little English, and is near his time for retirement. He will be of no use to me in a tight place. My staff of Deputies is strong enough, but I fear Mr. Thomson's health will not permit him to remain here

much longer, and in that case I beg you will press Government to give me another Joint-Magistrate One of the Deputy Collectors will from this time be employed almost entirely on work connected with scarcity, and I am sending him to start a test-work and supervise the organization of gratuitous relief at Kuhunda-Jaipur, and without a Joint-Magistrate I shall be much handicapped in the supervision of all this extraordinary work. I presume some of the Settlement Officers will be available in June, but I want men before that.

In conclusion, I beg to apologise for the delay in submitting this report; but the pressure of current work and indisposition during the last four or five days must be my excuse.

Statement of local labour employed February, 1897.

No. 405, dated Pipli, the 13th February 1897.

From—H. MACPHERSON, Esq., Assistant Settlement Officer in charge,
To—The Settlement Officer of the Orissa Division.

I HAVE little to add this fortnight to my former reports on the subject of famine relief.

There has been a further rise of prices, and coarse rice, I find, now sells on the average at 9 Cuttack seers to the rupee. In some out-of-the-way places, which were seriously affected by flood, the price is higher. Babu Ajoy Chandra Das of Circle Rahang reports that near Demirsina the price is as high as 7 seers to the rupee.

2. This place, I may note, is near that part of Serai and Chhabiskud, where Babu Amrit Lal Gupta reported that certain villages had suffered a total loss of crop. When I was on tour there at the end of last month, I was told that the Deputy Collector in charge of Puri khas mahals had been making enquiries into the condition of this locality. I was also told that there was some proposal to give relief work in the shape of repairs to the Chilka bundh, which protects villages on the north of the lake from the incursions of salt water. So far as I have observed on tour, this part of the district is the place where most immediate and particular attention requires to be given to the situation.

3. Since my last report I have been touring in parganas Lembai, Rahang, Chhabiskud, Kotdesh, Purbaduar, Banchas, Athaisil, Damarkhand and Autrodh, and have not yet seen a single case of emaciation. On the contrary, the persons in attendance at the Settlement camps seemed to be well fed and had a cheerful look about them, which was anything but suggestive of approaching scarcity or famine. None of the Assistant Settlement Officers have as yet reported cases of actual distress.

4. In my last report I suggested that it might be necessary to start test relief works in some parts of the district, notably the north of the Chilka and the sea coast parganas. I still think it is advisable to do something by the end of the month in the region north of the Chilka, but for other parts of the district it does not appear likely that succour will be called for before the end of next month.

5. The variations in the price of rice shown by the circle reports seem to prove the necessity of measures being taken at the time of opening relief works or ensuring a sufficient supply of grain in some of the distressed areas. Means of communications are so scanty in Chhabiskud and some of the sea coast parganas, that a departure from the ordinary course appears to be justifiable. The Collector of Puri, whom I met at Pipli on the 2nd instant, tells me that such a departure has already been made in Parikud and Malud portions of the district, which have suffered worse than any, and which are least accessible to ordinary traders.

(Enclosure to Cuttack Collector's No. 697*G.*, dated the 8th March 1897.)

CUTTACK COLLECTORATE;
The 9th March 1897.

W. B. THOMSON,
For *Collector.*

RESOLUTION ON THE SURVEY AND SETTLEMENT REPORTS FOR THE YEAR ENDING 30TH SEPTEMBER 1896.

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 18th March 1897.

RESOLUTION—No. 1207.

READ—

Letter No. 85A., dated the 16th January 1897, from the Board of Revenue, submitting the reports of the Director of the Department of Land Records and Agriculture on Settlements and Land Records, and the Superintendent of Settlement-Surveys on Surveys, in Bengal, for the year ending the 30th September 1896.

The reports.

The report of the Director of Land Records was submitted to the Board of Revenue with commendable punctuality by the Officiating Director, Mr. Lyon, two days only after the due date, that is, on the 17th instead of on the 15th December, while that of the Superintendent of Settlement-Surveys was not received till the 30th December (15 days after time), and then without maps. The delay in submission is attributed by the Superintendent to inaccuracies requiring further reference. Both the reports give a full and complete account of the operations conducted during the year.

Charge and inspection.

2. Colonel W. H. Wilkins officiated as Director of Surveys in Bengal up to the 19th October 1895, on which date Captain R. T. Crichton, I.S C., took charge, and continued as Superintendent of Settlement-Surveys throughout the rest of the year. He was absent from head-quarters on tour for 147 days in the year. Mr. W. C. Macpherson, I.C.S., was in charge of the office of Director of Land Records and Agriculture up to the 22nd February 1896, when he went on furlough, and Mr. P. C. Lyon, I.C.S., acted for him for the remainder of the year. Mr. Macpherson spent 47 and Mr. Lyon 111 days on tour. Mr. Macpherson was detained in Calcutta for some time during the cold weather in connection with an Agricultural Conference. Mr. Lyon was on tour during every month from March to September, except May, and visited every settlement of importance under his charge.

General results of 1895-96.

3. In view of the necessity of expediting the completion of the settlement of Orissa, and of the heavy demand for officers entailed by the rapid pace at which survey and settlement work was being carried on in Bihar, Sir Alexander Mackenzie decided to employ only two survey parties instead of four in North Bihar, and thus to reduce the programme area of survey and initial record-writing from 2,000 square miles to 1,000. The outturn of survey work during the year ending 30th September 1896 was (1) traverse survey, 2,131 square miles, (2) skeleton boundary survey, 187 square miles; (3) cadastral survey, 2,429 square miles; (4) record-writing, 2,478 square miles. The Lieutenant-Governor notices with pleasure that the whole of the survey programme of the season was completed. Settlement work under the control of the Director of Land Records was in progress in the following areas:—(1) for revision of land revenue in temporarily-settled estates and Government estates, 8,741 square miles; (2) for survey and record of rights in private estates other than wards' estates,

inclusive of Bihar, 9,580 square miles; and (3) for survey and records of rights in wards' estates, 821 square miles,—making a grand total of 19,142 square miles, as compared with 18,445 square miles in the preceding year. The following statement shows the general outturn and cost of survey-settlement work during the year under report and during the preceding three years:—

Year.	Traverse survey.	Skeleton boundary survey.	Topographical survey.	Cadastral survey.	Record-writing.	Cost of survey.	Cost of settlement.	Total cost.
1	2	3	4	5	6	7	8	9

1893-94	3,485	175	.. ....	3,754	3,637	6,90,125	5,53,228	12,43,3 3
1894-95	3,091	23	1,026	2,786	3,120	6,04,304	6,97,135	13,01,439
1895-96	2,131	187	.....	2,429	2,478	4,29,091	10,00,017	14,29,108
Total .	14,031	1,632	1,026	12,047	12,165	25,11,829	27,51,341	52,63,170

The Superintendent of Settlement-Surveys has explained in detail the reasons for the variation in cost rates of the survey operations of this year in different districts and for the same district in successive years.

4. The following table shows the survey work done in each district in Bihar season by season from the commencement of the operations in 1891:—

Bihar Survey.

		Traverse Survey.		Cadastral Survey.		Record-writing.		Total cost of cadastral survey and record-writing.	Cost rate per square mile.			Cost of survey and record-writing per acre.	Expenditure on settlement.

(* Including Saran.)

† Includes 28 square miles of Majhauli Ward's Estate, and excludes 11 square miles of river areas actually surveyed, but which, owing to the midstream boundary belong to the North-Western Provinces.

The statement given below shows the total survey work done up to the 30th September 1896, and remaining to be done on that date in each district:—

District.	Total area of district.	Areas completed.			Areas remaining.		
		Traverse survey	Cadastral survey.	Record-writing.	Traverse survey.	Cadastral survey.	Record-writing.
1	2	3	4	5	6	7	8
Muzaffarpur ..	3,070	3,059	3,062	3,063	Nil	Nil	Nil
Champaran ...	3,575	3,298	3,280	3,280	Nil(a)	Nil(a)	Nil(a)
Saran	2,622	2,394	1,194	1,194	228	1,428	1,428
Darbhanga ...	3,233	1,697	16	16	1,536	3,217	3,217
Total ...	12,500	10,448	7,552	7,553	1,764	4,645	4,645

(a) The jungly area, approximately 290 square miles, to the north of the district is not for survey.

The Superintendent reports that, as in previous years, the voluntary attendance of the raiyats was indifferent, but he attributes this in the majority of cases to the action of the petty landlords, who, according to Captain Crichton, endeavoured to keep the raiyats from coming forward to claim possession of lands to which these petty maliks prefer fraudulent claims themselves. Once the raiyats were induced to attend, they took a keen interest in the proceedings and were anxious to obtain their *parchas*.

The survey operations in the Muzaffarpur and Champaran districts have now been completed, with the exception of an approximate area of 290 square miles in the north of the latter district, which has been excluded from the survey operations. The total expenditure from 1891-92 in these two districts has been as follows:—

	Traverse survey.	Cadastral.	Record-writing.	Other heads.	City survey.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Muzaffarpur ...	92,441	2,02,865	2,63,678	2,094	4,060	5,65,138
Champaran ...	1,11,230	2,18,043	1,75,521	3,079	160	5,04,633

The cost rate of the entire operations per square mile is shown in the statement below:—

District.	Traverse, including stone embedding.	Cadastral survey, khanapuri, completion of records, &c.	Total cost per acre.
	Rs.	Rs.	
Muzaffarpur	30·21	152·33	4½ annas.
Champaran	33·72	118·76	4 annas nearly.

In the Saran district there were 52 square miles traversed, leaving 228 square miles remaining, or 240, including 12 square miles in the Gandak diara, and 645 square miles were cadastrally surveyed, leaving 1,425 square miles still to be done. In the Darbhanga district 1,179 square miles were traversed and 16 square miles were cadastrally surveyed during the year. Of the 1,536 square miles still left for traverse survey, about 640 were surveyed by Mr. Finucane, I.C.S., in 1878-79, but the records then made have not been kept corrected up to date. The Darbhanga Raj, however, has asked for a complete resurvey

of all these villages; and the Director, in anticipation of the Board's orders, requested the Superintendent of Settlement-Surveys to arrange for the traverse of all the Darbhanga Raj villages in areas not dealt with during the present survey operations, and to prepare new maps for all villages in which Mr. Finucane's maps have not up to date been revised. The Board have submitted a report to Government regarding these proposals, which have been approved.

Bihar Settlement.

5. The following statement shows the work done in each district from the commencement of the settlement proceedings:—

		Attestation.				Draft Records published.	Settlement of fair rents under section 104.			Cases under section 105.		Cases under section 106.		Final Records published.

Muzaffarpur.

6. Mr. P. C. Lyon was in charge of the operations in Muzaffarpur up to the 15th February, and Mr. C. J. Stevenson-Moore from that date to the 7th July. After Mr. Stevenson-Moore's departure on special leave, Mr. R. B. Hughes, the Assistant Settlement Officer, was in charge. Mr. Hughes corresponded directly with the Director. The Director has brought to notice that the bulk of the work of direction and supervision fell upon this officer. In all, 21 Settlement and Assistant Settlement Officers were deputed for various periods during the year. The programme of the year was the supervision of record-writing and disposal of boundary disputes in an area of 445 square miles, the attestation of the records of 1,664 villages, covering an area of 1,341 square miles, the disposal of petitions, the completion of the records after the disposal of case work, and the initiation of proceedings for the computation and recovery of costs. The progress made during the year was satisfactory. All the boundary disputes which arose and nearly 8,000 of the 22,000 disputes entered by the amins on their dispute lists, were disposed of. The survey and initial record-writing were completed, and attestation will be finished in the present season. It is satisfactory that 1,633 villages out of 1,649 taken up were attested, and the Lieutenant-Governor is pleased to notice the success with which this heavy work was accomplished. These villages covered an area of 1,319 square miles, and included more than two million plots and over four hundred thousand holdings. The records of all villages attested in previous years, and of 1,460, out of the 1,633 attested during the year under report, were published in draft, and 1,161 records were finally published in the course of the year. There were 2,307 applications made under section 104 of the Tenancy Act for the settlement of fair rents, and 1,859 of these were disposed of. The rents of 3,862 tenants

were settled, their rents being raised from Rs. 29,276 to Rs. 31,826, giving an increase of 8·7 per cent. on the previous rentals of these particular tenants. This enhancement was due to the assessment of new cultivation. There were 4,128 objections under section 105 pending at the close of the year, but it is reported that they are being actively disposed of. It is also stated that special officers are now engaged to deal with the arrears of cases under section 106. The general principles of computation and recovery of the costs of the survey and record of rights were approved by the Board and by Government in the course of the year, and the Lieutenant-Governor notices with much pleasure the satisfactory results of the beginnings made in the recovery of costs in this district. He agrees with the Director that the promptitude with which the landlords and raiyats have paid the sums due from them is evidence that they attach value to the extracts relating to their estates and holdings that have been furnished to them. Out of Rs. 21,443 due from landlords, Rs. 17,766 were paid voluntarily and Rs. 1,548 were realised by certificates, leaving a balance of Rs. 2,129; while out of Rs. 15,062 due from tenants, Rs. 14,654 were paid voluntarily and only Rs. 84 were realised by certificates, leaving a balance of Rs. 324 outstanding at the close of the year. As regards the realization of the cost, the settlement officer writes :—

"The procedure is simple: convenient centres are chosen, and notices are served in all the surrounding villages fixing days for their attendance; at the same time a schedule is sent to each village, setting forth the amount due from every payee in it. When the Assistant Settlement Officer goes to the centre, he erects a bamboo enclosure and site in the middle of it surrounded by his tahsildars, who collect the money, give the receipts and the certified copies of the khatians. At the close of each day they hand in their money and accounts to the cashier, who counts the money and deposits it in the treasure chest that night, and writes up his account next day.

Babu Siva Sanker Singh had collected in the thanas of Hajipur and Mahuwa, by the end of May, almost entirely without the adoption of coercive measures, Rs. 31,802-8-9 out of a demand of Rs. 36,504-10-11. He thus left a balance of Rs. 4,702-2-2 to be collected from head-quarters, and Babu Rai Krishna Bahadur, the Assistant Settlement Officer at head-quarters, was vested with powers under the Certificate Act for the purpose. The balance at the end of the year is Rs. 2,453-13-2, or rather more than 7 per cent. of the total demand. We have thus succeeded in collecting more than the 85 per cent. mentioned in my letter to Director of Land Records and Agriculture, No. 84B of 5th July 1896. The principal difficulty has been to obtain payments from the numerous petty maliks whose shares are often not more than a few annas. They show the same apathy in payment to us as they do in payment of Road and Public Works cesses in the Collectorate. On the other hand, no difficulty has been found in obtaining payment of the occupier's share, only Rs. 109-3-6 in Hajipur and Rs. 215-4 in Mahuwa being still outstanding. The smallness of the arrears afford a most striking proof of the popularity of the record. Other proofs are not wanting. The Subdivisional Magistrate of Hajipur has informed Mr. Hughes that the certified copies of the record which have been thus distributed are frequently filed before him, and Mr. Hughes has himself received several complaints from raiyats that, though the raiyats of neighbouring villages had obtained their khatians, they had not been so fortunate. Several enquiries have been made at head-quarters lately also, by proprietors and others, as to whether their certified copies were obtainable at head-quarters on payment."

It appears that rent rates rule high, but His Honour agrees with the Director and the Board that the full discussion of them must be postponed until complete figures for each thana are available. On the question of the rates in this district, the Settlement Officer observes :—

"Turning to the rates of rent, we find, as might be expected, that the rent of raiyats at fixed rates is lowest, viz., Rs. 3-8, including the rent of cultivated and uncultivated land. Next come occupancy raiyats with a rent rate of Rs. 4-3-2 for all lands held by them. Non-occupancy raiyats pay at the rate of Rs. 5-1-3, and under-raiyats a still higher rent of Rs. 5-3-11."

Whatever may be the cause, there can be no question of the fact that these, all-round rates are very high.

As the Board, in their letter to Government, have stated, the crop statistics are manifestly incorrect, for it is clearly impossible that 454,114 acres, or 32 per cent. of the cultivated area of the district, should be sown with indigo. A tenth of that area would probably be nearer the truth. The Settlement Officer has accepted these figures, and the officiating Director has passed them without question. In the report on the indigo crops for the year 1896 the average of the current and preceding year's crops is shown as 65,500 acres. The Lieutenant-Governor would draw the Director's special attention to these discrepant figures,

and request him to submit an explanation of them. The Board remark that the entry of 68 acres under coffee is probably a mistake; but the Settlement Officer states it is said to be cultivated in Muhammadan villages entirely for home consumption. Rice is shown as occupying 40 per cent. of the cropped area, and after rice and indigo, "other food-grains" come next, followed by marua and maize. It is worthy of note that out of a total area of 3,035 square miles there are, excluding current fallow and mango groves, only 141 square miles available for fresh cultivation. On the effect of partitions in running up rents, the Settlement Officer remarks:—

"Four statements were submited—the first containing extracts from the village notes written by 14 different Assistant Settlement Officers at the time of attestation; the second a statement showing the rent rates obtaining in estates which had undergone *butwara*; the third was a comparative statement for estates surveyed *jinali* in 1885 by Mr. Collin, and now revised after partitions had been given effect to; while the fourth showed for certain estates which are pending partition in the Muzaffarpur Butwara office, and the records of which had been prepared *jinali* by us, comparative figures of areas held by proprietors and raiyats, and of raiyat's rent as entered in the landlord's *jamabandi* filed in the batwara office, as found by the Deputy Collector's rate statement and as attested.

"Commenting on these four statements, the conclusion was irresistible that batwaras are the cause of very considerable enhancements of rent, and of dispossession of raiyats of their lands to some extent. From the information derived from the village notes, it appears that, after batwara, enhancements varying from 2 annas in the rupee to more than double the former rates invariably take place. At the same time the rates in estates in which batwara had taken place were found to be 3 to 22 per cent. higher than the total rates for 50 villages taken at random in each thana"

From the beginning of the operations only 17 appeals were preferred to the Special Judge against the decisions of Settlement Officers in settling rents. In 11 their decisions were upheld, in four reversed, and in two modified.

Champaran.

7. Mr. P. C. Lyon was in charge in this district and of Saran till 7th November; Mr. E. G. Colvin from that date till 8th March, when Mr. C. J. Stevenson-Moore became Settlement Officer of these districts as well as of Muzaffarpur. As in Muzaffarpur, after Mr. Stevenson-Moore's departure on special leave, the Assistant in charge corresponded directly with the Director. Eighteen Settlement and Assistant Settlement Officers were employed in the Champaran district for various periods during the year. The programme was similar to that in Muzaffarpur, but it is noted that the attestation work was simpler and the settlement of fair rents more onerous than in the former district. The survey and initial record-writing have been completed. There were 513 boundary disputes dealt with during the year. The records of 1,075 villages covering 1,162 square miles and containing over 1,300,000 plots were attested. The following statement shows the amount of work done in the settlement of fair rents from the beginning of operations according to the area attested in each year:—

Year	Number of tenants for whom fair rents were settled.	Former rental.	Fair rent settled	Enhancement.	Percentage of enhancement
1	2	3	4	5	6
		Rs.	Rs.	Rs.	
1893-94	22,151	1,44,556	1,62,636	18,080	12·50
1894-95	12,850	1,09,276	1,20,028	10,752	9·83
1895 96	34,633	3,69,366	3,98,762	29,396	7·9
Total ...	69,634	6,23,198	6,81,426	58,228	9 3

The Director states that practically the whole of the enhancement was due to the assessment of new cultivation, and was obtained by compromise. All such compromises were, it is said, carefully scrutinised by the Assistant Settlement Officers before being decreed. The work of publication of the records

was delayed on account of the large number of applications for the settlement of fair rents; 632 records were published in draft, and 372 finally, in the course of the year. Disposal of objections and cases under sections 105 and 106 was also delayed with the delay in draft publication: 3,971 objections and 322 disputes were dealt with during the year out of 4,829 and 401 for disposal. Owing to the necessity for adjusting the accounts of the season 1892-93, when advances were made by landlords to patwaris then working as amins, it was only possible to recover costs from raiyats, and not from landlords, during the year under report. It is satisfactory to find that the raiyats paid Rs. 36,452 voluntarily out of a total demand made from them of Rs. 38,125. The Lieutenant-Governor is pleased to learn that Mr. J. J. Macleod, C.I.E., has undertaken to bear the whole of the tenants' share of the costs in his villages. His Honour refrains from commenting on the statistics of status and rents of tenants until more complete figures are available. Statistics under these heads have so far been compiled for 931 villages, and crop statistics for 1,439 villages. Of the total cropped area in these villages, 49 per cent. is under rice. It is a remarkable fact that it is only in Champaran, where the raiyats are poorer and occupancy rights less widespread than elsewhere, that it is found that the tenants' lands are passing into the hands of money-lenders to any appreciable extent. In this district no less than nearly 9 per cent of the tenants' holdings have been sold or mortgaged within the last 10 years, 40 per cent. of the transferees being money-lenders, while in Muzaffarpur only a very small percentage of the holdings was transferred by sale in the same period, and the transferees were for the most part raiyats.

Saran.

8. Six Assistant Settlement Officers were employed in this district for various periods during the year. The Director remarks that through neglect of the scheme of work prepared by the Superintendent of Settlement-Surveys, only slight progress was made in initial record-writing until the season was far advanced, and the work had to be hurried at the end. In all 1,235 villages, covering 668 square miles, were dealt with, and all the boundary disputes instituted (765 in number) were disposed of. The draft records of 867 villages were published, but there was no final publication of the records of the villages attested in 1894-95. The rents of 21,729 tenants were settled, giving an increase of rent from Rs. 2,25,414 to Rs. 2,54,415, or 12·86 per cent. Practically the whole of this enhancement was, it is reported, due to assessment of new cultivation, and was obtained by compromise. The large number of objections under section 105 instituted by the Hatwa Raj is an unsatisfactory feature of the year's proceedings; three-fourths of those objections were rejected, and the Officiating Director states that many of them were patently frivolous. Now that these estates are under the management of the Court of Wards, it may be hoped that these frivolous objections will cease to be made. There were in all 9,487 such cases filed during the year; 7,143 were dealt with and 2,748 were pending at the close of the year. Apparently 176 appeals have been preferred to the Special Judge against the Settlement Officer's decisions, but none of them has been yet disposed of. The statistics of status and rents of raiyats, and of cultivation and crops, are not yet sufficiently advanced for any definite conclusions to be drawn from them.

Expenditure.

9. The expenditure on the operations in North Bihar was as follows:—

	Survey.		Settlement.		Total.	
	During the year.	To end of September 1896.	During the year.	To end of September 1896.	During the year.	To end of September 1896.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Muzaffarpur (a) ...	1,02,317	5,65,138	1,80,037	3,66,477	2,82,374	9,31,615
Champaran	1,32,541	5,04,833	1,21,103	2,48,016	2,53,643	7,52,949
Saran	97,130	2,59,021	62,135	98,595	1,59,265	3,57,616
Paibhanga	29,022	45,302	.....	...	29,022	45,302
Total ...	3,61,010	13,73,354	3,63,294	7,13,958	7,24,304	20,87,312

(a) Including the cost of survey of Muzaffarpur town and Hajipur Municipality.

The recoveries made in the Muzaffarpur and Champaran districts have been noted in former paragraphs.

10. In paragraph 16 of the Resolution on the Survey and Settlement Reports for 1894-95, Sir Charles Elliott recorded the opinion that the operations should be extended to South Bihar and into the Bhagalpur Division. Sir Alexander Mackenzie, in January 1896, requested the Board to consider this question and submit a special report after consulting the Director of Land Records, the Commissioners of the Patna and Bhagalpur Divisions, and the local officers. The reply of the Board has not yet been received, but the Officiating Director reports that the recommendation of the Department is that the proceedings should not at present be extended beyond that portion of Monghyr district that lies north of the Ganges

Orissa Settlement.

11. At the commencement of the year the settlement operations in Balasore were held as a distinct charge from those in Cuttack and Puri; but with effect from 1st February 1896, Mr. S. L. Maddox was appointed Settlement Officer of Orissa, with Mr. J. E. Webster, Mr. D. H. Kingsford and Mr. W. B. Thomson as Assistant Settlement Officers in charge, respectively, of Cuttack, Puri and Balasore. The programme for the year in Orissa included (1) the revision of the maps and records of the Khurda settlement of 1875-76, (2) the settlement of boundary disputes, (3) attestation and re-attestation work, and (4) the settlement of rents.

(1) The whole work of revision of the Khurda survey and settlement records was completed, the records of 1,342 villages, covering 913 square miles, being dealt with. The records will be attested and rents settled in the course of the present year.

(2) There were 64 pending boundary disputes and 205 were instituted during the year, all being concerned with the Balasore district. Two hundred and ten cases were disposed of, and in five out of seven appeals decided, the Revenue Officer's decision was upheld.

(3) Nineteen officers in all were employed in attestation work during the year. The following statement shows the progress made under this head:—

1		Outturn in 1895-96.			Balance at close of 1895-96.	
		2	3	4	5	6
		Villages.	Plots.	Area.	Villages.	Area.
Cuttack		1,028	1,022,935	495·2	19	4·71
Balasore		686	232,765	235·84	.....	.....
Puri ...	Ekrajat	78	28,543	75·99	40	14·96
	Khurda	48	22,938	18·01	1,294	895·46

The Director states that all the arrears will be disposed of during the present season, the attestation in Khurda being done together with the settlement of rents. Re-attestation forms a large item of work which must be done before rents can be settled; and although the Director cannot give exact figures, he is of opinion that 11 lakhs of plots in Puri and 9 lakhs in Cuttack will require to be re-attested. During the year under report this work was completed for 861 villages containing over 650,000 plots. In future an effort will be made to complete re-attestation in the camps of officers deputed to settle rents, and rules for the procedure to be adopted have been drawn up by Mr. Maddox.

(4) The settlement of rents constitutes the bulk of the work now remaining to be done before revenue can be assessed. On this subject the Officiating Director remarks as follows:—

"Mr. Stevens and I left Calcutta on the morning of the 14th March, and returned on the 2nd April, after visiting Cuttack, Khurda, Bhadrak and Balasore. During our stay

in Orissa a series of draft rules were framed, based mainly on the suggestions made by Mr. Finucane in his note of December 1893, on Mr. Nathan's proposals for the Kotdesh pargana. This note had also formed the basis of Mr. Maddox's work in Balasore, which was followed to a great extent in the draft rules. The main principles on which they were drawn up have been thus summarised by Government:—

(*a*) That in the case of the *pahi* raiyats of Orissa (whose rents the zamindars were empowered to enhance, and did enhance during the past 60 years), the existing rents should be taken as fair rents, unless applications be made by the zamindar for enhancement or by the raiyats for reduction.

(*b*) That in the case of *thani* raiyats, whose rents have not been altered during the term of the last settlement, rents should be proposed to them which would be somewhat lower than the competition rents paid by *pahi* raiyats; that the rents so proposed, if accepted by the raiyats, should be recorded as the fair rents with their consent; and that, if the rents proposed be not accepted, then the fair rents should be settled in accordance with the provisions of Chapter X of the Tenancy Act, following the Civil Procedure Code and Tenancy Act Rules, enhancements being mainly based on the great rise in prices that has taken place since the existing rents were fixed 60 years ago.

(*c*) That in the case of *basiaftidars* and similar privileged tenants, rent should be proposed in a similar manner, which would be somewhat lower than those fixed for non-privileged tenants, and be, if accepted, recorded as fair. If not accepted, rents are to be settled strictly in accordance with the procedure laid down in Chapter X of the Tenancy Act and the Government rules made under it."

* * * * * * * *

"The results of the work done up to the close of the year have been fully analysed in the instructive statistical statements that have been submitted by the Settlement Officer with his report. The progress made may be summarised as follows:—

Number of villages in which rents have been settled	...	1,410
,, of tenants for whom ,, ,, ...	...	177,188
,, of ,, whose existing rents have been settled as the fair-rents	...	91,808
,, of ,, newly assessed	...	8,131
,, of ,, whose rents have been enhanced for excess area	...	29,519
,, of ,, whose rents have been reduced for decrease in area	...	3,842
,, of ,, whose rents have been enhanced for other reasons	...	43,888
,, of new rentals accepted by the tenants ...	...	16,323
,, of ,, contested ,, ..	...	865"

"It was only in two circles that there was any opposition to our procedure, and in one of these the tenants were notorious litigants, who had for long been on bad terms with their landlord. But in both these circles the opposition soon quieted down when our methods of settlement began to be understood. The statistics showing the amount of enhancement in the case of each class of tenant do not show the working of our present rules quite accurately, as some of the work was done under Mr. Maddox's original scheme, and some classes have been affected by recent modifications in the rules."

The operation of the rules led to an enhancement of not less than 12 or more than 20 per cent.

Since the close of the year Sir Alexander Mackenzie, accompanied by the Senior Member of the Board of Revenue and the Director, Mr. Macpherson, has visited Orissa, and, after holding a conference with the local officers, His Honour made some modifications in the details of the rules based on the principles described by the Officiating Director.

Maintenance of records.

12. The question of the maintenance of the records of rights in Orissa is now under the consideration of the Lieutenant-Governor. The Board have addressed Government on the subject very recently, submitting a scheme prepared by Mr. Maddox,

which follows the lines approved by the Conference which assembled in Calcutta in December 1893. Mr. Lyon, in his letter forwarding the scheme to the Board, questioned whether the very heavy expenditure to be incurred in keeping up the records would be attended by such corresponding advantages as to justify it. The Board consulted Mr. Macpherson, who stated as his opinion that "it is right that rent-rolls should be continuously maintained in village offices as an education to the people and as a protection of the weak against the strong." The Board have also forwarded the notes containing the views held by Mr. Toynbee and Mr. Stevenson, who were consulted by them. The Hon'ble Mr. Stevens, Senior Member of the Board, "is inclined to question whether commensurate results, as regards either the maintenance of the record or the general assistance in the executive administration, will be found to justify the very heavy additional expenditure. To have short periods of settlement, and to correct the records on the expiry of each of these periods, would certainly be simpler and less harassing to the people, and it does not seem probable that the changes in the meanwhile would be so great as to make it difficult to trace them."

Sir Alexander Mackenzie is disposed to think that the advantages of keeping the records corrected from year to year will more than counterbalance the expense, and he will now submit the scheme for the consideration and orders of the Government of India, together with proposals relating to the percentage of the assets to be taken as revenue and the period of settlement.

Expenditure.

13. The expenditure incurred on settlement operations in Orissa during the year amounted to Rs. 90,099 in Balasore and Rs. 2,19,863 in Cuttack and Puri, making a total of Rs. 3,09,962, as against Rs. 1,93,409 (revised figures) in the preceding year. The amount expended on the survey settlement operations in Orissa, from the commencement of proceedings up to 30th September 1896, has been Rs. 10,35,294 on survey and Rs. 11,11,674 on settlement, giving a total of Rs. 21,46,968.

Chittagong.

14. Mr. C. G. H. Allen took over charge of the post of Settlement Officer in November 1895, and remained in charge for the rest of the year. Steady progress was made in the work of assessment, and the subsidiary work of publication of records, hearing of objections and trial of disputes were also carried on. The whole area of the district is 2,492 square miles, of which 1,910 square miles, containing 1,039 villages, are under settlement. Of these villages, assessment has now been completed for 695, and the draft records of 610 and the final records of 507 villages have been published. During the year 4,017 objections and 37 disputes were dealt with. Assessment of the rents of 106,719 tenants had been made in preceding years, and that of 71,067 tenants was made during the year under report. Existing rates of rent have been maintained, unless proved to be collusively unfair. Rents of raiyats have been increased as a rule on account of excess area only. The rents of talukdars and ijaradars have been so determined as to leave them 30 per cent. of the assets. Mr. Allen states that there have been practically no appeals to the Special Judge on the ground of excessive enhancements. The general result has been to raise the Government revenue by Rs. 1,40,342, representing an increase of 47 per cent. on the previous revenue of Rs. 2,98,378. If this rate be maintained in the remaining assessments, the total enhancements due to resettlement may be expected to reach Rs. 1,81,000. Though the increase of revenue is large, the Director states that he has learned that the new revenue is being collected without opposition or difficulty, than which there can be no better proof of the moderation of the assessment. The whole validity of the settlement proceedings was contested in the Rajakul case. The Special Judge found for Government on all points, and it appears that no appeal has yet been made against this decision. Having regard to the great complications of tenures in Chittagong, and consequent difficulty of making a workable settlement, the results, though necessarily expensive, appear to the Lieutenant-Governor to be very satisfactory.

15. The following statement shows in a convenient form the progress of work in the Chittagong district up to the close of the year 1895-96 :—

	Record-writing.		Attestation.				Mahal milan.	Settlement of fair rents.			
	Khasra-writing in the field; number of villages.	Khatian-writing and completion of records in office; number of villages.	Villages.	Square miles.	Tenants.	Plots.	Number of villages.	Number of tenants.	Former rental.	New rental.	Percentage of increase.

* The total number of villages in which records were finally published previous to 1895-96 is stated in the present report to be 255.

Palamau Government estate.

16. In accordance with the orders of Government such portions of the external boundaries of the *khalsa mauzas* of the Palamau Government estate as had not been surveyed in previous seasons were traversed during the year. The Lieutenant-Governor agrees with the Board that the Commissioner should notice every year in his Land Revenue Administration Report that the six feet clearing along the old revenue survey boundaries has been attended to. There were 141 square miles traversed in the course of the year. The assessment has been conducted under the provisions of Act VIII (B.C.) of 1879. The settlement work of the year consisted of the assessment of the new revenue. The general result is to fix a rental of Rs. 74,433, giving an enhancement of Rs. 17,767 or 31·35 per cent. over the attested existing rental, and of Rs. 33,591 or 82 per cent. over the rental of the last settlement. The Lieutenant-Governor, in approving the rate report, directed that the assessment should be applied with moderation, and that the tenants should be treated with consideration and

leniency. This settlement has been made for 15 years, and it has been decided to abandon the old thikadari system and to hold the estate khas. An additional assessment of Rs. 3,444 has been made on *mohua* trees, and a temporary settlement for one year of Rs. 10,440 on *palas* and *kusum* trees.

Darjeeling Terai.

17. The 946 estates or jotes for resettlement in the Darjeeling Terai were surveyed in 1894-95. During the year under report the records were attested, and a rate report was submitted to Government, which has been approved by the Lieutenant-Governor since the close of the year. The proposals involve an increase of 25 per cent. on the revenue.

Kolhan estate, Singhbhum.

18. The traverse survey only of this estate is being conducted by the Superintendent of Settlement-Surveys, the cadastral survey being undertaken by the Settlement Officer, Mr. Craven. The entire area was originally estimated to be about 1,423 square miles, but this is reported by the Superintendent to be incorrect, as 1,175 square miles were traversed in 1894-95, and the work was completed this year by the traversing of 229 square miles. The true area cannot be ascertained, however, till the detail survey has been completed. The total expenditure in 1894-95 was Rs. 35,954, and during the year under report Rs. 11,253. The cost rate for the year (Rs. 43·8 per square mile) was not excessive, considering the smallness of the programme and difficult country. As the settlement is not under the Director of Land Records, no mention is made of it in his report. In paragraph 26 of the Resolution on the Survey and Settlement Reports for 1894-95, Sir Charles Elliott, however, desired that the Director should give a short paragraph, stating the history of the work done during the year.

Private estates other than those of North Bihar.

Tippera.

19. The estates of the Maharaja of Hill Tippera, in Tippera and Noakhali, cover an area of 555 square miles, and are contained in 1,511 villages. Mr. J. G. Cumming was Settlement Officer during the year, and he was assisted by five Assistant Settlement Officers. Six boundary disputes were disposed of. No appeal has yet been lodged against the decision in any boundary dispute decided in the course of this settlement. The records for 535 villages were attested, in 112 villages the records were wholly draft published, and in 118 the raiyats' khatians only, while the records of 97 villages were finally published. The rents of 1,694 raiyats and 190 tenure-holders were settled, resulting in an enhancement of raiyats' rents from Rs. 18,576 to Rs. 22,813, and of tenure-holders' rents from Rs. 3,150 to Rs. 5,716. The average outturn of attestation was 12,542 plots for each officer per mensem. The Director considers that this is fair progress having regard to the obstructive and litigious character of the tenantry. Applications were put in by the Raj for enhancement of rents in 42 per cent. of the villages held khas, with the results that the rents of these raiyats were raised by 22 per cent. The enhancements were made chiefly on the ground of excess area, but also on the general ground of a rise in the price of food-grains. The Lieutenant-Governor agrees with the Officiating Director in regretting that no progress could be made by the Special Judge in the decision of the appeals that have been made to him, and with the Settlement Officer's contention that there is no hope of the parties coming to terms until the Special Judge has decided two or three important issues which are similar in nearly all the cases. The delay in disposing of the appeals is the more to be regretted, in that the enhancements being heavy, it is very desirable that it should be decided by the Appellate Court as soon as possible whether they are justified by law. The statistics tabulated show that out of 80,000 tenants over 70,000 are settled or occupancy raiyats paying an average rent of Rs. 3-11-2 per acre.

Tikari estate and Government estates in Gaya.

20. The survey and record-writing of the Tikari ward's estate were completed during the year under report. The following statement shows the area surveyed and the cost year by year since the commencement of proceedings in 1892-93:—

Year.	Area in square miles.					Cost.					
	New work 16″=1 mile.			Revision 32″=1 mile.		Traverse survey.	Cadastral survey.	Record-writing.	Boundary skeleton survey	City survey.	Total.
	Traverse survey.	Cadastral survey.	Record-writing.	Cadastral survey.	Record-writing.

Total ...	602	433	407	97	94	34,889	51,979	41,486	1,677	1,006	1,30,097

(a) Exclusive of 39 square miles not belonging to the estate, but situated among the scattered villages of the estate.
(b) Inclusive of Rs. 1,827 expended on training of local amins.
(c) Ditto 335 ditto arrears of previous season.

The cost of the survey per square mile was—(1) for traverse survey about Rs. 58; (2) for cadastral survey Rs. 98; and (3 for record-writing Rs. 82-12.

In Government estates in the Gaya district, traverse survey of 11 villages contained in 15 square miles, together with cadastral survey and record-writing of the same area, were accomplished during the year. The total survey cost was Rs 1,982. In the Balkhara mahal, which is partly the property of Government and partly of the Tikari ward, considerable trouble was caused during the record-writing by the agents of Mr. Salano, the present landlord. The work on boundary disputes was heavy. All the records and traces have been completed and sent to the Settlement Officer. The Director has considered the settlement work done in the Tikari estate and the Government estates together, as the same staff of officers was in charge. The attestation of 109 Government villages and 107 Tikari estate villages was finished. The Settlement Officer notices that the apathy of the tenants rendered the preliminary examination of the records difficult. The work was also complicated by the fact that in several villages owned by Government jointly with other landlords, while Government rent is paid in money, the other landlords receive their share in kind. In 12 villages of the Tikari estate applications for enhancement were made regarding 69 tenants, and the rent was enhanced by 4·1 per cent. The principles to be followed in settling rents in Government villages were determined during the year. It was decided that in addition to the enhancement in rent demandable on account of increase in area, Government should demand an enhancement of two annas in the rupee on the ground of a rise in the price of staple food-crops, discretion being given to the Settlement Officer to reduce this rate when it was found necessary. Rents were settled for 2,853 tenants in 88 villages, and were raised from Rs. 44,412 to Rs 48,423, giving an enhancement of 9 per cent. In 12 villages produce rents were commuted into cash rents. The records of 478 villages in the Tikari estate were finally published during the year, but draft publication in Government villages was postponed. The total expenditure on settlement during the year in the Gaya district was Rs. 24,852.

Smaller settlements.

21. The following statement shows the progress of operations and the cost incurred in the smaller surveys and settlements dealt with by the Superintendent of Settlement-

Surveys and by the Director of Land Records and Agriculture during the year:—

Estates.	Number of villages.	Area in square miles.	Survey.		Settlement.					Total cost of survey and settlement to end of the year.
			Traverse—During 1895-96.	Cadastral—During 1895-96.	Attestation: number of villages—		Settlement of fair rents to end of the year.

* Cost of settlement during 1895-96 included in Tikari and Balkhora.

Government estates.

22. *Pataspur.*—Progress of work was again delayed in this estate owing to the illness of the Settlement Officer in charge, and the Director does not think that the operations can be concluded before the end of April next. Record-writing and attestation had been completed in previous years and the settlement of fair rents was finished during the year. The draft records of 95 out of 96 villages were published before the close of the year. The rents of 10,124 tenants were settled and over 1,000 miscellaneous objections were dealt with. In 19 villages remissions of rent were given, while in the remaining 77 villages fair rents were settled resulting in an increase of nearly Rs 10,000 over a formal rental of Rs. 42,000, that is, an increase of about 23·75 per cent., of which 16·73 per cent is due to enhancements on account of excess area, and 7·02 to enhancements under other sections There has not been a single appeal against the decisions under section 104, Tenancy Act.

Jaipur Government Estates in Bogra.—The preparation and approval of a rate report was the only work done in connection with the settlement of these estates, the reason for the delay in completing this settlement being the incompetence of the late Settlement Officer, who has been removed and punished departmentally.

Estates in Backergunge.—Satisfactory progress was made in the settlement of these estates.

Estates in Shahabad.—Practically nothing was done in the work of settlement of these estates, owing, as in Bogra, to the incompetence of the Settlement Officer.

Private estates.

23. *Chaurasi Estates in the 24-Parganas.*—Here again the Director has had to notice unnecessary delay in various stages of the settlement operations Attestation and the settlement of rents have now been completed and the operations should be soon concluded.

Tantibunia Estate in Khulna.—The survey and initial record-writing were completed in 1894-95, and the records were completed and finally published during the year under report. The Director states that the final report will be submitted as soon as orders regarding the apportionment and realisation of costs have been received. The cost of the settlement proceedings during the year was Rs. 4,141.

No special remarks are required regarding the work in the other private estates in which settlement proceedings were in progress during the year 1895-96.

Wards' estates.

24. *Burdwan Raj khas mahals.*—This settlement has been completed, the expenditure during the year being Rs. 10,575, and the total cost of the settlement, exclusive of survey, from the beginning being Rs. 51,641. The Board state that they are now awaiting the final report.

Dakhin Shabazpur Estate.—The final report has been submitted by the Collector, and the Board are now awaiting the Director's review of the settlement. The total expenditure amounted to Rs. 99,480, including the cost of apportionment and recovery, of which Rs. 77,962 were recoverable under section 114, Tenancy Act. Of this amount Rs. 60,4.8 have been realized, and certificates have been issued for the balance.

Srirampur Estate.—This settlement is now concluded, and the final report is awaited by the Board.

Narhan Estate.—Sixty-two villages contained in an area of 58 square miles were traversed, 66 villages were cadastrally surveyed, covering an area of 53·75 square miles, and the initial record-writing of 60 villages was completed. Two villages were therefore unnecessarily traversed and six unnecessarily surveyed in detail. This was owing to the difficulty of ascertaining the villages in which the estate held an eight anna share or more, and to the defective character of the records supplied to the Survey Department. The expenditure was Rs. 2,322 for traverse, Rs. 8,196 for cadastral survey, and Rs. 5,397 for record-writing, or a total of Rs. 15,915. The rate was high, due to the small programme, detached work, and considerable difficulties and delays in ascertaining the true extent of the estate lands. Attestation will be carried on in the present season. Some boundary and other disputes were decided, and the cost to the Settlement Department was Rs. 2,144.

Maintenance of settlement records.

25. The question of the maintenance of the records in Orissa has been considered in a preceding paragraph. Act III (B.C.) of 1895 was brought into operation in the thanas of Hajipur in Muzaffarpur and Bettiah in Champaran, and the Sub-Registrars of these thanas have been appointed as Registrars of Mutations. The Act has also been extended to the Sujamutha portion of the Burdwan Raj Estate. It is premature to offer any opinion on the working of this Act. Half-yearly returns of mutations of tenant right in large Government and Wards' estates have been submitted to the Director, who has discussed these returns fully in his report.

26.—AMENDMENT OF THE TENANCY ACT.—On the subject of the amendment of the Tenancy Act the Officiating Director, Mr. Lyon, writes:—

"In consequence of the constant complaints received from Settlement Officers and others as to the difficulties found in working those provisions of the Bengal Tenancy Act which apply to settlement operations, Sir Charles Elliott drew up, before leaving India, a minute on the subject, suggesting certain reforms in procedure which would require a modification of the law. Mr Macpherson subsequently emphasised the difficulties under which work was being done in a letter to Government, No. 481S., dated 14th February 1896, in which he proposed that we should return to the provisions of Act VIII (B C.) of 1879 for the purposes of the settlement of Orissa. The whole subject was taken up at a Conference summoned by His Honour the Lieutenant-Governor at Belvedere on February 16th and 21st, 1896, at which the Members of the Board of Revenue, with the Secretary to the Board, the Revenue Secretary to the Government of Bengal, Mr. Macpherson, Mr. Maude, and myself were present. In accordance with the results of the discussions at that Conference, a note was subsequently submitted by me, in which I endeavoured to summarise the difficulties felt by the officers who were entrusted with the conduct of settlement operations in Bengal, and the Board of Revenue submitted a draft Bill to amend the settlement provisions of the Bengal Tenancy Act. His Honour the Lieutenant-Governor then prepared a minute dealing with the whole question, and forwarded it to the Government of India with proposals for

legislation. The orders of the Government of India, approving of legislation, subject to the sanction of Her Majesty's Secretary of State for India, and a copy of the Despatch in which that sanction has been solicited, have been received since the close of the year."

27. The Lieutenant-Governor desires to thank the Director, Mr. Macpherson, the Officiating Director, Mr. Lyon, and the Superintendent of Settlement-Surveys, Captain Crichton, for the zeal and enthusiasm they have displayed and for the excellent work which they have done during the year. Regarding the services of other officers and gentlemen the Officiating Director writes:—

Services of officers.

"The following Settlement and Assistant Settlement Officers rendered good service in the year under report:—Messrs. Allen, Colvin, Cumming, Gauntlett, Hughes, Kerr, Kingsford, Maddox, Roe, Stevenson-Moore, Thomson, and Webster, Mr. J. Taylor, Babu Sri Gopal Bhattacharya, Babu Haris Chandra Rai, Babu Prasanna Kumar Banerji, Babu Hara Krishna Mahanti, Babu Jogendra Narayan Mitra, Babu Durga Charan Ghose, Babu Giris Chandra Dutt, Babu Sasi Bhusan Dutt, Babu Siva Sunker Singh, Babu Bhupendra Nath Gupta, Babu Rai Krishna Bahadur, Pandit Rama Ballabh Misra, Maulvi Gholam Ghaus.

"It would be difficult for me to speak too highly of the admirable work that is being done by Mr. Maddox in Orissa. Mr. Stevenson-Moore has acquired a complete grasp of the needs of the settlement operations in North Bihar, and has submitted some admirable reports in connection with them in the course of the year. Mr. Cumming's thorough and careful work in Tippera is deserving of special notice, and Mr. Hughes has distinguished himself in Muzaffarpur by his indefatigable and intelligent supervision of a large staff of subordinates. Mr. Gauntlett in the supervision of khanapuri work in Saran, Mr. Kerr as Assistant Settlement Officer in charge in Motihari, Babu Prasanna Kumar Banerji in assessment work in Balasore, Babu Girish Chandra Dutt in his conduct of the operations in the Pataspur estate, Babu Siva Sanker Singh in recovery work in North Bihar, and Maulvi Gholam Ghaus in case-work in Saran, also rendered services of especial note.

"Mr. W. R. Bright continued to help the department with his careful supervision of settlement work in Midnapore, and Mr. Savage assisted us materially in Gaya. Captain Crichton, Superintendent of Settlement Surveys in Bengal, has, as in previous years, kept himself in touch with all the requirements of good record-writing, and has cordially co-operated with the Director of Land Records in all matters affecting his own department. Mr. E. Macnaghten has continued to give us valuable assistance as Secretary to the Bihar Indigo Planters' Association and has much facilitated the progress of the work."

His Honour also cordially endorses the praise bestowed by the Officiating Director on the officers mentioned in the extract above quoted, a copy of which will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Government of Bengal.

GENERAL DEPARTMENT,—(EMIGRATION).

NOTIFICATION—No. 1177.

The 23rd March 1897.—The following notification issued by the Government of India in the Department of Revenue and Agriculture is published in the *Calcutta Gazette* for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

No. $\frac{848}{7-9}$, dated Calcutta, the 16th March 1897.

NOTIFICATION—By the Government of India, Department of Revenue and Agriculture.

THE following draft of certain additions which it is proposed to make to the Rules under the Indian Emigration Act (XXI of 1883) is published, as required by section 81 of the said Act, for the information of persons likely to be affected thereby, and notice is hereby given that the draft will be taken into consideration by the Governor-General in Council on or after the 17th April 1897.

2. Any objection or suggestion which may be received from any person with respect to the draft before that date will be considered by the Governor-General in Council.

Draft of proposed additions.

(1) In the test prescribed for lime-juice in Rule 178A., Chapter V, Section III (added to the original rules by Notification No. 170, dated 1st February 1896), for the words in the *Note*—

"A darkening indicates lead or copper,"

the following shall be substituted, namely—

"A darkening which disappears again almost immediately is due to iron, but a persistent darkening indicates the presence of lead or copper."

To paragraph 2 of the said *Note* the following shall be added, namely—

"As a confirmatory test the following process may be used:—

"Evaporate some of the juice to dryness and ignite; then dissolve the remaining ash in Nitric Acid and divide the solution into two portions. To one of these add a little Iodide of Potassium solution: a yellow precipitate indicates lead. To the other portion add Ferrocyanide of Potassium: a chocolate precipitate indicates copper, and a white precipitate lead."

FINANCIAL DEPARTMENT.

NOTIFICATION.

No. 1595Medl.—The 22nd March 1897.—The following papers are published for general information.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

NOTE ON THE ARRANGEMENTS IN CONNECTION WITH THE PLAGUE OBSERVATION CAMP AT KHANA JUNCTION, ON THE EAST INDIAN RAILWAY.

THE accompanying plan of the quarantine encampment will explain how it has been laid out.

It will be seen that it is divided into three portions, viz., (1) the Plague hospital; (2) the contact camp; and (3) the suspect camp.

The Plague camp consists of—

(*a*) Two structures, 45′×16″, which are the native Plague hospitals.
(*b*) Six rooms, 10′×10″ for the families of the patients, and
(*c*) Eight rooms, 8′×10″, for the hospital attendants.

There is also a small pucka house for European cases, and accommodation for mehters and domes with a separate clear water tank for their use.

A Horbury's iron latrine is provided, also Larymore's stool incinerator, and there is a pure water-supply from iron tanks. The water for these tanks is obtained from a pucka well, carefully covered in, by a lift and force pump, and is thence distributed to the tanks by iron pipes. Each tank is fitted with a brass turncock, and provided with a wash-out plug for purpose of cleaning and disinfection and a covered-in manhole. There is accommodation for 40 plague cases. The beds are of iron, and thus can be quickly disinfected with a paraffin torch. *Thalas* and *battis* made of iron (Jail pattern) have been supplied for feeding purposes, as they also can be quickly disinfected by heat.

In the contact camp there are 75 huts (68 completed to date), 10′×8″, for two persons. There is thus accommodation for 150 persons. This camp also is provided with a Horbury's latrine and an iron tank for water-supply. It is surrounded by barbed wire fencing.

The suspect camp—75 huts, 10′×8″, at two persons per hut—provides accommodation for 150 persons. The camp is provided with a Horbury's latrine, and a pucka well is being rapidly constructed. The camp is surrounded with a barbed wire fencing.

Quarters for the Hospital Assistants and other officers are in course of construction.

A new shop for the *bunniah* is being built between the suspect and contact camps.

All the huts in the contact and suspect camps are numbered for convenience of registration.

Inspection.—The inspecting staff consists of two medical officers of the Indian Medical Service and two lady doctors.
